WHY EPSON?

The Best-Selling Projectors in the World

Epson understands education and has a solution no matter what your teaching scenario. Built with image quality and reliability in mind, EPSON projectors enhance communication and inspire collaboration, while offering a low total cost of ownership. From long-throw projectors designed for traditional educational settings to ultra-short-throw projectors and all-in-one solutions built for progressive classrooms, Epson has the model made for you.

Epson Innovation

Innovation is built into our DNA and incorporates environmental leadership at every turn. While offering a low total cost of ownership, Epson focuses on building products with outstanding image quality, reliability, and sustainability. In 1968, Epson built the world's first electronic mini printer bringing the desktop printer industry to life. Then in 1989, the VPJ-700 was one of the world's first color liquid crystal video (LCD) projectors representing the birth of the modern projector industry. Epson creates, develops, and refines its own core technology, including 3LCD chips and E-TORL® lamps.

Today, on average, 3LCD projectors use 25% less electricity required per lumen of brightness when compared to 1-chip DLP systems*. And our exclusive E-TORL lamps deliver more lumens per watt by maximizing both light diffraction and light leakage. Our methods to reduce heat eliminate the need for projector cool-down time. This difference translates into electricity savings, especially when you multiply these energy costs across multiple classrooms or conference rooms.

3LCD Technology – Innovative Technology with Proven Reliability

- 3 chips for full-time, vibrant color
- 25% less electricity required per lumen of brightness when compared to 1-chip DLP projectors*
- Over 20 years of road-tested reliability built into every projector

Energy-Efficient E-TORL Lamp, Exclusively from Epson

- Delivers more lumens per watt and lasts up to 3,500 hours**
- Minimizes both light diffraction and light leakage
- E-TORL lamp efficiency maximizes your presentation time, while minimizing your costs

*Data source: ProjectorCentral.com, Jan. 2011. Average of 1038 shipping models, for which manufacturers provided lumens and total power data, all resolutions and brightness levels.

**Lamp life will vary depending upon mode selected, environmental conditions, and usage. Lamp brightness decreases over time.

INTRODUCING iPROJECTION

Display content from your iPhone®, iPad®, or iTouch®.

Go mobile with Epson's new, intuitive app. Whether projecting a Keynote or PowerPoint file loaded to the app or a photo slideshow on your iPad, the EPSON iProjection app will enable you to have the wireless freedom you've come to expect from your mobile device*. The app is easy to use and navigate with intuitive menu options that help bring your iOS content to the big screen.

Learn more. Visit epson.com/projectorapp

*May require the EPSON wireless LAN module which may be sold separately for select EPSON projectors. Visit Epson support online or epson.com/projectorapp for full details.

ACCESSORIES

DOCUMENT CAMERAS

Share images and 3D objects or record lessons and video conferences.

DC-06 Document Camera

Flexible setup with USB connectivity. Connect to select projectors or a PC/Mac® computer with included software. One-touch auto focus to quickly and easily focus on an object.

XGA

USB
Connectivity

DC-11 Document Camera

High-quality visual imagery with 5-megapixel sensor, 10x digital zoom, and 30 frames-per-second video. Easily match your projector/computer resolution. Auto-select output resolution (SXGA, WXGA, XGA).

Record
Audio/Video

Split
Screen

USB
Connectivity

CONTROL SYSTEMS

Simplify control of your classroom audio/visual equipment.

(See below for sound enhancement options.)

PowerLite® Pilot™

Wall-mounted control box with comprehensive connections, the PowerLite Pilot helps control classroom AV equipment.

PixiePlus™

Featuring its sleek, space-saving design, PixiePlus is an affordable, easy-to-use projector control system designed for in-wall installation.

Easy installation — installs in any standard wall box

Save both money and energy — automatic projector shutdown timer feature

SOUND ENHANCEMENT

Enhance the learning experience for all of your students with rich, powerful sound.

AP-60 Sound Solution

Fully integrated sound enhancement solution that includes everything necessary to provide quality sound and voice amplification to the entire classroom. (Wireless pendant microphone included.)

Front and rear balance/volume adjustments

Easy installation with ceiling-mounted projectors (using 1.5" pipe)

Wireless Pendant Microphone Kit

Amplifies the teacher's voice — prevents vocal strain and ensures that the entire class will hear the lesson clearly. (For use with the PowerLite Pilot only.)

Active Speakers

Affordable, wall-mountable, 30 W classroom speaker set, designed to amplify classroom lessons.

Control volume, treble and bass

ACCESSORIES

INTERACTIVITY

BrightLink® Solo™ Interactive Module

Add interactivity to your new or existing projector (any brand), at a fraction of the price with Epson's interactive module, BrightLink Solo. Easily transform virtually any wall or dry-erase whiteboard into an interactive learning area.

Interactivity

GENERAL ACCESSORIES

96" & 90" Whiteboards (16:10)

Dry-erase boards optimized for projection; the perfect companion for your widescreen (WXGA) projection and ideal for use with the height-adjustable carts and wall mounts.

Universal Projector Ceiling Mount - ELPMBPJF

Universal ceiling mount for projectors under 50" with quick alignment and low-profile installation.

Adjustable Suspended Ceiling Channel Kit - ELPMBP01

Designed for simple projector positioning in false ceiling/suspended ceiling environments.

False Ceiling Plate Kit -ELPMBP02

For a clean-looking solution. Replaces the ceiling tile.

Structural Round Ceiling Plate - ELPMBP03

For use in structural/permanent ceiling environments.

Adjustment Extension Column (pipe) 8" - 11" - ELPMBP01

Easily lower the projector using this variable-height extension column.

ULTRA-SHORT-THROW ACCESSORIES

Height Adjustable Carts

These carts are ideal for teachers of varying heights, children, and those with disabilities. Now everyone can participate in classroom lessons, without limitations.

16:10 (WXGA) Cart

Use with standard or interactive whiteboards up to 96" diagonal (16:10).

4:3 (XGA) Cart

Use with standard or interactive whiteboards up to 85" diagonal (4:3).

Cart Options

Steel Lock Box

Store computer equipment and other valuables when not in use; includes lock and key.

Rear Laptop and Front Keyboard Trays

Store your laptop on a tray in the back and a keyboard in front for easy access.

Side Laptop Tray

Easy and convenient laptop access and control.

Height Adjustable Wall Mounts

Allows teachers and students of any height to use the whiteboard; installed on the wall.

16:10 (WXGA) Wall Mount

Use with standard or interactive whiteboards up to 96" diagonal (16:10).

4:3 (XGA) Wall Mount

Use with standard or interactive whiteboards up to 85" diagonal (4:3).

SHORT-THROW

Reduce shadows and glare. Project an 87" diagonal image from as little as 36" away.*

Maximize your available space, address installation challenges, and reduce the disruptive effects of glare and on-screen shadows.

PROJECTOR FEATURES

Wireless

Quick-Connect Wireless Key – Easily creates a wireless connection with the projector using the included high-speed LAN module

Wireless – Wireless LAN module for connecting to the network

Audio

Speaker – One 16 Watt speaker

Mic Input – Helps preserve the presenter's voice and ensures that listeners can hear

Instructional

Built-In Teaching Templates – Helpful, ready-to-use, time-saving templates. Available on classroom projectors.

Lens Related

Optional Lenses – Interchangeable lens options with varying ranges for optimal placement and flexibility

Throw Distance

Short-Throw – Throw ratio between 0.38 and 0.75. For example: Project an 87" diagonal image from just 36" away with little shadow interference.

Ultra-Short-Throw – Throw ratio less than 0.38. For example: Project an 87" diagonal image from just 10" away with no shadow interference.

Screen Image Treatment

Auto Screen Fit – Easily and quickly adjust the image to fit the screen

Quick Corner® – Adjust corners independently for a perfectly rectangular image

Automatic Horizontal Keystone – Automatic horizontal keystone correction easily achieves a perfect rectangular image

Resolution

SVGA – 800x600 resolution, good image quality, 4:3 aspect ratio

XGA – 1024x768 resolution, great image quality, 4:3 aspect ratio

WXGA – 1280x800 widescreen resolution, great image quality, 16:10 aspect ratio

WUXGA – 1920x1200 widescreen resolution, incredible image quality, 16:10 aspect ratio

High Definition – Display HD content for seamless picture quality and crisp, clear detail

Light Output

Lumens – Color/white light output. White light output measured using the ISO 21118 standard.

Maintenance

Monitor & Control – Configure and operate projectors remotely over the network. See projector-status alerts for lamps, temperature, and filters.

Network

Present Over Network – Project content over the network to multiple locations

Message Broadcasting – Broadcast customized announcements or instructions over a network

Virtual Remote Control – Control your projector conveniently with the virtual remote control on your computer via a web browser

Connectivity

USB Plug 'n Play – Instantly project images from a PC or Mac using a USB connection

HDMI Connectivity – Includes all-digital, HDMI audio and video connection, for HD quality with just one cable

Ease of Use

Thin as a Laptop – Sleek and lightweight design weighing under 4 pounds

Portable – A sleek, lightweight mobile projector that can be easily transported without using a cart

Projection Functions

Interactive – Annotate and interact with projected images

Dual Pen Interactive – For two users to write simultaneously and independently

Split Screen – Display content from two inputs simultaneously, side by side, on a single screen

DICOM Simulation – Under DICOM (Digital Imaging and Communication in Medicine) Mode, advanced grayscale is used in order to show more details on medical images. This function is recommended for educational and training purposes and is not to be used for medical diagnosis.

Edge Blending – Provides dynamic, seamless large image projection where no part of the image is brighter than the rest because of overlapping

Capture

Record Audio/Video – Capture lessons for remote or absent learners for posting on class or school websites

Cutting-Edge Technology

Built-In DVD – Has a convenient, built-in DVD player. No separate device necessary to play movies.

SPECIAL OFFERS
