Intended use

Your new dryer is a high-quality, energy-efficient appliance. It is designed to meet the needs of modern households and offers various functions for different fabrics and materials. It is a high-quality appliance that functions correctly and is in perfect condition.

Preparing for...

- Make sure the power socket is easily accessible and the water connection is correct. 
- Check that the required materials are available. 
- Ensure that the drum is clean and free of foreign objects. 
- Check that the filter is clean and dry. 
- Ensure that the door is closed and the drum is empty.

Inspecting the dryer

- Before using the dryer for the first time, you should inspect it carefully to ensure that all parts are in good condition. 
- Check that the drum is clean and free of foreign objects. 
- Check that the filter is clean and dry. 
- Ensure that the door is closed and the drum is empty.

Connecting the power plug

- Insert the plug into the power socket. 
- Make sure that the plug is securely inserted.

Sorting and loading laundry

- Sort the laundry by type and weight. 
- Load the laundry into the drum, ensuring that the items do not overlap. 
- Do not load the dryer beyond the recommended capacity.

Cleaning the fluff filter

- The filter should be cleaned after each cycle. 
- To clean the filter, pull it out and rinse it with warm water. 
- Allow the filter to dry thoroughly before returning it to the dryer.

Emptying condensation

- The condenser should be emptied after each cycle. 
- To empty the condenser, turn off the dryer, open the door, and empty the condenser. 
- Close the door to ensure the drying process continues.

Removing the laundry

- The drum must be empty prior to loading. 
- The drum and door may be hot! 
- Do not leave laundry in the dryer.

The drying result (e.g. Cupboard Dry) can be adjusted over three levels (1 - max. 3) 

After one of these programmes has been finely adjusted, the setting is retained for the future.

Environmental protection / Energy-saving tips

- Do not use steel wool or abrasive materials. 
- Do not damage the protective filter or air cooler. 
- Do not use any hard or sharp-edged tools to clean the protective filter or air cooler. 
- Do not damage the protective filter or air cooler.

Further information about the intended use, preparation, inspecting, connecting the power plug, sorting and loading laundry, cleaning the fluff filter, emptying condensation, removing the laundry, the drying result (e.g. Cupboard Dry), and environmental protection / Energy-saving tips can be found in the user manual.
Installation

Before installing, read instructions for installation and use, washes and drying techniques.

1. Open the door, disconnect the mains plug from the socket. The electrical connection must be sealed.
2. Pull the mains plug out of the socket immediately or disconnect the fuse. Never operate the dryer without a cover cap.
3. Do not use multiple plugs/couplings and/or extension cables. Only use earth-leakage circuit breakers with the following symbol:

Safety instructions

– Make sure the room is sufficiently ventilated. Do not lean or sit on the door. Keep the area around the dryer clean.
– Keep the cooling grille at the front of the dryer free from obstructions.
– The appliance plug must always be accessible.
– Do not use multiple plugs/couplings and/or extension cables.
– Only use earth-leakage circuit breakers with the following symbol:

Programmes

- Cottons: Standard programme for cottons in accordance with current EU regulation 932/2012
- Cupboard Dry: The condensation is conveyed directly via a hose.
- Extra Dry: Connection fittings for condensation outlet
- SuperQuick 40': Washer-dryer stack connection set

Most efficient programme for cotton fabric

1. Place the laundry into the dryer. Close the cover cap. Never operate the dryer without a cover cap.
2. Set the programme by pressing the relevant button (for example, Cottons cupboard dry). Check the contents of the laundry and remove any articles which may be difficult to dry (e.g. clothing with metal parts, such as buttons or zips, or with spandex, etc.).
3. Set the drying level.
4. Wait 5 min., and then empty the condensate container again.

What to do if...

- If the drum is too hot, remove all articles of clothing immediately after the end of the programme and leave them to cool down. Make sure the room is sufficiently ventilated.
- If the drum is still too damp, select a time programme for extended drying of laundry that is still to dry. This does not increase the temperature.
- After the end of the programme, warm laundry feels damper than it is, select a programme with a longer drying time or increase the drying level. This does not increase the temperature.

Spare parts

– Spare parts cannot be ordered directly from the manufacturer. Please contact the retailer or our service representatives.

Condensation is not drinking water and may be contaminated with fluff.

Repairs must only be carried out by the after-sales service.

- If featured, check hose for condensation outlet.
- If the mains plug has been damaged, have the defective mains cable replaced by the after-sales service.
- Dangers

– Do not lean or sit on the door. Keep the area around the dryer clean.
– Keep the cooling grille at the front of the dryer free from obstructions.
– Always pull the mains plug out of the socket before changing the bulb for the drum lights up after the door is opened or closed, and after the programme starts, and switches off automatically. Changing the bulb

– Emergency – Pull the appliance plug out of the socket immediately or disconnect the fuse.

Mains plug plugged in? Programme selected?

– Do not use multiple plugs/couplings and/or extension cables.
– Only use earth-leakage circuit breakers with the following symbol:

– Do not leave children unsupervised near the dryer. The final part of a tumble dryer cycle occurs without heat (cool down cycle), to avoid the risk of hot laundry.
– Do not lean or sit on the door. Keep the area around the dryer clean.

Dangers – Condensation is not drinking water and may be contaminated with fluff.

– Do not leave children unsupervised near the dryer.

– Final part of a tumble dryer cycle occurs without heat (cool down cycle), to avoid the risk of hot laundry.
– Do not lean or sit on the door. Keep the area around the dryer clean.

– Final part of a tumble dryer cycle occurs without heat (cool down cycle), to avoid the risk of hot laundry.
Your new dryer

Congratulations - You have chosen a modern, high-quality Bosch domestic appliance.

The condensation dryer is distinguished by its economical energy consumption.
Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition.
Should you have any questions, our after-sales service will be pleased to help.

Disposal in an environmentally-responsible manner

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU.

For further information about our products, accessories, spare parts and services, please visit: www.bosch-home.com

Intended use

- for domestic use only,
- only to be used for drying fabrics that have been washed with water.

Keep children younger than 3 years old away from the dryer.
Do not let children make the cleaning and maintenance work on the dryer without supervision.
Do not leave children unsupervised near the dryer.
The dryer can be operated by children 8 years old and older, by persons with reduced physical, sensory or mental abilities and by persons with insufficient experience or knowledge if they are supervised or have been instructed in its use by a responsible adult.

Preparing for installation, see Page 8

In case of damage

Never start the dryer if it is damaged!
Inform your after-sales service.

Connecting the mains plug

Make sure your hands are dry.
Hold the plug only.

Select the drying programme ...

Select the drying programme according to the type of laundry and its intended use.

Selecting and adjusting the programme ...

... and adapt to individual requirements

Sort and load the laundry

Remove all items from pockets.
Check for cigarette lighters.
The drum must be empty prior to loading.
See programme overview on page 7.
See also separate instructions for "Woollens basket" (depending on model)

Reduced temperature for delicate fabrics

For fabrics that require a longer drying time; e.g. polyacrylcs, polyamide, elastane or acetate.

Fine adjustment of the drying result

The drying result (e.g. Cupboard Dry) can be adjusted over three levels (1 - max. 3) for the Cottons, Easy-Care and SuperQuick 40' programmes.
After one of these programmes has been finely adjusted, the setting is retained for the others.
Further information → Page 5/6.

Additional functions

Display panel

Programme selector

Service indicators

Container
Clean

Empty the condensate container.
Clean the fluff filter and/or air cooler under running water. → Page 4/6.

Fine adjustment of the drying result

The drying result (e.g. Cupboard Dry) can be adjusted over three levels (1 - max. 3) for the Cottons, Easy-Care and SuperQuick 40' programmes → presetting = 0.
After one of these programmes has been finely adjusted, the setting is retained for the others.
Further information → Page 5/6.
**Emptying condensation**

Empty container after each drying operation!
1. Pull out condensate container keeping it horizontal.
2. Pour out condensation.
3. Always push container in fully until it clicks into place.

If Container flashes in the display panel → What to do if..., Page 10.

**Cleaning the fluff filter**

Clean the fluff filter after each drying operation.
1. Open the door, remove fluff from door/door area.
2. Pull out and fold open the fluff filter.
3. Remove the fluff (by wiping the filter with your hand).
4. If the fluff filter is very dirty or blocked, rinse with warm water and dry thoroughly.
5. Close and reinsert the fluff filter.

**Switching off the dryer**

Turn the programme selector to Off.
Do not leave laundry in the dryer.

**Removing the laundry**

The automatic anti-crease function causes the drum to move at specific intervals, the washing remains loose and fluffy for an hour (two hours if the additional Reduced Ironing function is also selected—depending on model).

**Programme end** once lights up in the display.

**Interrupt programme** removing or adding laundry.

The drying cycle can be interrupted for a brief period so that laundry may be added or removed. The programme selected must then be resumed and completed.

Never switch the dryer off before the drying process has ended. Drum and door may be hot!

1. Open door, the drying process is interrupted.
2. Load or remove laundry and close door.
3. If required, select a new programme and additional functions.
4. Press the Start/Stop button.
Information on laundry ...

Labelling of fabrics

Follow the manufacturer’s care information.
- Drying at normal temperature.
- Drying at low temperature → also select i Low Heat.
- Do not machine dry.
- Do not tumble-dry the following fabrics for example:
  - Impermeable fabrics (e.g. rubber-coated fabrics).
  - Delicate materials (silk or curtains made from synthetic material) → they may crease
  - Laundry contaminated with oil.

Drying tips
- To ensure a consistent result, sort the laundry by fabric type and drying programme.
- Always dry very small items (e.g. baby socks) together with large items of laundry (e.g. hand towel).
- Close zips, hooks and eyelets, and button up covers.
- Tie fabric belts, apron strings, etc. together
- Do not over-dry easy-care laundry → risk of creasing!
- Allow laundry to finish drying in the air.
- Do not dry woolens in the dryer, only use to freshen them up → Page 7, Woolens finish Programme (depending on model).
- Do not iron laundry immediately after drying, fold items up and leave for a while → the remaining moisture will then be distributed evenly.
- The drying result depends on the type of water used during washing. → Fine adjustment of the drying result → Page 5/6.
- Machine-knitted fabrics (e.g. T-shirts or jerseys) often shrink the first time they are dried → do not use the Extra Dry programme.
- Starched laundry is not always suitable for dryers → starch leaves behind a coating that adversely affects the drying operation.
- Use the correct dosage of fabric softener as per the manufacturer’s instructions when washing the laundry to be dried.
- Use the timer programme for small loads → this improves the drying result.

Environmental protection / Energy-saving tips
- Before drying, spin the laundry thoroughly in the washing machine → the higher the spin speed the shorter the drying time will be (consumes less energy), also spin easy-care laundry.
- Put in, but do not exceed, the maximum recommended quantity of laundry → programme overview → Page 7.
- Make sure the room is well ventilated during drying.
- Do not obstruct or seal up the air inlet.
- Keep the air cooler clean → Page 6 “Care and cleaning”.

Fine adjustment of the drying result

Adjustment of the levels of dryness

- Turn to Off
- Press and hold i Low Heat and turn 5 x to the right
- Press i Low Heat until the required level is reached
- Turn to Off

Care and cleaning

Dryer housing, control panel, air cooler, moisture sensors
- Wipe with a soft, damp cloth.
- Do not use harsh cleaning agents and solvents.
- Remove detergent and cleaning agent residue immediately.
- Allow the dryer to cool.
- Residual water may leak out, so place an absorbent towel underneath the maintenance door.

Air cooler / Protective filter
- Clean the protective filter 5 - 6 times a year or if Clean flashes after cleaning the fluff filter.

Moisture sensors
- The dryer is fitted with stainless steel moisture sensors. The sensors measure the level of moisture in the laundry. After a long period of operation, a fine layer of limescale may form on the sensors.

1. Unlock the maintenance door.
2. Open the maintenance door fully.
3. Turn both locking levers towards each another.
4. Pull out the protective filter/air cooler.
5. Clean the protective filter/air cooler thoroughly.
6. Clean the seals.
7. Re-insert the protective filter/air cooler, with the handle facing down.
8. Turn back both locking levers.
9. Close the maintenance door until the lock clicks into place.

Drying, Iron Dry, Cupboard Dry, Anti-Crease/End are displayed in sequence. Short signal when changing from level 3 to 0, otherwise long signal.
**Programme overview**  
also see Page 5

Sort the laundry according to type of textile and fabric. Fabrics must be suitable for tumble drying.

<table>
<thead>
<tr>
<th>After drying...</th>
<th><strong>iron laundry</strong></th>
<th><strong>lightly iron laundry</strong></th>
<th><strong>do not iron laundry</strong></th>
<th><strong>mangle laundry</strong></th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>PROGRAMMES</th>
<th>TEXTILE TYPE AND INFORMATION</th>
</tr>
</thead>
</table>
| **Cottons** | max. 7 kg  
Hard-wearing fabrics, boil-resistant fabrics made of cotton or linen. |
| **Easy-Care** | max. 3.5 kg  
Non-iron laundry made of synthetic fibres and blended fabric, easy-care cotton. |
| Iron Dry | Fabrics suitable for ironing (iron fabrics in order to avoid creasing). |
| *Extra Dry* | Single-layer fabrics. |
| **Sportswear** | max. 1.5 kg  
Fabrics with membrane coating, water-repellent fabrics, functional clothing, fleece fabrics (dry jackets/trousers with removable internal lining separately). |
| **SuperQuick 40’** | max. 2 kg  
Laundry made of synthetic fibres, cotton or blended fabrics (for example) that needs to be dried quickly. The values may differ from the those specified depending on the type of fabric, mixture of laundry to be dried, residual moisture in the fabric and loading capacity. |
| **Timed Programme** | warm 20 min.  
Pre-dried, multi-layered, sensitive fabrics made of acrylic fibres, or separate small items of laundry. Also for subsequent drying. |

*for **Cottons** and **Easy-Care** programmes only
**Dryness levels can be selected individually**.  
*Extra Dry, Cupboard Dry and Iron Dry (depending on the model).  
Degree of dryness can be finely adjusted; multi-layered textiles require a longer drying time than single-layered items of clothing.  
Recommendation: Dry separately.

---

**Frost protection / Transport**

1. Empty the condensate container → Page 4.  
2. Mains connection see safety instructions → Page 11.  
3. Installation  
   - Connect to an AC earthed socket. If in doubt have the socket checked by an expert.  
   - The mains voltage and the voltage shown on the rating plate (Page 9) must correspond.  
   - The connected load and necessary fuse protection are specified on the rating plate.  
4. Setting up the dryer  
   - The appliance plug must always be accessible.  
   - Be careful to avoid sharp edges.  
   - Do not operate the dryer if there is a danger of frost.  
   - Do not set up in a room that is susceptible to frost.  
5. Take all accessory parts out of the drum.  
   - Keep the area around the dryer clean.  
   - Do not set up the dryer behind a door or sliding door as this may obstruct or prevent the dryer door from opening.  
   - Do not remove the threaded feet under any circumstances.  
   - The drum must be empty.  
   - The drum must be empty.  
   - Do not set up the dryer if there is a danger of frost.

---

**Installation**

Delivery specification, dryer, instructions for installation and use, woollens basket
Technical data

- Dimensions (DxWxH): 60 x 60 x 85 cm (height adjustable)
- Weight: approximately 45 kg
- Max. capacity: 7 kg
- Condensate container: 4.2 l
- Connection voltage: see appliance rating plate
- Connected load:
  - Power consumption when switched off: 0.10 W
  - Power consumption when ready for use (left-on mode): 1.00 W
- Drum interior light (depending on model) (bulb E14, 25 W): The drum lights up after the door is opened or closed, and after the programme starts, and switches off automatically. Changing the bulb → page 10.

** Programme setting for testing in accordance with the applicable EN61212 standard.

Most efficient programme for cotton fabrics

The following "standard cottons programme" (identified with ) is suitable for drying normal, wet cotton laundry and is most efficient in terms of its combined energy consumption for drying wet cotton laundry.

Standard programme for cottons in accordance with current EU regulation 932/2012

![Image](https://via.placeholder.com/150)

Optional accessories (from after-sales service using order number, depending on model)

Platform
For easier loading and unloading. The basket contained in the drawer can be used to carry the laundry.

Washer-dryer stack connection set
The dryers can be placed on top of a suitable washing machine with the same width and depth to save space. The dryer must be fastened to the washing machine using this connection set. With pull-out worktop: WTZ 11300

Connection fittings for condensation outlet
The condensation is conveyed directly via a hose.

Installation underneath the worktop
Instead of the appliance covering plate, you must have a metal cover fitted by a specialist.

What to do if ...

If you cannot rectify a fault yourself (e.g. switching off/on), please contact our after-sales service. We will always find an appropriate solution and will avoid unnecessary visits by engineers. Trust the expertise of our manufacturer and rest assured that the repair will be carried out by trained service technicians using original spare parts. The contact details of your local after-sales service can be found in the enclosed after-sales service directory, or by calling one of these numbers:

- GB 0344 692 9879 (Calls charged at local or mobile rate.)
- IE 01450 2655 (0.03 € per minute at peak. Off peak 0.0088 € per minute.)

When contacting the after-sales service, please quote the appliance's product number (E no.) and production number (FD) (see the inside of the door).

Set the programme selector to Off and remove the appliance plug from the socket.

The Start/Stop indicator lamp does not light up.
Mains plug plugged in? Programme selected?
Check the socket fuse.

The display panel light and indicator lights (depending on model) go out and the Start/Stop indicator light flashes.
Energy-saving mode is activated. see the separate Energy-saving mode instructions.

The Container and Start/Stop indicator lights are flashing.
Empty the condensate container.
If featured, check hose for condensation outlet.
Clean the filter and/or air cooler under running water → Page 4/6.

Dryer does not start.
Start/Stop button selected?
Door closed?
Programme set?
Ambient temperature greater than 5°C?

Water is running out.
Align dryer horizontally.
Clean air cooler seal.

The door opens by itself.
Push the door closed until you hear it engage.

Creeing.
Laundry load exceeded?
Remove articles of clothing immediately after the end of the programme, hang up and pull into shape.
Unsuitable programme selected → Page 7.

Laundry is not dried correctly or is still too damp.
After the end of the programme, warm laundry feels damper than it actually is. Spread the laundry out and allow the heat to disperse. Finely adjust the dryness level – this extends the drying time but does not increase the temperature. Your laundry will become drier. Select a programme with a longer drying time or increase the drying level. This does not increase the temperature. Select a time programme for extended drying of laundry that is still damp. If you have exceeded the maximum load for the programme, the laundry may not be dried correctly. Clean the moisture sensor in the drum. A fine layer of limescale may adversely affect the performance of the sensors and your washing will not dry properly.
Drying has been interrupted as a result of a power cut, because the condensate container is full or because the maximum drying time has been exceeded.

Drying time too long.
Rinse the filter under running water → Page 4.
Insufficient supply of air → ensure that air can circulate.
Air inlet possibly blocked → Clean inlet → Page 8.
Ambient temperature higher than 35 °C → Ventilate the room.

The humidity in the room increases significantly.
Make sure the room is sufficiently ventilated.

Power failure.
Remove laundry from the dryer immediately and spread out.
This allows the heat to dissipate. Be careful as the door, the drum and the laundry may be hot.

One or more indicator lights for programme status are flashing.
Clean filter and air cooler → Page 4/6.
Check installation conditions → Page 8.
Switch off, leave to cool down, switch on again, restart programme.

The interior light is not working (depending on model).
Pull out the appliance plug, remove the cover cap in the interior above the door (use Torx 20 screw driver) and replace the bulb.
Close the cover cap. Never operate the dryer without a cover cap.
Safety instructions

Emergency
ONLY use the dryer...
- Pull the appliance plug out of the socket immediately or disconnect the fuse.
- in rooms inside the house.
- to dry fabrics.

The dryer must NEVER...
- be used for other purposes than those described above.
- be modified in terms of its technology or attributes.

Dangers
- The dryer must not be used by children or persons who have not been instructed in its use.
- Do not leave children unsupervised near the dryer.
- Keep pets away from the dryer.
- Remove all objects from pockets. Make especially sure that cigarette lighters are removed as they constitute an explosion hazard.
- Do not lean or sit on the door risk of tipping.

Installation
- Secure loose cables tripping hazard.
- Do not operate the dryer if there is a risk of frost.

Mains connection
- Connect the dryer according to specifications to an AC earthed socket, as otherwise it cannot be guaranteed that the appliance is completely safe.
- The cable cross-section must be sufficient.
- Only use earth-leakage circuit breakers with the following symbol:  
- The appliance plug and socket must be compatible.
- Do not use multiple plugs/couplings and/or extension cables.
- Do not hold the appliance plug with wet hands risk of electric shock.
- Do not use the dryer if the laundry has been in contact with solvents, oil, wax, grease or paint (e.g. hair setting spray, nail polish remover, stain remover, cleaning solvent, etc.) fire/explosion hazard.
- The tumble dryer is not to be used if industrial chemicals have been used for cleaning.
- Dust (e.g. coal dust, flour) poses a danger: do not use the dryer explosion hazard.
- Do not turn off the dryer until the drying process ends, unless the laundry will be removed quickly and spread out, so that the heat can dissipate.
- Do not put laundry containing foamed material/rubber in the dryer elastic material may be destroyed and the dryer may be damaged due to possible deformation of the foamed material.
- Light things, such as long hair, may be sucked into the air inlet of the dryer Risk of injury.
- Final part of a tumble dryer cycle occurs without heat (cool down cycle), to ensure that the items are left at a temperature that ensures that the items will not be damaged.
- Switch off the dryer once the programme has ended.
- Condensation is not drinking water and may be contaminated with fluff.

Defect
- Do not use the dryer if it is defective or if you suspect it is.
- Repairs must only be carried out by the after-sales service.
- Do not use the dryer if the mains cable is defective. To avoid danger, only have the defective mains cable replaced by the after-sales service.
- Always pull the mains plug out of the socket before changing the bulb for the interior light risk of electric shock.

Spare parts
- Only use genuine spare parts and accessories for safety reasons.

Disposal
- Dryer: pull out the appliance plug, then cut off the mains cable from the appliance. Dispose of at municipal waste disposal facility.
- Packaging: do not leave children alone with packing parts risk of suffocation.
- All materials are environmentally sound and can be reused. Dispose of in an environmentally-responsible manner.
