Revolutionary Visions.

welcome

Please visit official website to download the latest User Manual

Important Statement

1. VILTA contains two modes: **Denoising** and **Performance**

Denoising is default mode, suitable for all scenarios.

Be sure to select Denoising mode when you have high requirement on audio quality.

The Performance is strengthen mode, which will greatly improve the stability of gimbal. The motor response is radical that will be accompanied with some noise.

The Performance Mode only applies to scenes that require extreme high stability accuracy but not demand high on camera recording quality. (Switch Denosing and Performance in App)

2. The GoPro5 AGC(Automatic Gain Control) function will greatly amplify the background sound. **Please select Wind Only mode on GoPro 5 to minimize the noise to the lowest.** GoPro3 and GoPro4 do not have this problem.

Product Overview

- | | |
|-----------------------------|---------------------------------------|
| 01. Tilt Axis | 12. Camera Frame |
| 02. Roll Axis | 13. Pan Axis Lock |
| 03. Pan Axis | 14. 1/4 Screw Port |
| 04. Power Switch | 15. Function Button |
| 05. Shutter Button | 16. HERO3/3+/4 Frame |
| 06. Status Indicator | 17. Golden Finger Connector |
| 07. Joystick | 18. 1/4 Screw Port |
| 08. Micro-USB Charging Port | 19. Accessory Mounting Port |
| 09. Dismantle Button | 20. Handle Battery Indicator |
| 10. Lanyard Hole | 21. Micro-USB Charging Port |
| 11. Camera Fixed Knob | 22. Handle Battery |
| | 23. Camera Charging Module (Optional) |

1 Installation

1 Unlock Gimbal

- 1) Slide the Pan Axis Lock down
- 2) Twist the Tilt Axis and Roll Axis to unlock

The Status Indicator will flash red if any axis is locked

2 Install Camera

- 1) Insert GoPro in the Camera Frame
- 2) Fasten the knob as indicated

1. Put Hero 3/3+/4 into frame before installing to the Camera Frame
2. To avoid the camera falling, please ensure the knob is fixed before power on

3 Handle Dismantle and Mantle

Dismantle: Press handle Dismantle Button and push as stated to demount the handle

Mantle: Release Dismantle Button and align the mount, slightly pushing forward the gimbal

1. After dismantling handle, double tap on Power Button of gimbal to switch Follow Mode
2. Ensure you hear a click while mounting the grip

4 Install Accessory

Fit for GoPro official accessories

Fit for 1/4 screw camera kit accessories

2 Control

1 Joystick

- 1) Long press the Power Switch and control VILTA through joystick
- 2) Connect VILTA with APP and control through virtual joystick

2 Manual

Directly adjust the shooting direction by hand

Manual Mode can be turned on/ off in App

3 Connect and Shoot

1 VILTA as Remote Control

Power on the gimbal and camera, and operate camera with the following steps

GoPro5

CONNECTIVITY → Connect New → Smart Remote

GoPro 4

⚙️ SETTING → 📶:ON → PAIR → WI-FI RC

GoPro 3/3+

📶 → WI-FI RC → NEW

When the Shutter Button lights off, connection is successful

- 1) Long press the Shutter Button for 2 seconds to shoot/stop shooting
- 2) Short press to take a picture

For more detailed function: check **【Advanced】** — **【Shutter Button】**

2 Connect APP

Download and install APP

For iphone

Please search FreeVision in APP Store to download and install

For Andriod

Scan the QR code below to download and install

The Shooting Function Menu in the APP

VIDEO		
 Video	 Video+Photo	 Looping
PHOTO		
 Photo	 Night	 Burst

The Switching Sequence :

6 Parameter

1 Specification Parameter:

Dimensions	94*41*258 mm(Folded)
Weight	430g(15.16 oz)
Supported Camera	GoPro Hero3/3+/4/5

2 Technical Parameter:

• Controllable Rotation Range

Pan Axis:	360° (Infinite Rotation)
Tilt Axis:	-45° ~100°
Roll Axis:	± 40°

• Mechanical Rotation Range

Pan Axis:	360° (Infinite Rotation)
Tilt Axis:	-90° to 135°
Roll Axis:	-44° to 90°

• Maximum Control Speed:

Adaptive Rotation Speed (± 500 ° /s)

• Accuracy

Static Accuracy	Dynamic Accuracy
Tilt: 0.001°	Tilt: 0.01°
Pan: 0.002°	Pan: 0.02°
Roll: 0.001°	Roll: 0.01°

• Gimbal

Voltage	7.6V
Working Current	Static 300mA , Dynamic 2.5A
Consumption	2.5W

• Gimbal Battery

Voltage	7.6 V
Battery Type	Intelligent Lithium Battery
Battery Capacity	350 mAh
Energy	2.66 Wh

• Handle Battery

Voltage	7.4 V
Battery Type	Intelligent Lithium Battery
Handle Battery Capacity	2000mAh
Energy	14.8Wh

③ Other Specification

- Operating Temperature: -10°C - 50°C (14°-122°F)
- Wearable Gimbal Working Time: 1.2h
- Handheld Gimbal Working Time: 7h
- Handle Charging Time: 2.5 h (5V, 2A)
- Gimbal Charging Time: 1.5 h (5V, 1A)
- WIFI Working Frequency 2.412-2.462 GHz

Packing list

1. VILTA handheld gimbal
2. Charging cable
3. Portable bag
4. Lanyard
5. User manual
6. Hero 3/3+/4 frame

WARNING

1. Do not expose to fire or high heat.
2. Drop and collision will break VILTA. Please caution.
3. Not water-proof. No water or liquid cleaning agent.
4. Do not disassemble, repair or modify VILTA.
5. Gimbal and handle need to be respectively charged.
Please use charger complying with public safety regulation.
6. Do not interfere VILTA operation when working.
7. Not suitable for children.
8. Not include GoPro.
