Information for your safety and comfort

Safety instructions
Read these instructions carefully. Keep this document for future reference. Follow all warnings and instructions marked on the product.

Special notes on LCD monitors
The following are normal with the LCD monitor and do not indicate a problem.

• Due to the nature of the fluorescent light, the screen may flicker during initial use. Turn off the power switch and then turn it on again to make sure the flicker disappears.

• You may find slightly uneven brightness on the screen depending on the desktop pattern you use.

• The LCD screen has 99.99% or more effective pixels. It may include blemishes of 0.01% or less such as a missing pixel or pixel lit all the time.

• Due to the nature of the LCD screen, an afterimage of the previous screen may remain after switching the image, when the same image is displayed for hours. In this case, the screen is recovered slowly by changing the image or turning off the power switch for a few hours.

Cleaning your monitor
Please carefully follow these guidelines when cleaning the monitor:

• Always unplug the monitor before cleaning.

• Use a soft cloth to wipe the screen and cabinet front and sides.
Accessibility

Be sure that the power outlet you plug the power cord into is easily accessible and located as close to the equipment operator as possible. When you need to disconnect power from the equipment, be sure to unplug the power cord from the electrical outlet.

Safe listening

To protect your hearing, follow these instructions.

• Gradually increase the volume until you can hear it clearly and comfortably and without distortion.
• After setting the volume level, do not increase it after your ears have adjusted.
• Limit the amount of time listening to music at high volume.
• Avoid turning up the volume to block out noisy surroundings.
• Turn the volume down if you can’t hear people speaking near you.

Warnings

• Do not use this product near water.
• Do not place this product on an unstable cart, stand or table. If the product falls, it could be seriously damaged.
• Slots and openings are provided for ventilation to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug or other similar surface. This product should never be placed near or over a radiator or heat register, or in a built-in installation unless proper ventilation is provided.
• Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind onto or into the product.
• To avoid damage of internal components and to prevent battery leakage, do not place the product on a vibrating surface.
• Never use it under sporting, exercising, or any vibrating environment which will probably cause unexpected short current or damage internal devices.
• The adapter is only used for this monitor, do not be used for other purposes.
• Your device uses one of the following power supplies:
  Manufacture : Hipro Electronics Co., Ltd. Model: HP-A0301R3 (S220HQL Model)
  Manufacture : Delta Electronics Inc., Model: ADP-30MH B (S220HQL Model)
  Manufacture : Delta Electronics Inc., Model: ADP-40PH BB (S230HL Model)

Using electrical power

• This product should be operated from the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company.
• Do not allow anything to rest on the power cord. Do not locate this product where people will walk on the cord.

• If an extension cord is used with this product, make sure that the total ampere rating of the equipment plugged into the extension cord does not exceed the extension cord ampere rating. Also, make sure that the total rating of all products plugged into the wall outlet does not exceed the fuse rating.

• Do not overload a power outlet, strip or receptacle by plugging in too many devices. The overall system load must not exceed 80% of the branch circuit rating. If power strips are used, the load should not exceed 80% of the power strip’s input rating.

• This product’s power cord is equipped with a three-wire grounded plug. The plug only fits in a grounded power outlet. Make sure the power outlet is properly grounded before inserting the power cord plug. Do not insert the plug into a non-grounded power outlet. Contact your electrician for details.

---

**Warning! The grounding pin is a safety feature. Using a power outlet that is not properly grounded may result in electric shock and/or injury.**

---

**Note:** The grounding pin also provides good protection from unexpected noise produced by other nearby electrical devices that may interfere with the performance of this product.

• Use the product only with the supplied power supply cord set. If you need to replace the power cord set, make sure that the new power cord meets the following requirements: detachable type, UL listed/CSA certified, type SPT-2, rated 7 A 125 V minimum, VDE approved or its equivalent, 4.6 meters (15 feet) maximum length.

---

**Product servicing**

Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage points or other risks. Refer all servicing to qualified service personnel.

Unplug this product from the wall outlet and refer servicing to qualified service personnel when:

• the power cord or plug is damaged, cut or frayed

• liquid was spilled into the product

• the product was exposed to rain or water

• the product has been dropped or the case has been damaged

• the product exhibits a distinct change in performance, indicating a need for service

• the product does not operate normally after following the operating instructions
Potentially explosive environments

Switch off your device in any area with a potentially explosive atmosphere and obey all signs and instructions. Potentially explosive atmospheres include areas where you would normally be advised to turn off your vehicle engine. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Switch off the device near gas pumps at service stations. Observe restrictions on the use of radio equipment in fuel depots, storage and distribution areas; chemical plants; or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always, marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied petroleum gas (such as propane or butane), and areas where the air contains chemicals or particles such as grain, dust or metal powders.

Additional safety information

Your device and its enhancements may contain small parts. Keep them out of the reach of small children.

IT Equipment Recycling Information

Acer is strongly committed to environmental protection and views recycling, in the form of salvaging and disposal of used equipment, as one of the company’s top priorities in minimizing the burden placed on the environment.

We at Acer are very conscious of the environmental effects of our business and strive to identify and provide the best working procedures to reduce the environmental impact of our products.

For more information and help when recycling, please go to this website:
http://www.acer-group.com/public/Sustainability/sustainability01.htm

Visit www.acer-group.com for further information on the features and benefits of our other products.

Disposal instructions

Do not throw this electronic device into the trash when discarding. To minimize pollution and ensure utmost protection of the global environment, please recycle. For more information on the Waste from Electrical and Electronics Equipment (WEEE) regulations, visit
http://www.acer-group.com/public/Sustainability/sustainability01.htm
LCD pixel statement

The LCD unit is produced with high-precision manufacturing techniques. Nevertheless, some pixels may occasionally misfire or appear as black or red dots. This has no effect on the recorded image and does not constitute a malfunction.

This product has been shipped enabled for power management:

- Activate display’s Sleep mode within 15 minutes of user inactivity.
- Activate computer’s Sleep mode within 30 minutes of user inactivity.
- Wake the computer from Sleep mode by pushing the power button.

Tips and information for comfortable use

Computer users may complain of eyestrain and headaches after prolonged use. Users are also at risk of physical injury after long hours of working in front of a computer. Long work periods, bad posture, poor work habits, stress, inadequate working conditions, personal health and other factors greatly increase the risk of physical injury.

Incorrect computer usage may lead to carpal tunnel syndrome, tendonitis, tenosynovitis or other musculoskeletal disorders. The following symptoms may appear in the hands, wrists, arms, shoulders, neck or back:

- numbness, or a burning or tingling sensation
- aching, soreness or tenderness
- pain, swelling or throbbing
- stiffness or tightness
- coldness or weakness

If you have these symptoms, or any other recurring or persistent discomfort and/or pain related to computer use, consult a physician immediately and inform your company’s health and safety department.

The following section provides tips for more comfortable computer use.

Finding your comfort zone

Find your comfort zone by adjusting the viewing angle of the monitor, using a footrest, or raising your sitting height to achieve maximum comfort. Observe the following tips:

- refrain from staying too long in one fixed posture
- avoid slouching forward and/or leaning backward
- stand up and walk around regularly to remove the strain on your leg muscles
Taking care of your vision

Long viewing hours, wearing incorrect glasses or contact lenses, glare, excessive room lighting, poorly focused screens, very small typefaces and low-contrast displays could stress your eyes. The following sections provide suggestions on how to reduce eyestrain.

Eyes

• Rest your eyes frequently.
• Give your eyes regular breaks by looking away from the monitor and focusing on a distant point.
• Blink frequently to keep your eyes from drying out.

Display

• Keep your display clean.
• Keep your head at a higher level than the top edge of the display so your eyes point downward when looking at the middle of the display.
• Adjust the display brightness and/or contrast to a comfortable level for enhanced text readability and graphics clarity.
• Eliminate glare and reflections by:
  • placing your display in such a way that the side faces the window or any light source
  • minimizing room light by using drapes, shades or blinds
  • using a task light
  • changing the display's viewing angle
  • using a glare-reduction filter
  • using a display visor, such as a piece of cardboard extended from the display's top front edge
• Avoid adjusting your display to an awkward viewing angle.
• Avoid looking at bright light sources, such as open windows, for extended periods of time.

Developing good work habits

Develop the following work habits to make your computer use more relaxing and productive:
• Take short breaks regularly and often.
• Perform some stretching exercises.
• Breathe fresh air as often as possible.
• Exercise regularly and maintain a healthy body.
Declaration of Conformity

We,

Acer Incorporated
8F, 88, Sec. 1, Hsin Tai Wu Rd., Hsichih, Taipei Hsien 221, Taiwan

# Unpacking

Please check that the following items are present when you unpack the box, and save the packing materials in case you need to ship or transport the monitor in the future.

<table>
<thead>
<tr>
<th>LCD monitor</th>
<th>User guide</th>
<th>Quick start guide</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="LCD monitor" /></td>
<td><img src="image" alt="User guide" /></td>
<td><img src="image" alt="Quick start guide" /></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>D-sub cable</th>
<th>HDMI cable (Optional)</th>
<th>AC Power cord</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="D-sub cable" /></td>
<td><img src="image" alt="HDMI cable" /></td>
<td><img src="image" alt="AC Power cord" /></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>DVI cable (Optional)</th>
<th>AC Adapter</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="DVI cable" /></td>
<td><img src="image" alt="AC Adapter" /></td>
</tr>
</tbody>
</table>
Attaching the base (for selected models)

**Note:** Remove the monitor and monitor base from its packaging. Carefully place the monitor face-down on a stable surface -- use a cloth to avoid scratching the screen.

1. Attach the monitor stand arm to the base.
2. Ensure that the base is locked onto the monitor stand arm.
   - Secure the base to the monitor stand arm by turning the white screw using the integrated tab or a suitable coin. (for selected models)

**Note:** Take care when performing the installation to avoid injuring yourself.
Screen position adjustment

To optimize the viewing position, you can adjust the monitor tilt, using both of your hands to hold the edges of the monitor. The monitor can be adjusted to 15 degrees up or 5 degrees down.

Connecting the adapter and AC Power cord

- Check first to make sure that the power cord you use is the correct type required for your area.

- The monitor has a universal power supply that allows operation in either 100/120 V AC or 220/240 V AC voltage area. No user-adjustment is required.

- Plug one end of the AC power cord to the Adapter, and plug the other end into an AC outlet.

- For units using 120 V AC:
  Use a UL-listed cord set, type SVT wire and plug rated 10 A/125 V.

- For units using 220/240 V AC:
  Use a cord set consisting of H05VV-F cord and plug rated 10 A/250 V. The cord set should have the appropriate safety approvals for the country in which the equipment will be installed.

Power saving

The monitor will be switched to “power saving” mode by the control signal from the display controller, as indicated by the blinking blue light.

<table>
<thead>
<tr>
<th>Mode</th>
<th>LED light</th>
</tr>
</thead>
<tbody>
<tr>
<td>On</td>
<td>Blue</td>
</tr>
<tr>
<td>Standby/Power saving</td>
<td>Blinking Blue</td>
</tr>
</tbody>
</table>

The power saving mode will be kept until a control signal has been detected or the keyboard or mouse is activated. The recovery time from “power saving” mode back to “on” is around 3 seconds.
Display Data Channel (DDC)

To make installation easier, so long as your system supports the DDC protocol, the monitor is able to plug-and-play. The DDC is a communication protocol through which the monitor automatically informs the host system about its capabilities; for example, supported resolutions and corresponding timing. The monitor supports the DDC2B standard.

Installation

To install the monitor on your host system, please follow the steps below:

Steps

1. Connect the video cable
   a. Make sure both the monitor and computer are switched off.
   b. Connect the VGA video cable to the computer.
   c. Connect the digital cable
      (1) Make sure both the monitor and computer are switched off.
      (2) DVI Cable (Optional, only Dual-Input Model)
          a. Make sure both the monitor and computer are powered-OFF.
          b. Connect the DVI cable to the computer.
      (3) HDMI Cable (Optional, only HDMI-Input Model)
          a. Make sure both the monitor and computer are powered-OFF.
          b. Connect the HDMI cable to the computer.

2. Connect the adapter
   a. Connect the AC cord to the adapter.
   b. Connect one end of the adapter to the monitor and the other end to a properly grounded, AC outlet.

3. Turn on the monitor and computer
   Turn on the monitor first, then the computer. This sequence is very important.

4. If the monitor does not function properly, please refer to the troubleshooting section to diagnose the problem.

## Using the OSD Menus

*Note: The following content is for general reference only. Actual product specifications may vary.*

Your LCD monitor is equipped with an on-screen display (OSD) menu for making various adjustments and settings.

Press the **Menu** button to open the OSD menu. You can use the OSD menu to adjust the picture quality, OSD timeout, and general settings.
Picture Menu

The Picture menu is used for adjusting the picture quality.

1   Press the **Menu** button to bring up the OSD menu.

2   Press the `< / >` button to select **Picture** and press the **Menu** button to enter the **Picture** menu.

   The following options are available in the **Picture** menu: Acer eColor Management, Brightness, Contrast, H. Position, V. Position, Focus, Clock, Colour Temp, and Auto Config.

3   Press the `< / >` button to scroll through the **Picture** options, and press the **Menu** button to enter its sub-menu.

4   Press the `< / >` button to adjust/select the setting and press the **Auto** button to confirm.
OSD Menu

The OSD menu is used for adjusting the OSD timeout setting.

1. Press the **Menu** button to bring up the OSD menu.

2. Press the **< / >** button to select **OSD** and press the **Menu** button to enter the **OSD** menu.

3. To adjust the **OSD Timeout** setting, press the **Menu** button to enter its sub-menu.

4. Press the **< / >** button to select the desired time interval and press the **Auto** button to confirm.

Setting Menu

The Setting menu is used for adjusting the general settings for current input signal such as aspect ratio, OSD language, and etc.
1 Press the **Menu** button to bring up the OSD menu.

2 Press the `< / >` button to select **Setting** and press the **Menu** button to enter the **Setting** menu.
   The following options are available in the **Setting** menu: Wide Mode, DDC/CI, ACM, Input, Language, and Reset.

3 Press the `< / >` button to scroll through the **Setting** options, and press the **Menu** button to enter its sub-menu.

4 Press the `< / >` button to adjust/select the setting and press the **Auto** button to confirm.

**Information Menu**

The Information menu displays the basic information of the LCD monitor.

1 Press the **Menu** button to bring up the OSD menu.

2 To view the basic information of the LCD monitor, press the `< / >` button to select **Information**.
## Troubleshooting

Before sending your LCD monitor for servicing, please check the troubleshooting list below to see if you can self-diagnose the problem.

### VGA Mode
