※ The initial administrator ID is “admin” and the password should be set when logging in for the first time.

Please change your password every three months to safely protect personal information and to prevent the damage of the information theft.

Please, take note that it's a user's responsibility for the security and any other problems caused by mismanaging a password.

## IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean the contaminated area on the product surface with a soft, dry cloth or a damp cloth. (Do not use a detergent or cosmetic products that contain alcohol, solvents or surfactants or oil constituents as they may deform or cause damage to the product.)
7. Do not block any ventilation openings, Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/ accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/ apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lighting storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. This product is intended to be supplied by a Listed Power Supply Unit marked "Class 2" or "LPS" and rated from 12 Vdc, min.1.6 A / PoE , 0.42 A. (PNM-9000QB)
16. This Lens module has to be connected with equipment, which supplied by a power supply unit marked "Class 2" or "LPS". (SLA-T1080FA/T2480A/T2480VA/T4680A/T4680VA)
17. This product is intended to be supplied by isolation power.
18. If you use excessive force when installing the product, the camera may be damaged and malfunction. If you forcibly install the product using non-compliant tools, the product may be damaged.
19. Do not install the product in a place where chemical substances or oil mist exists or may be generated. As edible oils such as soybean oil may damage or warp the product, do not install the product in the kitchen or near the kitchen table. This may cause damage to the product.
20. When installing the product, be careful not to allow the surface of the product to be stained with chemical substance. Some chemical solvents such as cleaner or adhesives may cause serious damage to the product's surface.
21. If you install/disassemble the product in a manner that has not been recommended, the production functions/ performance may not be guaranteed. Install the product by referring to "Installation & connection" in the user manual.

22. Installing or using the product in water can cause serious damage to the product.
23. This device has been verified using STP cable. The use of appropriate GND grounding and STP cable is recommended to effectively protect your product and property from transient voltage, thunderstroke, communication interruption.

## WARNING

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE. DO NOT INSERT ANY METALLIC OBJECT THROUGH THE VENTILATION GRILLS OR OTHER OPENINGS ON THE EQUIPMENT.

Apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.

To prevent injury, this apparatus must be securely attached to the Wall/ceiling in accordance with the installation instructions.

## CAUTION

## EXPLANATION OF GRAPHICAL SYMBOLS

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

## Class I construction

An apparatus with CLASS I construction shall be connected to a MAINS socket outlet with a protective earthing connection.

## Battery

Batteries(battery pack or batteries installed) shall not be exposed to excessive heat such as sunshine, fire or the like.

The battery cannot be replaced.

## Disconnection Device

Disconnect the main plug from the apparatus, if it's defected. And please call a repair man in your location.

**When used outside of the U.S., it may be used HAR code with fittings of an approved agency is employed.**

## CAUTION

RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.  
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

## ATTENTION

IL Y A RISQUE D'EXPLOSION SI LA BATTERIE EST REMPLACÉE PAR UNE BATTERIE DE TYPE INCORRECT.  
METTRE AU REBUT LES BATTERIES USAGÉES CONFORMÉMENT AUX INSTRUCTIONS.

## CAUTION

These servicing instructions are for use by qualified service personnel only.  
To reduce the risk of electric shock do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.

Please use the input power with just one camera and other devices must not be connected.

Before connecting the Power Terminal Block, you need to unplug the power plug from the outlet first.

**The ITE is to be connected only to PoE networks without routing to the outside plant.**

**The wired LAN hub providing power over the Ethernet (PoE) in accordance with IEEE 802-3at shall be a UL Listed device with the output evaluated as a Limited Power Source as defined in UL60950-1 or PS2 as defined in UL62368-1.**

**Unit is intended for installation in a Network Environment 0 as defined in IEC TR 62102. As such, associated Ethernet wiring shall be limited to inside the building.**

Please read the following recommended safety precautions carefully.

- Do not place this apparatus on an uneven surface.
- Do not install on a surface where it is exposed to direct sunlight, near heating equipment or heavy cold area.
- Do not place this apparatus near conductive material.
- Do not attempt to service this apparatus yourself.
- Do not place a glass of water on the product.
- Do not install near any magnetic sources.
- Do not block any ventilation openings.
- Do not place heavy items on the product.
- Please wear protective gloves when installing/removing the camera.  
The high temperature of the product surface may cause a burn.

User's Manual is a guidance book for how to use the products.

The meaning of the symbols are shown below.

- Reference : In case of providing information for helping of product's usages
- Notice : If there's any possibility to occur any damages for the goods and human caused by not following the instruction

※ Please read this manual for the safety before using of goods and keep it in the safe place.

We do not guarantee the quality of third-party products (e.g. lenses, accessories) that you separately purchase.

In particular installation environments, there might be interference in radio communications. When interference of electromagnetic waves occurs between the product and radio communication device, it is recommended to keep a certain distance between the two or change the direction of the receiving antenna.

- 27 Troubleshooting

## RECOMMENDED PC SPECIFICATIONS

---

- CPU : Intel(R) Core(TM) i7 3.4 GHz or higher
  - RAM : 8G or higher
  - Supported OS : MS Windows 8.1, 10, Mac OS X 10.13
  - Recommended browser: Google Chrome
  - Supported browsers: MS Explore11, MS Edge, Mozilla Firefox (Window 64bit only), Apple Safari (Mac OSX only)
  - VGA : PCIe 256MB GDDR3 video graphics card or higher
- ※ Some functions may be restricted even in supported browsers.

## RECOMMENDED MICRO SD/SDHC/SDXC MEMORY CARD SPECIFICATIONS

---

- Recommended capacity : 16GB to 256GB (MLC type required)
- Recommended Manufacturers : SanDisk, Transcend
- Product Type : High endurance
- The compatibility varies depending on the card manufacturers and types.

- Micro SD card can support up to 512 GB if two slots are used. Each slot supports up to 256 GB, and one slot cannot support 512 GB by itself.

## NAS RECOMMENDED SPECS

---

- Recommended capacity : 200GB or higher is recommended.
- For this camera, you are recommended to use a NAS with the following manufacturer's specs.  
Recommended products : QNAP NAS, Synology NAS

## WHAT'S INCLUDED (PNM-9000QB)

Please check if your camera and accessories are all included in the product package.  
(As for each sales country, accessories are not the same.)

Appearance	Item Name	Quantity	Description
	Main Unit	1	
	Quick Guide (Optional)	1	
	Installation bracket	1	Used to install the main unit on the wall/ ceiling.
	Power Terminal Block	1	Plugged in the power plug
	Alarm terminal block	1	Used by inserting it into the alarm output terminal.
	Tapping Screw	4	Used for installation on the wall or ceiling
	Screw	4	Used to fasten the Main Unit to the Installation Bracket
	Ferrite Core	1	Used to block the high-frequency component(s) contained in the power supply and the signal end from being radiated to the outside

## WHAT'S INCLUDED (LENS MODULE/EXTENSION CABLE - OPTIONAL)

This is a lens module separately sold that is mounted to PNM-9000QB.

Please check if your camera and accessories are all included in the product package.  
(As for each sales country, accessories are not the same.)

Model Name	Appearance	Item Name	Quantity	Description
SLA-T1080FA		Lens Module	1	
		Quick Guide (Optional)	1	
		Nut for mounting the lens module	1	Used to fix the lens module on a ceiling or wall.
		Cable to connect lens module	1	Use this when connecting the main Unit and lens module
		RJ12 Plug	1	Use this when adjusting the length of the cable to connect the lens module

Model Name	Appearance	Item Name	Quantity	Description
SLA-T2480A		Lens Module	1	
		Quick Guide (Optional)	1	
		Tapping Screw	2	Used for installation on the wall or ceiling
		Cable tie	1	Use this for organizing the cable
		Bracket for lens module installation	1	Use this when installing and fixing lens module on the ceiling or wall
		Cable to connect lens module	1	Use this when connecting the main unit and lens module
		RJ12 Plug	1	Use this when adjusting the length of the cable to connect the lens module

Model Name	Appearance	Item Name	Quantity	Description
SLA-T2480VA		Lens Module	1	
		Quick Guide (Optional)	1	
		Lens module bracket	1	Use this for lens module installation
		Cable to connect lens module	1	Use this when connecting the main unit and lens module
		RJ12 Plug	1	Use this when adjusting the length of the cable to connect the lens module

Model Name	Appearance	Item Name	Quantity	Description
SLA-T4680A		Lens Module	1	
		Quick Guide (Optional)	1	
		Tapping Screw	2	Used for installation on the wall or ceiling
		Cable tie	1	Use this for organizing the cable
		Bracket for lens module installation	1	Use this when installing and fixing lens module on the ceiling or wall
		Cable to connect lens module	1	Use this when connecting the main unit and lens module
		RJ12 Plug	1	Use this when adjusting the length of the cable to connect the lens module

Model Name	Appearance	Item Name	Quantity	Description
SLA-T4680VA		Lens Module	1	
		Quick Guide (Optional)	1	
		Lens module bracket	1	Use this for lens module installation
		Cable to connect lens module	1	Use this when connecting the main unit and lens module
		RJ12 Plug	1	Use this when adjusting the length of the cable to connect the lens module
	SCL-150		Cable to connect lens module (15 m)	1

AT A GLANCE

Front of the main unit

Item	Description	
1 Power indicators	POWER	ON : While the power is on OFF : If the power is off
2 Status Indicators for Lens Module	The LED turns on when each channel video is successfully displayed.	

Side of the main unit

Item	Description	
1 Connection terminal of lens module	This terminal is connected to the lens module through the cable to connect the lens module.	
2 HDMI port	By connecting an HDMI cable, you can watch a live feed on the monitor.	
3 Audio terminal	AUDIO IN	Used to connect to a microphone.
	AUDIO OUT	Used to connect to speakers.
4 Alarm I/O Port	ALARM IN	Used to connect alarm input signals. Up to two ports can be used. Refer to "Alarm In Wiring Diagram" (page 18).
	ALARM OUT	Used to connect alarm output signals. Up to two ports can be used. Refer to "Alarm Out Wiring Diagram" (page 19).
	GND	Ground terminal.
5 Power supply terminal	Terminal used to connect to the DC12V power adaptor.	
6 PoE+ port	A port that connects to the PoE injector and network cable for power and network connection.	
7 Reset Button	<p>The button restores all camera settings to the factory default. Press and hold for about 5 seconds to reboot the system.</p> <p>■ If you reset the camera, the network settings will be adjusted so that DHCP can be enabled. If there is no DHCP server in the network, you must run the Device Manager program to change the basic network settings such as IP address, Subnet mask, Gateway, etc., before you can connect to the network.</p>	
8 Micro SD Card slot	Compartment for the Micro SD card.	

## Appearance of lens module

<SLA-T1080FA>

<SLA-T2480A>

<SLA-T4680A>

<SLA-T2480VA>

<SLA-T4680VA>

Item	Description
<b>1</b> Lens Module	This lens module is used to shoot video.
<b>2</b> Main unit connection terminal	This terminal is connected to the main unit through the cable to connect the lens module.

## INSTALLATION

### Precautions before installation

Ensure you read out the following instructions before installing the camera:

- Organize the cable separately in order to prevent excessive burden on the lens module while the camera is installed (within 1m from the lens module).
- Select an installation site that can hold at least 5 times the camera's weight.
- Stuck-in or peeled-off cables can cause damage to the product or a fire.
- For safety purposes, keep anyone else away from the installation site. And put aside personal belongings from the site, just in case.
- The power must be turned off when installing or removing lens module.

### Installing the main unit

1. Before mounting the main unit to the ceiling or wall, the installation bracket must be joined to the main unit first.

2. Use four screws provided to join the installation bracket to the main unit.

3. Use installation screws provided to install the main unit together with the installation bracket to the wall.

## Install lens module (SLA-T1080FA)

1. Drill a hole which the lens is passed through at the location where you want to install it.

! ■ Hole size (inner diameter):  $\varnothing 30 \pm 2\text{mm}$   
(If the size of the hole is outside of this range, the installation may fail.)

2. After inserting the lens module into the hole, fix the lens module using the supplied nut (M27).

3. Fix the cable separately. (Within 1m from the lens module)

## Install lens module (SLA-T2480A/SLA-T4680A)

1. Use two screws provided or remove protective film to use the double-sided tape on the bottom side of the lens module bracket to install the lens module bracket.

! ■ Remove foreign substances on the target object before attachment.

2. Push the lens module into the bracket.
3. Considering the direction of monitoring, adjust the lens to make it face the desired direction.

4. Fasten the screw next to the bracket and fix the lens direction.

5. After installation, pull the cable. Make sure that the lens module does not move by fixing it to the bracket with the cable tie.

6. Organize the cable separately (within 1m from the lens module).

## Install lens module (SLA-T2480VA/SLA-T4680VA)

1. Make a hole for the lens module at the spot where you want to install it.

2. Remove the protective film to use the double-sided tape of the lens module bracket and attach it to match the hole.

! Remove foreign substances on the target object before attachment.

3. Insert the lens module into the lens module bracket.

4. Tighten the screws in the screw hole on the bracket.

■ This only applies to the SLA-T2480VA.

5. Organize the cable separately (within 1m from the lens module).

## Installing the lens module in the main unit

Connect the lens module cable to the [CAMERA] port on the side of the main unit.

- ! ■ Connect the lens module and turn it on.
- Turn off the main unit power when connect or remove lens module
- Install the lens at least 3 meters away from the main unit. It is recommended to not fix the cable within 3 meters from the main unit.
- It is recommended to wrap the ferrite core two times around the power cable and LAN cable.

### Connect lens module cable to lens module

1. Unscrew the back cover by turning it counterclockwise.

**!** ■ Be sure to remove the back cover first and assemble/disassemble the RJ45 connector.

2. Connect the RJ45 modular jack (female) to the RJ45 connector (male).

3. Assemble by rotating the RJ45 modular jack (female) and the RJ45 protection cover clockwise (Follow the arrow).

4. Assemble by rotating RJ45 protection cover and back cover clockwise (Follow the arrow). When the back cover is assembled, the cable waterproof gasket is tightly attached to the cable to make it waterproof.

**!** ■ You must fully assemble it to rotate the back cover up to the end of the screw thread of the RJ45 connector.

### Adjust the length of the cable for connecting the lens module

The length of the cable for connecting the main unit and lens module can be adjusted. Please follow the steps in the correct order to adjust the length of the cable for connection:

1. Cut out the cable from the RJ12 Plug at the length you want.

2. Peel off the sheath of the cable you cut out.

3. Peel off the silver foil and pull it back.

4. Straighten the colored wires in the following order.

Number	Color
1	Black
2	Red
3	Blue
4	Orange
5	White
6	Green

5. Insert the electric wire into the end of the RJ12 PLUG provided as an accessory.

6. Fix the plug to the cable by using a pressing tool.

7. After adjusting the length, remove the remaining silver shield on the rear side of the plug.

**!** ■ Be sure to cut out the RJ12 Plug area to adjust the length.  
 ■ Make sure the color and order of the wires match what is provided in the table.  
 ■ Check out whether the silver shield of the cable properly makes contact with the RJ12 PLUG metal shield.

## INSERTING/REMOVING A MICRO SD CARD

- ! ■ Disconnect the power cable from the camera before inserting the Micro SD card.
- When it rains or the humidity is high, insertion or ejection of a Micro SD card is not recommended.

### Inserting a Micro SD card

Insert a Micro SD card in the arrow direction shown in the figure.

- ! ■ Do not insert the Micro SD card while it's upside down by force. Otherwise, it may damage the Micro SD card.

### Removing a Micro SD card

Gently press down on the exposed end of the memory card as shown in the diagram to eject the memory card from the slot.

- ! ■ Before removing the Micro SD card, in <Setup (⚙)>-<Event>-<Storage>, set the device to <Off> and press the [Apply] button and turn the camera off.
- If you turn off the camera or remove the Micro SD card that contains data from the product, the data may be lost or damaged.

## CONNECTING WITH OTHER DEVICE

### Powering and networking

Connect the POE+ device with the POE+ port of the Main Unit.

- ! ■ Connect and use a POE+ -enabled router.
- Use a POE+ device that complies with the IEEE 802.3at standard.
- If you connect using an POE+ -enabled router, you don't need a separate power supply cable to power it on.

### Network Cable Specification

Item	Contents	Remark
Connector	RJ45 (10/100/1000BASE-T)	
Ethernet	10/100/1000Base-T	To operate with 1000BASE-T, a cable of Category 6 or higher should be used for the Giga hub.
Cable	Category 6	
Max Distance	100 m	DC Resistance $\leq 0.125 \Omega/\text{m}$
PoE+ Support	IEEE 802.3at	

### Power Supply

Use the screwdriver to connect each line (+, -) of the power cable to the corresponding power port of the camera.

- ! ■ If the power sources for PoE+ and DC 12V are simultaneously turned on, the device power will be supplied by both of PoE+ and DC 12V.
  - You can also use a router featuring PoE+ to supply power to the camera.
  - Use PoE+ that is compliant with the IEEE 802.3at protocols.
- Be careful not to reverse the polarity when you connect the power cable.
- If you want to connect an external device, you must turn off the external device before proceeding.
- Connect the set and the adapter power line first, and then connect the power cable to the outlet on the wall.

### Power Cable Specification for Each Model

In case of DC 12V Input:

Wire Type (AWG)	#18	#16	#14
Cable Length (Max.)	13 m	21 m	30 m

## Connecting to Audio Input/Output

1. Connect the AUDIO IN port of the camera with the microphone or LINE OUT port of the amplifier that the microphone is connected to.
2. Connect the AUDIO OUT port of the camera with the speaker or LINE IN port of the amplifier that the speaker is connected to.
3. Check the specifications for audio input.

### • Audio Codec

- Audio In : G.711 PCM (Bit Rate: 64Kbps / Sampling Frequency: 8kHz), G.726 ADPCM (Bit Rate: 16Kbps, 24Kbps, 32Kbps, 40Kbps / Sampling Frequency: 8kHz), AAC (Bit Rate: 48Kbps / Sampling Frequency: 16kHz)
- Audio Out : G.711 PCM (Bit Rate: 64Kbps / Sampling Frequency: 8kHz)

### • Full duplex Audio

- **Audio in** : Selectable (microphone/Line-in), Supported voltage: 2.5VDC (4mA), Input impedance: 2K Ohm
- **Audio out** : Line-out (3.5mm mono jack), Maximum output: 1Vrms
- **Line out impedance** : 600Ω

## Connecting to the I/O port box

Connect the Alarm I/O cable to the corresponding port of the port box.

- **ALARM-IN** : Used to connect the alarm input sensor or external day/night sensor.
- **ALARM-OUT** : Used to connect the alarm output signal.
- **GND** : Used for earth-grounding.

## To connect the external sensor

Connect one strand of each signal line (2-strand) of the sensors to the **[ALARM IN]** port, and connect the other strand to the **[GND]** port.

## Alarm In Wiring Diagram

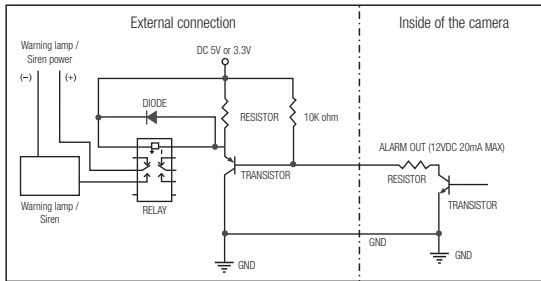

### To connect the alarm out

If devices (e.g., flashing light and siren) that exceed the voltage and current specifications are connected by using the open collector method, it may cause malfunction.

Refer to the alarm out connection diagram below when connecting devices that exceed the voltage and current specifications.

### Alarm Out Wiring Diagram

# network connection and setup

You can set up the network settings according to your network configurations.

## CONNECTING THE CAMERA DIRECTLY TO LOCAL AREA NETWORKING

### Connecting to the camera from a local PC in the LAN

1. Launch an Internet browser on the local PC.
2. Enter the IP address of the camera in the address bar of the browser.

- A remote PC in an external Internet out of the LAN network may not be able to connect to the camera installed in the intranet if the port-forwarding is not properly set or a firewall is set. In this case, to resolve the problem, contact your network administrator.
- By factory default, the IP address will be assigned from the DHCP server automatically. If there is no DHCP server available, the IP address will be set to 192.168.1.100. To change the IP address, use the Device Manager. For further details on Device Manager use, refer to "Using Device Manager". (Page 21)

## CONNECTING THE CAMERA DIRECTLY TO A DHCP BASED DSL/CABLE MODEM

1. Connect the user PC directly with the network camera.
2. Run the Device Manager and change the IP address of the camera so that you can use the web browser on your desktop to connect to the Internet.
3. Use the Internet browser to connect to the web viewer.
4. Move to [Setup] page.
5. Move to [Network] – [DDNS] and configure the DDNS settings.
6. Move to [Basic] – [IP & Port], and set the IP type to [DHCP].
7. Connect the camera, which was removed from your PC, directly to the modem.
8. Restart the camera.

- For information on how to set DDNS, refer to the online help of Web Viewer.
- For information on how to set the IP format, refer to the online help of Web Viewer.

## USING DEVICE MANAGER

- Device manager program can be downloaded from <Technical Guides>-<Online Tool> menu at Hanwha Techwin website (<http://www.hanwha-security.com>).
- More instructions of Device Manager can be found at <Help> menu of the main page.

## AUTOMATICALLY SEARCHING CAMERA

If a camera is connected to the same network of the PC where device manager is installed, you can find network camera by using search function.

1. Click <Search> at the main page of device manager.
2. Check the camera from the list.
  - Check MAC address at the sticker attached to the camera.

## CONFIGURING IP ADDRESS

If you want to change camera network setting, <Login OK> sign must be displayed at <Status>. Click <Authentication> at the main page to log in.

### Configuring Static IP

Manually insert and configure IP address & port information.

1. Click the camera from the list that you want to change the IP setting.
2. Click <IP Assign> at the main page of device manager.
3. Select <Assign the following IP address>.
  - IP information of the camera will be displayed as previously set.
4. Fill in IP & Port related categories.

### If not using a Broadband Router

For setting <IP Address>, <Subnet Mask>, and <Gateway>, contact your network administrator.

- HTTP Port : Used to access the camera using the Internet browser, defaulted to 80.
- RTSP Port: A port that controls real-time streaming. The initial value is 554.

### If using a Broadband Router

- IP Address : Enter an address falling in the IP range provided by the Broadband Router.  
ex) 192.168.1.2~254, 192.168.0.2~254, 192.168.XXX.2~254
- Subnet Mask : The <Subnet Mask> of the Broadband Router will be the <Subnet Mask> of the camera.
- Gateway : The <Local IP Address> of the Broadband Router will be the <Gateway> of the camera.

- The settings may differ depending on the connected Broadband Router model. For more information, refer to the user manual of the applicable router.
- For more information about port forwarding of the broadband router, refer to "Port Range Forward (Port Mapping) Setup". (Page 23)

### If the Broadband Router has more than one camera connected

Configure the IP related settings and the Port related settings distinctly with each other.

ex)

	Category	Camera #1	Camera #2
IP related settings	IP Address	192.168.1.100	192.168.1.101
	Subnet Mask	255.255.255.0	255.255.255.0
	Gateway	192.168.1.1	192.168.1.1
Port related settings	HTTP Port	8080	8081
	RTSP Port	554	555

- If the <HTTP Port> is set other than 80, you must provide the <Port> number in the address bar of the Internet browser before you can access the camera.  
ex) http://IP address : HTTP Port  
http://192.168.1.100:8080

5. Click [Apply] Button.
6. If the success message is displayed, click [OK].

## Configuring Dynamic IP

Receive IP address from DHCP

- Example of the Dynamic IP environment
  - If a Broadband Router, with cameras connected, is assigned an IP address by the DHCP server
  - If connecting the camera directly to modem using the DHCP protocols
  - If IPs are assigned by the internal DHCP server via the LAN

1. Click the camera from the list that you want to change the IP setting.
2. Click **<IP Assign>** at the main page of device manager.
3. Select **<Obtain an IP address automatically (DHCP)>**.
4. Click **[Apply]** button.
5. If the success message is displayed, click **[OK]**.

## AUTOMATICALLY CONFIGURING IP

1. Click the camera from the list that you want to automatically configure the IP.
2. Click **< + >** at the main page of device manager.
  - Equipment Setting menu appears.
3. At the menu, click **<Auto IP Configure>**.
4. Click **[Close]** button.

## MANUALLY REGISTERING CAMERA

If the camera cannot be found using search function, the camera can be registered remotely by manually inserting IP information, if the camera is connected to external network.

1. Click **<Add Devices>** - **<Manually Add Device>** at the main page of device manager.
2. Insert the range of IP address that you search.
3. Select the **<Model Name>** of the camera that you register, and insert HTTP port, ID, and password.
4. Click **[Register]** button.
5. Check if camera is registered.
  - Check MAC address at the sticker attached to the camera.

## PORT RANGE FORWARD (PORT MAPPING) SETUP

If you have installed a Broadband Router with a camera connected, you must set the port range forwarding on the Broadband Router so that a remote PC can access the camera in it.

### Manual Port Range Forwarding

- From the Setup menu of the Broadband Router, select **<Applications & Gaming>** - **<Port Range Forward>**. For setting the port range forward for a third-party Broadband Router, refer to the user guide of that Broadband Router.
- Select **<TCP>** and **<UDP Port>** for each connected camera to the Broadband Router.  
The number of each port to be configured to the IP router should be set according to the port number designated in **<Setup>** - **<Basic>** - **<IP & Port>** on the camera web viewer.
- When done, click **[Save Settings]**.  
Your settings will be saved.

- Port forwarding setting is an example of setting CISCO IP router.
- The settings may differ depending on the connected Broadband Router model. For more information, refer to the user manual of the applicable router.

### Setting up Port Range Forward for several network cameras

- You can set a rule of Port Forwarding on the Broadband Router device through its configuration web page.
- A user can change each port using the camera setting screen.

When Camera1 and Camera2 are connected to a router :

- Port forwarding can be done without additional router setup if the router supports the UPnP (Universal Plug and Play) function. After connecting the network camera, select the checkbox from the menu **<Quick connect>** in **<Wisenet DDNS>** in **"Settings -> Network -> DDNS"**.

## CONNECTING TO THE CAMERA FROM A SHARED LOCAL PC

---

1. Run device manager.  
It will scan for connected cameras and display them as a list.
2. Double-click a camera to access.  
The Internet browser starts and connects to the camera.

 ■ Access to the camera can also be gained by typing the camera's IP address in the address bar of the Internet browser.

## CONNECTING TO THE CAMERA FROM A REMOTE PC VIA THE INTERNET

---

On a remote computer that is not in the Broadband Router's network cluster is not allowed, users can access cameras within a Broadband Router's network by using the camera's DDNS URL.

1. Before you can access a camera in the Broadband Router network, you should have set the port range forward for the Broadband Router.
2. From the remote PC, launch the Internet browser and type the DDNS URL address of the camera, or the IP address of the Broadband Router in the address bar.  
ex) <http://ddns.hanwha-security.com/ID>

 ■ To use Wisenet DDNS, sign up at the Wisenet DDNS homepage (<http://ddns.hanwha-security.com>) and register the product at **[My DDNS]>[Register Product]**.

## CONNECTING TO THE CAMERA

### Normally, you would

1. Launch the Internet browser.
2. Type the IP address of the camera in the address bar.
  - ex) • IP address (IPv4) : 192.168.1.100 →  
http://192.168.1.100
  - the Login dialog should appear.
  - IP address (IPv6) : 2001:230:abcd:ffff:0000:0000:ffff:1111  
→ http://[2001:230:abcd:ffff:0000:0000:ffff:1111] - the Login dialog should appear.

### If the HTTP port is other than 80

1. Launch the Internet browser.
2. Type the IP address and HTTP port number of the camera in the address bar.
  - ex) IP address : 192.168.1.100:HTTP Port number(8080)  
→ http://192.168.1.100:8080 - the Login dialog should appear.

### Using URL

1. Launch the Internet browser.
2. Type the DDNS URL of the camera in the address bar.
  - ex) URL address : http://ddns.hanwha-security.com/ID
  - the Login dialog should appear.

- Network connection is disabled in the LAN only environment.

### Connecting via UPnP

1. Run the client or operating system in support of the UPnP protocol.
2. Click the camera name for search.
  - In the Windows operating system, click the camera name searched from the network menu.
  - The login window is displayed.

### Connecting via Bonjour

1. Run the client or operating system in support of the Bonjour protocol.
2. Click the camera name for search.
  - In the Mac operating system, click the camera name searched from the Bonjour tab of Safari.
  - The login window is displayed.

### To check the DDNS address

If the camera is connected directly to the DHCP cable modem, DSL modem, the IP address of your network will be changed each time you try to connect to the ISP (Internet Service Provider) server. If this is the case, you will not be informed of the IP address changed by DDNS.

Once you register a dynamic IP-based device with the DDNS server, you can easily check the changed IP when you try to access the device.

To register your device to the <DDNS> server, visit <http://ddns.hanwha-security.com> and register your device first, and then set the Web Viewer's <Network> - <DDNS> to <Wisenet DDNS>, as well as providing <Product ID> that had been used for DDNS registration.

## PASSWORD SETTING

When you access the product for the first time, you must register the login password.

- 
  - For a new password with 8 to 9 digits, you must use at least 3 of the following: uppercase/lowercase letters, numbers and special characters. For a password with 10 to 15 digits, you must use at least 2 types of those mentioned.
    - Special characters that are allowed: ~!@#\$\$%^&\*()-+=|[]{}?/
  - For higher security, you are not recommended to repeat the same characters or consecutive keyboard inputs for your passwords.
  - If you lost your password, you can press the **[RESET]** button to initialize the product. So, don't lose your password by using a memo pad or memorizing it.

## LOGIN

Whenever you access the camera, the login window appears. Enter the User ID and password to access the camera.

1. Enter "admin" in the <User name> input box.  
The administrator ID, "admin", is fixed and can not be changed.
2. Enter the password in the <Password> input field.
3. Click **[Sign in]**.  
If you have logged in successfully, you will the Live Viewer screen.

- 
  - When you access the camera web viewer, pay special attention to the security by checking whether the image data is encrypted.
- 
  - You will experience the best video quality if the screen size is 100%. Reducing the ratio may cut the image on the borders.

## CAMERA WEB VIEWER SETUP

1. Click the **[Setup (⚙️)]** icon.
2. The Settings window appears.
3. You can configure settings for the camera's basic information, video, audio, network, event, analysis, and system over the network.
4. Click **<Help (🔗)>** to view detailed descriptions of each function.

## TROUBLESHOOTING

PROBLEM	SOLUTION
When an Windows 10 user accesses the web viewer through Chrome or Firefox, the sound volume of microphone changes periodically.	<ul style="list-style-type: none"> <li>This is what happens when microphone driver has been set to Realtek driver. Install the High Definition Audio device (Windows Default Driver) or the third party driver as the microphone driver.</li> </ul>
No video is displayed when accessing the plug-in free webviewer on Safari via HTTPS.	<ul style="list-style-type: none"> <li>On the authentication popup window prompted when initially accessing https, click "View Authentication Certificate" and select the "Always trust when connecting to the designated webviewer IP" check box.</li> <li>If the webviewer continues failing to display a video after you select "Next" on the message window below, press the command key + Q to exit the Safari browser, access again and follow the procedures stated above.</li> </ul>
I can't access the camera from a web browser.	<ul style="list-style-type: none"> <li>Check to make sure that the camera's Network settings are appropriate.</li> <li>Check to make sure that all network cables have been connected properly.</li> <li>If connected using DHCP, verify that the camera is able to acquire dynamic IP addresses without any problem.</li> <li>If the camera is connected to a Broadband Router, verify that port forwarding is properly configured.</li> </ul>
Viewer got disconnected during monitoring.	<ul style="list-style-type: none"> <li>Connected Viewers become disconnected upon any change to camera or network configurations.</li> <li>Check all network connections.</li> </ul>
The camera connected to the network is not detected in the Device Manager program.	<ul style="list-style-type: none"> <li>Turn off the firewall settings on your PC and then search the camera again.</li> </ul>
Images overlap.	<ul style="list-style-type: none"> <li>Check whether two or more cameras are set to a single multicast address instead of different addresses. If a single address is used for multiple cameras, the images may overlap.</li> </ul>
No image appears.	<ul style="list-style-type: none"> <li>If the transmission method is set to multicast, check whether there is a router that supports multicast in the LAN the camera is connected to.</li> </ul>
Voice is not recorded even though audio input settings are configured.	<ul style="list-style-type: none"> <li>You must enable the &lt;Audio In&gt; check box in &lt;Basic&gt; - &lt;Video Profile&gt;.</li> </ul>

PROBLEM	SOLUTION
<Motion detection> of <Analytics> is set to <Enable>, but no notification e-mail reaches me even when an analysis event had occurred.	<ul style="list-style-type: none"> <li>Verify the settings in the following sequence:                             <ol style="list-style-type: none"> <li>Check &lt;Data &amp; Time&gt; settings.</li> <li>The &lt;Motion detection&gt; should be set to &lt;Enable&gt;.</li> <li>Check if the &lt;E-mail&gt; option of &lt;Event setup&gt; menu is checked to use.</li> </ol> </li> </ul>
No signal is found at the Alarm Output port even when an intelligent video analysis event is generated.	<ul style="list-style-type: none"> <li>Check alarm output port settings.</li> </ul>
Cannot record into the Micro SD card.	<ul style="list-style-type: none"> <li>Check if the memory card is defective.</li> <li>When replacing the Micro SD card, it must be done while the power is disconnected from the product.</li> </ul>
Micro SD card is inserted but the camera does not operate properly.	<ul style="list-style-type: none"> <li>Check if the memory card is inserted in the proper direction. Operation of memory card that is formatted by other devices is not guaranteed with this camera unit</li> <li>Format the memory card again in &lt;Setup&gt; → &lt;Event&gt; → &lt;Storage&gt; menu.</li> </ul>
Cannot record in the NAS.	<ul style="list-style-type: none"> <li>Confirm that the information registered in the NAS is correct.</li> </ul>
It reports that NAS setting has failed.	<ul style="list-style-type: none"> <li>Confirm that the IP address of the NAS is valid.</li> <li>Confirm that the ID/password of the NAS is valid.</li> <li>Confirm that you can access the folder designated as the default folder using the ID of the NAS.</li> <li>Confirm that the NAS SMB/CIFS items are unchecked.</li> <li>Confirm that the NAS IP address and the camera IP address are in the same format.                             <ul style="list-style-type: none"> <li>ex) The NAS &amp; camera subnet mask initial value is 255.255.255.0.</li> <li>If the IP address is 192.168.20.32 then the NAS IP address should be in the range of 192.168.20.1~192.168.20.255.</li> </ul> </li> <li>Check whether you tried to access as another user without formatting the default folder saved or used.</li> <li>Confirm that you used recommended NAS equipment.</li> </ul>

Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Hanwha Techwin cares for the environment at all product manufacturing stages, and is taking measures to provide customers with more environmentally friendly products.

The Eco mark represents Hanwha Techwin's devotion to creating environmentally friendly products, and indicates that the product satisfies the EU RoHS Directive.

#### **Correct Disposal of This Product (Waste Electrical & Electronic Equipment)**

(Applicable in the European Union and other European countries with separate collection systems)

This marking on the product, accessories or literature indicates that the product and its electronic accessories (e.g. charger, headset, USB cable) should not be disposed of with other household waste at the end of their working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate these items from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take these items for environmentally safe recycling.

Business users should contact their supplier and check the terms and conditions of the purchase contract. This product and its electronic accessories should not be mixed with other commercial wastes for disposal.

#### **Correct disposal of batteries in this product**

(Applicable in the European Union and other European countries with separate battery return systems.)

This marking on the battery, manual or packaging indicates that the batteries in this product should not be disposed of with other household waste at the end of their working life. Where marked, the chemical symbols Hg, Cd or Pb indicate that the battery contains mercury, cadmium or lead above the reference levels in EC Directive 2006/66. If batteries are not properly disposed of, these substances can cause harm to human health or the environment.

To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system.
