Basic Printing

Basic Printing

Note  This Quick Start Guide describes some of the features of your i70 printer and how to use them. For more information, view the i70 User's Guide on the Setup Software & User's Guide CD-ROM, or use the online help within your printer driver interface:

Windows
While in the printer’s Properties window, press the F1 key, or click ? in the upper right corner. Then click the feature you want to know more about, or click the Help button when displayed.

Macintosh
Turn Balloon Help on by selecting Help, then Show Balloon Help.

Turning on the Printer

1  Open the paper rest.

2  Press the POWER button.

   The POWER lamp flashes while the printer warms up and changes to steady (non-flashing) green when the printer is ready.

   Important  ●  Before unplugging the power cord, turn off the printer and ensure that the green lamp has gone out.

   ●  If the POWER lamp changes to orange and begins flashing, refer to the section “Handling Error Messages” on page 52.
Basic Printing

Loading Paper

■ Print Media to Avoid
Do not use the following types of paper. Using such paper will not only produce unsatisfactory results, but can also cause the printer to jam or malfunction.
- Folded, curled or wrinkled paper
- Damp paper
- Excessively thin paper (less than 64 gsm or 17 lb)
- Excessively thick paper* (more than 105 gsm or 28 lb)
  *non-Canon branded paper
- Picture postcards
- Postcards affixed with photos or stickers
- Envelopes with double flaps
- Sealed envelopes
- Envelopes with an embossed or treated surface
- Any type of paper with holes (such as loose-leaf)

■ Loading the Print Media
This section describes how to load plain paper into your printer.
- For detailed information on the speciality media Canon provides for use with its various printers, refer to the section "Using Speciality Media" on page 5.
- Consult the User's Guide for detailed instructions on how to load envelopes and speciality media into the printer.

1 Flatten the four corners of the paper before loading it.

Important When paper is curled, hold the opposing curled corners and gently bend them in the opposite direction until the paper becomes completely flat.
Basic Printing

2 Prepare to load paper.

(1) Open the paper rest and output slot cover.

(2) Move the paper thickness lever to the correct position for the media in use. Move to the right position for plain paper. Move to the left position for envelope, and T-Shirt Transfers.

3 Load the paper.

(1) Insert the paper into the sheet feeder with print side facing up.

Load Limit Mark
Do not load beyond this Load Limit Mark.

(2) Align the paper stack against the right side of the sheet feeder.

(3) Slide the paper guide against the left side of the stack of paper.

Note
- Do not stack more than 10 sheets in the paper output slot cover.
- Do not touch the printed surfaces until the ink dries. For specific drying times, refer to the instructions packaged with your media.
Basic Printing

Using Speciality Media

Canon recommends that you use genuine Canon media to ensure optimal print quality.

- **Photo Quality Media**
  - Photo Paper Pro
  - Photo Paper Plus Glossy
  - Matte Photo Paper
  - Glossy Photo Paper
  - Glossy Photo Cards
  - High Gloss Photo Film
  - High Resolution Paper

- **Media Suited to Business Documents**
  - High Resolution Paper
  - Transparencies

**Note**  
- For detailed description of print media types, refer to the *User’s Guide*.  
- *1: When paper cannot be fed normally, load the necessary number of sheets in the auto sheet feeder with them separating from each other to avoid them from sticking together.  
- *2: Print settings are much easier to select if you use the applications included on the *Setup Software & User’s Guide CD-ROM* when printing with Photo Paper Pro Perforated.  
  For instructions on how to print from the software applications, refer to the *Photo Application Guide*.  

---

6
Printing with Windows

1. Create a document or open a file to print.

2. Open Printer Properties dialog box.

   (1) Select **Print** from the application software's **File** menu.

   (2) Ensure that **Canon i70** is selected.

   (3) Click **Preferences** or **Properties**.

3. **Note** In Windows 2000, click the **Main** tab in the **Print** dialog box.
Basic Printing

3 Specify the required settings.

(1) Click Media Type to select the type of media loaded in the printer.

(2) Click OK.

Note
- From the Page Setup tab select the correct document size to be printed.
- To adjust Print Quality settings, select Custom and click Set on the Main tab. You can control quality in the Set Print Quality dialog box.
- For details about other printer driver functions, refer to the User’s Guide or Help.
- Select Preview before printing by clicking the check box. This displays a preview screen that allows you to confirm the selected printing effects and how your document will look when printed. Some applications do not contain the function to display the preview.

4 Print the document.

(1) Click Print.

Note You can cancel a print job in progress by simply pressing the RESUME/CANCEL button on the printer.
Printing with Macintosh

Note  • The menu screens and dialog boxes that appear may vary, depending on
       the software application you are using.
• The steps described in this section are for printing in Mac OS 9.

1  Create a document or open a file to print.

2  Select Paper Size.
   (1) Select the Page Setup from the application software’s File menu.
   (2) Select the desired paper size from the Paper Size pull-down menu.
   (3) Click OK.

3  Specify the required settings.
   (1) Select Print from the application software’s File menu.
   (2) Select the Media Type from the pull-down menu.
   (3) Select the type of document from the Print Mode pull-down menu.
   (4) Click Print.
Basic Printing

Note

- When you select the type of document from the Print Mode pull-down menu, the document will be printed in color and print quality suited to the characteristics of Media Type you have selected.

Text: Select when printing documents consisting mainly of text.

Graphic: Select when printing documents consisting mainly of graphs and graphics (illustrations) with strong color definition.

Photo: Select when printing documents consisting mainly of photographs and graphics featuring fine color gradation.

Manual: If you select Manual, the Details button will become selectable. Click the Details button to display the Detailed Setting dialog box where you can fine-tune the Print Quality and Halftoning settings. Refer to the User’s Guide.

- For details about other printer driver functions, refer to the User’s Guide or Help.
- You can cancel a print job in progress by simply pressing the RESUME/CANCEL button on the printer.
Basic Printing

Printing Data through Infrared Transmission

If you have a computer or PDA with an infrared port for wireless data transmission, you can print data with a cordless connection with the printer. You can also print an address book, schedule, or memo received from a PDA in a fixed format through infrared transmission.

Requirements for Infrared Transmission with the Computer

Printing through infrared transmission can be performed under Windows XP, Windows Me, Windows 2000, Windows 98 or Windows 95. In order to use infrared transmission, your computer must satisfy the following requirements:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computer</td>
<td>IBM PC/AT or compatible machine</td>
</tr>
<tr>
<td>CPU</td>
<td>Intel Pentium or higher</td>
</tr>
<tr>
<td>IrDA</td>
<td>IrDA 1.1 compliant</td>
</tr>
<tr>
<td>Baud rate (transmission speed)</td>
<td>Max. 4 Mbps</td>
</tr>
<tr>
<td>Infrared transmission devices</td>
<td>- Infrared transmission port</td>
</tr>
<tr>
<td></td>
<td>incorporated in the computer</td>
</tr>
<tr>
<td></td>
<td>- Infrared port (OBEX compliant)</td>
</tr>
<tr>
<td></td>
<td>of the PDA (Personal Digital</td>
</tr>
<tr>
<td></td>
<td>Assistants)</td>
</tr>
</tbody>
</table>
Basic Printing

When using other than Windows 95, Windows 98 or later must have been pre-installed and Microsoft Infrared Communication Driver must be installed on your computer.

When using Windows 95, IrDA 1.0 (baud rate: max. 115.2 kbps) is used for data transmission. In this case, Microsoft Infrared Communications Driver Version 2.0 must be installed in your computer. Refer to your computer’s operation manual for more details.

When using Windows 98 or Windows 95, check whether the infrared transmission driver has been installed. To activate the infrared port, carry out the following operation:

1. Click Start, then click Settings and Control Panel.
2. Check whether the Infrared icon is displayed in the window. If this icon is displayed, the required infrared driver has already been installed. Refer to your computer’s operation manual for more details.
3. Double-click the Infrared icon.
4. Check the Enable Infrared communication check box is on (Windows 98) or Enable infrared on check box (Windows 95) is on. If the check box is not selected, select it.

When using Windows Me, check whether the infrared communication driver has been installed following the procedure below.

1. Click Start, then click Settings and Control Panel.
2. Check whether the Wireless Link icon is displayed. If this icon is not displayed, there is a possibility that the infrared communication driver has not been installed. Refer to your computer’s operation manual for more details.

Performing Infrared Transmission
When performing infrared transmission, also refer to your computer or PDA manual.

1. Set up the Printer.
   (1) Ensure that the universal AC adapter is connected securely.
   When using an optional battery, ensure that it has been charged.

   (2) Open the paper rest and turn on the printer.

   (3) Load the paper on the paper rest.
2 Start Infrared Transmission.

(1) Oppose the infrared port of the computer or PDA to that of the printer at a
distance of less than 31.5 inch (80 cm).

The effective angle of the infrared port of the printer is about 10° from the
central axis in both vertical and horizontal directions.
The allowable distance of communication with the printer depends on the
computer or PDA you use. For this distance, refer to your computer or PDA
manual.

![Diagram of infrared ports](Diagram)

- **Note**
  - Do not place any obstacle between the infrared ports of the printer
    and PDA or computer. Data cannot be transmitted between them.
    Check the orientation and positions of the infrared ports of the
    printer and PDA or computer. Oppose these ports properly as
    mentioned above.
  - Before printing data or using a maintenance function of the printer
driver, ensure that the name of the printer connected based on the
IrDA system is displayed by clicking the **Wireless Link** icon (For
Windows Me, Windows 98 or Windows 95, click the **Infrared** icon) on
the **Control Panel**.
  - During printing, be careful not to interrupt infrared transmission
with the printer. If it is interrupted, turn off the printer and cancel
printing on the computer or PDA. Placing the pointer on the **Wireless
Link** icon (For Windows Me, Windows 98 or Windows 95, click the
**Infrared** icon) on the **Control Panel** allows you to check whether IrDA
transmission has been interrupted.
  - When using Infrared transmission in Windows XP or Windows 2000,
BJ Status Monitor is not displayed.
Advanced Printing

Advanced Printing

Printing Photographs from the Digital Camera Directly

Connecting a Canon digital camera with Bubble Jet Direct function to the printer allows you to print recorded images directly without using a computer.

Note To print directly from a digital camera or digital video camcorder, use only a Canon “Bubble Jet Direct” compatible digital cameras or digital video camcorders.

■ Media Types for Digital Camera

You can use the following Canon media:

<table>
<thead>
<tr>
<th>Digital Camera Setting</th>
<th>Media Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Card #1</td>
<td>Photo Paper Pro 4” x 6”</td>
</tr>
<tr>
<td>Card #2</td>
<td>Photo Paper Plus Glossy 4” x 6”</td>
</tr>
<tr>
<td>Card #3</td>
<td>Photo Paper Plus Glossy 5” x 7”</td>
</tr>
<tr>
<td>LTR</td>
<td>Photo Paper Pro or Photo Paper Plus Glossy Letter</td>
</tr>
<tr>
<td>A4</td>
<td>Photo Paper Pro or Photo Paper Plus Glossy A4</td>
</tr>
</tbody>
</table>

■ Printing from a Digital Camera

1 Set up the Printer.

   (1) Ensure that the universal AC adapter is connected securely.
   (2) Open the paper rest and turn on the printer.
Advanced Printing

2 Load the paper on the paper rest.

(1) Load the media with the more glossy surface up.
(2) Align the media on the right.
(3) Slide the paper guide against the left side of the media.

3 Connect the printer and the digital camera.
   (1) Ensure that the digital camera is turned off.
   (2) Connect the digital camera and printer with the USB cable that came with the digital camera.
       The digital camera will automatically turn on. If not, turn it on.

4 Start printing using the print function of the digital camera.
   (1) Select the Replay mode and display the image you want to print.
   (2) Press the SET button to display the Print menu.
   (3) Select Style and specify the paper size, borderless or bordered printing, and date printing on or off.
   (4) After specifying the style, specify a number of copies, select Print and then press the SET button.
Advanced Printing

Note  • For the digital camera operation method and troubleshooting, refer to your digital camera manual. For print error messages, refer to "Handling Error Messages While Using the Digital Camera" on page 58.
• By operating the digital camera, you can make the following prints:
  • You can make a standard print from the image displayed in the single display mode or in the index display mode.
  • You can print specified numbers of images, or make an index print using the DPOF function.
    Images other than Exif may not be index printed.
  • For the images taken with an Exif 2.2-compatible digital camera, the Photo Optimizer PRO function can be used.
  • If date printing is set on the digital camera, the date when the photograph was taken is to be printed (excluding the index print).
  • Images will be scaled automatically according to the image size set on the digital camera and the size of the media set on the printer.
• The digital camera does not support the following functions:
  • Print quality setting
  • Maintenance

*The print head cannot be aligned by operating the digital camera. Connect the printer to the computer, then align the print head. If the print head has not been aligned, reduce the printing speed (one-way printing) for better print quality.
Accessing Printer Driver

The Printer Properties dialog box can be opened from either within an application, or directly from the Windows Start menu.

Note
- This manual refers to Windows XP operation. The operations may vary depending on your operating system.
- Depending on your application program, the command and menu names may differ, and there may be more steps involved in opening the Printer Properties dialog box. For more details, see the user's manual for your application.

Opening the Printer Properties Dialog Box from Your Application Program

1. In your application, select the command to print a document.
   The Print dialog box can usually be opened by selecting Print from the File menu.

2. Ensure that the Canon i70 is selected. Then click Preferences (or Properties).
   The Printer Properties dialog box opens.

Opening the Printer Properties Dialog Box Directly from the Start Menu

This method is used for maintenance operations such as print head cleaning, or to specify printer settings common to all application programs.

When the Printer Properties dialog box is opened from the Start menu, additional tabs appear, including the Details tab. These do not appear when the Printer Properties dialog box is opened from within an application.

For more information about these additional tabs, refer to your Windows documentation.

1. Click Start and select Control Panel, Printers and Other Hardware, and then Printers and Faxes.
   For non-XP Windows, click Start, select Settings, and then Printers.

2. Select the Canon i70 icon.

3. Open the File menu and select Printing Preferences (or Properties).
   The Printer Properties dialog box opens.
Adjusting Print Quality for Photographs

- Improving Printed Images
  Two important factors control the quality and output of your printed images:

  **Paper and Ink**
  Using recommended Canon paper, speciality media, and inks for printing photographs can significantly improve the quality of your printouts. See the inside back cover for a list of Canon media and inks for this printer.

  **Printer Driver Settings**
  The printer driver has a variety of settings that can be used to creatively enhance the colors and output of your photographs. Many of these features are covered in this chapter.

  For more detailed information, see the i70 User’s Guide on the Setup Software & User’s Guide CD-ROM.

  You can also access the online help in either of the following ways depending on your operating system:

  **Windows**
  - Press the F1 key
  - Click ? in the upper right corner, then click the feature you want to know more about.
  - Click the Help button when displayed.

  **Macintosh**
  - Turn on Balloon Help by clicking Help, then Show Balloons.

- Adjusting Print Quality
  Features that affect the appearance and quality of your printed images can be controlled with the printer driver.

  The i70 automatically adjusts printer settings to improve print quality based on the media type (plain paper, Photo Paper Pro, and so on). You can also customize the Print Quality settings if desired.
Advanced Printing

To manually adjust Print Quality settings:

**Windows**

1. Open the Printer Properties dialog box.
   See "Opening the Printer Properties Dialog Box from Your Application Program" on page 17.

2. Select Custom in Print Quality, then click Set... to open the Set Print Quality dialog box.

3. Move the slide bar to adjust the Print Quality.

   ![Set Print Quality Image](image)

4. When the process is complete, click OK.

**Macintosh**

1. Open the Print dialog box.
   See "Printing with Macintosh" on page 9.

2. Click Print Mode and select Manual, then click Details... to open the Detailed Setting dialog box.

3. Move the slide bar to adjust the Print Quality.

   ![Detailed Setting Image](image)

4. When the process is complete, click OK.
Advanced Printing

To automatically optimize the image:
Photo Optimizer PRO automatically adjusts the photographic image created with a digital camera. Use this feature to compensate for unsatisfactory color balance and over- or under-exposure before printing.

**Windows**

1. Open the Printer Properties dialog box.  
   See "Opening the Printer Properties Dialog Box from Your Application Program" on page 17.
2. Click the Effects tab.
3. Select the Photo Optimizer PRO check box.
4. Click OK.

**Macintosh**

1. Open the Print dialog box.  
   See "Printing with Macintosh" on page 9.
2. Click Print Mode and select Manual, then click Details... to open the Detailed Setting dialog box.
3. Click (Special effects).
4. Select the Photo Optimizer PRO check box.
5. Click OK.
To use Vivid Photo option:
Vivid Photo intensifies background colors like fields, trees, oceans and skies, while maintaining natural skin tones in the images.

Note  In Windows Me or Windows 98
The Vivid Photo function is not available, if Background Printing has been disabled.

Windows
To use Vivid Photo, select the Vivid Photo check box on the Effects tab.

Macintosh
To use Vivid Photo, select the Vivid Photo check box under Special Effects.
Advanced Printing

To reduce noise from images recorded with digital camera:

Photo Noise Reduction function reduces noise from blue portions, such as the sky and dark portions of the images recorded with your digital camera.

Note In Windows Me or Windows 98
The Photo Noise Reduction function is not available, if Background Printing has been disabled.

Windows

To use Photo Noise Reduction, select the Photo Noise Reduction check box on the Effects tab.

![Photo Noise Reduction in Windows](image)

Macintosh

To use Photo Noise Reduction, select the Photo Noise Reduction check box under Special Effects.

![Photo Noise Reduction in Macintosh](image)
■ Saving and Recalling Driver Settings
When you change printer driver settings for a specific print job, such as printing black and white photos, or printing documents with a special background, you can save and name these settings for future use on similar print jobs.

Windows

1 Open the Printer Properties dialog box.
   See "Opening the Printer Properties Dialog Box from Your Application Program" on page 17.

2 Click the Profiles tab.

3 Enter new settings in Profiles.
   (1) Click Add to Profiles.

   The Add to Profiles dialog box opens.

   (2) Enter the name of profile for registering settings.

   (3) Select an icon.

   (4) Enter a description on the registering profile.

4 Click OK.

5 Click OK on the Profiles tab.
   This registers your printer driver print settings.

Note You can retrieve or delete the print settings profile at any time.

Retrieving profile: Select the desired profile from Printing Profiles, and click Retrieve from Profiles.

Deleting unwanted profile: Select the desired profile from Printing Profiles, and click Delete.
   For details, click Help and refer to the topic of this function.
Advanced Printing

Macintosh

1. Open the Print dialog box.
   See "Printing with Macintosh" on page 9.

2. Click Apply.
   The Register Settings dialog box opens.

3. Enter the print settings to register.

   ![Register Settings dialog box]
   (1) Click Apply....

   The dialog box to enter the new settings name opens.

   ![New Settings Name]
   (2) Enter a name under which to register your settings.

4. Click OK.

5. Click Close in the Register Settings dialog box.
   This registers your printer driver print settings.

   Note: You can retrieve or delete the saved driver settings at any time.

   Retrieving print settings: Select the name of the settings to retrieve from the Settings list and click Import.

   Deleting unwanted drivers settings: Select the name of the settings to delete from the Settings list and click Remove.
Using Printer Driver Options

Getting to know the basic features of your printer driver will provide you with sufficient expertise to print a wide range of images and documents. The illustrations below provide a basic introduction to the many features offered by your printer driver.

**Note** For detailed description of the printer driver functions, refer to the *User’s Guide.*

- **Printing with Borderless Printing**
- **Reducing Noise from Images Recorded with Digital Camera**
- **Smoothing the Rough Edges of Certain Images**
- **Automatically Resizing the Image to Fit the Page**
- **Resizing the Image by Selecting the Scaling Ratio**
- **Adding Illustrated Effect to Documents**
Advanced Printing

Using the Bundle Software

The Setup Software & User's Guide CD-ROM includes photo applications designed to edit the photographs taken by digital camera and print them as photo-lab quality prints. Please use the application(s) suitable for your print purposes.

Note
- To install applications, refer to Easy Setup Instructions.
- For details about photo applications, refer to the Photo Application Guide included on the Setup Software & User’s Guide CD-ROM.

■ Easy-PhotoPrint (Windows)
You can make Borderless Printing easily and quickly, just by selecting a photograph taken with a digital camera and the paper type on which to print. You can also use simple editing features such as trimming and image rotation. It is Exif Print (Exif 2.2)*1 compatible. Internet Explorer 4.0 or later must be installed.

■ ImageBrowser (Macintosh)
You can import photographs taken with a digital camera into the computer, edit and caption them. You can produce Borderless prints or Index prints with ease. It is Exif Print (Exif 2.2)*1 compatible.

■ ZoomBrowser EX/PhotoRecord (Windows)
You can import photographs taken with a digital camera into the computer, edit, add a caption and print them in an album format. PhotoRecord is Exif Print (Exif 2.2)*1 compatible. ZoomBrowser EX requires Windows XP, Windows 2000, Windows Me or Windows 98.

■ PhotoStitch (Windows/Macintosh)
You can select multiple photographs and merge them to create a panoramic photo.

■ Easy-WebPrint (Windows)
You can easily print pages displayed on the Internet Explorer or pages from the User’s Guide (on-screen manual of this printer) in full size. Easy-WebPrint automatically adjusts the layout when printing a screen. This feature enables you to print a screen without its right end being cut off.
This application is a plug-in for Internet Explorer, and its toolbar is automatically added to Internet Explorer after installation. Internet Explorer 5.5 or later must be installed. Easy-WebPrint requires Windows XP, Windows 2000, Windows Me or Windows 98.

*1 Exif Print (Exif 2.2) is a new worldwide standard. Under Exif 2.2, the digital camera can record data tags for specific camera settings and functions such as whether the flash was on or off, if the camera was in portrait or night scene mode, etc.
BJ Printers support Exif Print and use a suitable photo application to read the camera data precisely, producing optimal prints. This enables you to create prints that reproduce your vision more accurately than ever before.
Printing Photographs with Windows

This chapter describes the steps used to print from photo applications included with your Setup Software and User's Guide CD-ROM using the Borderless Printing mode.

**Note**  Media Types Suitable for Borderless Printing

Media types compatible with Borderless Printing include Photo Paper Plus Glossy (LTR, 4” x 6”, 5” x 7”), Photo Paper Pro (LTR, 4” x 6”), Matte Photo Paper (LTR), and Glossy Photo Paper (LTR).

Follow the steps below to create color prints of digital camera photographs with Easy-PhotoPrint using the Borderless Printing function. Easy-PhotoPrint supports Exif Print (Exif 2.2). Easy-PhotoPrint can handle only JPEG files (filename extension: .jpg and .jpeg).

1. **Start Easy-PhotoPrint.**
   (1) Store the photographs you took with your digital camera in the folder on the hard disk.
   This section describes how to print photographs stored in the folder on the hard disk.
   (2) Click **Start**, select **All Programs** (or **Programs**), **Canon Utilities**, **Easy-PhotoPrint**, and then **Easy-PhotoPrint**. The **Image Selection** sheet is displayed.

2. **Select photographs.**
   (1) Select the folder containing the photograph you want to print. All photographs in the selected folder are displayed.
Advanced Printing

(2) Click the [+][+][+][+] button on the thumbnail of the photograph you want to print and specify the number of copies.

3 Select the paper.

4 Select the layout.

(3) Load the media specified in the 2.Paper Selection tab.

(4) Click Print.
This chapter describes the steps used to print from photo applications included with your Setup Software and User's Guide CD-ROM using the Borderless Printing mode.

**Macintosh**

### Printing Photographs with Macintosh

Follow the steps below to create color prints of digital camera photographs with ImageBrowser using Borderless Printing function.

1. **Start ImageBrowser.**
   
   (1) Store the photographs you took with your digital camera in the folder on the hard disk.
   
   This section describes how to print photographs stored in the folder on the hard disk.

   (2) Double-click the Canon ImageBrowser (alias) icon on the desktop.
   
   If the Canon ImageBrowser icon is not displayed on the desktop, open the Canon ImageBrowser folder, and double-click the ImageBrowser icon in the folder.

2. **Select photographs.**

   (1) Select the folder containing the photograph you want to print.

   All photographs in the selected folder are displayed.

   (2) Click the photographs you want to print.

   (3) Click **PRINT** and select **Layout printing** from the pull-down menu.

The **Layout Options** dialog box appears and layout selection wizard starts.

**Note**  
**Media Types Suitable for Borderless Printing**

Media types compatible with Borderless Printing include Photo Paper Plus Glossy (LTR, 4” x 6”, 5” x 7”), Photo Paper Pro (LTR, 4” x 6”), Matte Photo Paper (LTR) and Glossy Photo Paper (LTR).
Advanced Printing

3 Enter layout options.

- Select Tiled photo printing.
- Click Next.

4 Select Borderless Printing.

- Select Borderless Printing.
- Select a paper size from the Paper Size pull-down menu.
  The menu only displays paper sizes compatible with Borderless Printing.

  Click OK.

A message box pops up. Read the message and click OK. This returns you to the Layout Options dialog box.
5 Specify the number of photographs to print on one page.

1. Select 1(1×1) from the No. of images pull-down menu.
2. Click OK.

6 Print the photograph.

1. Click PRINT.
2. Select a type of media for printing from the Media Type pull-down menu.
3. Select Photo from the Print Mode pull-down menu.
4. Load the selected paper in the printer.
5. Click Print.
Printing Maintenance

When Printing Becomes Faint or Colors are Incorrect

When printing becomes faint or colors are incorrect, even if ink remains in the ink tanks, the print head nozzles are probably clogged. Follow the procedures below to clean the nozzles.

**Step 1**
“Printing the Nozzle Check Pattern” on page 33

If the problem remains

**Step 2**
“Print Head Cleaning” on page 35

If white stripes are noticeable

**Step 2**
“Aligning the Print Head” on page 39

If the problem remains

**Step 3**
“Print Head Deep Cleaning” on page 37

Still the problem remains

**Step 4**
“Replacing an Ink Tank” on page 42

**Note**
- If ink tank replacement does not resolve the problem, contact the Customer Care Center.
- You will be alerted if you enable a low ink warning.
Printing the Nozzle Check Pattern

Print the nozzle check pattern to determine whether the ink ejects properly from the print head nozzles, and to verify print head alignment. Use this function when printed results are blurred or the color is incorrect.

Note Nozzle check pattern printing can be executed also from the printer itself. With the printer on, load a sheet of A4 or Letter paper in the printer. Hold the RESUME/CANCEL button until the POWER lamp flashes twice.

Windows

1. With the printer on, load a sheet of paper in the printer.

2. Open the Printer Properties dialog box.
   See "Opening the Printer Properties Dialog Box Directly from the Start Menu" on page 17.

3. Print the Nozzle Check Pattern.
   (1) Click the Maintenance tab.
   (2) Click Nozzle Check.
   (3) When the confirmation message is displayed, click OK.
   See "Examining the Nozzle Check Pattern" on page 34.
Printing Maintenance

**Macintosh**

1. With the printer on, load a sheet of paper in the printer.
2. Open the Printer Utility dialog box.
   (1) Select **Page Setup** in the **File** menu.
   (2) Click **Utilities** to open the **Printer Utility** dialog box.
3. Print the Nozzle Check Pattern.
   (1) Select **Test Print** from the pull-down menu.
   (2) Click **Nozzle Check**.
   (3) When the confirmation message is displayed, click **OK**. See "Examining the Nozzle Check Pattern" on page 34.

**Examining the Nozzle Check Pattern**
The nozzle check pattern should appear as follows when ink is discharged properly. Examine the nozzle check pattern output by the printer.

(1) Lines missing here indicate the print head requires cleaning.
   See "Print Head Cleaning" on page 35.

(2) Unevenness in these patterns indicates the print head requires alignment.
   See "Aligning the Print Head" on page 39.
Print Head Cleaning

Clean the print head if you suspect that the nozzles might be clogged. Cleaning the print head consumes ink, so perform print head cleaning only when necessary.

**Windows**

1. Ensure the printer is on.

2. Open the Printer Properties dialog box.
   See "Opening the Printer Properties Dialog Box Directly from the Start Menu" on page 17.

3. Start Print Head Cleaning.
   (1) Click the **Maintenance** tab.
   (2) Click **Cleaning**.
   (3) Select the ink tank for cleaning.
   (4) When a confirmation message is displayed, click **OK**.
Printing Maintenance

Macintosh

1. Ensure the printer is on.

2. Open the Printer Utility dialog box.
   (1) Select Page Setup... in the File menu.
   (2) Click Utilities to open the Printer Utility dialog box.

3. Start Print Head Cleaning.
   (3) Select Cleaning from the pull-down menu.
   (4) When the confirmation message is displayed, click OK.

   Important  Do not perform any other operations until the print head cleaning finishes. This takes about 60 seconds.

   Note  • Print head cleaning can be performed also from the printer itself. Ensure the printer is on. Hold down the RESUME/CANCEL button until the POWER lamp flashes once.
   • After print head cleaning finishes, print the nozzle check pattern to verify that the print head nozzles are clean.

   See “Printing the Nozzle Check Pattern” on page 33.
   If the head is not still clean after print head cleaning, perform print head cleaning three times.
   If the problem persists, perform print head deep cleaning.
   See “Print Head Deep Cleaning” on page 37.
Print Head Deep Cleaning

If print quality does not improve by standard print head cleaning, try print head deep cleaning, which is a more powerful process. Print head deep cleaning consumes ink, so perform this procedure only when necessary.

**Windows**

1. Ensure the printer is on.

2. Open the Printer Properties dialog box.
   See "Opening the Printer Properties Dialog Box Directly from the Start Menu" on page 17.

3. Start Print Head Deep Cleaning.
   (1) Click the **Maintenance** tab.
   (2) Click **Deep Cleaning**.
   (3) Select the ink tank for deep cleaning.
   (4) When the confirmation message is displayed, click **OK**.
Printing Maintenance

Macintosh

1. Ensure the printer is on.

2. Open the Printer Utility dialog box.
   (1) Select Page Setup... in the File menu.
   (2) Click Utilities to open the Printer Utility dialog box.

3. Start Print Head Deep Cleaning.
   (3) Select the ink tank for deep cleaning.
   (4) When the confirmation message is displayed, click OK.

   **Important**  The process takes one or two minutes to complete, so simply wait until the POWER lamp stops flashing.

   **Note**  After print head deep cleaning finishes, print the nozzle check pattern to verify that the print head nozzles are clean.

   See “Printing the Nozzle Check Pattern” on page 33.

   If the head is still not clean after print head deep cleaning, replace the ink tank.

   See “Replacing an Ink Tank” on page 42.

   If ink tank replacement does not resolve the problem, the print head may be worn out. Contact the Customer Care Center.
Aligning the Print Head

Aligning the print head position allows you to print without shifts in the color registration.

**Windows**

1. With the printer on, load a sheet of paper in the printer.
   Move the paper thickness lever to the right position.

2. Open the Printer Properties dialog box.
   See "Opening the Printer Properties Dialog Box Directly from the Start Menu" on page 17.

3. Print the pattern.
   (1) Click the Maintenance tab.
   (2) Click Print Head Alignment.
   (3) When the confirmation message is displayed, click OK.
   (4) After the pattern is printed, click Yes.
Printing Maintenance

4 Align the Print Head.

(1) Look at the print out. From the patterns, select the most even, least irregular patterns and enter the number that corresponds.

(2) Enter the numbers.

(3) Click **OK**.

**Note** If it is difficult to pick up the best pattern on Column F, pick the setting that produces the least noticeable vertical white stripes.

(4) When the confirmation message is displayed, click **OK**.

**Macintosh**

1 Ensure the printer is on.

2 Open the Print Utility dialog box.

(1) Select **Page Setup**... in the **File** menu.

(2) Click **Utilities** to open the **Printer Utility** dialog box.
3 Print the pattern.

(1) Print the pattern.

(2) Align the print head.

(1) Look at the print out. From the patterns, select the most even, least irregular patterns and enter the number that corresponds.

(2) Enter the numbers.

(3) Click Send.

Note If it is difficult to pick up the best pattern on Column F, pick the setting that produces the least noticeable vertical white stripes.

Less noticeable white stripes

More noticeable white stripes
Replacing an Ink Tank

When replacing an ink tank, check the model number very carefully. The printer will not print properly if the wrong ink tank is used, or installed in the incorrect position.

- Black: BCI-15 Black
- Color: BCI-15 Color

Replacing an Ink Tank

When an ink tank runs out of ink, replace it using the following steps.

1. Ensure that the printer is on, and then open the print head cover.
   The print head holder moves to the center.

2. Remove the empty ink tank.
   (1) Push the tab.
   (2) Remove the ink tank.

Important
- Handle ink tanks carefully to avoid staining clothing or the surrounding area.
- Discard empty ink tanks according to the local laws and regulations regarding disposal of consumables.
3 Prepare a replacement ink tank.

(1) Unpack a new ink tank and remove the orange protective cap.

   ![Image of ink tank being unpacked]

**Important**
- Do not re-attach the protective cap once you have removed it.
- Once the protective cap is removed, do not touch the open ink port.

4 Insert the ink tank.

(1) Insert a new ink tank with it slightly slanted.

(2) Push down on the **push** on the ink tank until it clicks into place.

   ![Image of ink tank being inserted]

5 Close the print head cover.

The print head holder moves to the right.

**Note**
- To maintain optimal print quality, use an ink tank within six months of its first use.
- Once an ink tank has been used, do not remove it from the printer and leave it out in the open. This will cause the ink tank to dry out and the printer may not function properly if it is reinstalled.
- Color ink consumption may occur even when black-and-white or grayscale printing is specified. Color ink is consumed in the head cleaning and deep cleaning, which are necessary to maintain the printer's capabilities.
- When an ink tank runs out of ink, replace the ink tank with a new one immediately. If printing is continued with no ink in the ink tank, a trouble may occur.
Printing Maintenance

■ Resetting the Ink Counter

When an ink tank is replaced, the ink counter must be reset. The low ink warning is only displayed properly if the ink counter is reset.

Message Prompting Confirmation of Ink Tank Replacement

When printing is started after replacement of a black or color ink tank, a confirmation message is displayed to ask whether the ink tank has been replaced. After replacement of an ink tank, reset the ink counter following the procedure described below.

Note Infrared transmission is performed in Windows XP or Windows 2000, the printer will not output the message asking for confirmation of ink tank replacement. This is why it is important to open the printer driver’s Properties dialog box and manually reset the ink tank counter in the Maintenance tab whenever an ink tank is replaced.

1 Check the message, and click Yes or OK.

When using Windows: When using Macintosh:

2 Select the replaced ink tank, and click OK.

The dialog box allows you to select the replaced ink tank. When both black and color ink tanks have been replaced, select both Black and Color.

If you have not replaced the ink tank with a new one, click Cancel.

When using Windows: When using Macintosh:
Important  Mistakenly clicking No or Cancel, instead, will prevent the Ink Low alert from functioning properly. If this happens, manually reset the ink counter according to the following procedure.

Resetting the Ink Counter in Printer Properties dialog box:

- When using Windows:
  1. Open the Printer Properties dialog box and click the Maintenance Tab.
  2. Click Ink Counter Reset.
  3. Select the newly installed ink tank, then click OK.

- When using Macintosh:
  1. Open the Page Setup dialog box.
  2. Click Utilities and select Low Ink Warning Setting.
  3. Click Ink Counter Reset.
  4. Select the newly installed ink tank, then click OK.
How Low Ink Warning Setting Works

The low ink warning notifies you of low ink levels during printing. The Low Ink Warning has been preset to be automatically displayed.

When you reset the ink counter, it will assume the ink tank is full regardless of how much ink actually remains. The reset is the only way to match the counter value with an actual ink volume. Reset the ink counter when installing a new ink tank.

Low Ink Warning Display

The '!' shows a low ink level in the ink tank.

How to Display Low Ink Warning Correctly

- Reset the ink counter every time you install a new ink tank

  The ink counter cannot work correctly unless you synchronize it with the actual ink level. The ink counter can only be adjusted when it is reset at the time a new ink tank is installed.

- Do not reset the ink counter of an ink tank in use.

  Synchronization of the counter and the actual ink level will not work properly.

  **Important** If you did not reset the counter when you installed the current ink tanks, the low ink warning may not function correctly, until the next time you replace the ink tanks. Also, ensure you treat both counters separately.

  Refer to "Low Ink Warning Accompanied by Ink Tank Icon With '?'" on page 55.
Troubleshooting

Troubleshooting usually falls into one of the following categories. In this chapter you will find the most common printing problems. Refer to the User's Guide for additional information on topics not covered in this section.

• "Cannot Install the Printer Driver" on page 48
• "Print Quality is Poor or Contains Errors" on page 49
• "Troubleshooting Printer Hardware" on page 50
• "Paper Does Not Feed Properly" on page 51
• "Handling Error Messages" on page 52
• "An Error Message Appears on the Screen" on page 53
• "Windows Cannot Print Properly through Infrared Transmission" on page 56
• "Handling Error Messages While Using the Digital Camera" on page 58

**Note** If you encounter any problem during installation or operation of your printer, quickly scan all topics to find a solution. If the problem persists, contact the Customer Care Center at (757) 413-2448.

When Error Occurs

The BJ Status Monitor opens and displays a message. Take the appropriate action described in the message. The message may vary depending on your operating system.

![Image of BJ Status Monitor]

- When using Windows Me, Windows 98 or Windows 95, click the **Guide** tab and follow the on-screen instructions.
- When using the infrared transmission feature in Windows XP or Windows 2000, the BJ Status Monitor is not displayed.
## Troubleshooting

### Cannot Install the Printer Driver

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause</th>
<th>Try This</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cannot Install the Printer Driver</td>
<td>Installation procedure not followed correctly</td>
<td>Follow the Easy Setup Instructions for proper printer driver installation. If the installer was forced to terminate due to an error, remove the CD-ROM from the CD-ROM drive and restart your computer. Reinstall the printer driver. If this problem persists, contact the Customer Care Center.</td>
</tr>
<tr>
<td>Other applications running in the background</td>
<td>Other applications opened on your computer can interfere with the installation routine. Close all open software applications before reinstalling the printer driver. Refer to the Easy Setup Instructions for installing the printer driver.</td>
<td></td>
</tr>
</tbody>
</table>
| Installation does not start automatically when the CD-ROM is inserted into the drive | Windows | If printer driver installation did not start automatically when you inserted the CD-ROM into the CD-ROM drive:  
1. Click Start and select My Computer.  
2. Double-click the CD-ROM icon.  
For non-XP Windows, open the My Computer window, and then double-click the CD-ROM icon.  
Double-click the CD-ROM icon on your desktop to start installation. |
| Installation CD-ROM not working properly | Windows | Confirm that there are no problems with the Setup Software & User's Guide CD-ROM. Use Windows Explorer to confirm that the CD-ROM can be read. Confirm that the CD-ROM icon is displayed on the desktop. If there is any problem with the CD-ROM, contact the Customer Care Center. |
| Unable to proceed beyond the Printer Port Screen | Windows | Reinstall the printer driver:  
• When connecting with a USB cable  
1. Click Cancel.  
2. When the Terminate Installation screen is displayed, click OK.  
3. Click Exit, then remove the CD-ROM.  
4. Turn the printer off.  
5. Restart the computer.  
6. Carefully follow the procedures described in the Easy Setup Instructions and reinstall the driver.  
• When connecting through infrared transmission  
2. Select a port.  
   - Windows XP/Windows 2000: [IR]  
   - Windows Me/Windows 98/Windows 95: [LPT3]  
   A port name other than [LPT3:] may be displayed depending on the type of your computer.  
3. Click Next. |

## Troubleshooting Printer Hardware

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause</th>
<th>Try This</th>
</tr>
</thead>
<tbody>
<tr>
<td>Printer Does Not Start or Printer Stops During Print Jobs</td>
<td>Print head has overheated due to long periods of continuous printing</td>
<td>Stop printing and turn the printer off for at least 15 minutes to allow the print head to cool down. The print head tends to overheat when printing continuously for long periods of time. The print head is designed to automatically pause at line breaks before resuming printing in order to cool down. Caution: The area around the print head can become extremely hot during extended print operation. Always avoid touching the print head and its peripheral components.</td>
</tr>
<tr>
<td>Printing high-resolution photographs and graphics</td>
<td>Wait until the print job finishes. The POWER lamp flashes green while the print data is being processed. Printing photographs and high-density graphics can take time.</td>
<td></td>
</tr>
<tr>
<td>Printer cable is too long</td>
<td>Avoid using USB cables longer than 16.4 feet.</td>
<td></td>
</tr>
<tr>
<td>There may be problems in your operating system</td>
<td>Restart your computer. It may solve the problem. Delete an undesired print job if there is any. Use BJ Status Monitor in Windows or BJ Print Monitor in Macintosh for the deletion.</td>
<td></td>
</tr>
<tr>
<td>The infrared transmission distance or the infrared port angle is incorrect</td>
<td>Place the printer at a distance of 80 cm from the computer or PDA. Ensure that the infrared ports are at a proper angle and there are no obstacles between them. Retry printing. The allowable distance and angle for infrared transmission depend on the functions of the computer or PDA in addition to environmental conditions. See “Printing Data through Infrared Transmission” on page 11.</td>
<td></td>
</tr>
<tr>
<td>The message “Cannot write to the XXX port” is displayed</td>
<td>If the infrared port is not selected as the print port of the printer driver, the message “Cannot write to the xxx port” (xxx is the name of the printer port) is displayed and printing does not start. Select the IR port (LPT3 port in Windows Me/Windows 98/Windows 95) and retry printing. See “Printing Data through Infrared Transmission” on page 11.</td>
<td></td>
</tr>
</tbody>
</table>
## Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause</th>
<th>Try This</th>
</tr>
</thead>
</table>
| Paper Does Not Feed Properly         | Incorrect page size selected                                                                      | Verify that the page size setting matches the size of the paper loaded in the printer:  
- Check the Paper Size setting from within your application to ensure that it matches the size of the paper loaded.  
- Check the Page Setup tab in the Printer Properties dialog box (for Windows) or the Page Setup dialog box (for Macintosh) to ensure that it matches the size of the paper loaded.  |
|                                      | Not enough free space on hard disk                                                              | Your operating system may be out of free disk space. Check the available space on your computer's hard disk.                                                                                           |
|                                      | During infrared transmission, infrared rays were interrupted or another infrared transmission unit is operating nearby | If infrared transmission between the infrared ports of the printer and computer or PDA is interrupted by any obstacle for ten seconds or longer during printing, the paper on which data is being printed is ejected and the printer is reset. Remove the obstacle and retry printing.  
If another infrared transmission unit is operating nearby, printing can stop due to interference. When printing a document through infrared transmission, do not operate other infrared transmission units like a television remote control.  
See “Printing Data through Infrared Transmission” on page 11.                                                                                     |
| Paper Does Not Feed Properly         | Inappropriate paper type used                                                                     | • Check to see if the paper you are printing on is too thick or curled. See “Print Media to Avoid” on page 3.  
• Check if the paper exceeds the load limit mark. If it exceeds, load less paper. See “Load the paper.” on page 4.                                                                                   |
|                                      | Paper feed roller is dirty                                                                        | Follow the steps described below to clean the paper feed rollers.  
If envelopes or post cards do not feed properly, even after correcting any paper curl, clean the paper feed roller.  
1. Ensure the printer is on and there is no paper loaded in the printer.  
2. Hold the RESUME/CANCEL button down and release after the POWER lamp flashes three times. The paper roller rotates as it cleans. Repeat this cleaning operation one more time.  
3. Load a sheet of plain paper in the printer.  
4. Hold the RESUME/CANCEL button down and release after the POWER lamp flashes three times, then feed the sheet of paper.                                                                                   |
| Paper Jams                           |                                                                                                  | 1. Gently pull the jammed paper out of the sheet feeder slot or the paper output slot, whichever is easier.  
• If the paper tears and some of it is left in the printer, turn the printer off, then open the print head cover and remove the piece of paper. Do not touch internal parts in the printer. If you cannot reach or remove the torn paper, do not attempt to disassemble the printer yourself. Contact the Customer Care Center.  
• If you cannot extract the paper, turn the printer off, and then turn it back on. The remaining paper will be ejected automatically.  
2. Close the print head cover and reload the paper into the sheet feeder, then press the RESUME/CANCEL button on the printer.  

Handling Error Messages

When a printer error occurs, the POWER/ERROR lamp flashes. The number of flashes indicates the type of error that has occurred. Count the flashes and take the appropriate action to correct the error.

<table>
<thead>
<tr>
<th>Number of Flashes</th>
<th>Possible Cause</th>
<th>Try This</th>
</tr>
</thead>
<tbody>
<tr>
<td>Two flashes</td>
<td>Printer is out of paper</td>
<td>Reload paper and press the RESUME/CANCEL button.</td>
</tr>
<tr>
<td>Three flashes</td>
<td>Paper jam</td>
<td>If a paper jam occurs, clear the jammed paper, reload paper in the printer, then press the RESUME/CANCEL button. See “Paper Jams” on page 51.</td>
</tr>
<tr>
<td>Six flashes</td>
<td>Print head not installed</td>
<td>Install print head.</td>
</tr>
<tr>
<td>Seven flashes</td>
<td>Defective print head</td>
<td>Press the POWER button to turn off the printer, and press the POWER button again to turn on the printer. If the same error occurs, the print head may be defective. Contact the Customer Care Center.</td>
</tr>
<tr>
<td>Eight flashes</td>
<td>Waste ink tank almost full</td>
<td>The printer has a built-in waste ink tank to hold the ink consumed during print head cleaning. Eight flash indicates that this tank is nearly full. Press the RESUME/CANCEL button to clear the error so printing can continue. Contact the Customer Care Center.</td>
</tr>
<tr>
<td>Nine flashes</td>
<td>Ink tank is not installed</td>
<td>If a black or color ink tank is not installed, install it. If all ink tanks are installed, push the [PUSH] mark of each ink tank to see if it has snapped firmly into place.</td>
</tr>
<tr>
<td>Ten flashes</td>
<td>Low battery level</td>

### Macintosh

- **Error No.: X202**

  - Not enough memory
  - Increase available memory by closing any other applications currently running.

- **Error No.: X203**

  - Printer driver fault
  - Uninstall, then reinstall printer driver. Refer to the **User’s Guide** for instructions on how to uninstall the printer driver.

- **Error No.: X300**

  - Printer not ready
  - If the **POWER** lamp is off, turn the printer on. If the **POWER** lamp is flashing green, the printer is initializing. Wait until the **POWER** lamp stops flashing.

  - Printer not properly connected
  - Ensure the printer is securely connected to the computer.

  - Note
  - If you are using switching hub or other device, disconnect the printer and reconnect it directly to the computer and try printing again. If successful, the problem may have been with the device. There could also be a problem with the cable(s). Replace the cable(s) and try printing again.

- **Error No.: X302**

  - Printer not selected in chooser
  - 1. From the **Apple** menu, select **Chooser**.
  - 2. Click the **i70** icon and ensure that the i70 is selected as the target connection. If not, select it.

  - Note
  - If the problem persists, delete all unnecessary documents from the Extensions and Control Panels folder.

- **Error No.: X303**

  - A message asking whether the ink tank has been replaced appears
  - **Windows**
    - If the ink tank has been removed, select **Yes** to reset the ink counter. If the ink tank has not been removed, select **No**.
  - **Macintosh**
    - If the ink tank has been replaced, click **Cancel** on the dialog box described above. You can choose the option to disable the display of this confirmation message.

- **Error No.: X304**

  - The ink tank has been removed but a new ink tank has not been installed
  - **Windows**
    - 1. Ensure the printer is on and open the **Printer Properties** dialog box.
    - 2. On the **Maintenance** tab, click **Low Ink Warning Setting**.
    - 3. Clear a check box of **Display a confirmation message of Ink tank replacement** and click **Send**.
  - **Macintosh**
    - 1. Ensure the printer is on and open the **Page Setup** dialog box.
    - 2. Click **Utilities** to open the **Printer Utility** dialog box.
    - 3. Select **Remaining Ink level Setting** from the pull-down menu and click **Low Ink Warning Setting**.
    - 4. Clear a check box of **Display a confirmation message of Ink tank replacement** and click **Send**.
## Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause</th>
<th>Try This</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Ink Warning Accompanied by Ink Tank Icon With '?'</td>
<td>Failure to reset ink counter when installing new ink tank</td>
<td>The ink tank level accompanied by the ink tank icon with the '?' indicates ink tank is not synchronized with its ink counter.</td>
</tr>
</tbody>
</table>

### Windows

1. Ensure the printer is on and open the **Printer Properties** dialog box.
2. On the **Maintenance** tab, click **Low Ink Warning Setting** icon.
3. Clear a check box of **Display low ink warning off** and click **Send**.

### Macintosh

1. Ensure the printer is on and open the **Page Setup** dialog box.
2. Click **Utilities** to open the **Printer Utility** dialog box.
3. Select **Remaining ink level setting** from the pull-down menu and click **Low Ink Warning Setting**.
4. Clear a check box of **Display low ink warning off** and click **Send**.

---

### Note

- A '?' is displayed next to the Ink counter between the time one ink tank is removed and the ink counter is reset when the next one is installed. Display of the '?' can be disabled by unchecking the **Display low ink Warning** check box.

- Always be sure to reset the ink counter in your printer driver when you replace ink tank. See "Resetting the Ink Counter" on page 44.
### Troubleshooting

## Windows

### Cannot Print Properly through Infrared Transmission

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause</th>
<th>Try This</th>
</tr>
</thead>
</table>
| Cannot Print Properly through Infrared Transmission | The required driver is not installed | • When using other than Windows 95, Windows 98 or later must have been preinstalled and Microsoft Infrared Communication Driver must be installed in the computer.  
• When Windows 95 is used, Microsoft Infrared Communication Driver Version 2.0 must be installed in the computer.  
See "Print Data through Infrared Transmission" on page 11. |
| | The infrared communication driver is inactive - Windows 98 | Start the infrared monitor and check whether the infrared transmission driver is active.  
1. Click **Start**, **Settings**, and **Control Panel.**  
2. Double-click **Infrared Monitor.**  
3. Click the **Options** tab.  
4. Check the **Enable infrared communication** check box.  
**Note** When the transmission speed is set to 4 Mbps, operation of the printer may become unstable depending on the type of your computer. In this case, check the Limit connection speed to check box and click ▼ to select [115.2kbps]. |
| | The installation place, distance, and/or angle is improper | Check the installation place, distance, or angle according to the Section "Print Data through Infrared Transmission." |
| | Your computer is not a PC/AT compatible machine or the infrared port used does not conform to IrDA 1.1 | The infrared transmission function of this printer can be used only with the PC/AT compatible machine or the PDA that has an infrared port conforming to IrDA 1.1. Other computers and PDAs cannot be used for printing through infrared transmission. |
## Troubleshooting

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Cause</th>
<th>Try This</th>
</tr>
</thead>
</table>
| Cannot Print Properly through Infrared Transmission (continued) | The selected printer port is wrong | Check the printer port setting.  
1. Open the printer driver Properties dialog box from the Start menu.  
2. Click the Details tab to ensure that the infrared port is selected as the destination port.  
   • When using Windows XP or Windows 2000  
   The port [IR] is used as the infrared transmission port.  
   • When using Windows Me, Windows 98 or Windows 95  
   The infrared port name is followed by the text "Infrared Printing (LPT) Port" which is enclosed in parentheses.  
   Example: LPT3: (Infrared Printing (LPT) Port)  
* A port other than the LPT3 port may be selected depending on the computer setting. |

Note | To check whether the printer is connected to the computer through infrared transmission, follow the procedure below.  
• When using Windows XP, Windows 2000 or Windows Me  
1. When the infrared port of the computer or PDA is moved close to the infrared port of the printer, the Wireless Link icon appears on the task bar.  
2. Place the cursor on the Wireless Link icon.  
   If "i70 is in range" is displayed, the printer is ready for printing.  
   If the name of another unit is displayed, change its orientation or turn it off.  
   • When using Windows 98 or Windows 95  
   Start the infrared monitor to check whether Infrared Communication Driver is active.  
1. Click Start, then click Settings and Control Panel.  
2. Double-click the Infrared icon.  
3. Check whether "i70 is in range" is displayed on the Status tab.  
   If the name of another unit is displayed, change its orientation or turn it off. |

#### Handling Error Messages While Using the Digital Camera

The following messages may be displayed on the digital camera or digital video camcorder when images are printed directly from them. Correct the error according to the procedure below.

<table>
<thead>
<tr>
<th>Camera Error Message</th>
<th>Possible Cause</th>
<th>Try This</th>
</tr>
</thead>
<tbody>
<tr>
<td>Printer in use</td>
<td>Images are printed from the computer.</td>
<td>Wait until printing ends. The printer automatically starts printing the images from the camera after completing the current printing.</td>
</tr>
<tr>
<td>Printer warming up</td>
<td>The printer is warming up.</td>
<td>Wait until warm-up ends. When it is ready, the printer starts printing automatically.</td>
</tr>
<tr>
<td>No Paper</td>
<td>No paper is loaded.</td>
<td>Load the paper in the printer and press the RESUME/CANCEL button on the printer.</td>
</tr>
<tr>
<td>Paper Jam</td>
<td>A paper jam occurs in the printer.</td>
<td>Remove the jammed paper, load new media, and press the RESUME/CANCEL button.</td>
</tr>
<tr>
<td>Printer cover open</td>
<td>The print head cover is open.</td>
<td>Close the print head cover.</td>
</tr>
<tr>
<td>No printhead</td>
<td>No printhead is installed. (The POWER lamp on the printer flashes six times.)</td>
<td>Install a printhead according to the Easy Setup Instructions.</td>
</tr>
<tr>
<td></td>
<td>The printhead is defective. (The POWER lamp on the printer flashes seven times.)</td>
<td>Contact the Customer Care Center.</td>
</tr>
<tr>
<td>Waste tank full</td>
<td>The waste tank is nearly full.</td>
<td>Press the RESUME/CANCEL button on the printer to recover from the error. Contact the Customer Care Center as soon as possible.</td>
</tr>
<tr>
<td>No Ink</td>
<td>An ink tank is not installed.</td>
<td>Install an ink tank. Be sure to press the [PUSH] of the ink tank to ensure it is firmly seated.</td>
</tr>
</tbody>
</table>
| Printer error        | The battery level is low. (The POWER lamp on the printer flashes ten times.) | Follow the procedure below.  
1. Turn off the printer.  
2. Connect the supplied universal AC adapter or load a charged battery.  
3. Turn on the printer. |
|                      | A printing error has occurred. (The POWER lamp on the printer flashes alternately orange and green.) | Turn the printer off and on again. If the error persists, contact the Customer Care Center. |
| Media type error     | The paper selected is not compatible with this printer. | Cancel printing from the digital camera and select a compatible paper type in the Print Style menu. |
**Troubleshooting**

**Note**
- If the operation time or data transmission time is too long when the digital camera or digital video camcorder is connected to this printer, a communication time error may occur and no more images can be printed. If this error occurs, disconnect the cable, connect it again, and retry the operation.
- Images can be printed directly from Canon "Bubble Jet Direct" compatible digital cameras and digital video camcorders connected to this printer.
- A low ink warning is not displayed on the digital camera's viewer.
- After replacing an ink tank, cancel the connection with the digital camera and reset the ink counter by operating the computer. See **"Resetting the Ink Counter"** on page 44
- If the ink counter is not reset, the remaining ink level may not be displayed properly.
- If the connected digital camera or digital video camcorder does not support "Bubble Jet Direct", the **POWER** lamp on the printer stays lit in orange. If this happens, disconnect the connection cable and turn the printer off and on again.
- To disconnect the cable connected between the digital camera and printer, follow the procedure below.
  1. Disconnect the cable from the printer.
  2. Turn off the digital camera.
  3. Disconnect the cable from the digital camera.
     When disconnecting the cable, be sure to hold the connector by its sides.
- For more details, also refer to the user's manual for the digital camera or digital video camcorder.

Appendix

Installing the Printer Driver when using Mac OS 9.x

When using other than Mac OS X (Mac OS 8.6 or later), install the printer driver following the procedure below. Screen shots may differ depending on the operating system used.

1. Turn on your Mac and insert the Setup Software & User’s Guide CD-ROM.
   
2. Open the Printer Driver folder on the CD-ROM, then double-click the Installer icon.

3. Read the License Agreement and click Accept, if you agree.

4. Click Install.
   The printer driver will load automatically.

5. If the message “No other applications can be running...” displays, click Continue.

6. When the “Installation was successful” screen displays, click Restart.

7. From the Application folder, double-click on the software to be installed.
   Follow the on-screen instructions.

8. When the “Installation has Finished” screen appears, click OK.

9. When prompted, restart your computer.

10. Select the Apple menu, then Chooser.

11. Click the i70 icon in the Chooser.

12. Close the Chooser.

**Note** Register your product at www.registercanon.com to ensure product support.

13. To insure highest quality output, continue with Step 7 Align the Printhead on the Easy Setup Instructions.
User’s Guide Table of Contents

Your printer’s User’s Guide offers detailed information on the following topics.

How to Use This Manual

Printer Parts and Their Function

Useful Printing Techniques
- Printing with Borderless Printing
- Reducing Noise from Images Recorded with Digital Camera
- Achieving Vivid Reproduction of Images with Lots of Greens and Blues
- Printing with Color and Brightness Automatically Optimized
- Adjusting Print Quality
- Smoothing the Rough Edges of Certain Images
- Automatically Resizing the Image to Fit the Page
- Resizing the Image by Selecting the Scaling Ratio
- Printing Multiple Pages on a Single Page
- Enlarge a Document by Printing it on Multiple Pages
- Printing Multiple Pages for Assembly into a Booklet
- Printing on Both Sides of the Page
- Printing Stamped Messages on Documents
- Printing Background Images on Documents
- Adding Illustrated Effect to Documents
- Printing Entire Image in Single Color
- Printing in Grayscale
- Reversing the Page Printing Order
- Printing on Nonstandard Size Paper
- Reducing the Sound of Printer Operation
- Registering Printer Driver Settings

Printing Media
- Compatible Media Types
- Envelopes
- High Resolution Paper

Options

The following options are available for this printer. Confirm the product names when you purchase the options.

- **Canon Portable Kit LK-51**
  This option is a battery kit that consists of a battery charger and a lithium-ion battery. Use this kit together with the printer in locations where there is no power supply (during business trip, etc.).

- **Canon Li-ion Battery LB-51**
  This option is available as an additional lithium-ion battery for the portable kit LK-51.

- **Universal Adapter AD-370U**
  This option is available as an additional universal AC adapter. Using optional cables for various regions allows you to use the printer at various mains voltages without using voltage conversion adapters.

- **Canon Cradle Kit CK-51**
  This option is a kit that consists of a stand dedicated to this printer and a portable kit LK-51 (battery charger and lithium-ion battery). The lithium-ion battery can be charged with the printer placed upright.
Appendix

Specifications

Printer

- Printing resolution: 4800 X 1200 dpi. max. (Ink droplets can be placed in a pitch of 1/4800 inch at minimum.)
- Print speed *
  *Print speed may vary with the content of the document and the processing speed of the host computer.
  - Black printing
    - Draft: 13 ppm
    - Standard: 11 ppm
  - Color printing
    - Draft: 9 ppm
    - Standard: 4.9 ppm
- Print width: 203.2 mm max. (8.0 in)
  (for Borderless Printing: 216 mm / 8.5 in)
- Resident print control mode: Canon extended mode
- Receive buffer: 64 KB
- Interface: USB 2.0 Full Speed / IrDA Ver.1.1
- Acoustic noise level: Approx. 40 dB (A) (in the highest print quality mode)
- Operating environment: Temperature: 5 to 35°C (41 to 95°F)
  Humidity: 10 to 90%RH (no condensation)
- Storage environment: Temperature: 0 to 40°C (32 to 95°F)
  Humidity: 5 to 95% RH (no condensation)
- Power supply: AC 100-127 V, 50/60 Hz
  AC 220-240 V, 50/60 Hz
- Power consumption:
  - Standby: Approx. 1 W (100 / 120 V), Approx. 2W (240 V)
  - Printing: Approx. 12 W (100 / 120 V), Approx. 13W (240 V)
- Dimensions (with the paper rest and paper output tray retracted): 12.19 (W) X 6.84 (D) X 2.04 (H) in

Print Quality

Standard / Index (DPOF only)

Trimming

Supported (The function depends on the camera connected)

DPOF Functions

Ver. 1.00 compatible (Index print, number of copies, select images,
print special characters (date/image no.))

BJ Printer Driver Systems Requirements

Windows

- Use a computer on which Windows XP, Windows 2000,
  Windows Me, Windows 98, or Windows 95 can operate.
- USB interface or IrDA Ver.1.1
- Available hard-disk space for printer driver installation
  Windows XP/Windows 2000: 50MB
  Windows Me/Windows 98: Windows 95: 15MB
- USB operation can only be guaranteed on a PC with pre-
  installed Windows XP, Windows 2000, Windows Me, or
  Windows 98. (This includes Windows XP, Windows 2000, or
  Windows Me upgraded from pre-installed Windows 98 or later)
- When using Windows 95, you can print through infrared
  transmission only.

Mac (Macintosh 8.6-9.x)

- Use a Macintosh series computer equipped with USB
  interface on which Mac OS 8.6-9.x can operate.
- 30MB of available hard-disk space for printer driver
  installation
- Use a Macintosh series computer equipped with USB
  interface on which Mac OS X v10.1 or later can operate.
  (The Setup Software & User’s Guide CD-ROM cannot be
  read in Mac OS X v10.0.x)
- 100MB of available hard-disk space for printer driver
  installation
- The following functions are not supported:
  - Borderless printing (will be supported with Mac OS X
    v10.2 or later version)
  - Shared printer in the network (will be supported as an
    OS function with Mac OS X v10.2 or later)
  - Duplex Printing
  - Photo Optimizer PRO
  - Printing on nonstandard size paper (will be supported
    with Mac OS X v10.2 or later)
- If you want to use an application, first install the
  application contained in the Mac OS X folder.

Additional Systems Requirements for User's Guide

- Pentium®, 75 MHz equivalent or higher processor (Pentium®, 133MHz equivalent or higher processor recommended)
- 2x or higher CD-ROM drive (4x or higher recommended)
- 20 MB of available hard-disk space
- Microsoft Internet Explorer 5.0 or later
## Appendix

### Safety Precautions

Please read the safety warnings and cautions provided in this manual to ensure that you use your printer safely. Do not attempt to use printer in any way not described in this manual.

**Warning**  
This product emits low level magnetic flux. If you use a cardiac pace maker and feel abnormalities, please be away from this product and consult your doctor.

**Warning**  
You may cause an electric shock/fire or damage the printer if you ignore any of these safety precautions.

<table>
<thead>
<tr>
<th>Choosing a location</th>
<th>Do not place the printer close to flammable solvents such as alcohol or thinners.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power supply</td>
<td>Never attempt to plug in or unplug the printer from the power supply when your hands are wet.</td>
</tr>
<tr>
<td></td>
<td>Always push the plug all the way into the power outlet.</td>
</tr>
<tr>
<td></td>
<td>Never damage, modify, stretch or excessively bend or twist the power cord. Do not place heavy objects on the power cord or universal AC adapter.</td>
</tr>
<tr>
<td></td>
<td>Never plug the printer into a power socket that is shared with other equipment (extension lead/cord, 2- or 3-way adapter, etc.).</td>
</tr>
<tr>
<td></td>
<td>Never use the printer if the power cord is bundled or knotted.</td>
</tr>
<tr>
<td></td>
<td>If you detect smoke, unusual smells or strange noises around the printer, immediately unplug the printer at the power supply and call for service.</td>
</tr>
<tr>
<td></td>
<td>Periodically, unplug the printer and use a dry cloth to wipe off any dust or dirt collected on the plug and the power outlet. If the printer is placed at a location exposed to a lot of dust, smoke, or high humidity, the dust collected on the plug absorbs moisture and may cause insulation failure and fire.</td>

<td>The printer contains high-voltage components. Never attempt any maintenance procedure not described in this guide.</td>
</tr>
</tbody>
</table>
### Appendix

| Working around the printer | Do not use flammable sprays near the printer.  
This could cause a fire or electric shock if the spray comes into contact with electrical components inside the printer. |
| Caution | You may cause injury or damage the printer if you ignore any of these safety precautions. |

| Choosing a location | Do not install the printer in a location that is unstable or subject to excessive vibration.  
Do not install the printer in locations that are very humid or dusty, in direct sunlight, outdoors, or close to a heating source.  
To avoid the risk of fire or electric shocks, install the printer in a location with an ambient temperature range of 5°C to 35°C (41°F to 95°F) and humidity of 10% to 90% (condensation free).  
Do not place the printer on a thick rug or carpet. |
| Power supply | Ensure that the area around the power outlet is kept clear at all times so you can easily unplug the power cord if necessary.  
Never remove the plug by pulling on the cord.  
Do not use an extension lead/cord.  
Never use a power supply source other than the one rated for the printer in the country where you purchased the printer.  
**AC 100-127 V, 50/60 Hz**  
**AC 220-240 V, 50/60 Hz** |
| Working around the printer | Never put your hands or fingers in the printer while it is printing.  
Do not carry or store the printer with the round side down.  
A failure can result.  
Do not place metal objects (paper clips, staples, etc.) or containers of flammable solvents (alcohol, thinners, etc.) on top of the printer.  
If any foreign object (mental or liquid) fall into the printer, unplug the power cord and call for service. |
| Print heads and ink tanks | For safety reasons store print heads and ink tanks out of the reach of small children.  
If a child ingests any ink, consult a doctor immediately.  
Do not shake print heads or ink tanks.  
Ink may leak out and stain clothing or the surrounding area. |
| Universal AC Adapter | When you pack the universal AC adapter for travel or storage, never wrap the cord around the body of AC adapter to prevent the cord from splitting or separating from the body of the AC adapter and causing a short circuit. |
Regulatory Information

Color Printer Model: K10222 (I70)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of a shielded cable is required to comply with Class B limits in Subpart B of Part 15 of the FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Canadian Radio Interference Regulations

This digital apparatus does not exceed Class B limits for radio noise emissions from a digital apparatus as set out in the interference-causing equipment standard entitled “Digital Apparatus”, ICES-003 of the Industry Canada.

The limited warranty set forth below is given by Canon U.S.A., Inc. (“Canon USA”) with respect to the new or refurbished Canon-brand product (“Product”) packaged with this limited warranty, when purchased and used in the United States only.

The Product is warranted against defects in materials and workmanship under normal use and service (a) for a period of one (1) year from the date of original purchase when delivered to you in new condition in its original container or (b) for 90 days from the date of original purchase for refurbished Products. Defective parts or a defective Product returned to a Canon USA repair facility or a Canon USA Authorized Service Facility (“ASF”), and proven to be defective upon inspection, will be repaired, exchanged for new or comparable rebuilt parts, or exchanged for a refurbished Product, as determined by the Canon USA repair Facility or the ASF. Warranty repair or replacement shall not extend the original warranty period of the Product. A dated proof of purchase is required at the time of warranty service. A copy of your dated bill of sale will satisfy this requirement. This warranty does not cover any accessories, or any consumables, such as paper or ink cartridges, as to which there shall be no warranty or replacement.

This limited warranty shall only apply if the Product is used in conjunction with compatible computers, peripheral equipment and software. Canon shall have no responsibility for such items except for compatible Canon-brand peripheral equipment covered by a separate warranty (“Separate Warranty”). Repairs of such Canon brand peripheral equipment shall be governed by the terms of the Separate Warranty. Non-Canon brand peripheral equipment and software that may be distributed with the Product are sold “as is” and without warranty of any kind by Canon, including any implied warranty regarding merchantability or fitness for a particular purpose, and all such warranties are disclaimed. The sole warranty, if any, with respect to such non-Canon brand items is given by the manufacturer or producer thereof.

This limited warranty covers all defects encountered in normal use of the Product and does not apply in the following cases:

(a) Loss of or damage to the Product due to abuse, neglect, mishandling, improper packaging by you, alteration, accident, electrical current fluctuations, improper use, failure to follow operating or maintenance instructions, or environmental conditions prescribed in Canon USA’s user’s manual or other documentation, or services performed by someone other than a Canon USA repair facility or ASF. Without limiting the foregoing, dropping the Product, scratches, and abrasions will be presumed to have resulted from misuse, abuse or failure to operate the Product as set forth in the user’s manual or other documentation for the Product.

(b) Use of parts or supplies (other than those sold by Canon USA) that cause damage to the Product or cause abnormally frequent service calls or service problems.

(c) If the Product has had it serial number or dating defaced, altered or removed.

ANY SYSTEM SOFTWARE (WHETHER FACTORY LOADED ON THE PRODUCT OR CONTAINED ON THE SOFTWARE DISKETTES OR CD-ROM’S ENCLOSED WITH, OR ACCOMPANYING, THE PRODUCT), AND ANY UTILITY SOFTWARE, DISTRIBUTED WITH OR FOR THE PRODUCT, IS SOLD “AS IS” AND WITHOUT WARRANTY BY CANON. THE SOLE WARRANTY WITH RESPECT TO SUCH SOFTWARE IS CANON’S LICENSE AGREEMENT DISTRIBUTED THEREWITH, INCLUDING ANY LIMITATIONS AND DISCLAIMERS THEREON. PLEASE CONTACT CANON IMMEDIATELY IF YOU HAVE NOT RECEIVED A COPY OF THE SOFTWARE MANUFACTURER’S LICENSE AGREEMENT.

NO IMPLIED WARRANTY, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, APPLIES TO THE PRODUCT AFTER THE APPLICABLE PERIOD OF THE EXPRESS LIMITED WARRANTY STATED ABOVE, AND NO OTHER EXPRESS WARRANTY OR GUARANTY, EXCEPT AS MENTIONED ABOVE, GIVEN BY ANY PERSON OR ENTITY WITH RESPECT TO THE PRODUCT SHALL BIND CANON USA, OR ITS ASF. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU. CANON USA SHALL NOT BE LIABLE FOR LOSS OF REVENUES OR PROFITS, INCONVENIENCE, EXPENSE FOR SUBSTITUTE EQUIPMENT OR SERVICE, STORAGE CHARGES, LOSS OR CORRUPTION OF DATA, OR ANY OTHER SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES CAUSED BY THE USE, MISUSE, OR INABILITY TO USE THE PRODUCT REGARDLESS OF THE LEGAL THEORY ON WHICH THE CLAIM IS BASED, AND EVEN IF CANON USA OR ITS ASF HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. NOR SHALL RECOVERY OF ANY KIND AGAINST CANON USA OR ITS ASF BE GREATER IN AMOUNT THAN THE PURCHASE PRICE OF THE PRODUCT CAUSING THE ALLEGED DAMAGE. WITHOUT LIMITING THE FOREGOING, YOU ASSUME ALL RISK AND LIABILITY FOR LOSS, DAMAGE OR INJURY TO YOU AND YOUR PROPERTY AND TO OTHERS AND THEIR PROPERTY ARISING OUT OF THE POSSESSION, USE, MISUSE, OR INABILITY TO USE THE PRODUCT SOLD BY CANON USA NOT CAUSED SOLELY AND DIRECTLY BY THE NEGLIGENCE OF CANON USA, OR ITS ASF. (SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE EXCLUSION OR LIMITATION MAY NOT APPLY TO YOU.) THIS LIMITED WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE ORIGINAL PURCHASER OF THE PRODUCT OR THE PERSON FOR WHOM IT WAS PURCHASED AS A GIFT, AND STATES YOUR EXCLUSIVE REMEDY.
Canon offers a full range of customer technical support* options:

- For interactive troubleshooting, e-mail technical support, the latest driver downloads and answers to frequently asked questions (www.canontechsupport.com)
- Automated interactive telephone support on most current products 24 hours, 7 days a week (1-800-423-2366)
- 24-hour, Fax-On-Demand System for Product specifications and technical information (1-800-526-4345)
- Free live technical support Monday—Saturday (excluding holidays) for Products still under warranty (1-757-413-2848)
- The location of the ASF nearest you (1-800-423-2366, select “automated support options”)

If the problem cannot be corrected by using one of the above technical support options, repair options are available at the time of your call to the Free live technical support number above or via the website at www.canontechsupport.com

International Warranty Service (outside the U.S.A.)

Warranty Service may be provided by participating Canon Affiliates at certain locations outside the United States. (A list of participating Canon Affiliates is included with the Product). A Product covered by this limited warranty will be repaired or exchanged in accordance with the warranty procedures of the participating Canon Affiliate. Such procedures may be different than those set forth in this limited warranty. A dated proof of purchase must be furnished to the participating Canon Affiliate to confirm eligibility and obtain warranty service.

This limited warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.

* Support program specifics are subject to change without notice.
