CONGRATULATIONS!

YOU HAVE TAKEN A LEAP OF FAITH. A step towards a world of wireless bliss. It takes a great deal of courage to liberate yourself from the shackles of speaker cables and ordinary stereo systems. But you have jumped right into it. **FOR THIS WE SALUTE YOU.**

We have done everything in our power to make your Libratone sound system as simple and user friendly as possible. Hopefully this manual will answer any questions you might have.

Thank you for buying our product. Thank you for joining the revolution.

FULLROOM™

Libratone Loop is based on a patent-pending audio technology. We call it FullRoom™ sound. Allow us to explain:

Regular speakers have closed cabinets. They push the sound waves in one direction - forward. Libratone Loop, on the other hand, plays like an acoustic instrument, dispersing sound waves in multiple directions, giving you a 360° sound experience.

FullRoom™ technology means that you only need one sound source to get a room full of sound.

To create the best sound conditions Libratone Loop should be placed against a hard backdrop. Whether you hang it on the wall, place it on a shelf or put it on the ground you get the same amazing sound quality.

Placing Libratone Loop close to a wall will reflect the sound off the wall. This gives you a deeper bass and an even fuller soundscape. We don't recommend you place Libratone Loop in a corner since this will limit the FullRoom™ experience, but it's up to you.

MUSIC AT HOME   AIRPLAY

AirPlay is a technology designed by Apple to transmit audio and video instantly, from source to source, within a Wi-Fi network. Once AirPlay is installed, you can stream from iTunes - both on Mac and PC - or you can use your iOS devices: iPad, iPhone or iPod touch. This means that you have your entire music and movie library in the palm of your hand, ready to be set free.

MUSIC ON THE GO   PlayDirect

Libratone PlayDirect™ is AirPlay to go. It allows you to stream your music wirelessly in non-Wi-Fi areas from PC/Mac or your iOS devices: iPad, iPhone or iPod touch. Libratone PlayDirect™ technology creates a direct network connection between your speaker and music device.

DLNA

Built-in DLNA technology allows you to stream music to your Libratone speaker from most devices using Android 4,0 or later, Blackberry OS 10 or later, and computers running Windows 7 or 8.

For more info go to www.libratone.com/dlna
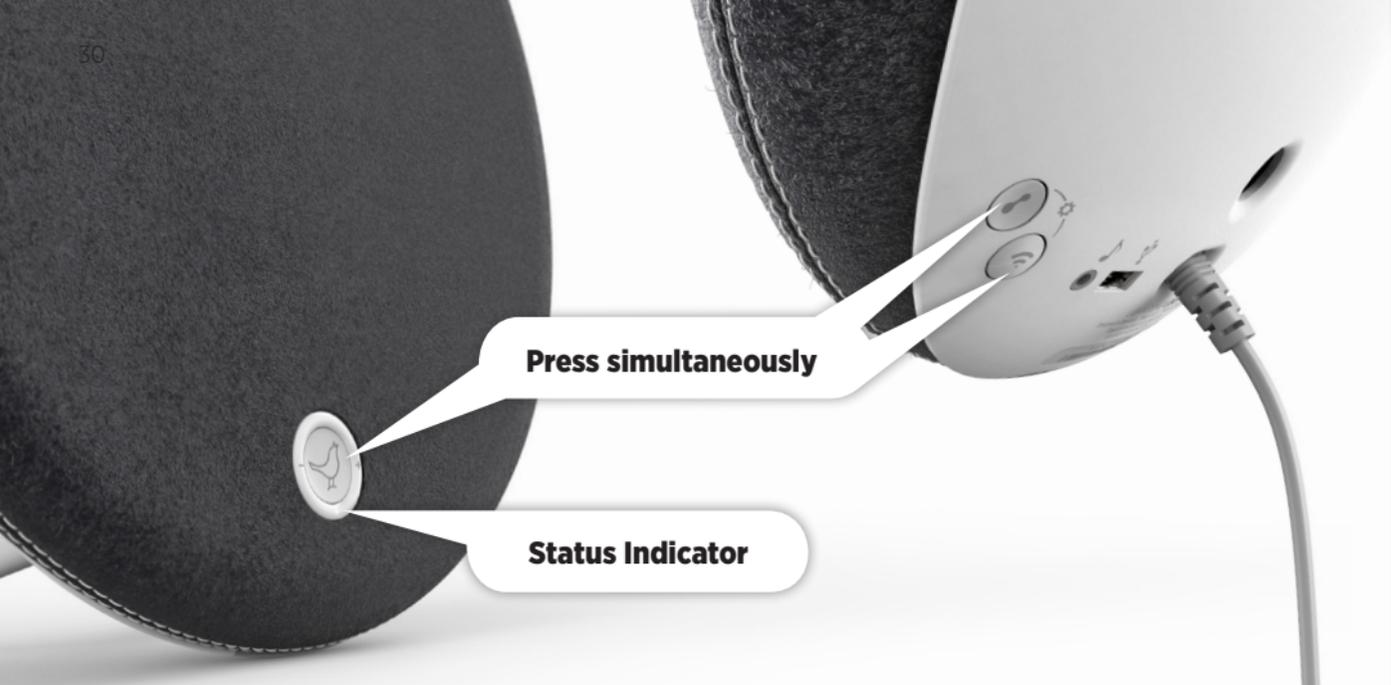

LIBRATONE APP

Add another dimension to your Libratone Loop by downloading the free Libratone app from Apple App Store to your iOS device.

The Libratone app keeps your speaker firmware up to date and allows you to customize the sound to your music style and acoustic surroundings - and thereby enhancing the FullRoom™ experience.

The Libratone app is also available for Android.
