

Dear Valued Customer

**WE REALLY
APPRECIATE
YOUR PURCHASE**

~thank you~

Features

- Single HDMI output 4K@60Hz maximum.
- DP 1.4 can support Two 3840x2160@60Hz
- DP 1.2 can support Two 3840x2160@30Hz
- Plug-n-play, no software or driver needed

Package contents

- 1x2 USB-C to HDMI 4K60 MST Hub Splitter
- Quick Start Guide

System Requirements

- Host computer system with an available USB Type-C (Thunderbolt 3/4 compatible) Port which supports DP 1.4/1.2 Alt Mode
- Windows® 11/10 / 8 .1/ 8 / 7 (32/64 bit)
- Mac OS do not support MST function

Notice

- Use on DP 1.1 or Mac system will only support Splitter (SST) mode
- Please set monitor color bit depth to 8bit. 10bit or 12bit will spend more bandwidth may cause the bandwidth not enough.
- When use DP 1.2 host, 4K@60 monitor recommend to setup to DP 1.1 mode for 4K@30 use.
- Some of AMD DP 1.4 graphic cards may have bandwidth output limit, which will cause the MST total output resolution lower than DP 1.4 bandwidth.
