FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Use of Trademarks, Registered Trademarks, and other Protected Names and Symbols

This manual may make reference to trademarks, registered trademarks, and other protected names and/or symbols of third-party companies not related in any way to StarTech.com. Where they occur these references are for illustrative purposes only and do not represent an endorsement of a product or service by StarTech.com, or an endorsement of the product(s) to which this manual applies by the third-party company in question. Regardless of any direct acknowledgement elsewhere in the body of this document, StarTech.com hereby acknowledges that all trademarks, registered trademarks, service marks, and other protected names and/or symbols contained in this manual and related documents are the property of their respective holders.

Introduction

The WFREPEAT300N 300Mbps Wireless-N WiFi Access Point and Repeater has two selectable modes for extending the range of existing wireless networks or adding wireless capabilities to a non-wireless network. Using a wall plug design, this allows for convenient or hidden placement anywhere there is an available AC outlet. As a wireless repeater, the effective range of any 802.11n WiFi network can be increased, while still providing up to 300Mbps of data bandwidth. This WiFi signal booster can help eliminate dead spots and provide a stronger signal in areas with obstructions that can reduce the range of a wireless signal. The WiFi range extender is also backward compatible with 802.11b/802.11g networks. As a wireless access point (AP), any non-wireless router can be given wireless-N capabilities. Built in wireless security (WEP/WPA/WPA2) will help to keep the network private. Backed by a StarTech.com 2-year warranty and free lifetime technical support.

Packaging Contents

- 1x Wireless-N Repeater
- 1x RJ45 Ethernet Cable
- 3x Interchangeable Wall Socket Plug (NA/UK/EU)
- 1x Instruction Manual

System Requirements

- Available AC electrical outlet

Repeater Mode:

- IEEE 802.11B or G or N compliant wireless access point (AP)

Access Point Mode:

- IEEE 802.3i/802.3u (10/100 Mbps) compliant network router
- RJ45 terminated UTP Ethernet cable

Installation

Repeater Mode Setup:

1. Connect the Repeater to an available AC electrical outlet.

2. Wired Setup: Connect an RJ45 Ethernet cable from the Repeater to your computer. Wireless Setup: Connect to the wireless network ‘WiFi-Repeater’.

3. The default IP address on the Repeater is 192.168.10.1; configure your computer to a matching network address (192.168.10.x, where ‘x’ is between 2~255) with subnet set to 255.255.255.0 and gateway to 192.168.10.1.

4. Open a web browser window and enter 192.168.10.1 into the address bar. This will bring up the login prompt for the Repeater. The default user name and password are ‘admin’ (without quotes).

5. From the main menu on the left side of the web interface, click the ‘Setup Wizard’ link followed by the ‘Wireless Repeater Mode (Station) option. Click ‘Next’ to continue.

6. The next screen will list some basic configuration information, so click the ‘Repeater – OneKey Setting’ button to continue, followed by the ‘Wireless Network Selection’ button.
7. The next screen will display a list of detected wireless networks. Click the ‘Refresh List’ button to rescan. Select the desired wireless network and then click the ‘Next’ button.

8. Wireless encryption settings will be automatically detected and listed on the following screen. If the wireless network has a password, then enter this into the ‘Pre-Shared Key’ field. You should not need to change any other settings on this screen. Click ‘Apply and Reboot’ and you will receive a confirmation prompt. Click ‘OK’ to proceed.
9. After the unit has rebooted, the configuration settings/status will be listed. Confirm that the Mode has been set and the correct network name (SSID) is listed and connected to.

Access Point Mode Setup:

1. Connect the Repeater to an available AC electrical outlet.

2. Wired Setup: Connect an RJ45 Ethernet cable from the Repeater to your computer. Wireless Setup: Connect to the wireless network ‘WiFi-Repeater’.

3. The default IP address on the Repeater is 192.168.10.1; configure your computer to a matching network address (192.168.10.x, where ‘x’ is between 2~255) with subnet set to 255.255.255.0 and default gateway to 192.168.10.1.

4. Open a web browser window and enter 192.168.10.1 into the address bar. This will bring up the login prompt for the Repeater. The default user name and password are ‘admin’ (without quotes).

5. From the main menu of the Repeater configuration utility, click the ‘Setup Wizard’ link followed by the ‘Standard Wireless AP Mode’ option. Click ‘Next’ to continue.

6. The next screen will list some basic information. Click the ‘AP – OneKey Setting’ button to proceed.
7. The Repeater will automatically pre-configure itself with default information and then reboot. If there are multiple wireless networks or a problem occurs with the automatic setup, Advanced Configuration may be required. Otherwise the setup is complete.
Advanced Configuration

Advanced configuration options for the Repeater can be accessed via the web interface.

1. Connect an RJ45 Ethernet cable from the Repeater to your computer.

2. The default IP address on the Repeater is 192.168.10.1; configure your computer to a matching network address (192.168.10.x, where ‘x’ is between 2~255) with subnet set to 255.255.255.0 and default gateway to 192.168.10.1.

3. Open a web browser window and enter 192.168.10.1 into the address bar. This will bring up the login prompt for the Repeater. The default user name and password are ‘admin’ (without quotes).
Wireless

Click the link for ‘Wireless’ on the main menu, followed by ‘Basic Settings’. This will present the basic wireless configuration options for the current mode and also allow for manually changing the Mode type. Other options are available on the main menu, such as encryption settings (Security), list of detected WiFi networks (Site Survey), time of use scheduling (Schedule) and WiFi Protected Setup (WPS).
Wireless Basic Settings

This page is used to configure the parameters for wireless LAN clients which may connect to your Access Point. Here you may change wireless encryption settings as well as wireless network parameters.

- **Disable Wireless LAN Interface**
- **Mode**: Repeater
- **Network Type**: Infrastructure
- **SSID of Connect to**: PMTest (Connected)
- **Enable Universal Repeater Mode** (acting as AP and client simultaneously)
- **SSID of Extended Interface**: WiFi-Repeater!

- **Apply Changes**
- **Reset**
LAN Interface

The ‘LAN Interface’ options allow for configuration of settings for the LAN port (RJ45), when used in Access Point mode. The Unit’s IP address, DHCP settings and other related settings can be customized to match your needs.

Management

The ‘Management’ sections contain settings for various administrative functions for the unit. An important section to note is the ‘Password’ screen. It is recommended that the default password for the Unit be changed before you finish configuration. To prevent unauthorized access, please update the user name and password.
Save/Reload Settings
The current settings for the unit can be saved to a file on your computer and reloaded onto the Repeater at any time. The Repeater can be reset to factory defaults from this screen, by clicking the ‘Reset’ button. The Repeater can also be reset to factory defaults by pressing and holding the ‘Reset’ button, located next to the RJ45 port, for 10 seconds.

Reboot
This provides a remote method of soft restarting the Unit.

Warranty Information
This product is backed by a two year warranty.
In addition, StarTech.com warrants its products against defects in materials and workmanship for the periods noted, following the initial date of purchase. During this period, the products may be returned for repair, or replacement with equivalent products at our discretion. The warranty covers parts and labor costs only. StarTech.com does not warrant its products from defects or damages arising from misuse, abuse, alteration, or normal wear and tear.

Limitation of Liability
In no event shall the liability of StarTech.com Ltd. and StarTech.com USA LLP (or their officers, directors, employees or agents) for any damages (whether direct or indirect, special, punitive, incidental, consequential, or otherwise), loss of profits, loss of business, or any pecuniary loss, arising out of or related to the use of the product exceed the actual price paid for the product. Some states do not allow the exclusion or limitation of incidental or consequential damages. If such laws apply, the limitations or exclusions contained in this statement may not apply to you.
Hard-to-find made easy. At StarTech.com, that isn’t a slogan. It’s a promise.

StarTech.com is your one-stop source for every connectivity part you need. From the latest technology to legacy products — and all the parts that bridge the old and new — we can help you find the parts that connect your solutions.

We make it easy to locate the parts, and we quickly deliver them wherever they need to go. Just talk to one of our tech advisors or visit our website. You’ll be connected to the products you need in no time.

Visit www.startech.com for complete information on all StarTech.com products and to access exclusive resources and time-saving tools.

StarTech.com is an ISO 9001 Registered manufacturer of connectivity and technology parts. StarTech.com was founded in 1985 and has operations in the United States, Canada, the United Kingdom, and Taiwan servicing a worldwide market.
