11 Microphone

Display keys:
Pressing a key launches the function that appears above that key in the display.

Display | Function when pressed
--- | ---
INT | Call other registered handsets ➔ page 8.
MENU | Open main/submenu (see menu overview ➔ page 14).
| Go back one menu level.
| Scroll up/down or adjust volume with ( ).
| Move cursor to left/right with ( ).
| Backspace deletes one character at a time.
| Confirm menu function or save entry.

ECO DECT

During a call, the level of the handset’s radio signal adjusts automatically according to
the distance between the handset and base station: the shorter the distance, the lower
the signal strength (radiation).
The handset’s radio signal is switched off when it is in standby mode. The base station,
however, maintains contact with the handset with fewer radio signals.
In addition, the base station radio signals are switched off when the No Radiation
setting is enabled.

Please note
◆ All registered handsets must support this feature.
◆ For quick connection of incoming calls the handset repeatedly switches to recep-
tion mode for short periods. This increases energy consumption and therefore
reduces the standby and talk times.

Gigaset service contact numbers:
For personal advice on our range of products and for repairs or guarantee/warranty claims
call:
Service Centre UK: 0845 0318190 (local call cost charge)
Service Centre IE: 0818 200033 (€6.6561 Ct./Call)
Please have your proof of purchase ready when calling.
Safety precautions

Read the safety precautions and the user guide before use. Explain their content and the potential hazards associated with using the telephone to your children.

- Use only the power adapter supplied, as indicated on the devices.
- Use only rechargeable batteries that correspond to the specification (see „Technical Data“). Never use a conventional (non-rechargeable) battery or other battery types as this could result in significant health risks and personal injury. Rechargeable batteries, which are noticeably damaged, must be replaced.
- Using your telephone may affect nearby medical equipment. Be aware of the technical conditions in your particular environment, e.g., doctor’s surgery. If you use a medical device (e.g., a pacemaker), please contact the device manufacturer. They will be able to advise you regarding the susceptibility of the device to external sources of high frequency energy (for the specifications of your Gigaset product see „Technical Data“).
- Do not hold the rear of the handset to your ear when it is ringing or when speaker mode is activated. Otherwise you risk serious and permanent damage to your hearing.
- Your Gigaset is compatible with the majority of digital hearing aids on the market. However, perfect function with all hearing aids cannot be guaranteed. The phone may cause interference in analogue hearing aids (humming or whistling) or cause them to overload. If you require assistance, please contact the hearing aid supplier.
- The base and charger are not splashproof. For this reason do not install them in a damp environment such as bathrooms or shower rooms.
- Do not use your phone/phone system in environments with a potential explosion hazard (e.g., paint shops).
- If you give your Gigaset to a third party, make sure you also give them the user guide.
- Remove faulty devices from use or have them repaired by our Service team, as these could interfere with other wireless services.

First steps

Check the pack contents

One Gigaset A125 base station, one mains adapter, one Gigaset handset, one phone cord, two batteries, one battery cover, one user guide.

If you have purchased a model with multiple handsets, the package should contain two batteries, a battery cover and a charging cradle with mains adapter for each additional handset.

Setting up the base station and charging cradle (if included)

- Set up the base station at a central location on a flat, non-slip surface in your house or apartment. You can also mount the base station and charging cradle on the wall.
- Pay attention to the range of the base station. This is up to 300 m in unobstructed outdoor areas and up to 50 m inside buildings.
- The base station and charging cradle are designed for use in enclosed dry rooms in a temperature range of +5 °C to +45 °C.
- Care: Wipe down the base station and handset with a damp cloth (no solvents) or an antistatic cloth. Never use a dry cloth. This can cause static.
- The phone’s feet do not usually leave any marks on surfaces. However, due to the multitude of different varnishes and polishes used on today’s furnishings, the risk of marks on the surfaces cannot be completely ruled out.
- Never expose the telephone to the influence of heat sources, direct sunlight or other electrical devices.
- Protect your Gigaset from moisture, dust, corrosive liquids and vapours.
Connecting the base station

- First connect the mains adapter 1.
- Then connect the telephone jack 2 and insert the cables into the cable ducts.

Please note:
- The mains adapter must always be connected, as the phone will not operate without mains connection.
- Use only the mains adapter and phone cord supplied. Pin connections on telephone cables can vary.

Connecting the charging cradle (if included)

- Connect the flat plug to the power supply 1.
- Plug the mains adapter into the plug socket 2.

If you need to disconnect the plug from the charging cradle, press the release button 3 and disconnect the plug 4.

Setting up the handset for use

The display is protected by a plastic film. Please remove the protective film!

Inserting the batteries and closing the battery cover

Warning
Use only the rechargeable batteries recommended by Gigaset Communications GmbH (page 10), i.e. never use conventional (non-rechargeable) batteries as this could result in significant health risks and personal injury. For example, the batteries could explode. The phone could also malfunction or be damaged as a result of using batteries that are not of the recommended type.

- Insert the batteries with the polarity in the correct direction.
- The polarity is indicated in the battery compartment.
- First insert the battery cover at the top 3.
- Then press the cover 4 until it clicks into place.
- To reopen the battery cover, grip into the cavity on the casing, then pull the battery cover in an upward direction.
Initial charging and discharging of the batteries
The correct charge status can only be displayed if the batteries are first fully charged and discharged.

- Charge the handset in the base for **6.5 hours**.
- The handset must only be placed in the designated Gigaset base or charging cradle.
- After charging, remove the handset from the base and only replace it when the batteries are fully discharged.

Please note
- The handset is pre-registered with the base. If you have purchased a **model with multiple handsets**, all handsets will already be registered with the base. You do not need to register the handset again. The internal handset number appears in the top left of the display, e.g. 1 (page 1).
- However, if a handset is not registered with the base (**Register HS or Put into base** is displayed), please register the handset manually (page 7).
- If you have purchased multiple devices, you can upgrade your Gigaset to a cordless PABX by registering all A125 handsets at the **same** base (page 7).
- After the first battery charge and discharge, you may place your handset in the charger after every call.
- Always repeat the charging and discharging procedure if you remove the batteries from the handset and reinsert them.
- The batteries may warm up during charging. This is not dangerous.
- After a while, the charge capacity of the batteries will decrease for technical reasons.

Setting the date and time
Set the date and time so that the correct date and time can be assigned to incoming calls, and so that the alarm can be used.

**MENU** → **Settings** → **OK** → **Date/Time** → **OK** → **Date** → **OK** → **Time** → **OK** (enter the day, month and year in 6-digit format) → **OK** → **Time** → **OK** (enter hours and minutes in 4-digit format) → **OK** (display message: Saved)
> (press and hold to return to idle status)

When entering the time and date, you can move the position of an entry to the left or right by pressing the control key up or down.

**Please note**
- If your phone receives the date and time during calling line display (e.g., via your network provider, a router or PABXs), you can specify whether this data should be copied to your phone:
  - Press the key sequence: **MENU** → **P#Q5#MI**

  The following is displayed; the current setting flashes:

  - Press one of the following keys to specify, when this data should be copied to your phone:
    - **Never**
    - **Once**, in case the date/time is not set on your phone
    - **Always**

  Your selection is displayed (e.g. 2):
  >

  Press the display key **OK**.
Activating/deactivating the handset
Press and hold the key to activate or deactivate the handset. If you place a deactivated handset in the base station or charging cradle, it will automatically activate after approx. 30 seconds. If you remove the handset from the base station/charging cradle, the display turns off briefly.

Making calls

Making external calls and ending calls
External calls are calls using the public telephone network.

![Enter the phone number](link)

The phone number is dialled. (Or you can first press and hold talk key (dial tone) and then enter the number.) During the call you can adjust the earpiece volume using and set the volume with .

End the call/cancel dialling: Press the end call key .

You can automatically insert a network provider dialling code before any phone number (page 5).

Accepting a call
Press the talk key to accept the call.

When Auto Answer is activated (see menu overview page 14), simply remove the handset from the base station/charging cradle.

Calling Line Identification
When you get a call, the caller’s number will be displayed on your handset; the caller’s name will be displayed if it is stored in the directory.

Prerequisites:
1 You have asked your network provider for the caller’s number (CLIP) to be displayed on your handset screen.
2 The caller has asked the network provider for his/her number to be identified (CLI).

External call appears in the display if you have not requested CLIP, Withheld appears if the caller has withheld CLI, and Unavailable appears if CLI has not been requested.

Automatic network provider preselection
You can store a call-by-call number (preselection number), which is automatically placed in front of numbers when you dial them. If, for example, you wish to make international calls via special network providers, you can save the relevant dialling code here.

In the “With Preselect” list, specify the dialling codes or the first digits of the dialling codes that you wish to assign to the preselection number.

In the “Without Presel” list, enter any exceptions to the “With Preselect” list.

Example:

<table>
<thead>
<tr>
<th>Presel. Number</th>
<th>0999</th>
<th>All numbers that start with 08, except for 081 and 084, are dialled with the preselection number 0999.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>With Preselect</td>
<td>08</td>
</tr>
<tr>
<td></td>
<td>Without Presel</td>
<td>081 084</td>
</tr>
<tr>
<td>07112345</td>
<td></td>
<td>07112345</td>
</tr>
<tr>
<td>08912345</td>
<td>0999 08912345</td>
<td>08412345</td>
</tr>
</tbody>
</table>

Enter preselection number via menu (page 14).

Permanently deactivating preselection: Delete the preselection number with C.

Temporarily cancelling preselection: (press and hold) ▶ MENU ▶ Preselect off ▶ OK ▶ (enter number) or (use number from directory) ▶ The number is dialled without Preselection.

Example:

<table>
<thead>
<tr>
<th>Phone number</th>
<th>Dialled number</th>
</tr>
</thead>
<tbody>
<tr>
<td>07112345</td>
<td>07112345</td>
</tr>
<tr>
<td>08912345</td>
<td>0999 08912345</td>
</tr>
<tr>
<td>08412345</td>
<td>08412345</td>
</tr>
</tbody>
</table>
Using the directory and lists

Directory
To open the directory: press control key s.
You can save up to 50 phone numbers (max. 22 digits) with corresponding names (max. 14 characters).
Enter letters/characters ➔ page 9.

Storing the first number in the directory
New Entry ➔ OK ➔ (enter number) ➔ OK ➔ (enter name) ➔ OK

Storing further numbers in the directory
MENU ➔ New Entry ➔ OK ➔ (enter number) ➔ OK ➔ (enter name) ➔ OK

Selecting a directory entry
Open the directory with s. You have the following options:
◆ Use u to scroll through the entries until the required name is selected.
◆ Enter the first character of the name and scroll to the entry with u, if required.

Dialling with the directory
s ➔ (select entry) ➔

Dialling from the last number redial list
( press briefly ) ➔ (select entry) ➔

Managing entries in the last number redial list
( press briefly ) ➔ (select entry) ➔ MENU
The following functions can be selected with s: Use Number/Copy to Dir./Delete Entry/Delete List

Calls list/network mailbox list
Press MENU ➔ Messages ➔ OK, to open the list overview. If you have new messages, only lists with new messages are displayed. Scroll through the lists by pressing s.
An advisory tone sounds as soon as a new entry appears in the calls list/network mailbox list. New messages appears in the display.

Please note
If calls are saved in the network mailbox, you will receive a message if the appropriate settings have been made (depending on your network provider).

Calls list
Prerequisites: CLIP (➔ page 5)
Depending on the type of list set, the calls list contains (➔ page 14) answered calls and missed calls.
Depending on the type of list set, all numbers of the last 25 incoming calls are saved or just the missed calls are saved.

Open the calls list
MENU ➔ Messages ➔ OK ➔ ( calls list )

The calls list is displayed as follows:
Number of new entries + number of old, read entries
Press OK to open the list.
The last incoming call is displayed. If necessary, use s to select another entry.

Using shortcut keys
You can assign directory entries to the keys 2–9:
s ➔ (select entry) ➔ MENU ➔ Shortcut ➔ OK
s (select key) ➔ OK or ➔ (press the key you want to assign the entry to)
To dial, press and hold the required shortcut key.

Last number redial list
This list contains the ten last dialled numbers.

This list contains the ten last dialled numbers.

Dialling from the last number redial list
( press briefly ) ➔ (select entry) ➔

Managing entries in the last number redial list
( press briefly ) ➔ (select entry) ➔ MENU
The following functions can be selected with s: Use Number/Copy to Dir./Delete Entry/Delete List

Calls list/network mailbox list
Press MENU ➔ Messages ➔ OK, to open the list overview. If you have new messages, only lists with new messages are displayed. Scroll through the lists by pressing s.
An advisory tone sounds as soon as a new entry appears in the calls list/network mailbox list. New messages appears in the display.

Please note
If calls are saved in the network mailbox, you will receive a message if the appropriate settings have been made (depending on your network provider).

Calls list
Prerequisites: CLIP (➔ page 5)
Depending on the type of list set, the calls list contains (➔ page 14) answered calls and missed calls.
Depending on the type of list set, all numbers of the last 25 incoming calls are saved or just the missed calls are saved.

Open the calls list
MENU ➔ Messages ➔ OK ➔ ( calls list )

The calls list is displayed as follows:
Number of new entries + number of old, read entries
Press OK to open the list.
The last incoming call is displayed. If necessary, use s to select another entry.

Using shortcut keys
You can assign directory entries to the keys 2–9:
s ➔ (select entry) ➔ MENU ➔ Shortcut ➔ OK
s (select key) ➔ OK or ➔ (press the key you want to assign the entry to)
To dial, press and hold the required shortcut key.
Using other functions

µ (select entry) → MENU

The following functions can be selected with µ: Delete Entry/Copy to Dir./Date/Time/Status/Delete List

Calling back a caller from the calls list

MENU → Messages → CallsList 01+02 → OK → µ (select entry) → OK

network mailbox list

You can use these lists to listen to messages on the network mailbox (→ page 7).

Network mailbox

The network mailbox is the answering machine in your provider’s telephone network. More information is available from your provider. You cannot use the network mailbox unless you have requested it from your provider.

In order to use the network mailbox quickly and easily via the network mailbox list (→ page 6), the menu (→ page 14) and to use fast access via key µ (→ page 1), you will need to enter the number in your phone:

MENU → µ Answer Machine → OK → µ Net Mailbox → µ (enter number) → OK

Locating a handset ("Paging")

You can locate your handset using the base.

Briefly press the registration/paging key on the base (→ page 1). All handsets will ring at the same time ("paging"), even if the ringers are switched off.

Ending paging: Briefly press the registration/paging key on the base (→ page 1) or press the talk key µ or the end call key ç on the handset.

Registering handsets manually

You can register up to four handsets to your base station. Each additional handset must be registered on the base station in order for it to work properly!

1) On the handset

MENU → µ Settings → OK → µ Handset → OK → µ Register HS → Enter the base system PIN (default setting: 0000) → OK → Registering is displayed.

2) On the base

Within 60 seconds, press and hold the registration/paging key on the base (→ page 1) for approx. 3 seconds.

Registration takes approx. 1 minute. Handsets are assigned the lowest available internal number (1–4). If the internal numbers 1–4 are already assigned to other devices, the number 4 will be overwritten.

De-registering handsets

You can de-register all other registered handsets from each of the registered Gigaset handsets.

MENU → µ Settings → OK → µ Handset → OK → µ De-register HS → µ Select the internal party you wish to de-register. The handset you are currently using is indicated by <. → OK → Enter the base system PIN (default setting: 0000) → OK
Using multiple handsets

Making internal calls
Internal calls are free calls to other handsets that are registered to the same base station.

2 handsets are registered
Press the display key INT, the other handset is called.

More than 2 handsets are registered
Calling a specific handset
INT (1...4, enter internal number of the handset) or
INT (Select the internal party) OK or the handset is called

Calling all handsets ("group call")
INT or INT Call all OK or all handsets are called

When a participant answers you can speak to them. To end the call, press .

Internal consultation call/connecting a call
You are in conversation with an external participant. Press the INT display key and call one or all handsets. The external participant hears the hold music. When the internal participant answers: If necessary, announce the external call.

Either press the end call key (the call is transferred to the internal participant), or press the display key . You are reconnected with the external participant.

When transferring a call you can also press the end call key before the internal participant answers.

Listening in to an external call
You are conducting an external call. An internal participant can listen in on this call and take part in the conversation (conference). Prerequisite: The Listening in function must be activated.

Activating/deactivating listening in
MENU Settings OK Base Listening in OK ( = on)

Internal listening in (conference)
You want to listen in to an existing external call. Press and hold the key. You can listen in to the call. All participants hear a signal tone.

To end: press the end call key . All participants hear a signal tone.

If the first internal participant presses the end call key , the handset that has “listened in” remains connected to the external participant.

Setting the alarm clock

Activating/deactivating the alarm clock
MENU Alarm Clock OK Activation OK ( = on)

When activated: Set the wake-up time OK

When the alarm clock rings, press any key to switch it off for 24 hours. If the alarm clock is set, the wake-up icon will appear on the screen and the wake-up time will be displayed instead of the date.

Setting the wake-up time
MENU Alarm Clock OK Wake-up time OK

Enter the wake-up time in hours and minutes, then press OK.

Phone settings
For details on how to make audio settings, see menu overview page 14.

For details on how to set the system PIN on the base station, see the menu overview page 14.

Changing the display language
MENU Settings OK Handset Language OK (select language) OK

The current language is indicated by .

If you accidentally choose a language you do not understand:
MENU  (press the keys one after the other) (select language) OK

Activating/deactivating music on hold
You can select that your external participant hears music in case of internal recall and during call transfer.

MENU  The number for the current setting flashes:
0 = off; 1 = on enter number OK.

Repeater mode
With a repeater you can increase the range of your base station. You will need to activate repeater mode ( page 14). Repeater mode and No Radiation mode ( page 14) cancel each other out.
Reseting the handset
You can reset individual settings and changes that you have made. Entries in the directory, the calls list and the handset’s registration to the base station will be retained.

MENU Settings OK Handset OK Reset Handset OK Reset? OK
Cancel the reset with .

Reseting the base station
When restoring factory settings the No Radiation mode is deactivated, individual settings are reset and all lists are deleted.
The date and time are retained.

Reseting the base via the menu
Handsets are still registered, the system PIN is not reset.

MENU Settings OK Base OK Base Reset OK Reset?
Resetting the base using the key on the base
All handsets are de-registered and the system PIN is reset to the original code 0000.
Carry out the following steps: Remove the mains cable from the base. Hold down the registration/paging key on the base ( page 1) and reconnect the power cable to the base at the same time. Hold the key down for at least 5 seconds.

Operating the base station on the PABX/router

Operating on the router
When operating the Gigaset on an analogue port of a router you can reduce problems with echoes by activating the Echo mode ( page 14). If you have no problems with echoes, this function should be deactivated.

Operating on the PABX
The following settings are only necessary when your PABX requires them; see the user guide for your PABX.
When entering the digits, enter them slowly one after the other.

Changing the dialling mode
MENU Settings OK Base OK Base Reset OK Reset?
The number for the set dialling mode flashes:
0 = touch tone dialling (DTMF); 1 = dial pulsing (DP) enter number OK.

Setting recall
MENU Settings OK Base OK Base Reset OK Reset?
The number for the current recall flashes:
0 = 80 ms; 1 = 100 ms; 2 = 120 ms; 3 = 400 ms; 4 = 250 ms; 5 = 300 ms; 6 = 600 ms; 7 = 800 ms enter number OK.

Changing pause after line seizure
You can set the length of the pause inserted between pressing the talk key and sending the phone number.
MENU Settings OK Base OK Base Reset OK Reset?
The number for the current pause length flashes: 1 = 1 sec.; 2 = 3 sec.; 3 = 7 sec. enter number OK.

Changing the pause after the recall key
MENU Settings OK Base OK Base Reset OK Reset?
The number for the current pause length flashes: 1 = 800 ms; 2 = 1600 ms; 3 = 3200 ms enter number OK.

Appendix

Entering letters/characters

Standard characters
Press the relevant key the number of times indicated.

Briefly press the hash key to switch from "Abc" to "123" mode, from "123" to "abc" mode and from "abc" to "Abc" mode.

</tbody>
</table>
Contact with liquid

If the handset has come into contact with liquid:
1. **Switch off the handset and remove the battery pack immediately.**
2. Allow the liquid to drain from the handset.
3. Pat all parts dry, then place the handset with the battery compartment open and the keypad facing down in a dry, warm place for at least 72 hours (not in a microwave, oven etc.).
4. Do not switch on the handset again until it is completely dry.

When it has fully dried out, you will normally be able to use it again.

Authorisation

This device is intended for analogue phone lines in the UK and on the Irish network. Country-specific requirements have been taken into consideration.
We, Gigaset Communications GmbH, declare that this device meets the essential requirements and other relevant regulations laid down in Directive 1999/5/EC.
A copy of the Declaration of Conformity is available at this Internet address: www.gigaset.com/docs

Service (Customer Care)

You have questions? As a Gigaset customer, you can take advantage of our comprehensive service offerings. You can find help quickly in this User Manual and in the service pages of our Gigaset online portal.
Please register your phone right after purchase. This enables us to provide you with even better service regarding questions or a warranty claim. Your personal user account enables you to directly contact our customer service by email.
Our representatives are available on the telephone hotlines for more advanced questions or immediate consultation.

**United Kingdom**

Please note that if the Gigaset product is not sold by authorised dealers in the national territory the product may not be fully compatible with the national telephone network. It is clearly specified on the box near the CE mark for which country/countries the equipment has been developed. If the equipment is used in a manner inconsistent with this advice or with the instructions of the manual and on the product itself, this may have implications on the conditions for warranty or guarantee claims (repair or exchange of product).
In order to make use of the warranty, the product purchaser is asked to submit a receipt which proves the date of purchase (date from which the warranty period starts) and the type of goods that have been purchased.
Guarantee Certificate
United Kingdom

Without prejudice to any claim the user (customer) may have in relation to the dealer or retailer, the customer shall be granted a manufacturer’s Guarantee under the conditions set out below:

◆ In the case of new devices and their components exhibiting defects resulting from manufacturing and/or material faults within 24 months of purchase, Gigaset Communications shall, at its own option and free of charge, either replace the device with another device reflecting the current state of the art, or repair the said device. In respect of parts subject to wear and tear (including but not limited to, batteries, keypads, casing), this warranty shall be valid for six months from the date of purchase.

◆ This Guarantee shall be invalid if the device defect is attributable to improper treatment and/or failure to comply with information contained in the user guides.

◆ This Guarantee shall not apply to or extend to services performed by the authorised dealer or the customer themselves (e.g. installation, configuration, software downloads). User guides and any software supplied on a separate data medium shall be excluded from the Guarantee.

◆ The purchase receipt, together with the date of purchase, shall be required as evidence for invoking the Guarantee. Claims under the Guarantee must be submitted within two months of the Guarantee default becoming evident.

◆ Ownership of devices or components replaced by and returned to Gigaset Communications shall vest in Gigaset Communications.

◆ This Guarantee shall apply to new devices purchased in the European Union. For Products sold in the United Kingdom the Guarantee is issued by: Gigaset Communications UK Limited, 2 White Friars, Chester, CH1 1NZ.

◆ Any other claims resulting out of or in connection with the device shall be excluded from this Guarantee. Nothing in this Guarantee shall attempt to limit or exclude a Customers Statutory Rights, nor the manufacturer’s liability for death or personal injury resulting from its negligence.

◆ The duration of the Guarantee shall not be extended by services rendered under the terms of the Guarantee.

◆ Insofar as no Guarantee default exists, Gigaset Communications reserves the right to charge the customer for replacement or repair.

◆ The above provisions does not imply a change in the burden of proof to the detriment of the customer.

To invoke this Guarantee, please contact the Gigaset Communications telephone service. The relevant number is to be found in the accompanying user guide.

Guarantee Certificate
Ireland

Without prejudice to any claim the user (customer) may have in relation to the dealer or retailer, the customer shall be granted a manufacturer’s Guarantee under the conditions set out below:

◆ In the case of new devices and their components exhibiting defects resulting from manufacturing and/or material faults within 24 months of purchase, Gigaset Communications shall, at its own option and free of charge, either replace the device with another device reflecting the current state of the art, or repair the said device. In respect of parts subject to wear and tear (including but not limited to, batteries, keypads, casing), this warranty shall be valid for six months from the date of purchase.

◆ This Guarantee shall be invalid if the device defect is attributable to improper care or use and/or failure to comply with information contained in the user manuals. In particular claims under the Guarantee cannot be made if:

◆ The device is opened (this is classed as third party intervention)

◆ Repairs or other work done by persons not authorised by Gigaset Communications.

◆ Components on the printed circuit board are manipulated

◆ The software is manipulated

◆ Defects or damage caused by dropping, breaking, lightning or ingress of moisture. This also applies if defects or damage was caused by mechanical, chemical, radio interference or thermal factors (e.g.: microwave, sauna etc.)

◆ Devices fitted with accessories not authorised by Gigaset Communications

◆ This Guarantee shall not apply to or extend to services performed by the authorised dealer or the customer themselves (e.g. installation, configuration, software downloads). User manuals and any software supplied on a separate data medium shall be excluded from the Guarantee.

◆ The purchase receipt, together with the date of purchase, shall be required as evidence for invoking the Guarantee. Claims under the Guarantee must be submitted within two months of the Guarantee default becoming evident.

◆ Ownership of devices or components replaced by and returned to Gigaset Communications shall vest in Gigaset Communications.

◆ This Guarantee shall apply to new devices purchased in the European Union. For Products sold in the Republic of Ireland the Guarantee is issued by Gigaset Communications UK Limited, 2 White Friars, Chester, CH1 1NZ.
Any other claims resulting out of or in connection with the device shall be excluded from this Guarantee. Nothing in this Guarantee shall attempt to limit or exclude a Customers Statutory Rights, nor the manufacturer’s liability for death or personal injury resulting from its negligence.

The duration of the Guarantee shall not be extended by services rendered under the terms of the Guarantee.

Insofar as no Guarantee default exists, Gigaset Communications reserves the right to charge the customer for replacement or repair.

The above provisions does not imply a change in the burden of proof to the detriment of the customer.

To invoke this Guarantee, please contact the Gigaset Communications helpdesk. This number is also to be found in the accompanying user guide.

**Environment**

**Our environmental mission statement**

We, Gigaset Communications GmbH, bear social responsibility and are actively committed to a better world. Our ideas, technologies and actions serve people, society and the environment. The aim of our global activity is to secure sustainable life resources for humanity. We are committed to a responsibility for our products that comprises their entire life cycle. The environmental impact of products, including their manufacture, procurement, distribution, utilisation, service and disposal, are already evaluated during product and process design.

Further information on environmentally friendly products and processes is available on the Internet at [www.gigaset.com](http://www.gigaset.com).

**Environmental management system**

Gigaset Communications GmbH is certified pursuant to the international standards ISO 14001 and ISO 9001.

**ISO 14001 (Environment):** Certified since September 2007 by TüV SÜD Management Service GmbH.

**ISO 9001 (Quality):** Certified since 17/02/1994 by TüV SÜD Management Service GmbH.

**Disposal**

Batteries should not be disposed of in general household waste. Observe the local waste disposal regulations, details of which can be obtained from your local authority.

All electrical and electronic products should be disposed of separately from the municipal waste stream via designated collection facilities appointed by the government or the local authorities.

This crossed-out wheeled bin symbol on the product means the product is covered by the European Directive 2002/96/EC.

The correct disposal and separate collection of your old appliance will help prevent potential negative consequences for the environment and human health. It is a precondition for reuse and recycling of used electrical and electronic equipment.

For more detailed information about disposal of your old appliance, please contact your local council refuse centre or the original supplier of the product.
Menu overview

Your phone has an extensive range of features. These are offered in the form of menus. To select a function while the phone is in idle status, press MENU (open menu), use the control key to scroll to the function you require and press OK to confirm.

To return to idle status: press and hold the key.

Not all of the functions described in this user guide are available in all countries.

You have questions? As a Gigaset customer, you can take advantage of our
comprehensive service offerings. You can find help quickly in this User Manual
and in the service pages of our Gigaset online portal: http://www.gigaset.com

If you have problems setting up or operation this product please call
GIGASET UK HELPLINE 084503 18190
GIGASET IRL HELPLINE 0818 200 033

Product may not be fully compatible with the national telephone network.
It is clearly specified on the box near the CE mark for which country/countries the
equipment has been developed. If the equipment is used in a manner inconsistent
with this advice or with the instructions of the manual and on the product itself, this
may have implications on the conditions for warranty or guarantee claims (repair or
exchange of product).
In order to make use of the warranty, the product purchaser is asked to submit a
receipt which proves the date of purchase (date from which the warranty period
starts) and the type of goods that have been purchased.
