Chapter 1: Basic Printing

Congratulations on purchasing your new Canon® S200 Color Bubble Jet™ Printer!

With this printer, you can print basic business documents in color or black & white, as well as print on a variety of specialty media, such as Canon High Resolution Paper (ideal for documents that include large numbers of color illustrations), Canon Glossy Photo Paper or Canon Photo Paper Pro (for digital photographs) and Canon Transparencies (for presentations). For a full list of the Canon specialty media that can be used with your S200 printer, see “Specialty Media” on page 3.

This Quick Start Guide describes some of the features of your S200 printer and how to use them. For more information, view and/or print the S200 User's Guide on the Setup Software & User's Guide CD-ROM, or use the online help in your printer interface:

While in the printer’s Properties window, press the F1 key, or click in the upper right corner then click the feature you want to know more about, or click the button when displayed.

Turn Bubble Help on by selecting Help, then Show Bubble Help.

Driver features and screen shots described in this guide reflect Windows® 98 and may be different for Windows XP™, Me and 2000 users.

Turning Your Printer On and Off

To turn your printer on, plug the power cord into an electrical outlet.

To turn your printer off, simply unplug the power cord from the back of the printer.
Basic Printing

What Is a Printer Driver?

Most computers require special software to link the software applications you use to create documents or images with your printer. This software, called a printer driver, converts information from the application into a format that the printer can understand. The Canon S200 printer driver also provides other features, such as monitoring the printer's paper supply and ink levels.

Selecting the S200 Printer for Use

If the S200 is the only printer connected to your computer, it will automatically be set as the default (main) printer. However, if your computer has access to multiple printers, you can set the S200 as the default printer.

To set the S200 as the default printer in Windows®:

1. Click Start, then Settings, then Printers.
2. Right-click the Canon S200 printer icon, then click Set as Default. The Canon S200 printer icon will display a check mark indicating that it is the default printer.

To select the S200 from within a Windows application:

Even if another printer is set as the default printer, you can still select the Canon S200 for a specific print job from within most Windows applications.

   Menus vary between applications. Consult your application user documentation if the Print option is not listed.

1. From the File menu, click Print.
2. Select Canon S200 from the Name drop-down list, then click OK.

To select the S200 in Mac® OS:

1. Click Apple, then Chooser.
2. Click the S200 printer icon. The S200 will remain the default printer until another is selected.
Recommended Paper Use

Two steps are recommended for getting the best output for your printed documents:

- Set the printer thickness lever inside the printer cover for the media used. (See “Load Limit and Paper Thickness Lever Position” on page 4.)
- Select the correct media setting in the printer driver from your computer. (See “Chapter 2: Advanced Print Features” on page 9.)

General Business Printing

For everyday paper printing, use plain paper (17 to 28 lb.). Use standard #10 envelopes with your S200 printer.

Specialty Media

For optimum results, Canon recommends that you use genuine Canon media with your S200 printer. Follow the instructions that come with any specialty media on storing, handling and printing.

Specialty media available for use with the S200 include:

- Canon High Resolution Paper
- Canon Transparencies
- Canon Banner Paper
- Canon Glossy Photo Paper
- Canon Photo Paper Pro
- Canon Glossy Photo Cards
- Canon High Gloss Photo Film
- Canon T-Shirt Transfers

For instructions on loading and handling specialty media, see the instructions that come with that media type or see the S200 User’s Guide on the Setup Software & User’s Guide CD-ROM.

Handle media carefully by its edges. Dirt or fingerprints on the print surface will adversely affect print quality.
Basic Printing

Media to Avoid

Do not use the following types of media with your S200 as they could produce poor quality print images, or jam or damage the printer:

- Paper that is folded, excessively curled, wrinkled or wrapped
- Damp paper
- Excessively thin or thick paper
- Paper with pasted photos, stickers, etc.
- Envelopes with overlapping flaps or self-sealing flaps
- Tractor feed paper, perforated paper or 3-hole punched paper, or paper with any type of attached fasteners, ribbons, etc.

Basic Printing

The S200 can print on paper ranging from standard copier paper (usually 17–28 lb.) to specialty media paper and envelopes.

The paper thickness lever is located inside the front cover, on the printhead holder. It controls the paper feed for the type and weight of the media on which you are printing.

- For envelopes (see “To load envelopes:” on page 6), banners and T-Shirt Transfers.
- For regular paper and other media with a left position in the table (see “Load Limit and Paper Thickness Lever Position” on page 4).

Use the chart on the previous page to ensure that the paper thickness lever is set correctly for the type of media you are using.

To load paper or other media:

1. Make sure the paper thickness lever is set correctly for the media used.
2. Slide the paper guide completely to the left.
3. Fan the edges of the sheets to remove static cling and avoid paper jams, then tap the edges of the stack against a flat surface so the stack is aligned.
4. Insert the media into the paper rest, with the print side facing up.

- Note: Some papers, especially specialty media, have specific sides for printing. The print side is usually the glossier side or the brighter white side. When using specialty media, do not touch the print side.

5. Slide the paper guide to the edge of the media until it is firmly in place.

- Note: You can load up to 50 sheets of plain (17 lb.) paper or 40 sheets of Canon High Resolution Paper in the paper rest at one time. Never load the paper above the load limit mark.
Basic Printing

To load envelopes:

1. Open the front cover and set the paper thickness lever to the envelope mark. Close the cover.

2. Slide the paper feed guide to the left.

3. Press down on the corners and sides of the envelopes to make them as flat as possible by expelling all of the air.

   To avoid paper jams, make sure envelopes are flat before you load them into the paper tray.

   Make sure that none of the flaps overlap. If the envelope edges are not flat, crease them with the side of a pen.

   Do not allow more than 5 envelopes to stack on the paper output tray.

4. With the address side facing down and pointed in the direction shown in the illustration, align the stack with the right side of the paper rest, then insert the stack into the printer.

5. Slide the paper guide to the edge of the envelopes until it is firmly in place.

   When printing envelopes, be sure to select Envelope as the Media Type on the Main tab of the Properties window. For more information, see page 9 (Windows) or page 11 (Mac OS) of this guide, or refer to the S200 User's Guide on the Setup Software & User's Guide CD-ROM.
Cancelling a Print Job

There are several ways to cancel a print job in progress:

**To cancel a print job from the printer:**

1. While a job is printing, go to the BJ Print Monitor window (click Finder, then BJ Print Monitor).
2. Highlight the job to be cancelled.
3. Click the Stop Printing icon in the Print Queue dialog box.
   The print job will be cancelled and the paper ejected.
Chapter 2: Advanced Print Features

Improving Printed Images

Two important factors control the quality and output of your printed images:

**Paper and Ink** Using recommended paper or specialty media for printing graphic images or photographs can significantly improve the quality of your printout. (See “Recommended Paper Use” on page 3.) Also, always use the specific Canon inks for your S200 printer, as noted on the inside back cover.

**Printer Driver Settings** There is a variety of settings you can use to enhance the quality of the print, the colors and the way in which the document comes out of the printer.

Adjusting Print Quality

Two of the features that affect the appearance and quality of your printed documents can be controlled with the printer driver.

**Media Type** The S200 automatically adjusts printer settings to improve print quality based on the media type (plain paper, Glossy Photo Paper, etc.) you select.

**Print Quality** When you select a media type, print quality is automatically set for that media. You can change print quality settings if desired.
Advanced Print Features

To manually adjust print quality settings in Windows:

1. From an application File menu, select Print.

2. With Canon S200 as the selected printer, click Properties. The S200 Properties window will open to the Main tab.

3. Select the appropriate Media Type from the drop-down menu.

4. Each media type has a default quality, but you can select a different Print Quality:

   - **High** For high quality when printing a color document.
   - **Standard** For high quality when printing text.
   - **Draft** For high speed when printing text drafts.
   - **Custom** Allows for more precise control.

   If you select Custom, the Set button becomes active. Click Set to open the Set Print Quality dialog box. There are two features you can control:

   - **Quality** The printer driver provides five settings for custom print quality, ranging from Fast at the far left (which means faster printing and less ink) to Fine.
   - **Halftoning** This controls the pattern in which the ink is laid down during printing for graphic images.

5. When done, click OK.
To manually adjust print quality settings in Mac OS:

1. Make sure that the S200 is the selected printer (from the Apple menu, select Chooser, then S200).

2. From an application File menu, click Print.

3. Select a media type from the Media Type drop-down menu.

4. Click the Manual print mode icon, then click the Details button. The Detailed Setting dialog box will open. Make sure Quality is selected.

5. Click and drag the Print Quality slide bar to select your preferred output quality.

6. When done, click OK, then Print.
Advanced Print Features

To select best print quality with the Print Advisor wizard:

Print Advisor is a wizard that helps you select the optimum media type and print quality for your print job.

2. With Canon S200 as the selected printer, click Properties. The S200 Properties window will open to the Main tab.
3. Click the Print Advisor button. The wizard dialog box will open.
4. Follow the on-screen instructions to select the appropriate driver settings for your print job.
5. Click OK to save the setting and close the S200 Properties window.

To automatically make images smoother in Windows:

1. From an application File menu, select Print.
2. With Canon S200 as the selected printer, click Properties.
3. Click the Effects tab, then click the Image Optimizer check box.
4. Click OK to save this setting and close the S200 Properties window.

1. From an application File menu, select Print.

2. With Canon S200 as the selected printer, click Properties.

3. Select the Effects tab.
4. Click to check the Photo Optimizer PRO check box.

When Photo Optimizer PRO is checked, the Apply Throughout Page option becomes active. If this box is left unchecked, the S200 will optimize each image individually. If checked, all images will be corrected automatically with the same settings.

5. When done, click OK.

Changing the Page Setup

You can change how the image is printed without affecting the original image file.

To change page setup in Windows:

1. From an application File menu, select Print.
2. With Canon S200 as the selected printer, click Properties.

- **Scaled Printing** With this option you can set the scale of the printed image down to 20% or up to 400% of the original.

- **Page Layout Printing** Lets you set the number of pages to print on a single sheet. Click **Specify** to set the number of pages to a sheet of paper (1 to 16), the print order for those pages (left to right or right to left) and whether you want to print a border around each page.

- **Booklet Printing** Data is printed on both sides of paper in such a manner that pages can be collated properly in the order of page numbers when the printed sheets are folded and stapled at the center.

- **Poster Printing** Lets you print an oversized image on multiple pages that can then be manually joined together. Click **Specify** to set the image divisions (how many tiles the image will break up into).

2. Click Apply, then select the name of your saved settings.
3. Click Defaults, then OK.
4. Click Import, then Close.
Monitoring Ink Levels

The print driver allows you to monitor the level of ink in each ink tank, with a low ink warning that notifies you when ink runs low during printing.

For this feature to accurately report ink levels, you must enable the low ink warning and reset the ink counter when a new ink tank is installed.

Do not reset the ink tank counter for an ink tank that is already in use. To do so will give an inaccurate report of ink levels. It is best to enable the low ink warning feature either when you first set up your printer or when replacing one or both ink tanks.

To enable low ink warning in Windows:

1. With the printer on, click Start, then Settings, then Printers.
2. Right-click the Canon S200 icon, then select Properties.
3. Select the Maintenance tab, then click the Low Ink Warning Setting icon.
4. Click to check Display low ink warning, click Send, and click OK.
5. If you have just installed one or both ink tanks, reset the ink counter for the new tank(s). See “To reset the ink counter in Windows:” on page 24.

To enable low ink warning in Mac OS:

1. With the printer on, click Page Setup from the File menu.
2. Click Utilities to open the Printer Utility dialog box.
3. Select Remaining ink level setting from the drop-down menu, then click the Low Ink Warning setting.
Printing Maintenance

4. Click to check **Display low ink warning**, then click **Send**.

5. If you have just installed one or both ink tanks, reset the ink counter for the new tank(s). See “To reset the ink counter in Mac OS” on page 24.

To check ink levels in Windows:

1. With the printer on, click **Start**, then **Settings**, then **Printers**.
2. Right-click the **Canon S200** icon, then select **Properties**.
3. Select the **Maintenance** tab, then click **Start Status Monitor**. The BJ Status Monitor will appear.

The Printer Status tab displays the ink levels for each tank. The following icons may appear above the ink tanks on the BJ Status Monitor:

- **Ink low.** Replace ink tank as soon as possible.
- **Ink out.** The ink tank may have run out of ink.
- **Not synchronized.** The ink level may not be synchronized with its ink counter. For information on how to synchronize ink levels and counters, see “To reset the ink counter in Windows” on page 24.

To check ink levels in Mac OS:

If background printing is enabled and the low ink warning is turned on, the BJ Print Monitor will display ink levels while printing.

By default, **Background Printing** is **Off**.

1. Select **Chooser** from the **Apple** menu.
2. Set **Background Printing** to **On**.
3. When a job is printing, note the ink level on the BJ Print Monitor.
The Ink Level icons display the ink levels for each tank. The following symbols may appear at the upper right corner of an icon:

- **Ink low.** Replace ink tank as soon as possible.
- **Ink out.** The ink tank may have run out of ink.
- **Not synchronized.** The ink level may not be synchronized with its ink counter. For information on how to synchronize ink levels and counters, see “To reset the ink counter in Mac OS” on page 24.

**Replacing Ink Tanks**

**To replace an empty ink tank:**

1. With the printer on, open the front cover. The printhead holder will automatically move to the center.
2. Pull the tab on the front of the empty ink tank toward you to release, then remove and discard the empty tank.
3. Remove the new ink tank from its package.
4. Align the new ink tank with the correct slot, then gently insert it.
5. Press down on the ink tank until it clicks into place.
6. Close the front cover.

**Caution** To avoid spilling ink, do not touch the bottom of the tank once you have removed the protective cap.

**Caution** Do not force an ink tank into the printhead. If the ink tank does not go in smoothly, realign it, then try again.

**Note** Remember to reset the ink counter after replacing an ink tank.
Printing Maintenance

To reset the ink counter in Windows:

1. With the printer on, click Start, then Settings, then Printers.
2. Right-click the Canon S200 icon, then select Properties.
3. Select the Maintenance tab, then click the Ink Counter Reset icon.
4. Select the newly installed ink tank, then click Execute.

Ensure that the Low Ink Warning has been enabled. See “To enable low ink warning in Windows,” on page 21.

If you are setting up your printer for the first time, perform this step for each ink tank.

To reset the ink counter in Mac OS:

1. With the printer on, click Page Setup from the File menu.
2. Click Utilities to open the Printer Utility dialog box.
3. Select Remaining ink level setting from the drop-down menu, then click the Ink Counter Reset icon.
4. Select the newly installed ink tank, then click Execute.

Ensure that the Low Ink Warning has been enabled. See “To enable low ink warning in Macintosh,” on page 21.

If you are setting up your printer for the first time, perform this step for each ink tank.
Printing a Nozzle Check Pattern

The printhead discharges ink through nozzles—tiny openings from which the ink is sprayed. Printing a nozzle check pattern can help determine if your printhead needs alignment or cleaning.

If faded or streaked colors and text appear on your output when you print, some of the nozzles may be clogged. You can check for this problem by printing a nozzle check pattern.

To print a nozzle check pattern in Windows:

1. Make sure the printer is on and paper is loaded.
2. Click Start, then Settings, then Printers.
3. Right-click the Canon S200 printer icon, then select Properties.
4. Click the Maintenance tab, then click the Nozzle Check button.
5. Click OK to start the nozzle test. The nozzle test pattern will print.
6. Examine the printout to determine the next action:
   - Lines missing in the printout indicate that the printhead requires cleaning. See “Cleaning the Printhead” on page 27.
   - Uneven patterns indicate that the printhead needs to be aligned. See “Aligning the Printhead” on page 29.
Printing Maintenance

To print a nozzle check pattern in Mac OS:

1. Make sure the printer is on and paper is loaded.
2. In a software application, click File, then Page Setup.
4. Select Test Print from the drop-down menu.
5. Click the Nozzle Check button. When prompted, click OK. The nozzle test pattern will print.
6. When done, click Close.
7. Examine the printout to determine the next action:
   - Lines missing in the printout indicate that the printhead requires cleaning. See “Cleaning the Printhead” next.
   - Uneven patterns indicate that the printhead needs to be aligned. See “Aligning the Printhead” on page 29.
Cleaning the Printhead

If your printed output appears faded, streaked or scratchy, the printhead may need to be cleaned or aligned.

Printhead cleaning consumes ink. Avoid unnecessary cleaning.

To clean the printhead in Windows:

Tips for Troubleshooting

Troubleshooting usually falls into one of the following categories:

- **Installation** The printer driver will not install properly.
- **Printer Hardware** The printer is not working or not working as expected.
- **Printed Output** The printed output is not coming out as expected.
- **Error Message** You are getting an error message from the software (displayed on the screen).
- **Customer Care Center** Canon offers a full range of customer technical support options.

If you encounter difficulties during installation or operation of your Canon S200 printer, quickly scan all topics until you find a description that approximates your difficulty. Go through the related solutions until you find one that works.

Safety Information

Warnings and Cautions

This guide uses the following icons to indicate situations that could cause damage or injury:

⚠️ Warning

- Always follow the instructions provided in Warnings to prevent potential or serious personal injury or death as a result of careless operation of the equipment.

⚠️ Caution

- Always follow the instructions provided in Cautions to prevent minor injuries to yourself or damage to the equipment as a result of careless operation of the equipment.

Read and follow all of these cautions and warnings to ensure the safe use of the printer. To avoid the hazards of fire, personal injury, or damage to the printer, never attempt to use the printer in any way other than the methods described in this guide.

Choosing a Location

⚠️ Warning

- Never place the printer near flammable solvents such as alcohol, thinner, etc. To avoid the hazards of fire or electric shock, keep all flammable liquids away from the printer.

- Never set the printer on a surface that is unstable or subject to excessive vibration. The printer could tip or fall and cause injury.

- Never use the printer in a location that is subject to high humidity, dust, high temperatures, or direct sunlight.

- Set up and use the printer in a location where ambient temperature is within 41°F–95°F (5°C–35°C) and 10%–90% humidity with no condensation.

Never place the printer on a thick carpet or rug. Fibers or dust entering the printer could cause a fire.

Keep the power outlet for the printer free of all obstacles so you can unplug the power cord at any time. Such obstacles could prevent you from unplugging the printer when a printer fault occurs and cause a fire or electric shock. The socket-outlet shall be installed near the equipment and shall be easily accessible.

- Always carry the printer with both hands holding both ends of the printer. To avoid dropping the printer and causing injury, always carry it carefully when moving it to another location.

Power Supply

⚠️ Warning

- Never attempt to plug the power cord into a power outlet when your hands are wet. To avoid electric shock, make sure that your hands are dry.

- Always push the plug completely into the power outlet. A loose or poorly connected plug could cause a fire or electric shock.

- Never cut, modify, stretch, bend, or twist the power cord, and never place heavy objects on the power cord. A power leak from a damaged power cord could cause a fire or electric shock.

- Never plug the printer power cord into a power outlet (power board, double adapter, etc.) that is shared by other devices or office equipment. To prevent the hazards of fire or electric shock, avoid overloading power points.

- Never use the printer if the power cord is bundled or knotted. To prevent the hazards of fire or electric shock, make sure the power cord is straight.
If you detect smoke, unusual odors, or strange noises around the printer, immediately unplug the printer. To avoid fire or electric shock, never use the printer under these conditions. Call the Customer Care Center.

- Always grasp the plug when you unplug the power cord. Pulling on the power cord could damage the cord and cause a fire or electric shock.

Never use an extension cord. To avoid a fire or electric shock, always plug the power cord directly into the power outlet.

Never use a power supply voltage other than that supplied in the country where you purchased the printer. Using incorrect voltage could cause a fire or electric shock. The correct power supply voltage for this printer is AC 120V, 60 Hz.

Cleaning and Maintaining the Printer

Use only a slightly damp cloth to clean the printer. Never use flammable solvents like alcohol, benzene, thinner, etc. If a flammable solvent contacts an electrical component inside the printer, a fire or electric shock could result.

Always unplug the printer power cord before you clean the printer. If you mistakenly turn on the printer while cleaning it, you could touch moving components inside the printer and suffer injury.

Never attempt to disassemble or modify the printer. The printer contains high voltage components which could cause a fire or serious electric shock.

Working Around the Printer

Never use flammable sprays near the printer. Gases in the spray could cause a fire or electric shock if they come in contact with electrical components inside the printer.

Never insert your fingers or hands inside the printer while it is printing. The printer contains moving parts which could cause injury.

Never place anything on top of the printer, especially metal objects (paper clips, staples, etc.), or containers with flammable solvents (alcohol, thinners, etc.). Objects falling into the printer could cause a fire or electric shock.

If any foreign object, especially a piece of metal or liquid, falls into the printer, immediately unplug the printer, then call the Customer Care Center. Continuing to use the printer after a foreign object has fallen into it could cause a fire or electric shock.

Printhead and Ink Tanks

For safety, always store printhead and ink tanks out of the reach of small children. If a child accidentally licks or ingests any ink, consult a physician immediately.

Never subject a printhead or ink tank to shocks or excessive vibration. Shaking could cause ink to leak and stain clothing.

Never touch the printhead or electrical contacts on a printhead immediately after removing it from the printer. These metal parts become very hot during printing and could cause minor burns.

Using the Printer Near Appliances and Fluorescent Lamps

- Allow at least 6 inches clearance between the printer and another appliance or a fluorescent lamp. Electrical noise generated by a fluorescent lamp placed too close to the printer could cause the printer to malfunction.

Limited Warranty—U.S. Only

The limited warranty set forth below is given by Canon U.S.A. Inc. ("Canon") with respect to the Canon brand computer peripheral product (the "product") that you have purchased, when purchased and used in the United States. The product that you have purchased is the only product to which this warranty card and the limited warranty provided by Canon and stated on the card apply.

Your product, when delivered to you in new condition in its original container, is warranted against defects in materials or workmanship as follows: for a period of one (1) year from the date of original purchase, defective parts or a defective product returned to a Canon repair facility or a Canon Authorized Service Facility ("ASF") for such product, as applicable, and proven to be defective upon inspection, will be exchanged for new or comparable rebuilt parts, or a refurbished product, as determined by the Canon repair facility or the ASF. Warranty repair or replacement shall not extend the original warranty period of the defective product. This limited warranty does not cover any supplies or accessories, including without limitation, ink tanks, as to which there shall be no warranty or replacement.

This limited warranty shall only apply if the product is used in conjunction with compatible computer equipment and compatible software, as to which items Canon shall have no responsibility.

Non-Canon brand equipment and software that may be distributed with the product are sold "as is," without warranty of any kind by Canon, including any implied warranty regarding merchantability or fitness for a particular purpose, and all such warranties are disclaimer. The sole warranty, if any, with respect to such non-Canon brand items is given by the manufacturer or producer thereof.

This limited warranty covers all defects encountered in normal use of the product, and does not apply in the following cases:

(a) Loss of or damage to the product due to abuse, mishandling, improper packaging by you, alteration, accident, electrical current fluctuations, failure to follow operating, maintenance or environmental instructions prescribed in Canon's instruction manual, or service performed by other than a Canon repair facility or an ASF.

(b) Use of parts or supplies (other than those sold by Canon) that cause damage to the product or cause abnormally frequent service calls or service problems.

(c) If the product has had its serial number or dating altered or removed.

NO IMPLIED WARRANTY, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, APPLIES TO THE PRODUCT AFTER THE APPLICABLE PERIOD OF THE EXPRESS LIMITED WARRANTY STATED ABOVE, AND NO OTHER EXPRESS WARRANTY OR GUARANTEE, EXCEPT AS MENTIONED ABOVE, GIVEN BY ANY PERSON OR ENTITY WITH RESPECT TO THE PRODUCT SHALL BIND CANON. (SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.) CANON SHALL NOT BE LIABLE FOR LOSS OF REVENUES OR PROFITS, INCONVENIENCE, EXPENSE FOR SUBSTITUTE EQUIPMENT OR SERVICE, STORAGE CHARGES, LOSS OR CORRUPTION OF DATA, OR ANY OTHER SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES CAUSED BY THE USE OR MISUSE OF, OR INABILITY TO USE THE PRODUCT, REGARDLESS OF THE LEGAL THEORY ON WHICH THE CLAIM IS BASED, AND EVEN IF CANON HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN NO EVENT SHALL RECOVERY OF ANY KIND AGAINST CANON BE GREATER IN AMOUNT THAN THE PURCHASE PRICE OF THE PRODUCT SOLD BY CANON WHICH CAUSED THE ALLEGED DAMAGE.

WITHOUT LIMITING THE FOREGOING, YOU ASSUME ALL RISK AND LIABILITY FOR LOSS, DAMAGE OR INJURY TO YOU AND YOUR PROPERTY AND TO OTHERS AND THEIR PROPERTY ARISING OUT OF USE OR MISUSE OF, OR INABILITY TO USE THE PRODUCT NOT CAUSED DIRECTLY BY THE NEGLIGENCE OF CANON. (SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE EXCLUSION OR LIMITATION MAY NOT APPLY TO YOU.) THIS LIMITED WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE ORIGINAL PURCHASER OF THE PRODUCT, OR THE PERSON FOR WHOM IT WAS PURCHASED AS A GIFT, AND STATES YOUR EXCLUSIVE REMEDY.

InstantExchange†

InstantExchange is a warranty program that expedites, usually by the next business day,†† the exchange of a defective product with a refurbished product. The refurbished product you receive will be covered by the balance of the period remaining on your original limited warranty. Note that by using this service you will keep the replacement product that is sent to you, and your originally purchased product shall become the property of Canon. InstantExchange warranty program service is available only during the express limited-warranty period for your product and only in the continental United States, Alaska and Hawaii during such period.

If the Canon Customer Care Center representative cannot correct the problem with your product over the telephone, and you elect InstantExchange warranty program service, the representative will issue you a reference number upon verification of warranty eligibility. You will be asked for information pertaining to your defective product and for a ship-to location for the replacement product (street address only). You must also provide a major credit card number that will be pre-authorized by Canon in an amount up to the cost of a new product at the time you elect InstantExchange warranty program service. Your credit card number will be charged in an amount up to the cost of a new product (i) if you do not return your defective product to a Canon repair facility by the date specified by Canon and in the manner described below; (ii) if the defect(s) in the product is/are not covered by this limited warranty; or (iii) if the warranty period on the product has expired or has not been sufficiently established by your supplying the appropriate documentation.

The Canon repair facility will ship out the replacement product via overnight courier, prepaid by Canon. After receipt of the replacement product (with instructions and a pre-paid return waybill), follow the instructions to ship the defective product to a Canon repair facility. You must return the defective product in the shipping carton in which the replacement product was packed (be sure to retain your printhead and ink tanks), and you must include the reference number, a copy of your dated proof of purchase (bill of sale) and a complete explanation of the problem. Do not include any other items in the return shipping container.

This limited warranty gives you specific legal rights, and you may also have other rights that vary from state to state.

* Support program specifics are subject to change without notice.
† InstantExchange warranty program service is subject to availability of refurbished replacement units.
†† 9 a.m.–5 p.m. (local), Monday–Friday (excluding holidays). The Canon Customer Care Center must receive pertinent information by 3 p.m. (E.S.T.) to ensure next-business-day InstantExchange warranty program service (two-business-day InstantExchange warranty service for Alaska and Hawaii). Canon does not guarantee next-business-day service in the event of factors beyond Canon's reasonable control.
