requires full effort.

Sometimes it doesn't.

Lexmark

Product Guide 2006

SECOND EDITION

We make printing easy

LEXMARK™

Some people waste energy. Some people don't.

reduce

Energy consumption has highly damaging effects on the environment: firstly because it often draws on non-renewable resources and secondly, because the greenhouse emissions are directly responsible for global warming. It is up to everyone to do something about this, and much can be done. At Lexmark, we have managed to bring down our printers' energy consumption by 70% in the last decade.

On your side, you can do your part by activating the Power Saver Mode on your Lexmark printer. Thus, you win twice, you save energy and you save money.

re reduce recover reuse recycle

We make printing easy

LEXMARK™

Lexmark Environmental Programme

LEXMARK AND THE ENVIRONMENT, A WAY OF LIFE

Lexmark takes seriously its responsibility to the environment and the communities in which it operates. For Lexmark, environment protection is a continuing process that involves all of our suppliers, employees, major functions of the company – and ultimately our customers and the way they use and dispose of our products. Caring for the environment through complementary business practices has become a way of life. Protecting the environment is the major objective in Lexmark's manufacturing processes. This is clearly demonstrated by Lexmark's 4R Strategy: Reduce Recover Reuse Recycle and the successful Cartridge Collection Programme where customers can return their empty cartridges free of charge.

As a provider of printing solutions including inkjet, laser, all-in-one printers and related supplies, Lexmark shares in the environmental responsibility for our products. To learn more about our programmes, our collection methods and our recycling policy, connect to www.lexmark.com/recycle.

ENVIRONMENTAL PROGRAMMES

Equipment

Our shared responsibility for the environmentally sound management of our products is also demonstrated by the implementation of the European WEEE Directive (Waste Electrical & Electronic Equipment). Lexmark equipment is marked according to the requirements of this Directive and programmes are set up to ensure that the waste from our electrical and electronic equipment is collected separately from everyday household and usual waste streams for proper recycling.

Cartridges

In addition to our WEEE programmes, Lexmark also offers a complete cartridge collection programme. Lexmark offers multiple choices such as individual pick up with prepaid reply labels inserted in the cartridge boxes or bulk programmes for large business users via office and pallet size containers.

Once collected, all Lexmark cartridges are recovered for reuse or recycling according to the most stringent recycling practices: there is no landfill or incineration involved.

CITIZENSHIP

Our structured approach to environmental protection with regular auditing and long-term commitment has proved to be a credible measurement of Lexmark environmental actions. The company already had ISO 9002 certification, but in order to comply with the demands of its customers and to fulfil its own objectives, Lexmark has also obtained ISO 14001 certification for all its owned factories across the world. Lexmark is now justifiably proud of its record for waste and water management, and is especially pleased with its ability to integrate environmental issues into each operation, making it part of our everyday business. Today, Lexmark extends this approach to its major suppliers who are required to comply with legislation.

Lexmark E342n/tn

- Achieve higher performance at a lower cost. The affordable E342n reaches ultra-fast print speeds of up to 28 ppm.
- Benefit from trouble-free setup and configuration, plus automated network management tools to print longer with virtually no interruption.
- Manage your printer easily. The newly designed operator panel provides all the information you need in one glance.

Model E342tn

Print Technology
Monochrome Laser
Product Class
Desktop Small Workgroup
Print Speed
Up to 28 ppm in A4
Up to 30 ppm in Letter
Time to First Page
As fast as 7,5 seconds
Print Quality
Up to 1200 x 1200 dpi
2400 Image Quality
Processor
366 MHz
Memory
32 MB expandable to 160 MB

PAPER HANDLING

Paper Input	
Standard	250 sheets + 1 manual
Maximum	800 sheets + 1 manual
Optional	550 sheets drawer (standard on E342tn)
Paper Output	150-sheet top, 1-sheet rear
Media Types Supported	Plain Paper, Envelopes, Card Stock, Transparencies, Paper Labels, Polyester Labels
Media Sizes Supported	A4, A5, JIS B5, Letter, Legal, Statement, Executive, Folio, Universal (76 x 127 mm to 215 x 355 mm) and Envelopes (7 3/4, 9, 10, DL, C5, B5, other

CONNECTIVITY / NETWORK

Connectivity (standard)	Centronics IEEE 1284 Bidirectional Parallel, USB Compatible with USB 2.0 Specification, Fast Ethernet

EVERCOLOR™ INK

Lexmark's Evercolor™ technology is a unique 6-colour ink combination that dramatically improves photo prints. It mixes pigmented photo inks with dye-based inks to produce photo-quality, fade-resistance results that rival prints developed in a professional lab.

Full-strength, dye-based colour inks from the No. 33 colour cartridge ensure a wide range of bright, accurate colours, especially on photo paper.

Diluted pigmented photo inks from the No. 31 photo cartridge deliver enhanced water resistance and superior print quality, even on plain paper.

Evercolor™ ink technology combines the inks from the two cartridges to deliver exceptional photo quality and up to 65 years archivability under glass display and up to 200 years in a photo album.

(1) The maximum number of input options is dependent upon whether the X64Xe MFP is used on a desktop/tabletop or with Lexmark furniture stands/base and if the configuration meets UL Safety specifications (Visit www.lexmark.com/multifunctionprinters for more information). (2) Requires USB connection. (3) Requires external parallel connection (The optional Parallel 1284-b Interface Card needs to be installed). (4) Only one internal connection can be active at any given time.

An incredible value in multifunction!
Big advantages without a big price!

Services 136 - 147

Lexmark X644e

- Big screen, big choices. With an extremely large, fully customisable LCD touch-screen, your end-users are just a touch away from all the functions they need to stay productive.
- Extensive features. Automatic duplex scanning, advanced security and direct USB printing are just some of the handy features on this high-performance device.
- Rapid and robust. The X644e can zip through your busiest print runs at up to 48 ppm, with as little as 8.5 seconds to the first printed page.

Print Technology
Monochrome Laser
Product Class
Medium to large workgroup
Functions
Printing, copying, faxing, scanning
Print Speed
Up to 48 ppm in A4
Up to 50 ppm in Letter
Time to First Page
As fast as 8,5 seconds
Print Quality
1200 Image Quality - 1200 x 1200 dpi
2400 Image Quality - 600 x 600 dpi
Processor
533 MHz
Memory
256 MB expandable to 768 MB

PAPER HANDLING

Paper Input	
Standard	500 sheets + 100 multipurpose feeder
Maximum	3100 sheets (1)
Optional	250-sheet drawer, 500-sheet drawer, 2000-sheet drawer
Paper Ouput	
Standard	500 sheets
Maximum	500 sheets
Duplex Printing	Optional
Media Types Supported	Card Stock, Refer to the Card Stock & Label Guide, Vinyl Labels, Transparencies, Polyester Labels, Plain Paper, Paper Labels, Integrated Labels, Envelopes, Dual Web Labels
Media Sizes Supported	10 Envelope, 7 3/4 Envelope, A4, C5 Envelope, B5 Envelope, A5, 9 Envelope, DL Envelope, Universal, Statement, Letter, Legal, JIS-B5, Folio, Executive
Media Weights Supported	60 up to 216 g/m2 (Card Stock)

CONNECTIVITY / NETWORK

Connectivity (standard)	Fast Ethernet, USB compatible with USB 2.0 specification, One Internal Card Slot, USB Direct interface on Operator Panel
Connectivity (optional)	
Internal Print Servers[4]	MarkNet N8000 Fast Ethernet, MarkNet N8020 Gigabit Ethernet, MarkNet N8030 Fibre Ethernet, MarkNet N8050 802.11g Wireless
External Print Servers	N4000e Fast Ethernet(2), N4050e 802.11g Wireless(2), MarkNet N7000e Fast Ethernet(2), MarkNet N7002e Fast Ethernet(3), MarkNet N7020e Gigabit Ethernet (4 ports)(2)
Other Attachment Options	Parallel 1284-B Interface Card, RS-232C Serial Interface Card
Management Software	MarkVision Professional
Printer Languages	PCL® 6 Emulation, PostScript® 3 Emulation, PPDS Migration Tool, PDF v1.5 emulation
Operating Systems Supported	
Microsoft Windows	98, Me, NT, 2000, XP, Server 2003, XP Professional x64
Apple Macintosh	Mac OS 9.x, Mac OS X
Other	Please visit www.lexmark.com for a complete list of supported versions

DIGITAL COPYING

Copy Speed	Up to 48 ppm
Copy Select	Up to 999 per cycle
Content Selection	Text, mixed, photo
Reduce/Enlarge	25% to 400%
Automatic Duplex	Optional (1:1, 1:2, 2:1, 2:2)
Multi-up Copying	2-up, 4-up, portrait or landscape
Additional Features	Book copying, job building, account tracking, copy collation, job interrupt, job cancel, scan preview, watermarks

FAX CAPABILITIES

Modem Speed	33.6 Kbps
Receive Fax	Yes
Send Hard Copy Fax	Flatbed or ADF
Additional Features	Memory send, group fax, speed dials, shortcut keys (Greater than 500), selectable quality modes (Standard, fine, super fine, extra fine), book faxing, retry, transmission and receive log, automatic and customizable cover sheet, broadcasting fax (Up to 46 location), fax redirect e-mail, LDAP lookup

(1) The maximum number of input options is dependent upon whether the X64Xe MFP is used on a desktop/tabletop or with Lexmark furniture stands/base and if the configuration meets UL Safety specifications (Visit www.lexmark.com/multifunctionprinters for more information). (2) Requires USB connection. (3) Requires external parallel connection (The optional Parallel 1284-b Interface Card needs to be installed). (4) Only one internal connection can be active at any given time.

Multifunction advantages at your fingertips. Solving piles of paperwork at a touch!

SCANNER

Scanner Type	Duplex colour/mono flatbed (ADF single pass)
Optical Resolution	600 x 600 dpi (mono), 300 x 300 dpi (colour)
Document Feeding Mode	Flatbed or ADF (50 sheets)
Original Document Thickness	
Original Document Size	ADF minimum: 114 x 139 mm ADF maximum: 216 x 355 mm Flatbed maximum: 216 x 355 mm
Scanning Capabilities	Scan to FTP server, scan to folder, scan to workstation, USB direct scan interface, network twain, LDAP integration, custom scan profiles, shortcut keys (Greater than 500)
File Format	JPEG, multipage TIFF, PDF

PHYSICAL SPECIFICATIONS

Dimensions (W x D x H)	710 x 560 x 645 mm
Weight	37.65 kg
Acoustics/Noise Level	Standby mode: 30 dBA Printing mode: 56 dBA
Power and Electrical Specifications	220-240 V AC (50Hz)
Cost-saving and Environmental Features	Energy Star compliant, high-yield toner cartridges available, power saver mode, selectable print darkness levels, print and hold (Verify print), multi-up printing, WEEE

SUPPLIES

Ships with 10K* pages return programme toner cartridge
32K* pages extra-high-yield return programme toner cartridge (aftermarket).
21K* pages high-yield return programme toner cartridge (aftermarket).
10K* pages high-yield return programme toner cartridge (aftermarket).
Regular cartridge is also available
** Average cartridge yield. Declared yield value in accordance with ISO/IEC 19752.*
Printers and supplies are designed for use in Europe, Middle East and Africa only.

Lexmark X850e

- The perfect fit for your budget. Affordably priced, the X850e MFP offers a rich range of innovative features to help you work more easily and productively than ever before.
- Now showing on the 'big screen'. The incredibly large, customisable touch-screen gives you fast access to a number of easy-to-use functions, including duplex colour scanning.
- Faster and more robust. The X850e delivers 35 ppm print speed, rapid time to first page, advanced finishing, and large standard input capacity of 3.100 sheets.

Print Technology
Monochrome Laser
Product Class
Medium to large workgroup A3
Functions
Printing, copying, faxing, scanning
Print Speed
Up to 35 ppm in A4 / Letter
Time to First Page
As fast as 10 seconds
Print Quality
1200 Image Quality - 1200 x 1200 dpi
2400 Image Quality - 600 x 600 dpi
Processor
625 MHz
Memory
256 MB expandable to 768 MB
Hard Drive
Greater than 40 GB

PAPER HANDLING

Paper Input	
Standard	3000 sheets + 100 multipurpose feeder
Maximum	5100 sheets
Optional	2000-sheet side high capacity feeder, 2 x 500-sheet
Paper Ouput	
Standard	
Maximum	3800 sheets
Optional	300-sheet bin 1, 500-sheet finisher bin 1, 3000-sheet finisher bin 2
Duplex Printing	Standard
Finishing	Optional (Stapling, hole punching, offsetting)
Media Types Supported	Card Stock, Envelopes, Paper Labels, Plain Paper, Transparencies, Refer to the Card Stock & Label Guide
Media Sizes Supported	10 Envelope, 7 3/4 Envelope, A3, A4, A5, C5 Envelope, DL Envelope, Executive, Folio, JISB4, JIS-B5, Ledger, Legal, Letter, Statement
Media Weights Supported	

CONNECTIVITY / NETWORK

Connectivity (standard)	Fast Ethernet, USB Compatible with USB 2.0 Specification, One Internal Card Slot, USB Direct interface on Operator Panel, Centronics IEEE 1284 Bidirectional Parallel
Connectivity (optional)	
Internal Print Servers[3]	MarkNet N8000 Fast Ethernet, MarkNet N8020 Gigabit Ethernet, MarkNet N8030 Fibre Ethernet, MarkNet N8050 802.11g Wireless
External Print Servers	N4000e Fast Ethernet(4), N4050e 802.11g Wireless(4), MarkNet N7000e Fast Ethernet(4), MarkNet N7002e Fast Ethernet(5), MarkNet N7020e Gigabit Ethernet (4 ports)(4)
Other Attachment Options	Parallel 1284-B Interface Card, RS-232C Serial Interface Card
Management Software	MarkVision Professional
Printer Languages	PCL® 6 Emulation, PostScript® 3 Emulation, PPDS Migration Tool, PDF v1.5 emulation
Operating Systems Supported	
Microsoft Windows	98, Me, NT, 2000, XP, Server 2003, XP Professional x64
Apple Macintosh	Mac OS 9.x, Mac OS X
Other	Please visit www.lexmark.com for a complete list of supported versions

DIGITAL COPYING

Copy Speed	Up to 35 ppm
Copy Select	Up to 999 per cycle
Content Selection	Text, mixed, photo
Reduce/Enlarge	25% to 400%
Automatic Duplex	1:1, 1:2, 2:1, 2:2
Multi-up Copying	2-up, 4-up, portrait or landscape
Additional Features	Book copying, job building, account tracking, copy collation, job interrupt, job cancel, scan preview, watermarks

FAX CAPABILITIES

Modem Speed	33.6 Kbps
Receive Fax	Yes
Receive to Memory	Yes
Send Hard Copy Fax	Flatbed or ADF
Send Soft Copy Fax	From the PS3 print driver
Send to Fax Server	Yes
Additional Features	Memory send, group fax, speed dials, shortcut keys (Greater than 500), selectable quality modes (Standard, fine, super fine, extra fine), book faxing, retry, transmission and receive log, automatic and customisable cover sheet, broadcasting fax (Up to 46 locations), fax redirect e-mail, LDAP lookup, fax storage

(1) This input option can be installed beneath the MFP to offer additional capacity for wide-format paper. Available only as an RPQ, as it cannot exist concurrently with the 2000-Sheet Dual Input. (2) With the finisher option installed, the capacity is reduce to 300 sheets in bin1. (3) Only one internal connection can be active at any given time. (4) Requires USB connection. (5) Requires external parallel connection.

An affordable path to workgroup efficiency! Down with heavy costs. Up with productivity!

SCANNER

Scanner Type	Colour/mono flatbed with DADF
Optical Resolution	600 x 600 dpi (mono), 600 x 300 dpi (colour)
Document Feeding Mode	Flatbed or ADF (75 sheets)
Original Document Thickness	
Original Document Size	ADF minimum: 210 x 139 mm ADF maximum: 297 x 432 mm Flatbed maximum: 297 x 432 mm
Scanning Capabilities	Scan to FTP server, scan to folder, scan preview, scan to workstation, USB direct scan interface, network twain, LDAP integration, custom scan profiles, shortcut keys (Greater than 500)
File Format	JPEG, multipage TIFF, PDF

PHYSICAL SPECIFICATIONS

Dimensions (W x D x H)	
Bundle (Optional)	1095 x 640 x 700 mm
Finisher (Optional)	1066 x 584 x 660 mm
High-Cap Feeder (Optional)	381 x 406 x 610 mm
Weights	Bundle: 105.7 kg / Finisher: 52 kg / High-cap feeder: 29 kg
Acoustics/Noise Level	Standby mode: 32 dBA Printing mode: 52 dBA
Power and Electrical Specifications	220-240 V AC (50Hz)
Cost-saving and Environmental Features	Energy Star compliant, high-yield toner cartridges available, duplex printing, power saver mode, selectable print darkness levels, print and hold (Verify print), multi-up printing, WEEE

SUPPLIES

Ships with 30K* pages return programme toner cartridge
Ships with 48K* photoconductor kit
30K* pages high-yield toner cartridge (aftermarket)
48K pages photoconductor kit

Forms Card

Electronic Forms, Easy and Effective

Forms Card™ is an affordable, compatible and easy-to-implement forms solution designed for fast, high performance printing. Forms Card will help businesses eliminate pre-printed form costs while providing forms that can carry a powerful marketing image directly to their customers.

Cost savings
- No more preprinted forms
- Reduced storage costs
- Maximise printer investment
- No dedicated server required

Simple powerful design
- Merge programme in printer
- Reduced network traffic
- Forms archive and retrieval
- Central forms management

Increase productivity
- Instant updates of forms
- High-quality forms

Superior compatibility
- No application changes
- Host independent
- Embedded bar code support
- SAP R/3 RDI support.

Eliminate costly, preprinted forms
Forms Card is an easy-to-use, electronic forms package that makes it possible to print forms on demand. Forms Card maximises printer investment with the use of electronic forms.
Preprinted forms are expensive to produce, store and handle, plus they can quickly become obsolete, forcing businesses to destroy and reprint them. Forms Card eliminates the need to buy preprinted forms and cuts storage and handling costs. Forms are created and printed as they are needed.
Additionally, forms can be updated with information such as new phone numbers, made available instantly to users.

Easily integrate electronic forms into your business
Forms Card is one of the simplest way of integrating electronic forms into your workplace. It works with any host or network system. Since it generally requires no changes to host applications and as no server or host-based merge programme is necessary, you will find the integration extremely smooth. What's more, because forms are stored at the printer (and merged there), network traffic is reduced and through put is improved.

A simple approach to high-quality electronic forms
Forms Card has an easy-to-use design programme, Forms Composer to create forms. Lexmark Forms Manager(1) allows downloading of the form to the printer's flash or hard disk memory option. Once the electronic form is designed and in the printer, data can be sent directly from your host computer (mainframe, mid-range, PC, etc.) and Forms Card will automatically merge the data with the correct form design and print the completed form. High-quality forms quickly and efficiently.

Productivity enhancing integration
Finally, Lexmark Data Transformer(1) lets you complement and work with Forms Card to give you better control of printing function attributes and data to Forms Card output, for instance sending it to several printers at once. Lexmark Data Transformer(1) will let you manage your output more efficiently with, for instance, fax output via a MultiFunction printing device.

For users requiring bar code printing, extensive bar code support is provided natively in the Forms Card DLE. And Forms Card will also accept and process SAP RDI output.

(1) Lexmark Forms Composer, Lexmark Forms Manager and Lexmark Data Transformer are to be used by Lexmark Certified Solution Providers. For more information, please contact your local sales representative. (2) To be used only with Forms Cards DLE. Please, contact your Lexmark sales representative or get in touch with Lexmark's Certified Solution Providers to analyse, implement and managed your migration from hardcopy forms to electronic format. (3) Printer's Flash Memory or Hard Disk need also to be installed in Lexmark printers or MFPs. (4) NA: Not Available. Please contact Lexmark Sales Representative

SOFTWARE REQUIREMENTS

Forms Composer, Forms Manager and Data Transformer are compatible with the following operating systems

V3.3 Component	
Forms Composer	Data Transformer, Windows XP Professional SP1, Windows XP Professional SP2
Forms Manager	Windows 2000 Professional SP4, Windows XP Professional SP1, Windows XP Professional SP2
Data Transformer	Windows 2000 Server SP4, Windows Server 2003 Standard Edition

MINIMUM SYSTEM REQUIREMENTS

Pentium processor based personal computer
32 MB of RAM
CD ROM drive
128 MB of available hard drive space

MINIMUM PRINTER REQUIREMENTS

The following is required for use the Forms Card product :
A Forms Card DLE providing the merging software and an additional storage memory (Flash memory or Hard disk) to store the electronic template of the forms.

BAR CODES AVAILABLE

Mono-dimensional : 3 of 9, Code 39, Code 93, Codabar, 2 of 5, EAN/JAN-8, EAN/JAN-13, HIBC128, ISBN, ISSN, ITF14, JIS-S-UCC, MSI, Postnet 5, Postnet 9, Postnet 11, RSS, UCC-EAN 128, UPC-A, UPC-E, USS 128, UCC 128, Planet, Bi-dimensional : Aztec, Codablock F, DataMatrix, EAN/UCC Composite, Maxicode, MicroPDF417, PDF417, QR

Bar Code Application Solution

This Lexmark bar code Application Solution supports PCL and PostScript command access for more than 47 industry standard one-and two-dimensional bar codes.

The Complete Bar Code Solution for Business

Bar code Application Solution
- Multiple 1-D and 2-D bar codes
- OCR-A and OCR-B as scalable and bitmap fonts
- FREESCAPE emulation alternate escape code feature

Compatible with SAP R/3 Visual bar code creation
- Visual bar code Designer application provided
- Generate bar code data quickly and easily

Flexible
- Independently scalable bar heights and widths
- Capability to embed text with selectable positioning
- Data format verification and error reporting
- Automatic bar code data compression

Professional quality bar codes
The Lexmark bar code Application Solution supports 47 industry standard one and two-dimensional bar codes. Bar Codes are generated in the printer for better quality and can be combined with other applications, such as SAP R/3 or Lexmark Optra Forms.

Bar code design made simple
The Lexmark Visual bar code Designer software allows programmers to save hours by visually choosing the bar code type and characteristics they want. The exact PCL escape sequences or PostScript commands needed to create the bar code in the host application are provided.

SAP R/3 device type
The Bar Code Card or SIMM provides SAP R/3 customers with an intelligent, trouble-free solution requiring no additional fonts or software on the server. The supplied device type for SAP R/3 allows utilisation of all functions of the bar code option.

FEATURES SUPPORTED
- Visual bar code Designer application that eliminates trial and error to create the correct commands for a specific bar code in PostScript and PCL
- Support for the new International Printing for mySAP Business Suite font, Andale WorldType in UNICODE 3.0 UTF-8 format.
- PCL and PostScript command access for bar codes in applications
- FREESCAPE emulation alternate escape code feature
- Independently scalable bar heights and widths
- Capability to embed text with selectable positioning
- Data format verification and error reporting
- Automatic bar code data compression (when required)
- Automatic bar code checksum calculation and character placement (when required)
- Automatic placement of special characters (prefix, start/stop, guard bars, etc., when required)
- Selectable fonts and automatic scaling)
- Automatic text printing with selectable placement
- Bar code 3 of 9 standard in Lexmark T430, T63x, X63x, C76x and X762e products

PrintCryption™ Application Solution

High-level Security Protection for Business

Provides a higher level of security with minimal administrator support

Strengthens security for proprietary and confidential information when transmitted over a TCP/IP network

Supports secure key management protocols with session keys or persistent keys

Ideal for businesses handling sensitive or personal information, such as financial institutions, government agencies and healthcare organisations

AES encryption meets FIPS-197 requirements (Federal Information Processing Standard)

Lexmark has extended its technology leadership with the introduction of the Lexmark PrintCryption™ Application Solution designed to protect sensitive information as it is printed. The new Lexmark PrintCryption™ Application Solution delivers encryption and decryption capabilities for secure printing to Lexmark network printers. This new level of printing security is ideal for businesses handling highly confidential, personnel, financial, medical, technical or propriety business information.

Product overview

The PrintCryption™ Solution provides corporate environments with strengthened printing security.
The new Lexmark PrintCryption™ Solution works with software from Levi, Ray and Shoup, Inc. (LRS), VPS/TCPIP 8.0 or later and VPS/Secure 8.0 or later, to provide encrypted, end-to-end print job security between common mainframe and Windows systems and wired or wireless Lexmark network printers.
A command line utility (DCP) is used to encrypt print jobs for Linux, Sun Solaris, HP-UX and IBM AIX.

Compatibility

The Lexmark PrintCryption™ Application Solution provides support for the Advanced Encryption Standard (Rijndael algorithm). The printer must be connected to the TCP/IP network using the standard Ethernet connection in the network printer models. Unique TCP/IP port numbers are used for the encrypted print information. The card decrypts and prints the information appropriate for the port.

The PrintCryption™ Application Solution for Lexmark multi-function devices and network printers is designed to provide security for proprietary and confidential documents.

PrintCryption document from PC

PACKAGE CONTENTS

- Lexmark PrintCryption™ Card
- Installation instruction sheet (French, German, Italian, Spanish, English and Portuguese)
- CD-ROM with the license agreement, README in PDF format and encryption software. Use selected UNIX and Windows system environment.
- Encryption software is included to secure and support print data sent from supported systems Sun Solaris (7, 8, 9), Linux (Red Hat 7, 8, Caldera 3.1, SuSE 8), Microsoft Windows (98, Me, NT 4.0, 2000 and XP), *Apple Mac OS X, HP-UX 10, 11, and *IBM AIX 4.3, 5.0.

EXPORT RESTRICTIONS

These products have been classified by the US Bureau of Industry and Security under ECCN 5D002 (c.1) as retail PrintCryption items exportable to certain countries under License Exception ENC, Section 740.17 (b)
(3) of the Export Administration Regulations.
These products are subject to U.S. export control laws and may be subject to export or import regulations in other countries. Licenses and approvals to export, re-export, or import this product may be required after delivery.

These products may not be exported or re-exported to any countries (or any nationals of such countries) that support international terrorism, including, but not limited to, Cuba, Iran, Iraq, Libya, North Korea, Sudan and Syria.
These products may not be exported for use in the design, development, production or use of nuclear, biological or chemical weapons.

IPDS and SCS / TNe Application Solution

Affordable, Flexible Host-Based Printing

AFP/IPDS or SCS printing over TCP/IP

Supported in both mono and colour laser printers

Concurrent support for multiple datastreams

Supports resident scaleable fonts

Emulation of common IBM IPDS and SCS printers

Provides traditional coax or twinax printing if needed

The Affordable Application Solution

Lexmark Application Solution for IPDS and SCS/TNe is an inserted card that provides customers a way to print all types of output, host-based or client-based, on their network-attached Lexmark laser multifunction device or printer. With the Lexmark Card for IPDS and SCS/TNe businesses can use their multi-function devices and printers for both network printing and for IBM AS/400 or mainframe jobs. Printing bar codes, forms, publications and graphics can be done with ease. Now enterprises can realise the cost and time savings associated with true distributed printing.

Assured Compatibility

The Lexmark Application Solution for IPDS and SCS/TNe option for network-attached multifunction devices and printers provides IBM IPDS or SCS printer emulation. Without any changes to host applications or software, businesses will be able to direct their legacy output (AFP/IPDS or SCS) across your LANs using today's popular TCP/IP protocol. The solution is also compatible with IBM mainframe or IBM AS/400 applications that generate SCS (LU1) output or with applications that output AFP/IPDS through Print Services Facility (PSF).

Configuration Freedom

Maximise investment and productivity by locating your Lexmark multifunction device or printer whenever you need it, while maximising productivity. Thanks to Lexmark's SmartSwitch auto-emulation sensing built into allmost all Lexmark printers, printers will automatically switch to the proper document language, whether it is SCS, IPDS, PostScript or PCL emulation.

Easy Network Attachment

With Lexmark's Card option, customers can easily migrate from coax or twinax cable connections to Ethernet. To help in the process, Lexmark provides customers a range of both internal and external print servers and adapters for use on Fast Ethernet, 802.11g Wireless, Fibre, and Token Ring networks. For those needing a traditional connection, the Coax/Twinax Adapter for SCS is also available.

(1)Requires Coax/Twinax Adapter for SCS p/n 11K4120. (2)PDS Advanced Function PRPQ required

The application solution designed for AFP/IPDS or SCS printing over TCP/IP to Lexmark network laser multifunction devices and printers.

MEMORY REQUIREMENTS

6MB minimum

NETWORK ATTACHMENT

Hardware
- Standard Ethernet (100BaseTX/10BaseT)
- Network printer port
- MarkNet N2000, N2100, N8000 series of network print servers
- MarkNet X2000 (AFP/IPDS only)

Software for AFP/IPDS Printing over
- TCP/IP PSF/MVS V2.2 or later
- PSF/MVS V3.1 or later
- PSF/VSE Version 2.2 with APAR/PTF: DY45247/UD51162
- PSF/VM Version 2.1 with APAR PQ39895 (PTF UQ45995)
- IBM iSeries or AS/400 OS/400 V3R1, V3R2, V3R6, V3R7, V4R1, V4R2, V4R3, V4R4, V5R1, V5R2 or later through PSF
- PSF for OS/2 (PSF/2) 2.0
- PSF for AIX (PSF/6000) 2.1 or later

Software for SCS LU1 Printing using a Gateway and TCP/IP

If TN3270E or TN5250 capable SNA gateway software supports the TN3270E or TN5250 protocol according to RFC 2355, then a TN3270E or TN5250 session can be used to print SCS jobs directly from a mainframe or AS/400 TN3270E or TN5250 session can be used to print SCS jobs directly from a mainframe or AS/400

Software for SCS LU1 Printing over TCP/IP
- IBM iSeries or AS/400 for TN5250E SCS LU1 printing as an IBM 3812-01 printer: IBM iSeries or AS/400 OS/400 V3R7 or later with all PTFs applied
- IBM Mainframe for TN3270E SCS (LU1) printing as an IBM 3287 printer: IBM Communications Server (CS) for OS/390 Version 2 Release 5 or later on ESA systems
- TCP/IP for MVS Version 3 Release 2 or later
- TCP/IP for VM/ESA Version 2 Release 4 or later (function level 310 or later)
- TCP/IP for VSE/ESA V1 R3 or later using General Print Server Feature
- Using Cisco 7500 Series Routers

DIRECT TWINAXIAL ATTACHMENT(1)

Hardware
- IBM 3174 Control Unit
- ES/9000 Work Station Subsystem Controller Software

Any application or host software that generates the data stream for one of the emulated printers such as:
- PSF/MVS V2.2 or V3.1 or later
- PSF/VSE V2.2.1, 2.2.0
- PSF/VM V2.1.1, 2.1.0 (with maintenance)
- VTAM Printer Support R70 or later (VPS, VPS/IPDS Levi, Ray and Shoup software)
- GDDM V2.3 with APAR
- RSCS V3.2 or later

DIRECT COAXIAL ATTACHMENT(1)

Hardware
- IBM iSeries or AS/400e servers, e-systems or Twinaxial Workstation Controllers
- 5494 or 5394 Remote Control Unit

Software
- AS/400 PSF/400 V3R1 to V5R2
- AS/400 OS/400 V3R1 to V5R2
- AS/400 OS/400 V3R6 with System Support Program (SSP) Release 7.5(2)
- AS/400 SSP Release 7.1(2)

Lexmark Print Servers

Six great reasons to connect with Lexmark!

Cost-efficiency

Network printing is smart for every businesses bottom line. By connecting your printer with a Lexmark print server, you can significantly boost workflow efficiency, drive down capital expenses, save money on supplies and consumables and reduce maintenance intervention.

Optimal performance

Now you can leverage all the power and performance of your Lexmark printer, no matter what type of network you have. You can also break free from cables with our 802.11g wireless print servers, which let you place your printers wherever they're most productive for your business.

Top-notch security

For greater peace of mind, Lexmark's N8000 series are armed with the latest 802.1x authentication methods to ensure your applications are protected. Plus, our N8050 802.11g wireless print server offers WPA-Enterprise security for high-level data protection, password controls, user restrictions and much more.

Simplified network management

Lexmark's internal and external print servers support Lexmark's award-winning MarkVision Professional software, which lets you manage your network of devices easily and effectively. MarkVision also provides proactive tools, such as automated email alerts for low toner and paper.

Very easy set-up

Whether you're working in a Windows or Mac environment, you can benefit from auto-discovery and zero configuration to be up and running quickly, with virtually no interruption to your business. You can also use the embedded Web server for hassle-free custom-configuration.

Flexible and future-proof

In addition to being compatible with multiple network types, Lexmark servers support most standards and applications, including TCP/IP, IPP, IPX/SPX and AppleTalk printing. For further investment protection, you can also upgrade easily to the latest features, using downloadable firmware updates.

INTERNAL PRINT SERVERS

Boost business productivity by attaching your Lexmark devices directly to your network with one of these high-performance print servers. There's one for every need, including Fast Ethernet, Gigabit Ethernet, Fibre and 802.11g wireless…

Fast Ethernet print server

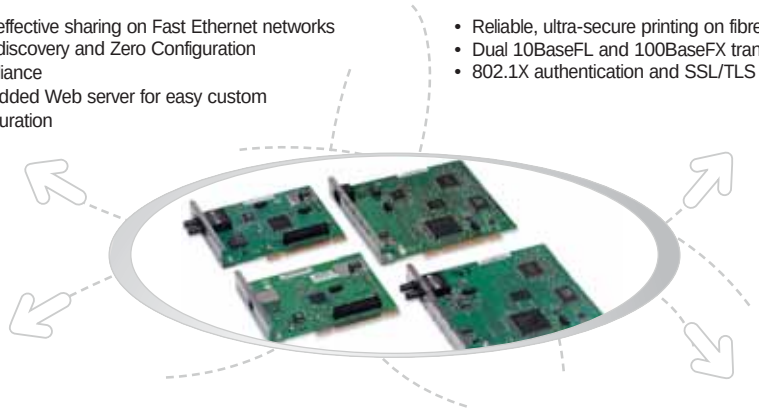
Lexmark MarkNet N8000

- Cost-effective sharing on Fast Ethernet networks
- Auto-discovery and Zero Configuration compliance
- Embedded Web server for easy custom configuration

Fibre Ethernet print server

Lexmark MarkNet N8030

- Reliable, ultra-secure printing on fibre networks
- Dual 10BaseFL and 100BaseFX transceivers
- 802.1X authentication and SSL/TLS security



Gigabit Ethernet print server

Lexmark MarkNet N8020

- High-speed performance for Gigabit Ethernet networks
- Compatible with both Fast and Gigabit Ethernet networks
- 802.1X authentication and SSL/TLS security

802.11 Wireless print server

Lexmark MarkNet N8050

- Wi-Fi certified
- WPA-Enterprise security for high-level data protection
- Backwards compatible with 802.11b products

EXTERNAL PRINT SERVERS

Lexmark's external print servers offer businesses an easy and affordable way to place a Lexmark or third-party laser, inkjet or dot matrix printer in just about any major network environment…

Fast Ethernet

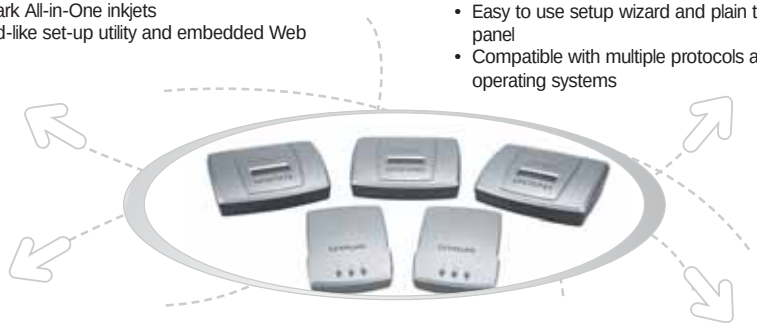
Lexmark N4000e

- Affordably priced server for USB-enabled printers
- Network-scanning capability with selected Lexmark All-in-One inkjets
- Wizard-like set-up utility and embedded Web server

Fast Ethernet

Lexmark MarkNet N7000e & N7002e

- Connect to Lexmark or third-party printers via Hi-Speed USB (MarkNet N7000e) or Parallel port (MarkNet N7002e)
- Easy to use setup wizard and plain text LCD op panel
- Compatible with multiple protocols and operating systems



802.11g Wireless print server

Lexmark N4050e

- Easy set-up via USB connection
- WPA (Wi-Fi Protected Access) Personal Security
- Network-scanning capability with selected Lexmark All-in-One inkjets

Gigabit Ethernet

Lexmark MarkNet N7020e

- Connects to Lexmark or third-party printers via 4 Hi-Speed USB ports
- Printer pooling
- Advanced network management with MarkVision Professional

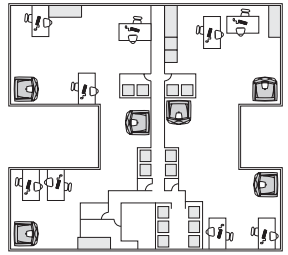
MarkVision Professional

Powerful Remote Multifunction Device and Printer Management

The MarkVision Professional™ print management application increases end-user productivity while reducing IT and Helpdesk cost through easy-to-use remote problem prevention and resolution.



Pro-active Monitoring
- Real-time remote operator panel and printer status
- Real-time filterable notification of printer conditions
- Perform tasks automatically depending on printer conditions

Confidence for your Help Desk
- Monitor both Lexmark and 3rd Party multifunction devices and printers
- Apply enhanced secure communications settings quickly
- Install and configure multiple devices simultaneously

Simple, flexible interface
- Customise most important tasks on a single home page
- Group devices logically by any criteria using dynamic filters
- Find printers easily and quickly using multiple methods

Pro-active real-time remote management.

MarkVision Professional is designed to reduce the overall cost of network printing services while increasing the availability and variety of printing resources for all users. With more and more print devices distributed across organisations, the need for a printer and multifunction device management tool has become even more critical. MarkVision Professional makes it easy to set up, manage and maintain your printers and multifunction devices, while increasing productivity across your enterprise.

A solution that satisfies IT and your Helpdesk center.

MarkVision Professional gives you the ability to monitor, configure and manipulate networked printer and multifunction devices in your enterprise, including those at different sites, in real time from one central point or through a web browser anywhere in the company.
This will help in preventing and if necessary resolving printing problems quickly and cost effectively.

Go one step further and automate processes!

Inside MarkVision Professional, the MarkVision Messenger listens for certain printer events to occur, then sends an alert automatically when that condition arises. It provides real-time notification of printer conditions via e-mail, paging or other applications. It also facilitates automated response to any alert before it becomes critical and disruptive to user productivity.

Too many printers, too little time?

MarkVision Professional lets you organise your printers into a tree-like structure similar to that of a corporate organisational chart. In this way, you can locate and monitor those devices quickly and easily.
A Home Task Page allows users to create groups of tasks by adding or removing tasks to fit the organisation's needs.
When you have many printers on your network, being able to choose and view only those mission-critical printers or any other priority printer condition you can formulate, is essential. MarkVision Professional can automatically group devices into folders based on real-time status alerts, or filters.

SERVER AND CLIENTS ENVIRONMENTS SUPPORTED

These are true for both installations except where stated
- Windows 98/Me/XP (client only)
- Windows NT 4.0/2000/XP/ Server 2003
- HP-UX 11.00
- Mac Client Server OSX
- Novell Server
- IBM AIX 5.1, 5.2
- Sun Solaris 2.6, 9
- SuSE Linux 7.1, 7.2, 7.3, 8.0
- RedHat Linux 7.1, 7.2, 7.3, 8.0

FEATURES SUPPORTED
- Plug-in support for new devices and functions to reduce need for re-installing the software
- Customisable user interface
- Remote Printer Monitoring and Management
- Real-time pro-active alerts with filtering
- User Accounts and groups
- Dynamic device folders and filters
- Quick printer find
- Scheduled tasks
- Automatic TCP/IP and IPX discovery
- Management of other manufacturers printers
- Links to multiple web pages
- Runs as an application or in a browser
- Customisable home Task page

LEXMARK CONNECTIVITY SUPPORTED
- MarkNet N2000, N8000 and X2000 Series print servers

NETWORK PRINTERS SUPPORTED*

Full bi-directional (NPAP)
- Optra Family of Laser Printers
- Lexmark T, C, W
- Lexmark E323n, E332n
- Lexmark MFP range - X52x, X62x, X63x, T63x, T64x, X422, W840, C920, X64x, X720, X750e, X752e, X762e, X85xe, X912e, X83xe, C920

Using SNMP
- Any common-MIB compliant printer or MFP

Some people treat
our planet badly.

Some people don't.

recover

"Environmentally sound waste management" is one of the priorities of the United Nations Environment Program. By inviting everyone to change unsustainable patterns of production and consumption, it makes us all responsible for doing something about it. At Lexmark, over the years, we have developed and enhanced the Lexmark Cartridge Collection Programme. We now offer environmentally sound collection and recycling of all our cartridges, soon to be extended to all our equipment. And you can also do your part; simply return your used cartridges to Lexmark. You will help the environment by increasing the recovery of materials, thus reducing production and materials consumption.

re reduce recover reuse recycle

We make printing easy

LEXMARK™

Quality and Excellence

Lexmark supplies used together with your Lexmark printer deliver the highest performance and quality available every time.

CUSTOMER NEEDS

The core of printing technology is in the cartridge itself. The majority of our cartridges are single-element (integrated drum for laser cartridges or printhead for inkjet cartridges) for ease of installation, avoiding the risk of deterioration of the print head and therefore degradation of print quality during printer life. Replacing a Lexmark cartridge is like getting a brand new printer!

CUSTOMER CHOICE

Lexmark has developed a complete range of cartridges with its printers to fit the many needs of its various end-users: extra-high-yield, high-yield and standard-yield cartridges, tri-packs and low-priced cartridges for inkjet printers. High-Yield print cartridges are especially designed for heavy users, to reduce their cost of printing, but they are also 'green' products as you require fewer cartridges and less packaging.

MEASURING YIELD WITH THE NEW ISO/IEC 19752

The ISO standard more accurately represents the potential customer experience by taking into account manufacturing variations in the performance of the cartridges and the printers. Until now, printer manufacturers have used a variety of methodologies to measure toner yield, making it challenging for customers to compare yield measurements accurately from leading suppliers.
This single, rigorous worldwide ISO standard to measure monochrome toner cartridge yield will help customers more objectively and accurately evaluate printer and print cartridge yield. A requirement of the new standard is that all products must be tested and written reports must be made available to customers at their request. We have now completed ISO/IEC 19752 yield claim testing for mono laser cartridges introduced since 1999.

A FACELIFT FOR LEXMARK SUPPLIES

We recently developed a fresh new packaging design for Lexmark's laser supplies. Today, virtually all of Lexmark's cartridges are sold in the new-style box. The result is a more aesthetically pleasing and environmentally friendly design with improved security features to combat counterfeiting. The individual boxes have optimised dimensions to enable the shipment of more units on a pallet. Also, the new box allows easy empty cartridge return. It's so easy to close that customers don't even need to tape the box before sending it back to Lexmark.

The development of new technologies and new cartridges is key to Lexmark's Business. We invest in R&D, integrating customers' input to design and develop a complete range of supplies: from laser cartridges to inkjet cartridges, papers and transparencies and ribbons. Backed by a 100% Satisfaction Guarantee, each laser and inkjet cartridge is tested individually before leaving the manufacturing site to guarantee high print quality day after day, print after print.

Sometimes you want to take risks...

Sometimes you don't.

beoriginal

Sometimes you like taking risks, but when it comes to your critical business printing applications or your valuable pictures Lexmark makes you feel safe. The cartridge and the printer form a complex sensitive solution designed by our engineers to work together, so only Lexmark high technology Original cartridges give you the longevity and quality you can count on, page after page. At Lexmark, our unique focus is to make printing easy for our customers, so they have the time to concentrate on designing brilliant documents...or to practise their favourite activities.

We make printing easy

Lexmark Standard Service Offerings

Since printing is a vital part of your business, Lexmark has developed a range of service offerings to ensure you security, peace of mind and a greater return on your investment. Total satisfaction being the core objective, these offerings provide you with the tools to keep business moving, including fast and reliable intervention from our specialised technical team.

How does Lexmark deliver the service?

Depending on the type of product, different levels of service are available to our customers

RETURN TO BASE

Return to base offers you remote product support by both telephone and Internet, as well as a dependable return process in case of product defect. In the event of a need for repair action, the helpdesk will instruct you to return the defected product at a Lexmark-designated location in your area. You will receive it back usually within five to seven days in serviced areas. This service covers offsite repair or equipment replacement, all parts and labour, and the return shipment straight to your door.

EXCHANGE

A valuably priced offering, Exchange ensures you a fast and effective door-to-door process. The way it works is simple: We pick up your defective hardware unit (after you remove the cartridge and any options), simultaneously bringing to you an operational unit, and then repair or replace the defective unit offsite. All parts and labour are included. You also benefit from remote support by both telephone and Internet.

ON-SITE EXCHANGE

On Site Exchange is a convenient and comprehensive exchange service that makes your life easier. While you focus on your business, Lexmark takes care of everything, including pickup of the defective product (after having removed the cartridge and any options), offsite repair or replacement, and complete reinstallation. You also benefit from telephone and Web-based support. Response time is usually next business day in serviced areas and can be adapted to your specific requests. This may vary depending on the type of product.

ON-SITE REPAIR

With On-Site Repair, a Lexmark-authorised specialist comes to your home or office to analyse and repair your defective device directly on-site. The specialist will also make sure your product meets Lexmark's most stringent standards of quality and performance. This offering includes telephone and Web-based support, all parts and labour, complete on-site repair and testing. Response time is usually next business day in serviced areas and can be adapted to your specific requests. This may vary depending on the type of product.

REPLACEMENT

Replacement ensures you a fast and effective door-to-door repair process. The way it works is simple: we bring you a practically new product without any cartridge or any options, and will come back later to collect your defective product. Response time is usually within 1 to 5 business days in serviced areas. All parts and labour are included. You also benefit from remote support by both telephone and Internet.

Which service offering fits you best?

Extended Guarantee

Expanding the coverage of your base guarantee, the extended guarantee prolongs service for a period of one, two or three years. It must be continuous from the base guarantee without a gap (lapsed coverage) and may be purchased only once. In very special cases, signing a four-year extended guarantee contract is possible. For such a request, contact Lexmark directly.

Renewal Guarantee

The ability to renew an extended guarantee, or a previous renewal guarantee, is available for one year at a time, providing there is no gap in coverage. Renewal guarantees can be purchased each year as long as the reference is available in Lexmark's official pricing list. This new offering gives you the flexibility to benefit from your printer for an extended amount of time until a new installed base purchase is made.

Base Guarantee Upgrade

At any moment during your initial base guarantee – but not exceeding it – you can opt for an even higher level of service, such as on-site support and exchange.

Maintenance Kit Installation

When you purchase a new Maintenance Kit from Lexmark, a Lexmark authorised service partner can come to you to install it – or even sell you a new one on site. Maintenance Kits include a fuser unit, or transfer belt, as well as wearable parts.

Lexmark Standard Service Offerings

The Multifunction Installation Packs

The Light Installation Pack (Level 1)

The light installation pack offers you a smooth delivery and assembly of your MFD device in a fast and methodical way, saving you valuable time. With this pack our Lexmark service engineers take care of all the preparation from unpacking and installation to device configuration. The Lexmark MFD is more than a high performance, high-quality printer. The Lexmark MFD merges print, copy and scan functions into a single space-saving device.

Level 1 detailed description:

- Unpacking the hardware
- Assembling the solution
- Assembling the scanner cabinet
- Installing the scanner
- Fitting the printer trays (1)
- Connecting:
  - > The mains
  - > The network
