GN4800

INCREASED PRODUCTIVITY BETWEEN DESK PHONES AND IP TELEPHONY.

The GN4800 is an innovative office headset that provides seamless integration between your PC and traditional telephone. Use it to create your personal workspace and be more productive – work hands-free, listen to streaming music and use the telephone – all with a single corded headset. It also provides a smooth migration path to IP telephony making it a valuable product for changing technology.

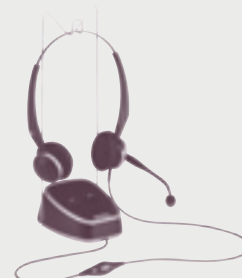

In today's open office environments, unwanted noise can decrease productivity. Not surprisingly, more and more employees are streaming music to block out the sounds of photocopiers, loud voices and other office annoyances. That means when a call comes in, people take off their headphones and pick up the handset, assuming they hear their telephone ring at all. The GN4800 solves all these problems by seamlessly integrating computer applications and telephony as well as providing the freedom of working hands free, all the time.

THE GN4800 IS AVAILABLE WITH TWO DIFFERENT HEADSETS

The GN4800 Hi-Fi provides high-fidelity stereo audio performance and has a noise-canceling microphone for crystal clear communications in noisy working environments. Also offered is the durable, dual-use GN4800 Wideband with true IP bandwidth (150-6800Hz) and solid stereo quality. Both GN4800 products have USB, plug 'n' play, connections and are Microsoft Windows® compliant.

GN4800 WIDEBAND

GN4800 HI-FI

FEATURES

- One headset for direct-connect desk phones, PC-based IP telephony, and PC-audio applications
- Increased productivity and job satisfaction in a noisy work environment
- One corded headset for streaming music and telephony
- Automatic switching functionality between desk phone and PC
- Choice between hi-fi stereo and wideband stereo quality headsets
- USB interface for PC-based IP telephony ensures future-proof investment
