**Congratulations**

You have chosen a modern, high-quality appliance.

**Intended use**

This appliance has been designed only for household use. It is not suitable for continuous use in public and commercial areas.

**Technical data**

- **Supply voltage**: 230 V~ 50 Hz
- **Power consumption**: 3000 W
- **Dimensions**: H 4000 mm, W 600 mm, D 600 mm
- **Weight**: 25 kg

**Programme overview**

<table>
<thead>
<tr>
<th>Programme Type</th>
<th>Textile Type</th>

**Notes on laundry**

- Before drying, spin the laundry in the washing machine.
- Close zips, hooks and eyelets, and button up covers.
- Do not cover or seal the air inlet on the dryer.
- Make sure the room is well ventilated during drying.
- Avoid drying items that produce a lot of fluff.

**Setting (indicators lights and buttons)**

- **Start button**: Start the programme.
- **Anti-crease function**: Can be extended by up to 60 min.
- **Temperature setting**: Select the temperature setting.
- **Programme selector**: Select the programme.
- **Duration setting**: Select the duration setting.

**Display panel and settings**

- **Programme end**: The programme ends
- **Finished in (Remaining time)**: Shows the remaining time
- **Display panel**: Shows the programme status
- **Option**: Shows the selected option

**Maintenance**

- **Clean fluff filter**: The fluff filters must be cleaned after every drying cycle. Rinse regularly under running water.
- **Inspect the dryer**: Inspect the dryer after every maintenance work on the dryer without supervision.

**Optional accessories**

- **Max. 3 kg**: Suitable for drying items up to 3 kg.

**Installation**

- **Display panel**: Set and adjust the Programme selector when the appliance is turned on.
- **Door**: Open the door or press the Reload button.

**Important information**

- **Mains plug**: Never pull out the mains plug forcibly, as this can damage the appliance.
- **Anti-crease function**: The anti-crease function can be extended by up to 60 min.

**Supplied accessories**

- **Condensate container**: Can be found in the rear of the appliance.
- **Fluff filter**: Can be found in the door/door area.

**Notes on washing and care**

- **Wool finish**: Suitable for woolen fibres.
- **Functional clothing**: Made of synthetic fibres.
- **Iron Dry**: Suitable for ironing after drying.

** CPP**

- **Carl-Wery-Str. 34**
- **81739 München/Deutschland**
Power failure. Remove the laundry from the dryer immediately and spread out. This allows the heat to disperse.

Laundry is not dried correctly or is still too damp. After the end of the programme, warm laundry feels damper than it actually is. Spread out the laundry to allow the heat to disperse.

Energy

p

4 kg

Creasing. Laundry load exceeded?

The dryer is equipped with stainless steel moisture sensors.

Other intermittent noises and vibrations. Not an error.

Dryer does not start.

Drying time too long. Clean the fluff filters under running water.

The automatic cleaning process causes a noticeable sound.

During drying, the compressor and the pump generate some noise which is entirely normal.

The process of pumping the condensation out by trained service technicians using original spare parts.

After-sales service

Safety instructions
Congratulations - You have chosen a modern, high-quality Bosch domestic appliance. The condensation dryer with heat pump and automatic cleaning of the heat exchanger is outstanding in terms of efficient energy consumption and low maintenance requirements → page 6. Every dryer which leaves our factory is carefully checked to ensure that it functions correctly and is in perfect condition. Should you have any questions, our after-sales service will be pleased to help.

### Intended use

- exclusively for domestic use,
- only for drying fabrics which have been washed using water.

Keep children younger than 3 years old away from the dryer.

Do not let children make the cleaning and maintenance work on the dryer without supervision. Do not leave children unsupervised near the dryer.

Keep pets away from the dryer.

The dryer may be operated by children from 8 years of age, by persons who have limited physical, sensory or mental abilities and by persons who have inadequate experience or knowledge, provided they are supervised or have been instructed by a responsible person.

This appliance is intended for use up to a maximum height of 4000 metres above sea level.

### Programmes / Fabrics

**Cottons**
- Hard-wearing fabrics.

**Easy-Care**
- Fabrics made from synthetic or blended fabrics.

**Dryness levels to select with the Cottons and Easy-Care programmes:**

**Inspect the dryer**

Make sure your hands are dry.

**Connect the mains plug**

**Sort the laundry**

Remove all items from pockets, especially cigarette lighters. The drum must be empty prior to loading.

See also separate instructions for “Woolen basket” (depending on model).

Set and adjust the programme individually

**Close the door**

Select Start/Reload

**Drying**

Condensate container with filter

Control panel

Door

1. Rinse both parts

2. Remove fluff from the edge of the shaft.

3. Close the door

4. Start/Reload

5. Empty the condensate container, page 8/12.

6. Clean fluff filter

   Clean fluff filters reduce energy consumption.

   The fluff filter consists of two parts. Clean the inner and outer filter after every drying cycle:

   1. Open the door.
   2. Remove fluff from the door area.
   3. Pull out both parts of the fluff filter.
   4. Remove fluff from the edge of the shaft. Fluff should not fall into the open shaft.
   5. Rinse both parts under running water and dry thoroughly.
   6. Close the inner and outer filter, put them back together and reinsert them into the appliance.

7. **Empty the condensate container**

   Empty the container after each drying cycle, but not during the cycle.

   1. Remove the container, holding it level.
   2. Pour out the condensate.
   3. Always push the container back in until it clicks into place.

   If (Condensate container) flashes in the display panel despite the container having been emptied → clean filter in condensate container, page 8/12.

   Do not pull out/empty the condensate container when drying is in progress.

8. **Remove the laundry and switch off the dryer**

   **End of the programme...**

   **Interrupt the programme**

   1. Open the door or press the Start/Reload button; the drying cycle is interrupted.
   2. Add or remove laundry and close the door.
   3. If required, select a new programme and additional functions. Select the Start/Reload button. The remaining time is updated after a few minutes.

   **The drum and door may be hot!**
Notes on laundry ...

Labelling of fabrics

- Follow the manufacturer's care instructions.
  - Suitable for tumble drying.
  - Dry at normal temperature.
  - Dry at low temperature → in addition, select Low Heat.
  - Do not tumble dry.

Do not tumble dry the following fabrics:
- Non-breathable fabrics (e.g. rubber-coated).
- Delicate materials (silk, curtains made from synthetic material) → these maycrease.
- Oil-stained laundry.

Drying tips

- To ensure a consistent drying result, sort the laundry by fabric type and drying programme.
- Always dry very small fabrics (e.g. baby socks) together with larger items of laundry (e.g. towels).
- Close zips, hooks and eyelets, and button up covers.
- Tie cloth belts, apron strings, etc. together or use a laundry bag.
- Do not over-dry easy-care laundry → risk of creasing.
- Allow laundry to finish drying in the air.
- Do not dry woollens in the dryer. They may, however, be refreshed in the dryer → Wool finish Programme (depending on model).
- Do not iron laundry immediately after drying; fold items up and leave for a while → residual moisture will then be distributed evenly.
- Knitted fabrics (e.g. T-shirts, jerseys) often shrink slightly the first time they are tumble-dried. → Do not use the Cupboard Dry Plus programme.
- Starched laundry is not always suitable for dryers → starch leaves behind a coating that reduces the drying effect.
- When washing laundry that is to be tumble dried afterwards, use the correct amount of fabric softener as specified in the manufacturer’s instructions.
- For pre-dried, multi-layered fabrics or small, individual items of laundry, use the programme as normal. Also suitable for subsequent drying.

Environmental protection / Energy-saving tips

- Before drying, spin the laundry in the washing machine → higher spin speeds minimise the drying time and reduce energy consumption.
- Use the maximum recommended capacity, but do not exceed it → Programme overview page 7.
- Make sure the room is well ventilated during drying.
- Do not cover or seal the air inlet on the dryer.

Important information ...

Your dryer is designed to be particularly energy efficient. Its technical features include a refrigeration circuit, which uses energy efficiently in a similar way to a refrigerator.

The dryer’s heat exchanger is cleaned automatically during drying.

The fluff filters and filter in the condensate container must be cleaned regularly.

Never operate the dryer without the fluff filters and without filter in condensate container!

Fluff filters

During drying, fluff and hair from the laundry is trapped by the fluff filter. Blocked fluff filters may impair the heat exchange process.

The fluff filters must therefore be cleaned after every drying cycle. Rinse regularly under running water → page 4/12.

Filter in the condensate container

The filter in the condensate container cleans the condensation. This condensation is required for the automatic cleaning process. The filter should be cleaned regularly under running water. Empty the condensate container before cleaning the filter → page 4/8/12.

Fabrics

- Do not dry any fabrics that have come into contact with solvents, oil, wax, grease or paint: e.g. hair styling products, nail varnish remover, stain remover, cleaning solvent etc.
- Empty all pockets.
- Do not dry non-breathable fabrics.
- Avoid drying items that produce a lot of fluff.
- Woollens should be refreshed only, using the woollens programme.
**Programme overview** see also page 6.

Sort the laundry according to type of textile and fabric. Fabrics must be suitable for tumble drying.

After drying, laundry is to be ...
- ☑ Ironed
- ☐ Lightly ironed
- ☐ not ironed
- ☐ mangled

### PROGRAMMES

</tr>
</tbody>
</table>

*Dryness levels can be selected individually → Cupboard Dry Plus, Cupboard Dry and Iron Dry (depending on the model). Degree of dryness can be finely adjusted; multi-layered textiles require a longer drying time than single-layered items of clothing. Recommendation: Dry separately.*
Care and cleaning

Heat exchanger
The dryer's heat exchanger is cleaned automatically during drying. **SELF CLEANING** appears rolling in the display panel. Do not pull out the condensate container during the cleaning process.

Dryer housing, control panel
- Wipe with a soft, damp cloth.
- Do not clean with a water jet.
- Remove detergent and cleaning agent residue immediately.
- Some water may collect between the window and the seal during drying. This does not affect the proper operation of your dryer in any way.

Filter in the condensate container
The filter is cleaned automatically when the condensate container is emptied. However, the filter should still be cleaned regularly under running water. This prevents stubborn deposits/dirt from building up.

1. Pull out the condensate container.
2. Pull the filter out of its snap-in lock.
3. Clean the filter under running water or in the dishwasher.
4. Refit the filter.
5. Insert the condensate container so that it locks into place.

Only operate the dryer with the filter inserted.

Moisture sensors
The dryer is equipped with stainless steel moisture sensors. Moisture sensors measure the moisture level of the laundry. After sustained, repeated operation, a fine layer of limescale may form on the moisture sensors.

1. Open the door.
2. Clean the moisture sensors with a damp sponge which has a rough surface.

Do not use steel wool or abrasive agents!

Installation

- Scope of delivery: dryer, operating and installation instructions, basket for woollens (depending on the model).
- Check the dryer for transport damage.
- The dryer is very heavy. Do not attempt to lift it on your own.
- Be careful to avoid sharp edges.
- Do not lift the dryer by protruding parts (e.g. the door) - risk of breakage.
- Do not set up in a room that is susceptible to frost. Freezing water may cause damage.
- If in doubt, have the appliance connected by a specialist.

1. Setting up the dryer
   - The mains plug must always be accessible.
   - Ensure that the appliance is placed on a clean, level and firm surface.
   - Do not obstruct the air inlet on the dryer.
   - Keep the area around the dryer clean.
   - Level the dryer using the threaded feet and a spirit level. Never remove the threaded feet!

   Take all accessory parts out of the drum. The drum must be empty.

   Do not install the dryer behind a door or sliding door which could prevent or obstruct the dryer door from opening. This will prevent children from locking themselves in and risking their lives.

   Make sure that the air inlet remains unobstructed.

2. For mains connection, see Safety instructions → page 13.
   - Connect to an AC earthed socket. If in doubt have the socket checked by a specialist.
   - The mains voltage and the voltage shown on the rating plate (→ page 10) must be the same.
   - The connected load and necessary fuse protection are specified on the rating plate.

Frost protection

Preparation
1. Empty the condensate container → page 4,8/12.
2. Select any programme using the programme selector.
3. Press the Start/Reload button → condensation is pumped into the container.
4. Wait several minutes or until the dryer stops, and then empty the condensate container again.
5. Turn the programme selector to Off.

Do not operate the dryer if there is a risk of frost.

Transport

- Prepare the dryer → see Frost protection.
- Transport the dryer in a vertical upright position.
- Following transportation, do not use the dryer for two hours.

The dryer contains residual water; this can flow out if the dryer is tilted.
Technical Data

- **Dimensions (DxWxH)**: 60 x 60 x 85 cm (height adjustable)
- **Weight**: approx. 51 kg
- **Max. capacity**: 8 kg
- **Condensate container**: 4.0 l
- **Connection voltage**: 220-240 V
- **Connected load**: 1000 W
- **Fuse protection**: 10 A
- **Ambient temperature**: 5 - 35°C

**Product number Production number** Inside of door
The rating plate can be found on the back of the dryer.

- **Power consumption when switched off**: 0.10 W
- **Power consumption when ready for use (left-on mode)**: 1.00 W
- **Drum interior light (depending on model)**: The drum lights up after the door is opened and after the programme starts, and switches off automatically.

* Programme setting for testing in accordance with the applicable EN61121 standard.
** The values may differ from those specified, depending on the type of fabric, composition of laundry to be dried, residual moisture in the fabric, the degree of dryness that has been set and the amount of laundry being loaded.

### Most efficient programme for cotton fabrics

The following “standard cottons programme” (identified with ✂) is suitable for drying normal, wet cotton laundry and is most efficient in terms of its combined energy consumption for drying wet cotton laundry.

**Standard programme for cottons in accordance with current EU regulation 932/2012**

<table>
<thead>
<tr>
<th>Programme</th>
<th>Load</th>
<th>Energy consumption</th>
<th>Programme duration</th>

<td>203 min/122 min</td>
</tr>
</tbody>
</table>

Programme setting for testing and energy labelling in accordance with Directive 2010/30/EU.

### Optional accessories

- **Washer-dryer stack connection set** (order from the after-sales service using the order number, depending on the model)
  - **WTZ 20410**
  - **WMZ 20500**
  - **WMZ 20600**

For easier loading and unloading. The basket contained in the drawer can be used to carry the laundry.

- **Wollens basket**
  - For drying individual wollen fabrics, sports shoes and soft toys (see separate instructions for “Woollens basket”)

### Normal noises

- During drying, the compressor and the pump generate some noise which is entirely normal. The compressor in the dryer may occasionally generate a humming noise. The volume and pitch of this may vary depending on the selected programmes and the progress of the drying.

- The automatic cleaning process causes a clicking noise.

- The process of pumping the condensation into the condensate container generates pumping noises.
Turn the programme selector to Off and remove the mains plug from the socket.

- The Start/Reload indicator light does not light up.
  - Mains plug plugged in?
  - Programme selected?
  - Check the socket fuse.

- The display panel light and indicator lights (depending on model) go out and the Start/Reload indicator light flashes.
  - Energy-saving mode is activated → see the separate Energy-saving mode instructions.

- The display panel switches off.
  - The appliance goes into the sleep mode after activating Finished in option → page 5.

- The Condensate container indicator light flashes.
  - Empty the condensate container → page 4.
  - Press the Start/Reload button to reset the displayed indication and then press the Start/Reload button again to restart the appliance if necessary.

- Fluff filter indicator light flashes.
  - Clean the fluff filter → page 4/8.
  - Press the Start/Reload button to reset the displayed indication and then press the Start/Reload button again to restart the appliance if necessary.

- SELF CLEANING: appears in the display panel.
  - Not an error. Automatic cleaning of the heat exchanger.
  - Do not empty the condensate container.

- The dryer does not start.
  - Start/Reload button selected?
  - Door closed?
  - Programme set?

- Programme terminates shortly after starting.
  - Ambient temperature greater than 5°C?
  - Is the appliance loaded with the laundry?
  - Load too small for selected programme?/Use timed programme → page 6/7.
  - Loaded laundry dry?

- Water is leaking out.
  - Make sure the dryer is level.

- The door opens by itself.
  - Push the door closed until you hear it engage.

- Creasing.
  - Laundry load exceeded?
  - Remove articles of clothing immediately after the end of the programme, hang up and pull into shape.
  - Unsuitable programme selected → page 7.

- Laundry is not dried correctly or is still too damp.
  - After the end of the programme, warm laundry feels damper than it actually is. Spread the laundry out and allow the heat to disperse.
  - Finely adjust the dryness level – this extends the drying time but does not increase the temperature. Your laundry will become drier.
  - Select a programme with a longer drying time or increase the drying level.
  - Select a time programme for extended drying of laundry that is still damp.
  - If you have exceeded the maximum load for the programme, the laundry may not be dried correctly.
  - Clean the moisture sensor in the drum. A fine layer of limescale may adversely affect the performance of the sensors and your washing will not dry properly.

- Drying has been interrupted as a result of a power cut, because the condensate container is full or because the maximum drying time has been exceeded.

- Drying time too long.
  - Clean the fluff filters under running water → page 4/8.
  - Insufficient supply of air → Ensure that air can circulate.
  - Air inlet possibly blocked → Clear inlet → page 9.
  - Ambient temperature higher than 35°C → Ventilate the room.

- One or more indicator lights are flashing.
  - Clean the fluff filter → page 4/8/12.
  - Check the installation conditions → page 9.
  - Switch off, allow to cool, switch back on and restart the programme.

- Power failure.
  - Remove the laundry from the dryer immediately and spread out. This allows the heat to dissipate. Be careful as the door, the drum and the laundry may be hot.

- Other intermittent noises and vibrations.
  - Not an error.

- Loud humming noise for several seconds.
  - Has the condensate container been properly inserted?
  - Push the condensate container all the way in.
