- 2 Displays network connection information
- 3 Indicates whether Quiet Mode is enabled
- 4 Displays the menu options

Parent topic: Control Panel Buttons and Lights

Status Icon Information

Your product displays status icons on the LCD screen for certain product status conditions.

Icons	;	Description
•		Ink and maintenance box status; select the icon to view the ink and maintenance box levels

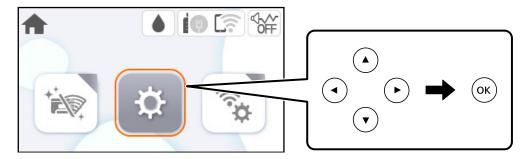

Icons	Description
	Displays the network connection status; select the icon to set up or change your network connection
	Not connected to a wired (Ethernet) network.
	Connected to a wired (Ethernet) network.
	Not connected to a wireless network
	Searching for an SSID or experiencing a wireless network connection issue
	Connected to a wireless network; the number of bars indicates the connection's signal strength
	Wi-Fi Direct is not enabled
	Wi-Fi Direct is enabled
₹	The Quiet Mode setting is enabled or disabled. Select the icon to change the setting. Depending on the selected paper type and print quality, when this feature is enabled noise is reduced during printing but print speed is slower.
1	There is a problem with the indicated setting; select the icon for information on resolving the problem
•	Displays additional information or instructions when you press the 🍑 button
?	Displays the Help screen

Parent topic: Control Panel Buttons and Lights

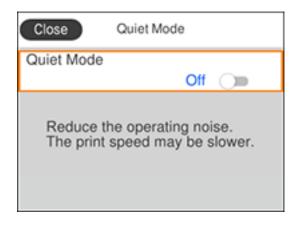

Navigating the LCD Screen

Follow these guidelines to navigate and use the menus on the LCD screen.

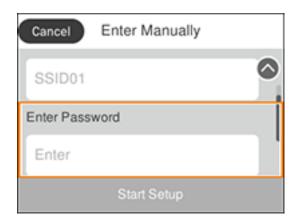

To navigate the menus, press the arrow buttons to change the highlighted selection and press the **OK** button to confirm your selection.

To change a setting, press the arrow buttons to highlight the setting and press the **OK** button.

To enter a value in a field, press the arrow buttons to highlight the field and press the **OK** button to display the on-screen keyboard.

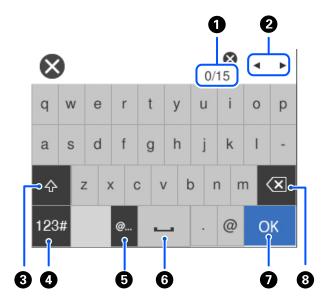

Parent topic: Control Panel Buttons and Lights

Entering Characters on the LCD Screen

Follow these guidelines to enter characters for passwords and other settings.

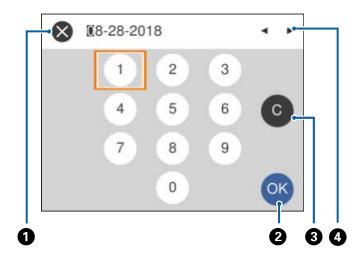

On-screen keyboard

- 1 Displays the character count
- 2 Moves the cursor left or right
- 3 Switches between uppercase and lowercase characters, numbers, and symbols
- 4 Switches between characters, numbers, and symbols
- 5 Displays a list of common domain names to choose from
- 6 Enters a space
- 7 Select when you are finished
- 8 Deletes the previous character

Note: You can also switch the character type by pressing the \bigcirc button.

On-screen keypad

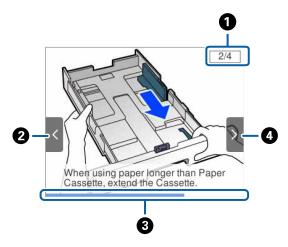

- 1 Cancels entry and closes the keypad
- 2 Select when you are finished
- 3 Clears the entered number
- 4 Moves the cursor left or right

Parent topic: Control Panel Buttons and Lights

Viewing Animations

You can view animations on the LCD screen to help guide you with a procedure or to troubleshoot a problem.

- 1. Select the ? help icon.
- 2. Select **Troubleshooting** if you are experiencing a problem or **How To** to view instructions on common procedures.
- 3. Select a topic from the list of available topics and follow the on-screen instructions. While viewing the topics, you may see screens like this:

- 1 Displays the current step number and the total number of steps
- 2 Press the left arrow button to view the previous step
- 3 Indicates your overall progress through the animation
- 4 Press the right arrow button to view the next step

Parent topic: Control Panel Buttons and Lights

Changing LCD Screen Language

You can change the language used on the LCD screen.

1. Press the n home button, if necessary.

2. Select Settings > General Settings > Basic Settings > Language.

3. Select a language.

Parent topic: Using the Control Panel

Selecting the Date and Time

You can select the current date, time, and daylight saving phase in your area, and choose your preferred date and time format.

1. Press the nh home button, if necessary.

- 2. Select Settings > General Settings > Basic Settings > Date/Time Settings.
- 3. Select Daylight Saving Time.
- 4. Select the setting that applies to your area:
 - Winter: it is winter or your region does not use Daylight Saving Time (DST)
 - Summer: it is spring or summer and your region uses Daylight Saving Time (DST)

Note: If your region uses Daylight Saving Time (DST), you must change this setting to match the season. When you change from **Winter** to **Summer**, your product automatically sets its clock ahead one hour. When you change from **Summer** to **Winter**, it sets its clock back one hour.

- 5. On the Date/Time Settings screen, select **Date/Time**.
- 6. Select the date format you want to use.
- 7. Use the arrow buttons and the **OK** button to enter the current date.
- 8. Select the time format you want to use.
- 9. Use the arrow buttons and the **OK** button to enter the current time.
- 10. On the Date/Time Settings screen, select **Time Difference**.
- 11. Use the arrow buttons and the **OK** button to enter the time difference between your time zone and UTC (Coordinated Universal Time).

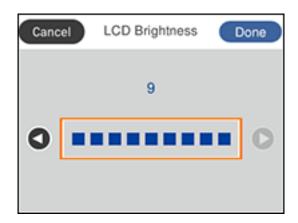

Parent topic: Using the Control Panel

Adjusting the Screen Brightness

You can adjust the brightness of the LCD screen.

- 1. Press the $\widehat{\mathbf{w}}$ home button, if necessary.
- 2. Select Settings > General Settings > Basic Settings > LCD Brightness.

You see a screen like this:

- 3. Press the left or right arrow button to decrease or increase the brightness.
- 4. When you are finished, select **Done**.

Parent topic: Using the Control Panel

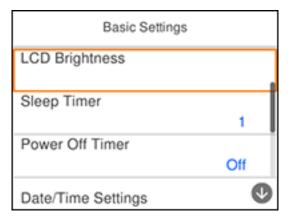

Turning Off the Operation Time Out Setting

The Operation Time Out setting causes the LCD screen to return to the Home screen after a few minutes of inactivity. This feature is enabled by default, but you can turn it off.

Note: This setting can be locked by an administrator. If you cannot access this setting, contact your administrator for assistance.

- 1. Press the nhome button, if necessary.
- 2. Select Settings > General Settings > Basic Settings.

You see a screen like this:

3. Select **Off** as the **Operation Time Out** setting.

Parent topic: Using the Control Panel

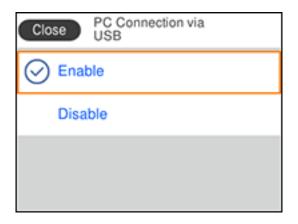

Preventing PC Connection via USB

You can disable access to your product from a USB-connected computer. This restricts non-network access to the product.

Note: This setting can be locked by an administrator. If you cannot access this setting, contact your administrator for assistance.

- 1. Press the \(\hat{\psi} \) home button, if necessary.
- 2. Select Settings > General Settings > Printer Settings > PC Connection via USB.

You see a screen like this:

3. Select Disable.

Parent topic: Using the Control Panel

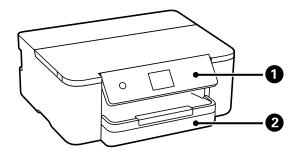

Product Parts Locations

See these sections to identify the parts on your product.

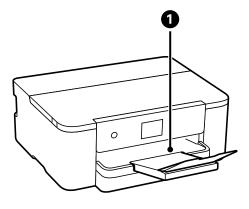

Product Parts - Front Product Parts - Inside Product Parts - Back

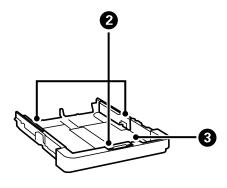

Parent topic: Product Basics

Product Parts - Front

- 1 Control panel
- 2 Paper cassette

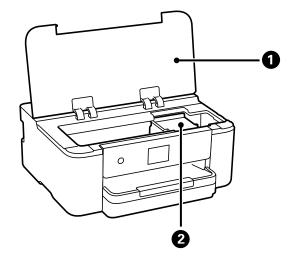

- 1 Output tray
- 2 Edge guides
- 3 Paper cassette

Parent topic: Product Parts Locations

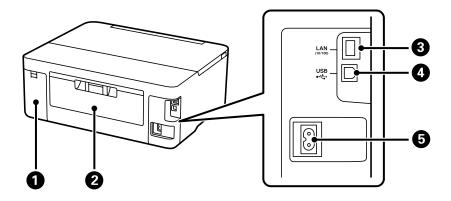

Product Parts - Inside

- 1 Printer cover
- 2 Ink cartridge holder

- 1 Maintenance box cover
- 2 Rear cover
- 3 **LAN** port
- 4 USB port
- 5 AC inlet

Parent topic: Product Parts Locations

Using Power Saving Settings

Your product enters sleep mode automatically and turns off the LCD screen if it is not used for a period of time. You can make the time period shorter and select other options to save energy and resources.

Changing the Sleep Timer Settings
Changing the Power Off Timer Settings

Parent topic: Product Basics

Changing the Sleep Timer Settings

You can adjust the time period before your product enters sleep mode and turns off the LCD screen.

- 1. Press the nh home button, if necessary.
- 2. Select Settings > General Settings > Basic Settings > Sleep Timer.
- 3. Press the **OK** button.
- 4. Use the displayed keypad to select a time period.
- 5. When you are finished, select **Done** on the Sleep Timer screen.

Parent topic: Using Power Saving Settings

Changing the Power Off Timer Settings

You can have the product turn off automatically if it is not used for a specified period of time.

- 1. Press the \(\hat{\psi} \) home button, if necessary.
- 2. Select Settings > General Settings > Basic Settings > Power Off Timer.
- 3. Select a time period between **30minutes** and **12h** (12 hours).

Parent topic: Using Power Saving Settings

Epson Connect Solutions for Smartphones, Tablets, and More

Use your smartphone, tablet, or computer to print documents, photos, emails, and web pages from your home, office, or even across the globe.

Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Setting Up Epson Connect Services
Using Epson Email Print
Using Epson Remote Print

Parent topic: Product Basics

Setting Up Epson Connect Services

If you did not activate your product's email address for use with Epson Connect when you set up your product, you can activate it using the product control panel.

- 1. Press the nhome button, if necessary.
- 2. Press the right arrow button to select **Settings > General Settings > Web Service Settings > Epson Connect Services**.

You see a screen like this:

- 3. Select **Register**.
- 4. Select Start Setup.

5. Follow the instructions on the screen to activate your product's email address.

Parent topic: Epson Connect Solutions for Smartphones, Tablets, and More

Using Epson Email Print

With Epson Email Print, you can print from any device that can send email, such as your smartphone, tablet, or laptop. Just activate your product's unique email address. When you want to print, attach a PDF, Microsoft Office document, or photo to an email and send it to your product. Both the email and the attachments will print automatically.

- 1. Connect your product to your network. See the link below.
- 2. If you did not already set up Email Print when you installed your product software, see the link below to use your product control panel to activate your unique email address. Or visit epson.com/connect (U.S.) or epson.ca/connect (Canada) to learn more about Email Print, create your Epson Connect account, and register your product to the Epson Connect service.
- 3. Now you are ready to send and print emails to your product's Email Print address.

Note: Go to epsonconnect.com and log into your Epson Connect account to personalize your product's email, adjust print settings, and set up other Epson Connect services.

Setting Up Epson Connect Services

Related topics

Wi-Fi or Wired Networking

Using Epson Remote Print

With Epson Remote Print software, you can print from your laptop or desktop computer to an Epson Email-enabled product anywhere in the world.

- 1. Connect your Epson product to your wireless network. See the link below.
- 2. If you did not already set up an Epson Connect account when you installed your product software, visit epsonconnect.com to create your account and register your product to the Epson Connect service.

Note: Make a note of your product's email address.

- 3. Visit epsonconnect.com to learn more about Remote Print and how to download the Remote Print Driver software.
- 4. Download and install the Remote Print software.
- 5. Enter the email address and optional access key of your Epson product during Remote Print setup.
- 6. Now you are ready to print remotely. Select the print command in your laptop or desktop computer application and choose the Remote Print option for your Epson product.

Wi-Fi or Wired Networking

Using the Epson Smart Panel Mobile App

Use this free Apple and Android app to set up and control your Epson product. Epson Smart Panel also lets you check product status.

Note: App features may vary depending on your Epson product.

- 1. Visit epson.com/connect (U.S.) or epson.ca/connect (Canada) to learn more about Epson Smart Panel and check the compatibility of your mobile device.
- 2. Download Epson Smart Panel from the Apple App Store or Google Play.
- 3. Do one of the following:
 - If your Epson product is already connected to a wireless network, connect your mobile device to the same network. Then open Epson Smart Panel and select your Epson product, if necessary.
 - If your Epson product is not connected to a wireless network, connect your mobile device to the network you want to use, then open Epson Smart Panel and follow the instructions to set up your Epson product.

Now you are ready to control your Epson product with your mobile device.

Using AirPrint

AirPrint enables instant wireless printing from iPhone, iPad, iPod touch, and Mac without the need to install drivers or download software.

Note: If you disabled paper configuration messages on your product control panel, you cannot use AirPrint. See the link below to enable the messages, if necessary.

- 1. Load paper in your product.
- 2. Set up your product for wireless printing. See the link below.
- 3. Connect your Apple device to the same wireless network that your product is using.
- 4. Print from your device to your product.

Note: For details, see the AirPrint page on the Apple website.

Android Printing Using the Epson Print Enabler

You can wirelessly print your documents, emails, photos, and web pages right from your Android phone or tablet (Android v4.4 or later). With a few taps, your Android device will discover your nearby Epson product and print.

- 1. Connect your Epson product to your wireless network. See the link below.
- 2. On your Android device, download the Epson Print Enabler plug-in from Google Play.
- 3. Go to **Settings** on your Android device, select **Printing**, and enable the Epson plug-in, if necessary.
- Connect your Android device to the same wireless network as your product.
- 5. Now you are ready to print. From an Android application such as Chrome or Gmail, tap the menu icon and print whatever is on the screen.

Note: If you do not see your product, tap **All Printers** and select your product.

Using the Mopria Print Service

You can use the Mopria Print Service to print from your Android phone or tablet (Android v4.4 or later) to your Epson product or any Mopria-certified product from other manufacturers. You can download the Mopria Print Service from Google Play.

Note: For details on the Mopria Print Service, click here (U.S.) or click here (Canada). Some Amazon Fire tablets also use the Mopria Print Service.

- 1. Connect your Epson product to your wireless network. See the link below.
- 2. On your Android device, download the Mopria Print Service app from Google Play.

Note: On some Samsung Galaxy devices, Mopria may come preinstalled.

- 3. Go to **Settings** on your Android device, select **Printing**, and enable the Mopria Print Service, if necessary.
- 4. Connect your Android device to the same wireless network as your product.

5. Now you are ready to print. From an Android application such as Chrome or Gmail, tap the menu icon and select **Print**. Then select **All printers**, select your Epson product, adjust your print settings, and print.

Voice-activated Printing

Take advantage of voice-activated, hands-free printing from your Epson product with Alexa, Siri, and Google Assistant. Depending on which voice assistant you use, you can ask your product to print photos, calendars, recipes, photo props, and more. Click here for more information.

1. Connect your product to your network. See the link below.

- 2. Set up your product's email address for use with Epson Connect. See the link below to activate it from the product control panel.
- 3. Click here for instructions on how to set up your product and voice assistant to use the voice-activated printing feature.

Now you are ready to print with your voice and your Epson product.

Using Your Product on a Secure Network

Network Security Recommendations

To help deter unauthorized access to your product over a network, you should protect your network environment using appropriate security measures.

Security measures such as these can help deter threats such as loss of user data, use of telephone and fax lines, and other intrusions:

· Enable security on your wireless LAN

Enable the appropriate security on the wireless LAN you plan to use with your product. Network security such as a network password can deter interception of traffic over the wireless LAN. Your router may already have a default password enabled by your Internet service provider (ISP). See your ISP and router documentation for instructions on how to change the default password and better secure your network.

· Connect your product only to a network protected by a firewall

Connecting your product directly to the Internet may leave it vulnerable to security threats. Instead, connect it to a router or other network connection protected by a firewall. Your router may already have a firewall set up by your Internet service provider; check with your ISP for confirmation. For best results, set up and use a private IP address for your network connection.

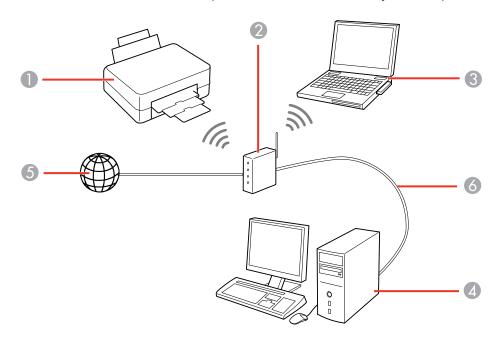

Change the default administrator password on your product

If your product has an option to set an administrator password, change the default administrator password to deter access by unauthorized users to personal data stored on your product, such as IDs, passwords, and contact lists.

Parent topic: Wi-Fi or Wired Networking

Wi-Fi Infrastructure Mode Setup

You can set up your product to communicate with your computer using a wireless router or access point. The wireless router or access point can be connected to your computer over a wireless or wired network.

- 1 Epson product
- 2 Wireless router or access point
- 3 Computer with a wireless interface
- 4 Computer
- 5 Internet
- 6 Ethernet cable (used only for wired connection to the wireless router or access point)

Selecting Wireless Network Settings from the Control Panel Setting Up Wireless Printing from a Smartphone or Tablet

Parent topic: Wi-Fi or Wired Networking

Selecting Wireless Network Settings from the Control Panel

You can select or change wireless network settings using your product control panel.

To install your product on a wireless network, follow the instructions on the *Start Here* sheet and install the necessary software by downloading it from the Epson website. The installer program guides you through network setup.

Note: Breakdown or repair of this product may cause loss of network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your network data and settings.

- 1. Press the $\widehat{\mathbf{w}}$ home button, if necessary.
- 2. Use the arrow buttons to select the icon and press the **OK** button.
- 3. Select **Router** and press the **OK** button.
- 4. Select **Start Setup** or **Change Settings** and press the **OK** button.
- 5. Select **Wi-Fi Setup Wizard** and press the **OK** button.
- 6. Use the arrow buttons to select the name of your wireless network or select **Enter Manually** to enter the name manually and press the **OK** button. Use the displayed keypad to enter your network name.
- 7. Select the **Password** field, press the **OK** button, and enter your wireless password using the displayed keypad.

Note: The network name and password are case sensitive. Be sure to correctly enter uppercase and lowercase letters, and numeric or special characters.

- To enter letters or symbols, press the arrow buttons to scroll through characters, and press the OK button to select one.
- To enter numbers and symbols or change the case of letters, press the 🗘 button.
- To delete the previous character, select the sack icon and press the **OK** button.
- To enter a space, select the space icon and press the **OK** button.
- 8. Select **OK** and press the **OK** button when you finish entering your password.
- 9. Confirm the displayed network settings, press the down arrow to select **Start Setup**, and press the **OK** button to save them.

10. Press the n home button to exit.

You see the icon on the LCD screen and should be able to connect to your product directly from your computer or device, and then print. If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

Note: If you don't see the icon, you may have selected the wrong network name or entered the password incorrectly. Repeat these steps to try again.

Parent topic: Wi-Fi Infrastructure Mode Setup

Setting Up Wireless Printing from a Smartphone or Tablet

You can use the Epson Smart Panel app to connect your Epson product to a wireless network or connect your device directly to the product. Epson Smart Panel is available on iOS and Android devices.

Make sure you have the following:

- A Bluetooth-enabled device that is connected to a wireless network
- The Epson Smart Panel app installed on the device
- The wireless network name (SSID) and password

Note: Your device must be close enough to the product to create and maintain a Bluetooth connection.

1. Make sure the product is turned on and is ready to print.

Note: You must perform initial setup and ink installation before setting up wireless printing.

- 2. Open the Epson Smart Panel app on your device.
- 3. Do one of the following:
 - If the app automatically recognizes the product, follow the on-screen instructions to set up the wireless connection.
 - If the app does not automatically recognize the product, select the + icon and continue with the next step.
- 4. On the next screen, select **Start setting up** and follow the on-screen instructions.

Note: If your product is not listed, move closer to the product and try again. If the product is still not shown, connect your printer to the wireless network using the control panel and then select **Connect**

Smartphone to Product Already Connected to Wi-Fi in the Epson Smart Panel app and follow the on-screen instructions. See the link below for wireless setup instructions.

Your product is now connected to a wireless network and set up for use with the Epson Smart Panel app.

Wi-Fi Direct Mode Setup

You can set up your product to communicate directly with your computer or another device without requiring a wireless router or access point. In Wi-Fi Direct Mode, the product itself acts as a network access point for up to 8 devices.

- 1 Epson product
- 2 Computer with a wireless interface
- 3 Other wireless device

Connecting to a Mobile Device Modifying the Wi-Fi Direct Network Name or Password

Parent topic: Wi-Fi or Wired Networking

Connecting to a Mobile Device

You can connect a mobile device directly to the printer without a wireless router or access point.

Note: Make sure the Epson Smart Panel app is installed on your mobile device before connecting to the printer.

- 1. Press the nome button, if necessary.
- 2. Use the arrow buttons to select the icon and press the **OK** button.
- 3. Use the down arrow button to select **Wi-Fi Direct** and press the **OK** button.
- 4. Press the **OK** button to select **Start Setup**.
- 5. Do one of the following:
 - If you are using Epson Smart Panel, open the Epson Smart Panel app on your device and select the printer displayed on the LCD screen. Select Complete on the LCD screen and press the OK button.
 - For iOS devices, select Other Methods and press the OK button, then select iOS and press the OK button. Scan the QR code with the camera app on your device and follow the instructions on your device. On the printer LCD screen, select Dismiss and press the OK button, then select Complete and press the OK button.
 - For other types of devices, select Other Methods and press the OK button, then select Other OS
 Devices and press the OK button. Use your device to select the Wi-Fi network name (SSID)
 displayed on the LCD screen, then enter the password shown.
- 6. Follow the instructions on the LCD screen to complete Wi-Fi Direct setup.

The Wi-Fi Direct icon displayed on the LCD screen indicates if Wi-Fi Direct is enabled on the product.

If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

Modifying the Wi-Fi Direct Network Name or Password

You can modify the Wi-Fi Direct name and password to create a more descriptive and secure Wi-Fi Direct network.

Note: If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

- 1. Press the nhome button, if necessary.
- 2. Use the arrow buttons to select the icon and press the **OK** button.
- 3. Use the down arrow button to select Wi-Fi Direct and press the OK button.
- 4. Use the down arrow button to select **Start Setup** and press the **OK** button.
- 5. Press the up arrow button to select the **Menu** icon and press the **OK** button.
- 6. Do one of the following:
 - To change the Wi-Fi Direct network name, select Change Network Name, press the OK button, select Yes and press the OK button again. Select Change, press the OK button, then use the onscreen keyboard to enter the new network name.
 - To change the Wi-Fi Direct password, select Change Password, press the OK button, and select Yes and press the OK button again. Use the on-screen keyboard to enter your new Wi-Fi Direct password.

Note: Your password must be at least 8 and no more than 22 characters long.

Note: If you have already connected devices or computers to your product via Wi-Fi Direct, they will be disconnected when you change the network name or password.

- 7. When entering your Wi-Fi Direct network name or password, do the following:
 - To enter letters or symbols, press the arrow buttons to scroll through characters, and press the OK button to select one.
 - To enter numbers and symbols or change the case of letters, press the enter reset button.
 - To delete the previous character, select the sack icon and press the **OK** button.
 - To enter a space, select the space icon and press the **OK** button.

8. Use your computer or wireless device to select the Wi-Fi network name (SSID) displayed on the LCD screen, then enter the password shown.

Note: Make a note of the SSID and password that appear.

Press the nhome button to return to the home screen.
 Computers and wireless devices can now access the product using the new network name and password.

Wi-Fi Protected Setup (WPS)

If your network uses a WPS-enabled wireless router or access point, you can quickly connect your product to the network using Wi-Fi Protected Setup (WPS).

Note: To check if your router is WPS-enabled, look for a button labeled **WPS** on your router or access point. If there is no hardware button, there may be a virtual WPS button in the software for the device. Check your network product documentation for details.

Using WPS to Connect to a Network

Parent topic: Wi-Fi or Wired Networking

Using WPS to Connect to a Network

If you have a WPS-enabled wireless router or access point, you can use Wi-Fi Protected Setup (WPS) to connect your product to the network.

- 1. Press the nh home button, if necessary.
- 2. Use the arrow buttons to select the icon and press the **OK** button.
- 3. Select Router and press the OK button.
- 4. Select Start Setup or Change Settings and press the OK button.
- 5. Use the down arrow button to select **Push Button Setup (WPS)** and press the **OK** button.
- 6. Press the **OK** button to select **Start Setup**.
- 7. Follow the instructions on the LCD screen to complete WPS setup.
- 8. Press the nhome button to exit.

You see the icon on the LCD screen and should be able to connect to your product directly from your computer or device, and then print. If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

Note: If you don't see the **r** icon, repeat these steps to try again.

Parent topic: Wi-Fi Protected Setup (WPS)

Printing a Network Status Sheet

You can print a network status sheet to help you determine the causes of any problems you may have using your product on a network.

- 1. Press the \(\hat{\alpha} \) home button, if necessary.
- 2. Use the arrow buttons to select the **Settings** and press the **OK** button.
- 3. Press the **OK** button to select **General Settings**.
- 4. Use the down arrow button to select **Network Settings** and press the **OK** button.
- 5. Use the down arrow button to select **Network Status** and press the **OK** button.
- 6. Use the down arrow button to select **Print Status Sheet** and press the **OK** button.
- 7. Press the **OK** button to select **Print**.

Examine the settings shown on the network status sheet to diagnose any problems you have.

Parent topic: Wi-Fi or Wired Networking

Printing a Network Connection Report

You can print a network connection report to view solutions to any problems you may have using your product on a network.

- 1. Press the nhome button, if necessary.
- 2. Use the arrow buttons to select the **Settings** and press the **OK** button.
- 3. Press the **OK** button to select **General Settings**.
- 4. Use the down arrow button to select **Network Settings** and press the **OK** button.
- 5. Use the down arrow button to select **Connection Check** and press the **OK** button.
- 6. Use the arrow buttons to select **Print Check Report** and press the **OK** button.

7. Press the **OK** button to select **Print**.

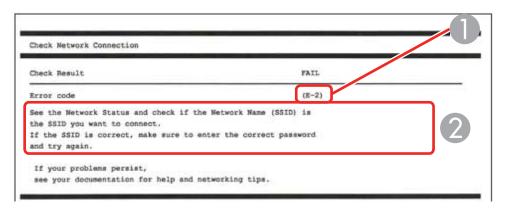

Examine the error codes and solutions shown on the network connection report.

Network Connection Report Codes and Messages

Parent topic: Wi-Fi or Wired Networking

Network Connection Report Codes and Messages

Check the error codes and messages on the network connection report to solve problems you may encounter with network connections. The tables here list solutions to problems based on the error codes and messages that may appear on the top of the report.

- 1 Error code
- 2 Message

Note: Error codes and messages listed here may not all apply to your product.

Error Codes and Messages

Error code and message	Solution
E-1 Confirm that the network cable is connected and network devices such as hub, router, or access point are turned on.	Make sure your router, access point, and/or hub are turned on, and the network cable is securely connected to your device and to your product.
	If you are trying to set up Wi-Fi, remove the network cable and set up Wi-Fi again. Ethernet and Wi-Fi cannot be connected at the same time.

Error code and message	Solution
E-2, E-3, or E-7	Check the following:
No wireless network names (SSID) found. Confirm that the router/access point is turned on and the wireless network (SSID)	Make sure your router or access point is turned on, and is correctly connected to your computer or network device.
is set up correctly. Contact your network administrator for assistance.	Turn off the router or access point, wait about 10 seconds, and turn it on again.
No wireless network names (SSID) found. Confirm that the wireless network name (SSID) of the PC you wish to connect is set up correctly. Contact your network administrator for assistance. Entered security key/password does not match the one set for your router/access point. Confirm security key/password. Contact your network administrator for assistance.	Move your product closer to your router or access point, and remove any obstacles between them. Also move your product away from devices such as wireless phones or microwaves.
	Confirm that the SSID shown on the network connection report matches the label on your router or access point. Also make sure your SSID uses only ASCII characters and symbols, or your product cannot display the SSID correctly.
	If you are trying to connect using the WPS push button method, make sure your router or access point supports it.
	If you are using a network password, check the label on your router or access point to confirm that you are using the correct password, or check with your network administrator or router/access point documentation.
	 If you are connecting to a smart device that generates an SSID, check the device documentation for the SSID and password you should use.
	If your wireless connection suddenly disconnects, and another smart device was added to the network using a WPS push button method or your network was set up using a non-WPS push button method, try downloading and installing your product software again.

Error code and message	Solution
E-5 Security mode (e.g. WEP, WPA) does not match the current setting of the printer. Confirm security mode. Contact your	If the security on your router or access point is not one of the following types, change the type of security on your router or access point and reset your product's network settings.
network administrator for assistance.	• WEP-64 bit (40 bit)
	• WEP-128 bit (104 bit)
	WPA PSK (TKIP/AES); also known as WPA Personal
	WPA2 PSK (TKIP/AES); also known as WPA2 Personal
	WPA (TKIP/AES)
	WPA2 (TKIP/AES)
	WPA3-SAE (AES)
E-6 MAC address of your printer may be filtered. Check whether your router/access point has restrictions such as MAC address filtering. See the documentation of the router/access point or contact your network administrator for assistance.	If your router or access point has MAC address filtering enabled, register your product's MAC address so it is not filtered. Locate the MAC address on the network connection report and check your router or access point documentation for instructions.
	If your router or access point is using shared authentication with WEP security, confirm that you are using the correct authentication key and index.
	If your router or access point limits the number of connected devices, raise the connection limit. See your router or access point documentation for instructions.
E-8 Incorrect IP address is assigned to the printer. Confirm IP address setup of the network device (hub, router, or access point). Contact your network administrator for assistance.	If your product's Obtain IP Address setting is set to Auto , enable DHCP on your router or access point. If it is set to Manual , the IP address may be out of range or on a different network segment; set a valid IP address using your product control panel or the Web Config utility. You can also try turning off your product and the router or
	access point, waiting about 10 seconds, and turning them on again.

Error code and message	Solution
E-9 Confirm the connection and network setup of the PC or other device. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.	Make sure your computer or network device are turned on. Also make sure that you can access the Internet and other devices on the same network from the devices you are trying to connect to your product.
	If you still cannot connect to your product, turn off your router or access point, wait about 10 seconds, and turn it on again. Download and install your product software again to reset your network settings.
E-10 Confirm IP address, subnet mask, and default gateway setup. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.	Make sure other devices on the network are turned on and do the following:
	If your product's Obtain IP Address setting is set to Manual , check the IP address, subnet mask, and default gateway addresses on the network connection report to see if they are correct. If not, correct the settings.
	If DHCP is enabled, set your product's Obtain IP Address setting to Auto . If you want to use the DHCP-assigned address as a static address, set the Obtain IP Address setting to Manual , enter the product's IP address as listed on the network connection report, and set the subnet mask to 255.255.255.0.
	If you still cannot connect to your product, turn off your router or access point, wait about 10 seconds, and turn it on again.
E-11 Setup is incomplete. Confirm default gateway setup. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.	If you set your product's TCP/IP Setup setting to Manual , check that the default gateway address listed on the network connection report is correct. Also turn on the device that is set as the default gateway.

Error code and message	Solution
E-12	Make sure other devices on the network are turned on and do the following:
Confirm the following:	
-Entered security key/password is correct	Make sure the IP address, subnet mask, and default gateway addresses are correct, if you are entering them
-Index of the security key/password is set to

assistance.	 Download and install your product software again to reset your network settings.
	If your router or access point uses WEP security with several registered passwords, make sure that the first registered password is set on your product.

Network Environment Messages

Message	Solution
The Wi-Fi environment needs to be improved. Turn the wireless router off and then turn it on. If the connection does not improve, see the documentation for the wireless router.	Move your product closer to your router or access point, and remove any obstacles between them. Then turn off your router or access point, wait about 10 seconds, and turn it back on again. If you still cannot connect to your product, check the documentation that came with your router or access point for solutions.
*No more devices can be connected. Disconnect one of the connected devices if you want to add another one.	You can connect up to 8 computers or other devices to your product using a Wi-Fi Direct (Simple AP) connection. If you want to add another device, disconnect an existing connected device first.

Disabling Wi-Fi Features

Parent topic: Wi-Fi or Wired Networking

Changing a USB Connection to a Wi-Fi Connection

If you have already connected your product to your computer using a USB connection, you can change to a Wi-Fi connection.

- 1. Disconnect the USB cable from your product.
- 2. Uninstall your product software.
- 3. Download and install your product software from the Epson website using the instructions on the *Start Here* sheet.

Parent topic: Changing or Updating Network Connections

Changing a Wi-Fi Connection to a Wired Network Connection

If you have already connected your product to your computer wirelessly, you can change to a wired network connection if necessary.

- 1. Connect one end of an Ethernet network cable to the product's **LAN** port.
- 2. Connect the other end to any available LAN port on your router or access point.
- 3. Uninstall your product software.
- 4. Download and install your product software from the Epson website.
- 5. Follow the on-screen instructions to install the software.
- 6. When you see the Select Your Connection screen, select **Wired network connection**.
- 7. If you see a Select Setup Option screen, select **Set up printer for the first time**.
- 8. Continue following the rest of the on-screen instructions.

Accessing the Web Config Utility

You can select your product's network settings and confirm its operating status using a web browser. You do this by accessing your product's built-in Web Config utility from a computer or other device that is connected to the same network as your product.

Note: You can also access the Web Config utility from the product information area in the Epson Smart Panel app.

- 1. Print a network status sheet.
- 2. Locate the IP address for your product that is listed on the network status sheet.
- 3. On a computer or other device connected to the same network as your product, open a web browser.
- 4. Enter your product's IP address into the address bar.

Note: The printer uses a self-signed certificate when accessing HTTPS. This may cause a warning message when you access Web Config. This does not indicate a problem and can be ignored.

On the first visit to the Web Config utility, you will be prompted to set an administrator password. The
administrator password is required to access the full capabilities of the Web Config utility. The
default password is the product's serial number. Check the label on your product to locate the serial
number.

You see the available Web Config utility options.

Importing a CA Certificate

Deleting a CA Certificate

Parent topic: Using Your Product on a Secure Network

About Digital Certification

You can configure the following digital certificates for your network using Web Config:

CA-signed Certificate

You can ensure secure communications using a CA-signed certificate for each security feature. The certificates must be signed by and obtained from a CA (Certificate Authority).

CA Certificate

A CA certificate indicates that a third party has verified the identity of a server. You need to obtain a CA certificate for server authentication from a CA that issues it.

Self-signed Certificate

A self-signed certificate is issued and signed by the product itself. You can use the certificate for only SSL/TLS communication, however security is unreliable and you may see a security alert in the browser during use.

Parent topic: Using a Digital Certificate

Obtaining and Importing a CA-signed Certificate

You can obtain a CA-signed certificate by creating a CSR (Certificate Signing Request) using Web Config and submitting it to a certificate authority. The CSR created in Web Config is in PEM/DER format. You can import one CSR created from Web Config at a time.

1. Access Web Config and select **Network Security**.

- 2. Select one of the available network security options and select a certificate option.
- 3. In the CSR section, select **Generate**.
- 4. Select the CSR setting options you want to use.
- 5. Click **OK**.

You see a completion message.

- 6. Select Network Security, select your network security option, and select Certificate again.
- 7. In the CSR section, click the **Download** option that matches the format specified by your certificate authority to download the CSR.

Caution: Do not generate another CSR or you may not be able to import a CA-signed certificate.

- 8. Submit the CSR to the certificate authority following the format guidelines provided by that authority.
- Save the issued CA-signed certificate to a computer connected to the product.
 Before proceeding, make sure the time and date settings are correct on your product. See the product's *User's Guide* for instructions.
- 10. Select **Network Security**, select your network security option, and select **Certificate** again.
- 11. In the CA Certificate section, click **Import**.
- 12. Select the format of the certificate as the Server Certificate setting.
- 13. Select the certificate import settings as necessary for the format and the source from which you obtained it.
- 14. Click **OK**.

You see a confirmation message.

15. Click **Confirm** to verify the certificate information.

CSR Setup Settings

You can select these settings when setting up a CSR in Web Config.

Note: The available key length and abbreviations vary by certificate authority, so follow the rules of that authority when entering information in the CSR.

Setting	Options/Description
Key Length	Select a key length for the CSR
Common Name	Enter a name or static IP address from 1 to 128 characters long; for example, Reception printer or https://10.152.12.225
Organization, Organizational Unit, Locality, State/Province	Enter information in each field as necessary, from 0 to 64 characters long in ASCII; separate any multiple names with commas
Country	Enter a two-digit country code number as specified by the ISO-3166 standard

Parent topic: Using a Digital Certificate

CSR Import Settings

You can configure these settings when importing a CSR in Web Config.

Note: The import setting requirements vary by certificate format and how you obtained the certificate.

Certificate format	Setting descriptions
PEM/DER format obtained from Web Config	Private Key : Do not configure because the product contains a private key
	Password: Do not configure
	CA Certificate 1/CA Certificate 2: Optional
PEM/DER format obtained from a computer	Private Key: Configure a private key
	Password: Do not configure
	CA Certificate 1/CA Certificate 2: Optional
PKCS#12 format obtained from a computer	Private Key: Do not configure
	Password: Optional
	CA Certificate 1/CA Certificate 2: Do not configure

Deleting a CA-signed Certificate

You can delete an imported CA-signed certificate with Web Config when the certificate expires or if you have no more need for an encrypted connection.

Note: If you obtained a CA-signed certificate from Web Config, you cannot import a deleted certificate; you must obtain and import a new certificate.

- 1. Access Web Config and select **Network Security**.
- Select SSL/TLS and select Certificate.
- 3. Click Delete.

You see a completion message.

4. Click **OK**.

Updating a Self-signed Certificate

If your product supports the HTTPS server feature, you can update a self-signed certificate using Web Config.

- 1. Access Web Config and select Network Security, select SSL/TLS, and select Certificate.
- 2. Click Update.
- 3. Enter an identifier for your product from 1 to 128 characters long in the **Common Name** field.

Note: You can add up to 5 IPv4 addresses, IPv6 addresses, host names, or FQDNs; separated by commas. The first value is assigned to the Common Name field, and the rest are added to the Alias field of the certificate subject. You cannot enter a space before or after a comma.

- 4. Select a validity period for the certificate as the Certificate Validity (year) setting.
- Click Next.

You see a completion message.

- 6. Click **OK**.
- 7. Click **Confirm** to verify the certificate information.

Loading Paper

Before you print, load paper for the type of printing you will do.

Loading Paper in the Cassette

Compatible Epson Papers

Paper or Media Type Settings - Printing Software

Selecting the Paper Settings for Each Source - Control Panel

Selecting the Default Paper Source Settings

Selecting the Universal Print Settings

Loading Paper in the Cassette

You can load paper up to this size in the paper cassette: Legal (8.5 × 14 inches [216 × 356 mm]).

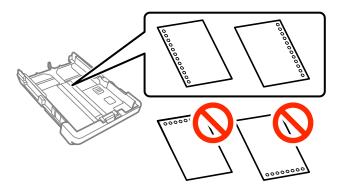

Note: Before loading paper, make sure your product is not currently printing.

- 1. Press the ? help button.
- 2. Select How To.
- 3. Select Load Paper.
- 4. Do one of the following:
 - · To load Letter-sized paper, select Basic.
 - To load paper that is larger than Letter size, select Paper that exceeds the cassette length
 - To load envelopes, select **Load Envelope**.
 - To load photo paper, select Load Photo Paper.

Always follow these paper loading guidelines:

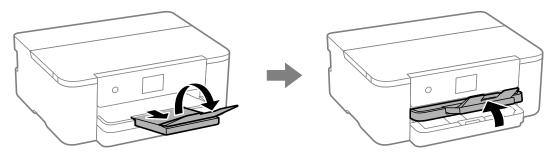

- Do not remove or insert the paper cassette during printing.
- · Load only the recommended number of sheets.
- Load paper short edge first and printable side facedown.
- Make sure the paper is under the tabs on the edge guides and not sticking out from the rear end of the cassette.
- If you have trouble loading a stack of envelopes, press each envelope flat before loading it or load one envelope at a time.

- If print quality declines when printing multiple envelopes, try loading one envelope at a time.
- · Load letterhead or pre-printed paper top edge first.
- Check the paper package for any additional loading instructions.
- Load a single sheet of loose-leaf or other paper with holes as shown.

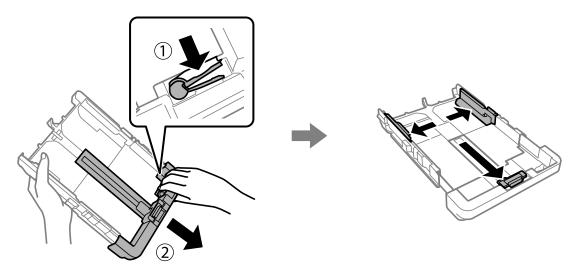

Note: Do not select automatic 2-sided printing for this type of paper and do not print over the holes. Select **Letterhead** or **Preprinted** as the paper type setting.

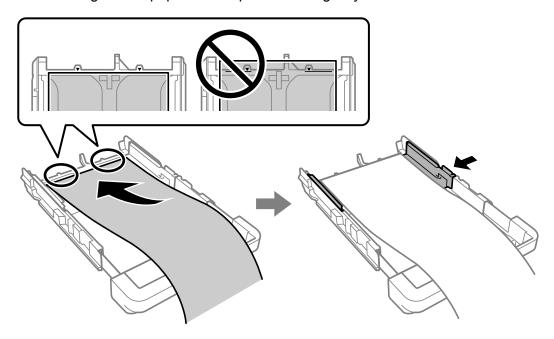

- When loading paper longer than the cassette, select **User-Defined** as the paper size setting. Make sure the end of the paper is cut perpendicularly and do not touch paper that is being fed or ejected.
- To load paper longer than the cassette, do the following:
 - 1. Extend the output tray and lift it.

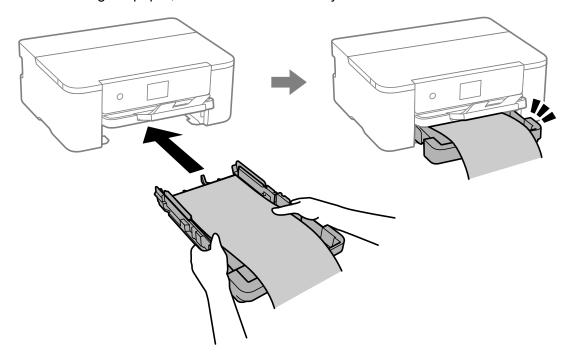

2. Extend the paper tray by pressing the lever and slide the edge guides all the way out.

3. Insert the paper printable side down and slide the edge guide until it touches the paper. Do not let the front edge of the paper extend past the triangle symbols on the end of the cassette.

4. While holding the paper, insert the cassette until you hear a click.

5. Lower the output tray and select **User-Defined** as the paper size setting.

Note: When printing on glossy photo papers, ink drying times increase considerably (humidity, temperature, and other environmental conditions can also affect photo drying times). To avoid smearing your photos, do not touch the printed side until the ink is completely dry. Moisture and oils from your skin can also affect print quality, so avoid rubbing or scratching the surface of your photos even after they dry.

Printing from a Computer

Before printing from your computer, make sure you have set up your product and installed its software as described on the *Start Here* sheet.

Note: If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select **Enable automatic checking** and click **OK**. The update scans your system to see if you have the latest product software. Follow the on-screen instructions. You can also check for updates using Epson Software Updater in the Epson software folder on your computer.

Parent topic: Printing from a Computer

Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.

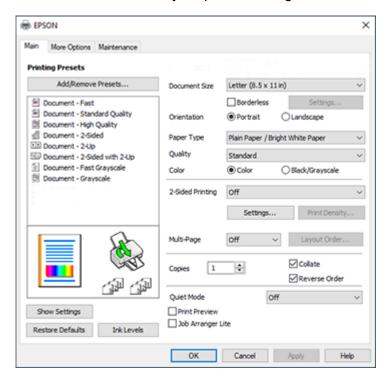

- 1. Open a photo or document for printing.
- 2. Select the print command in your application.

Note: You may need to select a print icon on your screen, the **Print** option in the File menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

Note: You may also need to select **Properties** or **Preferences** to view your print settings.

You see the Main tab of your printer settings window:

4. Select the size of the paper you loaded as the Document Size setting.

Note: You can also select the **User-Defined** setting to create a custom paper size, but you cannot use the **Borderless** setting.

5. If you are printing a borderless photo, select **Borderless**. You can click **Settings** to access additional options for borderless printing.

Note: You must select a compatible borderless paper type and size to print without borders. Check the borderless paper compatibility list for details.

6. Select the orientation of your document.

Note: If you are printing an envelope, select **Landscape**.

7. Select the type of paper you loaded as the Paper Type setting.

Note: The setting may not exactly match the name of your paper. Check the paper type settings list for details.

- 8. Select the **Quality** setting that matches the print quality you want to use.
- 9. Select a Color option:
 - To print a color document or photo, select the Color setting.
 - To print text and graphics in black or shades of gray, select the **Black/Grayscale** setting.
- To print on both sides of the paper, select the 2-Sided Printing setting and select the options you want.
- 11. To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select one of the settings in the Multi-Page menu and select the printing options you want.
- 12. To print multiple copies and arrange their print order, select the **Copies** options.
- 13. To preview your job before printing, select **Print Preview**.
- 14. To save your print job as a project that can be modified and combined with other print jobs, select **Job Arranger Lite**.

15. To reduce noise during printing when you select **Plain Paper/Bright White Paper**, select **On** in the Quiet Mode menu.

Note: Enabling **Quiet Mode** may reduce printing speed.

Prints several pages on one sheet of paper. Click the **Layout Order** button to select page layout and border options.

2×1 Poster, 2×2 Poster, 3×3 Poster, 4×4 Poster

Prints one image on multiple sheets of paper to create a larger poster. Click the **Settings** button to select image layout and guideline options.

Parent topic: Selecting Basic Print Settings - Windows

Selecting Double-sided Printing Settings - Windows

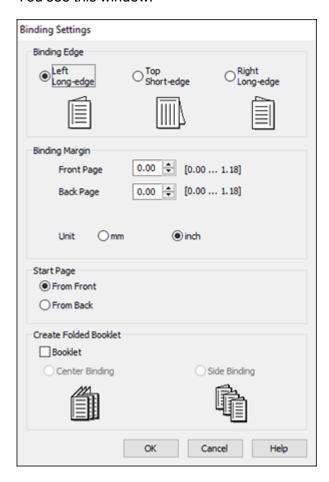

You can print on both sides of the paper by selecting one of the 2-Sided Printing options on the Main tab.

Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network.

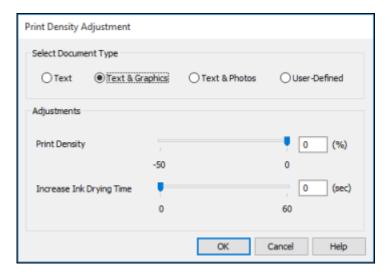

- 1. Select one of the following options for **2-Sided Printing**:
 - Auto (Long-edge binding) to print your double-sided print job by automatically flipping the paper on the long edge.
 - Auto (Short-edge binding) to print your double-sided print job by automatically flipping the paper on the short edge.
 - **Manual (Long-edge binding)** to print your double-sided print job by printing one side and prompting you to flip the paper over on the long edge to print the other side (recommended for paper types that do not support automatic duplexing).
 - **Manual (Short-edge binding)** to print your double-sided print job by printing one side and prompting you to flip the paper over on the short edge to print the other side (recommended for paper types that do not support automatic duplexing).
- 2. Click the **Settings** button.

You see this window:

- 3. Select the double-sided printing options you want to use.
- 4. Click **OK** to return to the Main tab.
- 5. Click the **Print Density** button.

You see this window:

- 6. Select the type of document you are printing as the Document Type setting. The software automatically sets the Adjustments options for that document type.
- 7. If necessary, select the Adjustments options you want to use.
- 8. Click **OK** to return to the Main tab.
- 9. Print a test copy of your double-sided document to test the selected settings.
- 10. Follow any instructions displayed on the screen during printing.

You can select any of the available options on the 2-Sided Printing Settings window to set up your double-sided print job.

Binding Edge Options

Select a setting that orients double-sided print binding in the desired direction.

Binding Margin Options

Select options that define a wider margin to allow for binding.

Start Page

Selects whether printing starts on the front or back page.

Create Folded Booklet Options

Select the **Booklet** checkbox and a binding option to print double-sided pages as a booklet.

Parent topic: Selecting Double-sided Printing Settings - Windows

Print Density Adjustments - Windows

You can select any of the available options on the Print Density Adjustment window to adjust the print quality of your double-sided print job.

Print Density

Sets the level of ink coverage for double-sided printing.

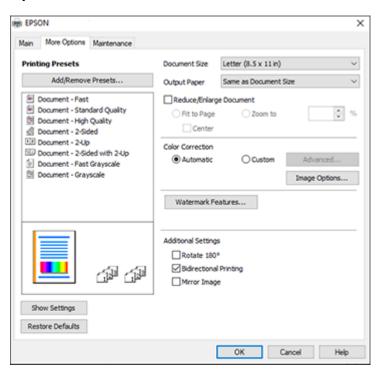

Increase Ink Drying Time

Sets the amount of time required for drying ink after printing on one side of the paper before printing the other side in double-sided printing to prevent ink smearing.

Parent topic: Selecting Double-sided Printing Settings - Windows

Selecting Additional Layout and Print Options - Windows

You can select a variety of additional layout and printing options for your document or photo on the **More Options** tab.

- 1. To change the size of your printed document or photo, select the **Reduce/Enlarge Document** checkbox and select one of these sizing options:
 - Select the Fit to Page option to size your image to fit the paper you loaded. Select the size of your document or photo as the Document Size setting, and the size of your paper as the Output Paper setting. If you want to center your image on the paper, select the Center option.
 - Select the **Zoom to** option to reduce or enlarge your document or photo by a specific percentage. Select the percentage in the **%** menu.
- 2. Select one of the following Color Correction options:
 - Select **Automatic** to automatically adjust the sharpness, brightness, contrast, and color saturation for your image.

- Select Custom and click the Advanced button to manually adjust the color correction settings or turn off color management in your printer software.
- Select **Image Options** to access additional settings for improving printed images.

Note: You can also select Color Universal Print settings.

- 3. To add the following features, click the **Watermark Features** button:
 - Anti-Copy Pattern: adds a watermark that only appears when your printout is copied

Note: This setting is not available for all types of printing. Click the **Add/Delete** button to create your own pattern, and click the **Settings** button to customize the pattern.

• Watermark: adds a visible watermark to your printout

Note: Click the **Add/Delete** button to create your own watermark, and click the **Settings** button to customize the watermark.

• Header/Footer: adds information such as the date and time to the top or bottom of your printout

Note: Click the **Settings** button to customize the text and location of the header or footer.

4. Select any of the Additional Settings options to customize your print.

Image Options and Additional Settings - Windows

You can select any of the Image Options and Additional Settings to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

Image Options

Emphasize Text

Adjusts the weight of printed text to increase readability.

Emphasize Thin Lines

Adjusts the weight of printed lines to increase visibility.

Edge Smoothing

Smooths jagged edges in low-resolution images such as screen captures or images from the Web.

Fix Red-Eye

Reduces or removes red-eye in photos.

Print Text in Black

Prints colored text in black.

For Color Text

Prints colored text on a background pattern or underlined.

For Color Graphs and Images

Prints colored graphics and images with overlay patterns.

For Color Text, Graphs, and Images

Prints colored text, graphics, and images with overlay patterns.

Enhancement Options

Specifies Color Universal Print enhancement settings for text, graphics, and images.

Additional Settings Options

Rotate 180°

Prints the image rotated 180° from its original orientation.

Bidirectional Printing

Prints in both directions (right-to-left and left-to-right), speeding up printing, but may reduce print quality.

Mirror Image

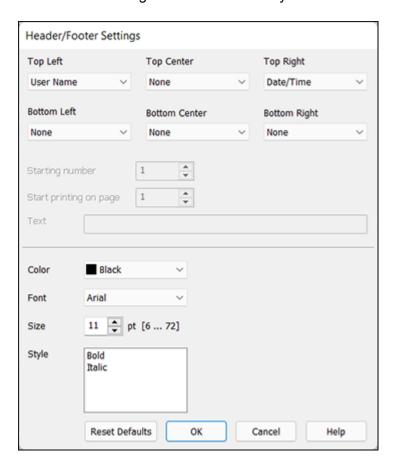

Flips the printed image left to right.

Parent topic: Selecting Additional Layout and Print Options - Windows

Header/Footer Settings - Windows

You can select any of the Header/Footer Settings options to add headers or footers when you print. The items are available to print at the top or bottom of your pages, in either the left, right, or center of the page.

Note: These settings are not saved with your document.

You can select to print the following information:

- User Name
- Computer Name
- Date
- Date/Time
- Document Name
- Collate Number (copy number)

- Page Number
- Text

You can also adjust the text settings for the printed information.

Note: The user name, computer name, date, and time come from the Windows Control Panel on your computer.

- 2. Select Printer Settings.
- 3. Click the **Maintenance** tab.

You see the maintenance options:

4. Click the **Extended Settings** button.

You see this window:

- 5. Select any of the extended settings to customize your print.
- 6. Click **OK** to close the Extended Settings window.
- 7. Click **OK** to close the printer software window.

Extended Settings - Windows

Parent topic: Printing with Windows

Extended Settings - Windows

You can select these settings on the Extended Settings window.

Enable EPSON Status Monitor 3

Enables product monitoring for ink and paper supplies and other issues.

Check Paper Width Before Printing

Prevents printing beyond the edges of the paper if the paper size setting is incorrect; may reduce print speed.

Thick Paper and Envelopes

Prevents ink from smearing when you print on envelopes or other thick paper.

Separator Page

Before each document, prints a separator page containing the title, user, date, and time.

Remove white borders

Removes white margins that may appear when you print borderless photos.

Always Spool RAW Datatype

Increases print speed and may solve other printing problems.

Page Rendering Mode

Increases print speed when printing is extremely slow or the print head stops during printing.

Print as Bitmap

Increases print speed when printing is extremely slow or the print head stops during printing, and other settings do not help.

Skip Blank Page

Ensures that your product does not print pages that contain no text or images.

Change Standard Resolution

Reduces the resolution of print data to correct printing problems.

Refine screening pattern

Prints graphics with a finer screening pattern.

Allow Applications to Perform ICM Color Matching

Allows applications to perform ICM color matching.

Always Use the Driver's Paper Source Setting

Prints using the paper source setting in the printer driver, rather than the setting in your application.

Output 1 page documents facedown in 2-Sided mode

Outputs single-sided pages in a 2-sided print job facedown instead of faceup.

Output documents for filing

Outputs all landscape, portrait, 1-sided, and 2-sided documents in the same orientation for easier filing.

Barcode mode

Reduces bleeding when printing barcodes on plain paper, letterhead paper, recycled paper, preprinted paper, envelopes, and thick paper.

Reduce Print Data Size

Increases print data compression to improve print speed. Not recommended when printing fine patterns.

Selecting Default Print Settings - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

- 1. Access the Windows Desktop and right-click the licon for your product in the right side of the Windows taskbar, or click the up arrow and right-click.
- 2. Select Printer Settings.

You see the printer settings window:

- 3. Select the print settings you want to use as defaults in all your Windows programs.
- 4. Click OK.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

Changing the Language of the Printer Software Screens

Parent topic: Printing with Windows

Changing the Language of the Printer Software Screens

You can change the language used on the Windows printer software screens.

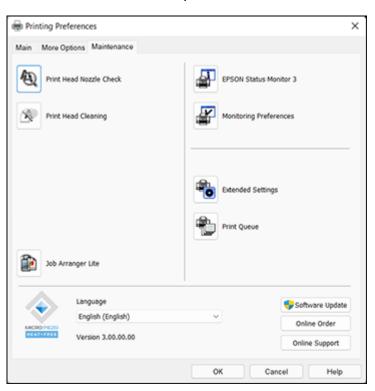

1. Access the Windows Desktop and right-click the licon for your product in the right side of the Windows taskbar, or click the up arrow and right-click lick.

2. Select Printer Settings.

You see the printer settings window.

3. Click the Maintenance tab.

You see the maintenance options:

- 4. Select the language you want to use as the **Language** setting.
- 5. Click **OK** to close the printer software window.

The printer software screens appear in the language you selected the next time you access them.

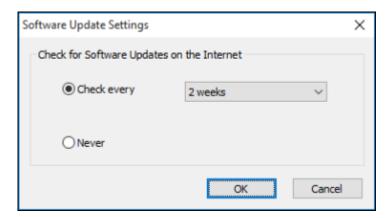

Parent topic: Selecting Default Print Settings - Windows

Changing Automatic Update Options

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.

- 1. Access the Windows Desktop and right-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click.
- 2. Select Software Update Settings.

You see this window:

- 3. Do one of the following:
 - To change how often the software checks for updates, select a setting in the **Check every** menu.
 - To disable the automatic update feature, select the **Never** option.
- 4. Click **OK** to exit.

Note: If you choose to disable the automatic update feature, you can check for updates manually.

Replacing Ink Cartridges and Maintenance Boxes

The maintenance box stores ink that gets flushed from the system during print head cleaning. When an ink cartridge is expended or the maintenance box is at the end of its service life, you need to replace it.

You may also need to replace a cartridge that is more than six months old if your printouts do not look their best, even after cleaning and aligning the print head.

Note: Please dispose of your used Epson branded ink cartridges and maintenance boxes responsibly and in accordance with local requirements. If you would like to return your used ink cartridges and maintenance boxes to Epson for proper disposal, please go to epson.com/recycle for more information.

Conserving Low Black Ink with Windows

Ink Safety Precautions

- Keep ink cartridges and maintenance box out of the reach of children and do not drink the ink.
- Keep the ink cartridges out of direct sunlight.
- Store ink cartridges in a cool, dark place; do not store the ink cartridges in high or freezing temperatures.
- Be careful when you handle used ink cartridges; there may be ink remaining around the ink supply port. If ink gets on your skin, wash it off with soap and water. If it gets in your eyes, flush them immediately with water. If you experience discomfort or vision problems after flushing your eyes, see a doctor immediately. If ink gets in your mouth, see a doctor immediately.
- Do not dismantle an ink cartridge. This could damage the print head.
- Do not disassemble or modify the ink cartridge or maintenance box; otherwise ink may get into your eyes or on your skin or you may not be able to print normally.
- Do not shake cartridges too vigorously; this can cause them to leak.
- Do not remove or tear the label on the cartridge; this can cause leakage.

- Use an ink cartridge before the date printed on its package or within six months of opening the package, whichever is earlier.
- Store ink cartridges with their bottoms down. Do not store cartridges upside down.
- After bringing an ink cartridge inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.
- Do not open the ink cartridge package until you are ready to install it in the printer. The cartridge is vacuum packed to maintain its reliability. Leaving a cartridge unpacked for a long time before using it may prevent normal operation.
- Do not break the hooks on the side of the cartridge when removing it from the packaging.
- Do not shake cartridges after opening their packages; this can cause them to leak.
- You must remove the yellow tape from the cartridge before installing it; otherwise, print quality may
 decline or you may not be able to print.
- Do not remove the transparent seal from the bottom of the cartridge. This may cause the cartridge to become unusable.
- Do not touch the green IC chip on the side of the cartridge. This may prevent normal operation.
- If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in
 the same environment as the product. Note that there is a valve in the ink supply port, making covers
 or plugs unnecessary, but care is needed to prevent the ink from staining items that the cartridge
 touches. Do not touch the ink cartridge ink supply port or surrounding area.
- Install a new ink cartridge immediately after removing an expended one. Leaving cartridges uninstalled can dry out the print head and may prevent the product from printing.
- Do not turn off the printer during cartridge replacement. Otherwise, ink remaining in the print head nozzles will dry out and you may not be able to print.
- Do not put your hands inside the product or touch any cartridges during printing.
- Removed ink cartridges may have ink around the ink supply port, so be careful not to get any ink on the surrounding area when removing the cartridges.

Ink Consumption

- Quoted yields may vary depending on the images that you are printing, the paper type that you are using, the frequency of your prints and environmental conditions such as temperature.
- Do not use the cartridges that came with the printer for the replacement. The ink in the ink cartridges supplied with your printer is partly used during initial setup. In order to produce high quality printouts, the print head in your printer needs to be fully charged with ink. This process consumes a quantity of ink and, therefore, these cartridges may print fewer pages compared to subsequent ink cartridges.

- To maintain optimum print head performance, some ink is consumed from all ink cartridges during
 maintenance operations. Ink may also be consumed when you replace an ink cartridge or turn the
 printer on.
- When printing in monochrome or grayscale, color inks may be used instead of black ink depending on the paper type or print quality settings you are using.

Checking Cartridge and Maintenance Box Status - Windows

A low ink reminder appears if you try to print when ink is low, and you can check your cartridge or maintenance box status at any time using a utility on your Windows computer.

1. To check your status, access the Windows Desktop and double-click the icon for your product in the right side of the Windows taskbar, or click the up arrow and double-click. Then click **Details**.

You see this window:

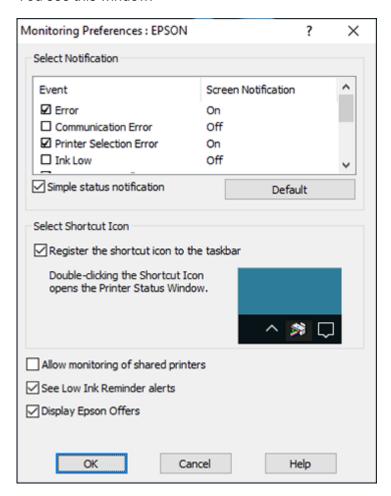

2. Replace or reinstall the maintenance box or any ink cartridge as indicated on the screen.

Note: If any of the cartridges installed in the product is broken, incompatible with the product model, or improperly installed, Epson Status Monitor will not display an accurate cartridge status.

3. To disable the low ink reminder, right-click the product icon in the Windows taskbar and select **Monitoring Preferences**.

You see this window:

- 4. Deselect the **See Low Ink Reminder alerts** checkbox at the bottom of the screen.
- 5. To disable promotional offers, deselect the **Display Epson Offers** checkbox.
- 6. Click **OK**.

Purchase Epson Ink Cartridges and Maintenance Box

You can purchase genuine Epson ink, maintenance boxes, and paper at epson.com (U.S. sales) or epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Note: Your printer is designed to work only with genuine Epson-brand ink cartridges. Other brands of ink cartridges and ink supplies are not compatible and, even if described as compatible, may not function properly or at all. Epson periodically provides firmware updates to address issues of security, performance, minor bug fixes and ensure the printer functions as designed. These updates may affect the functionality of third-party ink. Non-Epson branded or altered Epson cartridges that functioned prior to a firmware update may not continue to function.

The included initial cartridges are designed for reliable printer setup and cannot be used as replacement cartridges or resold. After setup, the remaining ink is available for printing. Yields are based on ISO 24711 in default mode, printing continuously. Yields vary due to print images, settings, and temperatures. Printing infrequently or primarily with one color reduces yields. All cartridges must be installed with ink for printing and printer maintenance. For print quality, some ink remains in replaced cartridges.

Ink Cartridge and Maintenance Box Part Numbers

Parent topic: Replacing Ink Cartridges and Maintenance Boxes

Ink Cartridge and Maintenance Box Part Numbers

Use these part numbers when you order or purchase a new maintenance box or ink cartridges.

Maintenance box part number: T6715

Note: For best printing results, use up a cartridge within 6 months of opening the package.

Ink color	Part number		
	Standard-capacity	High-capacity	
Black	924120	924XL120	
Cyan	924220	924XL220	
Magenta	924320	924XL320	
Yellow	924420	924XL420	

Parent topic: Purchase Epson Ink Cartridges and Maintenance Box

Removing and Installing Ink Cartridges

Make sure you have your replacement cartridges handy before you begin. You must install new cartridges immediately after removing the old ones.

Caution: Leave your old cartridges in the printer until you are ready to replace them to prevent the print head nozzles from drying out. Do not open ink cartridge packages until you are ready to install the ink. Cartridges are vacuum packed to maintain reliability.

Caution: Make sure you follow all safety precautions when handling ink cartridges. See the link below for more information.

- 1. Turn on your product.
 - If an ink cartridge is expended, you see a message on the LCD screen. Note which cartridges
 need to be replaced, then select How To and press the OK button. Follow the instructions on the
 screen.
 - If you are replacing a cartridge before you see a message on the LCD screen, press the ŵ home button if necessary, and select Maintenance > Ink Cartridge Replacement and press the OK button.
- 2. Follow the on-screen instructions to replace the expended ink cartridge.

If you remove a low or expended ink cartridge, you cannot re-install and use the cartridge.

Caution: If you remove an ink cartridge for later use, protect the ink supply area from dirt and dust and store it in the same environment as the printer. The valve in the ink supply port is designed to contain any excess ink, but do not touch the ink supply port or surrounding area. Always store ink cartridges with the label facing up; do not store cartridges upside-down.

Replacing the Maintenance Box

If the maintenance box is full, a message appears on your product's LCD screen. Select **How To** and press the **OK** button, then follow the steps on the LCD screen to replace the maintenance box. Make sure you have a new maintenance box before you begin.

Note: In some print cycles a small amount of surplus ink may be collected in the maintenance box. To prevent ink leakage from the maintenance box, the product is designed to stop printing when the absorbing capacity of the maintenance box has reached its limit. Whether and how often this is required will vary according to the number of pages you print, the type of material you print on and the number of cleaning cycles that the printer performs.

Caution: Do not reuse a maintenance box that has been removed and left uninstalled for more than a week. Keep the maintenance box away from direct sunlight.

Parent topic: Replacing Ink Cartridges and Maintenance Boxes

Printing with Expended Color Cartridges - Windows

If you see a message during printing telling you that you can temporarily print in black ink with an expended color cartridge, you can cancel your print job and select print settings.

You can print with an expended color cartridge on the following types of paper:

- Plain paper
- · Pre-printed paper
- Letterhead
- Color paper
- · Recycled paper
- High-quality plain paper
- · Thick paper
- Envelopes

Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Note: To use this feature, Epson Status Monitor must be enabled.

- 1. Do one of the following:
 - If available, click **Print in Black** to continue printing using black ink.
 - If the **Print in Black** option is not available, click **Close** and cancel your print job, then follow the steps below.

Note: If the message screen appears on another computer on a network, you may need to cancel the print job using the product control panel.

- 2. Load one of the paper types listed above in your product.
- 3. Access the print settings in your print application.
- 4. Click the **Main** tab and make sure **Borderless** is not selected.
- 5. Select a paper type that supports **Print in Black**.
- 6. Select the Black/Grayscale Color setting.
- 7. Click OK.
- 8. Print your document.

Epson Status Monitor 3 displays a print message.

9. Click **Print in Black** to print your document.

Cleaning the Translucent Film

If the print quality has not improved after aligning the print head and cleaning the paper path, the translucent film inside the product may be smeared with ink.

To clean the printer head path, use the following:

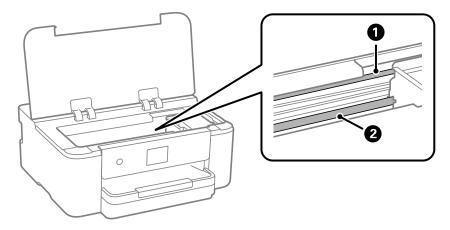

- Several cotton swabs
- 1/4 cup (59 ml) water containing 2 to 3 drops of mild dish detergent
- A small flashlight

Caution: Do not use any other liquid to clean the translucent film or you may damage your product.

- 1. Turn off the product.
- 2. Unplug the power cable.
- 3. Disconnect any connected cables.
- 4. Open the printer cover.

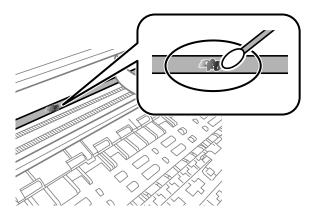

5. Using the flashlight, check the translucent film shown here for ink smears.

- 1 Translucent film
- 2 Print head rail

Caution: Do not touch the print head rail or you may not be able to print. Do not wipe off the grease on the rail.

6. Moisten a cotton swab with the water and detergent mixture and squeeze out any excess moisture, then lightly wipe the ink off the translucent film.

Caution: Do not press too hard on the film or you may dislocate the anchor springs and damage your product.

- 7. Use a new, dry cotton swab to dry the translucent film.
- 8. Repeat steps 6 and 7 as necessary to clean all ink smears.
- 9. When the translucent film is dry and free of any fibers, close the printer cover.
- 10. Reconnect any disconnected cables, plug in the power cord, and turn on the product.

Cleaning and Transporting Your Product

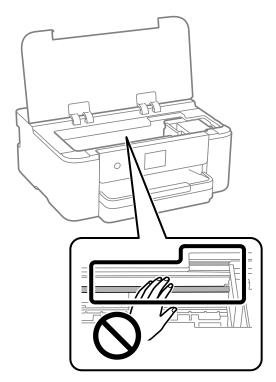

See these sections if you need to clean or transport your product.

Cleaning the Product
Transporting Your Product

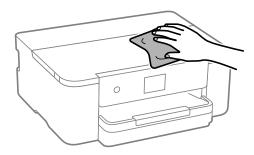

Cleaning the Product

To keep your product working at its best, you should clean it several times a year.

Caution: Do not use a hard brush, benzene, alcohol, or paint thinner to clean the product or you may damage it. Do not place anything on top of the cover or use the cover as a writing surface, or it could get permanently scratched. Do not use oil or other lubricants inside the product or let water get inside. Do not touch the parts shown below; otherwise a malfunction may occur.

- 1. Turn off the product.
- 2. Unplug the power cable.
- 3. Disconnect any connected cables.
- 4. Remove all the paper from the product.
- 5. Clean the outer case and control panel with a soft, dry cloth. If you cannot remove the dirt, try cleaning with a soft cloth moistened with a mild detergent. Do not use liquid or chemical cleansers.

Parent topic: Cleaning and Transporting Your Product

Transporting Your Product

If you need to store your product or transport it a long distance, prepare it for transportation as described here.

Caution: During transportation and storage, follow these guidelines:

- Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak.
- Leave the ink cartridges installed. Removing the cartridges can dry out the print head and may prevent the product from printing.

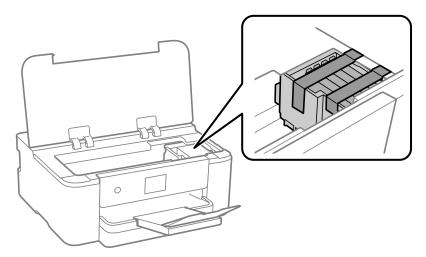

Note: Before storing your product for a long period, replace low, expended, or expired ink to help prevent the print head from drying out. Store your product in a cool, dry place.

1. Turn off the product.

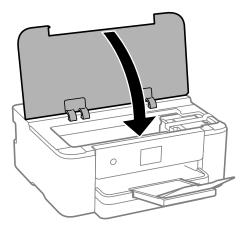

2. Unplug the power cable.

Note: Make sure the power light is off before unplugging the power cable. Otherwise, the print head does not return to the home position which can cause the ink to dry and may prevent the product from printing.

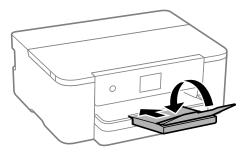

- 3. Disconnect any connected cables.
- 4. Remove all the paper from the product.
- 5. Open the printer cover and secure the ink cartridge holder to the printer as shown.

6. Close the printer cover.

7. Lower the control panel and close all of the trays as shown.

- 8. Place the product in its original packing materials, if possible, or use equivalent materials with cushioning around the product. Make sure the box adequately protects the product control panel.
- 9. After unpacking the product, be sure to remove all of the tape.

Keep the product level during transportation. If print quality has declined when you print again, clean and align the print head.

1. Press the ? help button.

2. Select **Troubleshooting** or **How To** to view instructional images or animations.

Parent topic: Solving Problems

Checking for Software Updates

Periodically, it's a good idea to check Epson's support website for free updates to your product software. Visit epson.com/support (U.S) or epson.ca/support (Canada) and select your product.

Note: Your printer is designed to work only with genuine Epson-brand ink cartridges. Other brands of ink cartridges and ink supplies are not compatible and, even if described as compatible, may not function properly or at all. Epson periodically provides firmware updates to address issues of security, performance, minor bug fixes and ensure the printer functions as designed. These updates may affect

the functionality of third-party ink. Non-Epson branded or altered Epson cartridges that functioned prior to a firmware update may not continue to function.

- **Windows**: Your printer software automatically checks for updates. You can also manually update the software by selecting **Software Update** here:
 - Access the Windows Desktop and right-clicking the icon for your product in the right side of the Windows taskbar, or clicking the up arrow and right-clicking.
 - On the Maintenance tab in the printer settings window

You can also update the software by selecting **EPSON Software Updater** in the **EPSON** or **EPSON Software** program group, accessible by the **Start** button, or on the **Start** or **Apps** screens, depending on your version of Windows.

- OS X: You can manually update the software by opening the Applications > Epson Software folder and selecting EPSON Software Updater.
- macOS 10.12.x to 11.x: You can manually update the software by opening the **App Store**, selecting **Updates**, searching for a software update option for Epson Software, and selecting **Update**.

Parent topic: Solving Problems

Product Status Messages

You can often diagnose problems with your product by checking the messages on its LCD screen.

Note: If the screen is dark, press any button to wake the product from sleep mode.

LCD screen message	Condition/solution
Printer error. Turn on the printer again. See your documentation for more details.	A serious error has occurred. Turn the product off and then back on again. If the error continues, check for a paper jam. If there is no paper jam, contact Epson for support.
Paper out in XX.	Load paper in the empty paper cassette. Make sure to insert the paper cassette all the way until it stops.
You need to replace Ink Cartridge.	Replace the ink cartridge as soon as possible.
The printer's borderless printing ink pad is nearing the end of its service life. It is not a user-replaceable part. Please contact Epson Support.	The borderless ink pad is near the end of its service life and the message will be displayed until the ink pad is replaced. Contact Epson to replace borderless ink pads before the end of their service life. Press the OK button to resume printing.

LCD screen message	Condition/solution	
The printer's borderless printing ink pad has reached the end of its service life. It is not a user-replaceable part. Please contact Epson Support.	The borderless ink pad is at the end of its service life. Turn off the product and contact Epson for support. Borderless printing is not available until the ink pad is replaced.	
Paper Setup Auto Display is set to Off. Some features may not be available. For details, see your documentation.	You cannot use AirPrint if Paper Setup Auto Display is disabled.	
The combination of the IP address and the subnet mask is invalid. See your documentation for more details.	There is a problem with the network connection to your product.	
To use cloud services, update the root certificate from the Epson Web Config utility.	Run the Web Config utility and update the root certificate. Contact your system administrator for more information.	
Check that the printer driver is installed on the computer and that the port settings for the printer are correct.	Make sure the correct port (USB or network) is selected for your product connection.	
Recovery mode	An error has occurred during firmware updating. Connect your product using a USB cable and try downloading the Firmware Update from Epson's support website. If you still need help, contact Epson for support.	
Update Firmware		

Note: In some print cycles a very small amount of surplus ink may be collected in the borderless printing ink pad. To prevent ink leakage from the pad, the product is designed to stop borderless printing when the pad has reached its limit. Whether and how often this is required will vary according to the number of pages you print using the borderless print option. The need for replacement of the pad does not mean that your printer has ceased to operate in accordance with its specifications. The printer will advise you when the pad requires replacing and this can only be performed by an authorized Epson Service provider. The Epson warranty does not cover the cost of this replacement.

Running a Product Check

Running a product check helps you determine if your product is operating properly.

- 1. Disconnect any interface cables connected to your product.
- 2. Load plain paper in the product.
- 3. Press the nhome button, if necessary.
- 4. Use the arrow buttons to select **Maintenance** > **Print Head Nozzle Check** and press the **OK** button.
- 5. Press the **OK** button to select **Print**.

The nozzle pattern prints.

- 6. Do one of the following, depending on the results of the product check:
 - If the page prints and the nozzle check pattern is complete, the product is operating properly. Any
 operation problem you may have could be caused by your computer, cable, software, or selected
 settings. Check the other solutions in this book or try uninstalling and reinstalling your printer
 software.
 - If the page prints but the nozzle check pattern has gaps, clean the print head.
 - If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

Resetting Control Panel Defaults

If you have a problem with settings on the product control panel, you can reset them to their factory defaults. You can choose which settings to reset or reset them all.

Note: This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

- 1. Press the nhome button, if necessary.
- 2. Use the arrow buttons to select **Settings** > **Restore Default Settings** and press the **OK** button.
- 3. Select one of these options:
 - Network Settings: Resets all network settings
 - All Except Network Settings: Resets all settings except for network settings
 - · All Settings: Resets all control panel settings

You see a confirmation screen.

4. Use the arrow buttons to select **Yes** (if you want to reset the selected settings), or **No** (to cancel the operation) and press the **OK** button.

Product Does Not Turn On or Off Noise After Ink Installation

Software Installation Problems

Parent topic: Solving Problems

Product Does Not Turn On or Off

If you cannot turn the product on or off, try these solutions:

- If you cannot turn on your product, make sure the power cord is securely connected and hold down the power button a little longer.
- If you cannot turn off your product, hold down the power button a little longer. If you still cannot turn off your product, unplug the power cord, plug the power cord back in, then turn your product on and off again using the power button.

Parent topic: Solving Setup Problems

Product Parts - Front

Noise After Ink Installation

If you hear noises from your product after installing ink, check the following:

- The first time you install the ink cartridges, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on.
- If the product's print head stops moving or making noise, and the charging process has not finished after approximately 5 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Parent topic: Solving Setup Problems

Software Installation Problems

If you have problems while installing your product software, try these solutions:

- Make sure your product is turned on and any necessary cables are securely connected at both ends. If
 you still have problems installing software, disconnect the cable and carefully follow the instructions on
 the Start Here sheet. Also make sure your system meets the requirements for your operating system.
- Close any other programs, including screen savers and virus protection software, and install your product software again.
- In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.
- If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your system administrator.
- If you are printing over a network, make sure your product is set up properly on the network.

If the USB cable is not recognized, try using a different USB cable.

Product Does Not Appear in Mac Printer Window

Wireless Network Connection is Unstable on a Mac

Wired Network Connection Becomes Unstable

USB Connection Problems

Parent topic: Solving Problems

Cannot Print Over a Network

If you cannot print over a network, try these solutions:

- Make sure that your product is turned on.
- Make sure you install your product's network software as described in your product documentation, or contact your system administrator.
- Print a network status sheet and verify that the network settings are correct. If the network status is **Disconnected**, check any cable connections and turn your product off and then on again.
- Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.

- If you are using TCP/IP, make sure the product's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually. If the IP address assigned to the printer is 169.254.xxx.xxx and the subnet mask is 255.255.0.0, the IP address may not be assigned correctly. Restart your wireless router or reset the printer's network settings.
- If you have changed your wireless router, update your settings to match the new router.
- Make sure your computer and product are both using the same wireless network.
- Try restarting your router following the instructions in your router documentation.

Note: If you are reading these instructions online, you will lose your Internet connection when you restart your router.

- Check to see if your wireless router or access point has an enabled Privacy Separator function that is
 preventing printing from a device over the network. See your router or access point documentation for
 instructions on disabling the Privacy Separator function.
- If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your
 product's LCD screen is not lit, make sure you select one of the WPS options from the product control
 panel within 2 minutes of pressing the WPS button on your router.
- Check your wired LAN router or access point to see if the LED for the port to which your product is connected is on or flashing. If the link LED is off, try the following:
 - Make sure the Ethernet cable is securely connected to your product and to your router, access point, switch, or hub.
 - Try connecting your product to a different port or a different router, access point, switch, or hub.
 - · Try connecting with a different Ethernet cable.
 - Try printing to your product from another computer on the network.
- If you are connecting the product via EpsonNet Setup and the Wi-Fi icon does not appear lit on the LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.

Printing a Network Status Sheet Connecting to a New Wi-Fi Router Using WPS to Connect to a Network

Network Software Cannot Find Product on a Network

If EpsonNet Setup cannot find your product on a network, try these solutions:

- Make sure your product is turned on and connected to your network. Verify the connection using your product control panel.
- Check if your network name (SSID) contains non-ASCII characters. Your product cannot display non-ASCII characters.
- Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.
- Make sure your product is not connected to a guest network.
- If necessary, reinstall your product software and try running EpsonNet Setup again:
 - 1. Reset your product's network settings to their factory defaults.
 - 2. Windows only: Uninstall your product software.
 - 3. Restart your router following the instructions in your router documentation.

Note: If you are reading these instructions online, you will lose your Internet connection when you restart your router, so note the next step before restarting it.

- 4. Download your product software from the Epson website, or contact your system administrator.
- If you have replaced your router, reinstall your product software to connect to the new router.
- If you have replaced your router, reinstall your product software to connect to the new router.

Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- Check to see if your wireless router or access point has an enabled Privacy Separator function that is
 preventing detection of your device over the network. See your router or access point documentation
 for instructions on disabling the Privacy Separator function.
- Try accessing any website from your computer to make sure that your computer's network settings are
 correct. If you cannot access any website, there is a problem on the computer. Check the network
 connection of the computer. See the documentation provided with the computer for details.

Parent topic: Solving Network Problems

Product Does Not Appear in Mac Printer Window

If your product does not appear in the Mac printer window, try these solutions:

- Turn your product off, wait 30 seconds, then turn it back on again.
- If you are connecting the product wirelessly via EpsonNet Setup and a WiFi symbol is not displayed on the product's LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.
- Make sure you installed your product software correctly for your network. See the *Start Here* sheet for instructions.
- If your Mac includes both wired and wireless network services, make sure the network to which you
 connected your product is at the top of the Set Service Order list. Check your Mac documentation for
 instructions.
- If your Mac includes both wired and wireless network services, make sure the network to which you
 connected your product is at the top of the Set Service Order list. Check your Mac documentation for
 instructions.

Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

Uninstall Your Product Software

Wireless Network Connection is Unstable on a Mac

If you connected a device to a USB 3.0 port on your Mac, you may experience wireless network interference between your product and your Mac.

If you cannot connect to your product over the wireless network or the connection becomes unstable, move the device connected to your Mac USB 3.0 port further away from your Mac.

Parent topic: Solving Network Problems

Wired Network Connection Becomes Unstable

When you connect the product to a wired network using a router or access point that supports IEEE 802.3az (Energy Efficient Ethernet), the connection may become unstable, you may be unable to connect to the product, and the communication speed may become slow. If you experience any of these issues, follow the steps below to disable IEEE 802.3az and then connect your product again.

- 1. Disconnect the Ethernet cables connected to the computer and your product.
- 2. Disable IEEE 802.3az for the computer's network adapter if it is enabled (check your operating system's Ethernet connection settings).
- 3. Connect the computer and your product directly with an Ethernet cable.
- 4. Print a network connection report from your product.
- 5. On the computer, open a web browser and enter your product's IP address from the network connection report.
- 6. Select **Network Settings > Wired LAN**.
- 7. Select **OFF** for IEEE 802.3az. and click **Next**.
- 8. Click **OK** and remove the Ethernet cable connecting the computer and your product.
- 9. If you disabled IEEE 802.3az for your computer's network adapter, enable it.
- 10. Reconnect the Ethernet cables from the router or access point to your computer and product. If problems still occur, other devices on the network may be causing them.

Parent topic: Solving Network Problems

USB Connection Problems

If you used a USB cable to connect to a computer that has multiple peripherals, make sure the computer is grounded. Otherwise, you may feel a slight electric shock when touching your product.

If the printer is not recognized while using a USB cable, make sure the cable is connected securely at both ends, and that you are not using a USB hub. You may also need to try a different USB cable. Your printer does not support USB 3.0 cables.

Updating a Self-signed Certificate

Cannot Import a Digital Certificate

If you cannot import a digital certificate, try these solutions:

- Make sure the CA-signed certificate and the CSR have the same information. If they do not match, import the certificate to a device that matches the information or use the CSR to obtain the CA-signed certificate again.
- Make sure the CA-signed certificate file size is 5KB or less.
- Make sure you are entering the correct password.

Parent topic: Solving Network Security Problems

Related tasks

Obtaining and Importing a CA-signed Certificate

Deleted a CA-signed Certificate

If you accidentally deleted a CA-signed certificate, try these solutions:

- If you retained a backup file, import the CA-signed certificate again.
- If you obtained the certificate using a CSR created in Web Config, you cannot import a deleted certificate. Create a new CSR and obtain a new certificate.

Parent topic: Solving Network Security Problems

Related tasks

Obtaining and Importing a CA-signed Certificate

Digital Certificate Warning Messages

If you see a warning message when using a digital certificate, check for solutions in this table.

Message	Solution
Enter a Server Certificate.	Select a certificate file and click Import .
CA Certificate 1 is not entered.	Import CA certificate 1 before importing additional certificates.

Message	Solution
Invalid value below.	Remove any unsupported characters in the file path and password.
Invalid date and time.	Set the date and time on the product using Web Config, EpsonNet Config, or the product control panel.
Invalid password	Enter the password that matches the password set for the CA certificate.
Invalid file	Try the following:
	 Import only certificate files in X509 format sent by a trusted certificate authority.
	 Make sure the file size is 5KB or less and is not corrupted or fabricated.
	Make sure the chain in the certificate is valid; check the certificate authority's website.
Cannot use the Server Certificates that include more than three CA certificates.	Import certificate files in PKCS#12 format that contains one or two CA certificates, or convert each certificate to PRM format and import them again.
The certificate has expired. Check if the certificate is valid, or check the date and time on your printer.	Make sure the product time and date are set correctly and, if the certificate is out of date, obtain and import a new certificate.
Private key is required.	Do one of the following to pair a private key with the certificate:
	For PEM/DER format certificates obtained from a CSR using a computer, specify the private key file.
	For PKCS#12 format certificates obtained from a CSR using a computer, create a file containing the private key.
	If you re-imported a PEM/DER format certificate obtained from a CSR using Web Config, you can only import it once. You must obtain and import a new certificate.

Message	Solution
·	Make sure the computer and product are connected, and the certificate file is not corrupted, then import the certificate file again.

Solving Paper Problems

Check these sections if you have problems using paper with your product.

Paper Feeding Problems
Paper Jam Problems
Paper Ejection Problems

Parent topic: Solving Problems

Paper Feeding Problems

If you have problems feeding paper, try these solutions:

- If paper does not feed for printing, remove it from the paper tray or cassette. Reload it, then adjust the
 edge guides. Make sure the paper stack is not above the tab on the edge guides inside the cassette or
 paper tray.
- Be sure to insert the paper cassette all the way into your product.
- If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.
- · Do not load more than the recommended number of sheets.
- Make sure your paper meets the specifications for your product.
- If paper jams when you print on both sides of the paper, try loading fewer sheets.
- Make sure the paper size and paper type settings are correct for the paper source.
- For best results, follow these guidelines:
 - Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.
 - · Load paper in the cassette printable side down.
 - Follow any special loading instructions that came with the paper.

Selecting the Paper Settings for Each Source - Control Panel

Paper Jam Problems

If a paper jam occurs in the product, a message appears on the LCD screen. Follow the on-screen instructions to locate the paper jam and remove the paper.

If any torn pieces of paper remain inside the product, use the arrow buttons to select **Maintenance** > **Remove Paper** > **Start** after clearing the paper jam error.

Caution: Never touch the buttons on the control panel while your hand is inside the product. If the product starts operating, it could cause an injury. Be careful not to touch the protruding parts to avoid injury. Remove the jammed paper carefully or you may damage the product.

Parent topic: Solving Paper Problems

Paper Ejection Problems

If you have problems with paper ejecting properly, try these solutions:

- If paper does not eject fully, you may have set the wrong paper size. Cancel printing to eject the paper. Select the correct paper size when you reprint.
- If paper falls from the output tray, extend the paper stopper.
- If paper is wrinkled when it ejects, it may be damp or too thin. Load new paper and be sure to select the correct paper type setting when you reprint.
- If you are using letterhead paper, select the appropriate paper type setting.
- Clean the roller inside the printer to remove any dust on the paper path.

Solving Problems Printing from a Computer

Check these sections if you have problems while printing from your computer.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

Nothing Prints
Product Icon Does Not Appear in Windows Taskbar
Error After Cartridge Replacement
Printing is Slow

Parent topic: Solving Problems

Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

- Make sure your product is turned on and connected to your computer.
- Make sure any interface cables are connected securely at both ends.
- Make sure the interface specifications match the specifications for the printer and the computer.
- · Make sure there are no errors or paper jams in the product.
- If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.
- Make sure the printer status is not offline or pending.
- Make sure you are using the Epson printer driver for your product or the available functions are limited.
- Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.
- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. Print the image at a lower resolution or if necessary, increase your system's memory.
- In Windows, make sure your product is selected as the default printer and the printer port setting matches the printer connection port.

- In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.
- In Windows, do one of the following to open the Epson Printer Connection Checker and follow the onscreen instructions to check the connection status:
 - Windows 11: Click , then search for Epson Printer Connection Checker and select it.
 - Windows 10: Click and select Epson Software > Epson Printer Connection Checker.
 - Windows 8.x: Navigate to the Apps screen and select the Epson Printer Connection Checker icon.
 - Windows 7: Click and select All Programs > Epson Software > Epson Printer Connection Checker.
- On a Mac, make sure the printer is added to the printer list and the printer is not paused.
- Make sure your product is selected as the printer in your printing program.
- You can try to clear the problem by updating the product software to the latest version. If the problem persists, try uninstalling and reinstalling the printer driver.

Running a Product Check Using AirPrint

Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

- 1. Do one of the following:
 - Windows 11: Click , search for Settings and select it. Select Bluetooth & devices > Printers & scanners. Select your product name and select Printing preferences.
 - Windows 10: Click and select (Settings) > Devices > Printers & scanners. Select your product name and select Manage > Printing preferences.

- Windows 8.x: Navigate to the Apps screen and select Control Panel > Hardware and Sound > Devices and Printers. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
- Windows 7: Click and select Devices and Printers. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
- Windows Vista: Click , select Control Panel, and click Printer under Hardware and Sound. Right-click your product name, select Printing Preferences, and select your product name again if necessary.
- 2. Click the **Maintenance** tab.
- 3. Click the **Extended Settings** button.
- 4. Select Enable EPSON Status Monitor 3 and click OK.
- 5. Click the **Monitoring Preferences** button.
- 6. Click the checkbox for the option that adds the shortcut icon to the taskbar.
- 7. Click **OK** to close the open program windows.

Parent topic: Solving Problems Printing from a Computer

Error After Cartridge Replacement

If you see an error light or error message after you replace an ink cartridge, follow these steps:

1. Make sure the print head is in the ink cartridge replacement position. (The ink cartridge holder should be beneath the cutout in the product case.)

Note: If the print head is not in the ink cartridge replacement position, follow the instructions on replacing an ink cartridge in this manual to move it.

- 2. Remove and reinsert the replaced ink cartridge, making sure to push it all the way into its slot.
- 3. Complete the ink cartridge installation steps.

Parent topic: Solving Problems Printing from a Computer

Related tasks

Removing and Installing Ink Cartridges

Printing is Slow

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.
- If you are using Windows 7, close the **Devices and Printers** window before you print.
- On a Mac, make sure you download and install the Epson printer driver.
- Make sure Quiet Mode is turned off.
- Clear space on your hard drive or run a defragmentation utility to free up existing space.
- Close any programs you are not using when you print.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.
- If you are printing over a wireless network, factors such as interference, network traffic, or weak signal strength may affect your printing speed.

For the fastest printing, select the following settings in your product software:

- Make sure the paper type setting matches the type of paper you loaded.
- Turn on any high speed settings in your product software.
- Select a lower print quality setting.
- Windows: Click the Maintenance or Utility tab, select Extended Settings or Speed and Progress, and select the following settings:
 - Always Spool RAW Datatype
 - Page Rendering Mode
 - · Print as Bitmap
- Windows: Select Printing preferences, click the More Options tab, and make sure the Bidirectional printing setting is enabled.
- Mac: Select System Preferences, select Printers & Scanners, and select your product. Select Options & Supplies, select Options (or Driver), and enable the Bidirectional printing setting.

If printing is still slow and you are using Windows 7 or Windows Vista, try the following:

1. Click and select Computer or My Computer. Double-click the C: drive and open these folders: ProgramData > EPSON > PRINTER.

Note: If you do not see the ProgramData folder, open the **Organize** menu and select **Folder and search options**. In the window that appears, click the **View** tab, select **Show hidden files, folders, and drives** in the Advanced settings list, and click **OK**.

- 2. Right-click the **EPAUDF01.AUD** file and select **Delete**.
- 3. Restart your computer and try printing again.

Blank Pages Print

If blank pages print unexpectedly, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.
- If a blank page exists in a document you are printing and you want to skip printing it, select the **Skip Blank Page** setting in your printer software, if available.
- Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.
- Make sure your product is selected as the printer in your printing program.
- Make sure your product is on a flat surface and operating in the recommended environmental conditions or multiple sheets of paper may be fed at the same time.

Incorrect Margins on Printout

If your printed page has incorrect margins, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.
- Make sure you selected the correct margins for your paper size in your printing program.
- Make sure your paper is positioned correctly for feeding into the product.
- Load paper in the correct direction and slide the edge guides against the edges of the paper.

You can use the preview option in your printer software to check your margins before you print.

Border Appears on Borderless Prints

If you see a border on borderless prints, try these solutions:

- Make sure you are printing on a compatible borderless paper type and size.
- Windows: Make sure you selected the Borderless setting in your printer software.
- Mac: Make sure you selected the Borderless checkbox or a paper size with a Borderless option in your printer software.
- Adjust the Expansion setting to adjust the amount of image expansion on the edges of borderless prints.

- Make sure the image size and the paper size are set correctly; if the image is small, the enlargement may not be enough to cover the paper.
- Access the Extended Settings (Windows) or Printing Preferences (Mac) and select Remove White Borders.
- Make sure you have stored the paper correctly. Paper can expand or contract if it is not stored properly. See the instructions that came with your paper for storage instructions.

Incorrect Characters Print

If incorrect characters appear in your prints, try these solutions before reprinting:

- Make sure any cables are securely connected at both ends.
- In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.
- · On a Mac, cancel any paused print jobs.
- If your product is connected to a USB hub, connect it directly to your computer instead.
- If your computer entered sleep mode the last time you printed, the next print job after your computer exits sleep mode may contain garbled characters. Print your document again.
- Make sure you are using the printer software for this product. Check the product name at the top of the driver window.

Parent topic: Solving Page Layout and Content Problems

Incorrect Image Size or Position

If your printed image is the wrong size or in the wrong position, try these solutions:

- Make sure you selected the correct paper size and layout settings in your printing program and printer software.
- Make sure you selected the correct paper size on the control panel.
- Make sure your paper is positioned correctly for feeding into the printer.

- Slide the edge guides against the edges of the paper.
- If the image is slightly enlarged and cropped during borderless printing, change the **Expansion** setting.

You can use the preview option in your printer software to check your margins before you print.

Slanted Printout

If your printouts are slanted, try these solutions:

- Make sure your paper meets the specifications for your product.
- Do not load more than the recommended number of sheets.
- Slide the edge guides against the edges of the paper.
- Make sure the paper type setting matches the type of paper you loaded.
- Select a higher print quality setting in your printer software.
- Turn off any high speed settings in your product software.
- · Align the print head.
- · Adjust the print quality.
- Make sure the product is not printing while tilted or at an angle.

Check these sections if your printouts have problems with print quality, but your image looks fine on your computer screen.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

White or Dark Lines in Printout
Blurry or Smeared Printout
Faint Printout or Printout Has Gaps
Grainy Printout
Incorrect Colors

Parent topic: Solving Problems

White or Dark Lines in Printout

If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Make sure the paper type setting matches the type of paper you loaded.
- · Make sure you loaded the printable side of the paper correctly for your product.
- Turn off any high speed settings in your product software.
- Align the print head. If print quality does not improve after aligning the print head, disable the bidirectional (high speed) setting.
- Adjust the print quality in the product software.
- When horizontal banding appears or the top or bottom of the paper is smeared, load paper in the correct direction and slide the edge guides to the edges of the paper.
- When vertical banding appears or the paper is smeared, clean the paper path.
- You may need to replace the ink cartridges.

Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:

- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- Slide the edge guides to the edges of the paper.
- Use a support sheet with special paper, or load special paper one sheet at a time.
- Make sure your paper meets the specifications for your product.
- Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.
- Do not load more than the recommended number of sheets. For plain paper, do not load above the line indicated by the triangle symbol on the edge guide.
- Make sure the paper type setting in your product software matches the type of paper you loaded.
- If you are printing on thick paper or envelopes, turn on the Thick Paper setting from the control panel
 or select Thick Paper and Envelopes in the Extended Settings of the printer software. (Turning this
 setting on will decrease print speed.)
- When manually printing 2-sided, make sure the ink is completely dry before loading the paper.
- Remove each sheet from the output tray as it is printed.
- Avoid handling printouts on glossy paper right after printing to allow the ink to set.
- · Do not stack printouts immediately after printing.
- If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Adjust the density and/or ink drying time settings.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- Align the print head using the Print Quality Adjustment setting.

- Adjust the print quality in the product software.
- Clean the paper path.

Note: Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

Faint Printout or Printout Has Gaps

If your printouts are faint or have gaps, try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- The ink cartridges may be old or low on ink, and you may need to replace them.
- Make sure the paper type setting matches the type of paper you loaded.
- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.
- · Align the print head.

Adjust the print quality in the product software.

• Clean the paper path.

Grainy Printout

If your printouts are grainy, try these solutions:

- Make sure you loaded the printable side of the paper correctly for your product.
- Select a higher print quality setting and turn off any high speed settings in your product software.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- · Align the print head using the **Print Quality Adjustment** setting.
- Adjust the print quality in the product software.
- You may need to increase the image resolution or print a smaller size; see your software documentation.

Note: Images from the Internet may be low resolution and not result in a high quality printout.

 If you enlarged the image size in an image-editing program, you need to increase the image resolution setting to retain a high image quality. Increase the image resolution by the same amount you increase the image size. For example, if the image resolution is 300 dpi (dots per inch) and you will double the image size for printing, change the resolution setting to 600 dpi. **Note:** Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.

Incorrect Colors

If your printouts have incorrect colors, try these solutions:

- Make sure the paper type setting matches the paper you loaded.
- Make sure the Black/Grayscale or Grayscale setting is not selected in your printer software.
- Select **EPSON Standard** as the **Color Mode** (Windows) or **Mode** (Mac) setting in the printer software.
- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.
- The ink cartridges may be old or low on ink, and you may need to replace them.
- After you print, the colors in your printout need time to set as the ink dries. During this time, the colors
 may look different than you expect. To speed up drying time, do not stack your printouts on top of each
 other.
- Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.
- Select Custom as the Color Correction setting on the More Options tab of the printer software, then
 click Advanced. Try changing the Scene Correction setting to something other than Automatic. If
 changing that setting does not work, change the Color Management setting to any color correction
 method other than PhotoEnhance.
- If you are using a Mac, select **ColorSync** from the **Color Matching** menu of the driver.

For best results, use genuine Epson paper.

Uninstall Your Product Software

If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Printing Software - Windows

Uninstalling Product Software - Mac

Parent topic: Solving Problems

Uninstalling Printing Software - Windows

You can uninstall and then re-install your printer software to solve certain problems.

- 1. Turn off the product.
- 2. Disconnect any interface cables.
- 3. Do one of the following:
 - Windows 11: Click , then search for Settings and select it. Select Apps or System > Apps & features. Then select the program you want to uninstall and select Uninstall.
 - Windows 10: Click and select (Settings) > Apps > Apps & features. Select the program you want to uninstall and select Uninstall.

Windows 8.x: Navigate to the Apps screen and select Control Panel > Programs > Programs and Features. Select the uninstall option for your Epson product, then select Uninstall/Change.

Note: If you see a User Account Control window, click Yes or Continue.

In the next window, select your product, if necessary, and click **OK**. Then follow any on-screen instructions.

• Windows (other versions): Click or Start, and select All Programs or Programs. Select Epson, select your product, then click EPSON Printer Software Uninstall.

Note: If you see a User Account Control window, click Yes or Continue.

In the next window, select your product, if necessary, and click **OK**. Then follow any on-screen instructions.

4. Restart your computer, then re-install your software.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

Parent topic: Uninstall Your Product Software

Uninstalling Product Software - Mac

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

- 1. To download the Uninstaller utility, visit epson.com/support (U.S.) or epson.ca/support (Canada) and select your product.
- Click Downloads.
- 3. Select your operating system, click **Utilities**, locate the Uninstaller utility, and click **Download**.
- 4. Run the file you downloaded.
- 5. Double-click the **Uninstaller** icon.
- 6. In the Epson Uninstaller screen, select the checkbox for each software program you want to uninstall.

- 7. Click Uninstall.
- 8. Follow the on-screen instructions to uninstall the software.
- 9. Reinstall your product software.

Note: If you uninstall the printer driver and your product name remains in the **Print & Fax**, **Print & Scan**, or **Printers & Scanners** window, select your product name and click the – (remove) icon to remove it.

Parent topic: Uninstall Your Product Software

Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

Internet Support

Visit Epson's support website at epson.com/support (U.S.) or epson.ca/support (Canada) and select your product for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative

Before you call Epson for support, please have the following information ready:

- Product name
- Product serial number (located on a label on the product)
- Proof of purchase (such as a store receipt) and date of purchase
- Computer configuration
- · Description of the problem

Then call:

- U.S.: (562) 276-7202, 7 AM to 4 PM, Pacific Time, Monday through Friday
- Canada: (905) 709-2567, 7 AM to 4 PM, Pacific Time, Monday through Friday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Ink Cartridge Specifications

Note: Your printer is designed to work only with genuine Epson-brand ink cartridges. Other brands of ink cartridges and ink supplies are not compatible and, even if described as compatible, may not function properly or at all. Epson periodically provides firmware updates to address issues of security, performance, minor bug fixes and ensure the printer functions as designed. These updates may affect the functionality of third-party ink. Non-Epson branded or altered Epson cartridges that functioned prior to a firmware update may not continue to function.

The included initial cartridges are designed for reliable printer setup and cannot be used as replacement cartridges or resold. After setup, the remaining ink is available for printing. Yields are based on ISO 24711 in default mode, printing continuously. Yields vary due to print images, settings, and temperatures. Printing infrequently or primarily with one color reduces yields. All cartridges must be

installed with ink for printing and printer maintenance. For print quality, some ink remains in replaced cartridges.

ColorCyan, Magenta, Yellow, BlackCartridge lifeOpened package: 6 months

Unopened package: do not use if the date on the package has

expired

Temperature Storage: –22 to 104 °F (–30 to 40 °C)

1 month at 104 °F (40 °C) Ink freezes at 3.2 °F (–16 °C)

Ink thaws and is usable after 3 hours at 77 °F (25 °C)

Note: For best printing results, use up a cartridge within 6 months of opening the package.

Safety and Approvals Specifications

United States Safety: UL62368-1

EMC: FCC part 15 Subpart B Class B

Canada Safety: CAN/CSA C22.2 No. 62368-1

EMC: CAN ICES-3 (B)/NMB-3 (B)

This equipment contains the following wireless module:

• Manufacturer: Seiko Epson Corporation

Type: J26H005

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated so that the radiator is kept at least 7.9 inches (20 cm) or more away from a person's body (excluding extremities: hands, wrists, feet and ankles).

Important Safety Instructions

Before using your Epson product, read and follow these safety instructions.

General Printer Safety Instructions
Wireless Connection Safety Instructions
LCD Screen Safety Instructions

Parent topic: Notices

General Printer Safety Instructions

- Be sure to follow all warnings and instructions marked on the printer.
- Use only the type of power source indicated on the printer's label.
- Use only the AC adapter that comes with the printer and do not use it with other equipment. Use of other cords with this product or use of the AC adapter with other products may cause fires or shock.
- Make sure the AC power cord meets the relevant local safety standard.
- · Place the printer near a wall outlet where the plug can be easily unplugged.
- Avoid plugging the printer into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.
- Do not let the power cord become damaged or frayed.

- If you use an extension cord with the printer, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.
- Always turn off the printer using the power button, and wait until the power light stops flashing before
 unplugging the printer or cutting off power to the electrical outlet.
- Place the printer on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.
- Keep your product at least 8.7 inches (22 cm) away from cardiac pacemakers to prevent your product's radio waves from affecting the operation of the pacemaker.
- Leave enough space above the printer to fully raise the printer cover.
- Leave enough space in front of the printer for the paper to be fully ejected.
- · Avoid locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.
- Do not place the printer near a radiator or heating vent or in direct sunlight.
- Leave enough room around the printer for sufficient ventilation. Do not block or cover openings in the case or insert objects through the slots.
- Keep the printer away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.
- Do not place or store the printer and the AC adapter outdoors, near excessive dirt or dust, water, heat sources, or in locations subject to shocks, vibrations, high temperature or humidity.
- When connecting the printer to a computer or other device with a cable, ensure the correct orientation
 of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong
 orientation may damage both devices connected by the cable.
- Do not touch the flat white cable inside the printer.
- Do not move the print head by hand; this may damage the printer.
- Do not spill liquid on the printer and do not handle the printer with wet hands.
- Do not use aerosol products that contain flammable gases inside or around the printer. Doing so may cause fire.
- Except as specifically explained in your documentation, do not attempt to service the printer yourself.
- Unplug the printer and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the case damaged; if the product does not operate normally or exhibits a distinct change in performance. Adjust only those controls that are covered by the operating instructions.

- If damage occurs to the plug, replace the cord set or consult a qualified electrician. If there are fuses in the plug, make sure you replace them with fuses of the correct size and rating.
- Never disassemble, modify, or attempt to repair the power cord, plug, printer, or options by yourself, except as specifically explained in the printer's manuals.
- Unplug the power cord from the electrical outlet if you are not going to use the printer for an extended period.
- Before transporting the printer, make sure that the print head is in the home (far right) position.
- When storing or transporting the printer, do not tilt it, stand it on its side, or turn it upside down; otherwise, ink may leak.

Parent topic: Important Safety Instructions

Wireless Connection Safety Instructions

Radio waves from this product may adversely affect the operation of medical equipment or automatically controlled devices, such as pacemakers, automatic doors or fire alarms. When using this product near such devices or inside a medical facility, follow the directions from authorized staff members at the facility, and follow all posted warnings and directions on the device to avoid causing an accident.

Do not connect this product to the internet directly. Connect it to a network protected by a router or firewall.

Parent topic: Important Safety Instructions

LCD Screen Safety Instructions

- Use only a dry, soft cloth to clean the LCD screen. Do not use liquid or chemical cleansers.
- If the LCD screen is damaged, contact Epson. If the liquid crystal solution gets on your hands, wash
 them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them
 immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor
 immediately.
- Do not press too hard on the LCD screen or subject it to heavy impacts.
- If the LCD screen chips or cracks, do not touch or attempt to remove the broken pieces; contact Epson for support.
- The LCD screen may contain a few small bright or dark spots, and may display uneven brightness. These are normal and do not indicate that the screen is damaged in any way.

FCC Compliance Statement

For United States Users

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- · Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- · Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do

not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

For Canadian Users

Binding Arbitration and Class Waiver

1. DISPUTES, BINDING INDIVIDUAL ARBITRATION, AND WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS

- 1.1 **Disputes**. The terms of this Section 1 shall apply to all Disputes between you and Epson. The term "Dispute" is meant to have the broadest meaning permissible under law and includes any dispute, claim, controversy or action between you and Epson arising out of or relating to this Agreement, Epson branded products (hardware and including any related software), or other transaction involving you and Epson, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation, ordinance, or any other legal or equitable basis. "DISPUTE" DOES NOT INCLUDE IP CLAIMS, or more specifically, a claim or cause of action for (a) trademark infringement or dilution, (b) patent infringement, (c) copyright infringement or misuse, or (d) trade secret misappropriation (an "IP Claim"). You and Epson also agree, notwithstanding Section 1.6, that a court, not an arbitrator, may decide if a claim or cause of action is for an IP Claim.
- 1.2 Binding Arbitration. You and Epson agree that all Disputes shall be resolved by binding arbitration according to this Agreement. ARBITRATION MEANS THAT YOU WAIVE YOUR RIGHT TO A JUDGE OR JURY IN A COURT PROCEEDING AND YOUR GROUNDS FOR APPEAL ARE LIMITED. Pursuant to this Agreement, binding arbitration shall be administered by JAMS, a nationally recognized arbitration authority, pursuant to its code of procedures then in effect for consumer related disputes, but excluding any rules that permit joinder or class actions in arbitration (for more detail on procedure, see Section 1.6 below). You and Epson understand and agree that (a) the Federal Arbitration Act (9 U.S.C. §1, et seq.) governs the interpretation and enforcement of this Section 1, (b) this Agreement memorializes a transaction in interstate commerce, and (c) this Section 1 shall survive termination of this Agreement.
- 1.3 **Pre-Arbitration Steps and Notice**. Before submitting a claim for arbitration, you and Epson agree to try, for sixty (60) days, to resolve any Dispute informally. If Epson and you do not reach an agreement to resolve the Dispute within the sixty (60) days), you or Epson may commence an arbitration. Notice to Epson must be addressed to: Epson America, Inc., ATTN: Legal Department, 3131 Katella Ave., Los Alamitos, CA 90720 (the "Epson Address"). The Dispute Notice to you will be sent to the most recent address Epson has in its records for you. For this reason, it is important to notify us if your address changes by emailing us at EAILegal@ea.epson.com or writing us at the Epson Address above. Notice of

the Dispute shall include the sender's name, address and contact information, the facts giving rise to the Dispute, and the relief requested (the "Dispute Notice"). Following receipt of the Dispute Notice, Epson and you agree to act in good faith to resolve the Dispute before commencing arbitration.

- 1.4 **Small Claims Court**. Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.
- 1.5 WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS. YOU AND EPSON AGREE THAT EACH PARTY MAY BRING DISPUTES AGAINST THE OTHER PARTY ONLY IN AN INDIVIDUAL CAPACITY, AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY CLASS OR REPRESENTATIVE PROCEEDING, INCLUDING WITHOUT LIMITATION FEDERAL OR STATE CLASS ACTIONS, OR CLASS ARBITRATIONS. CLASS ACTION LAWSUITS, CLASS-WIDE ARBITRATIONS, PRIVATE ATTORNEY-GENERAL ACTIONS, AND ANY OTHER PROCEEDING WHERE SOMEONE ACTS IN A REPRESENTATIVE CAPACITY ARE NOT ALLOWED. ACCORDINGLY, UNDER THE ARBITRATION PROCEDURES OUTLINED IN THIS SECTION, AN ARBITRATOR SHALL NOT COMBINE OR CONSOLIDATE MORE THAN ONE PARTY'S CLAIMS WITHOUT THE WRITTEN CONSENT OF ALL AFFECTED PARTIES TO AN ARBITRATION PROCEEDING.
- 1.6 **Arbitration Procedure**. If you or Epson commences arbitration, the arbitration shall be governed by the rules of JAMS that are in effect when the arbitration is filed, excluding any rules that permit arbitration on a class or representative basis (the "JAMS Rules"), available at http://www.jamsadr.com or by calling 1-800-352-5267, and under the rules set forth in this Agreement. All Disputes shall be resolved by a single neutral arbitrator, and both parties shall have a reasonable opportunity to participate in the selection of the arbitrator. The arbitrator is bound by the terms of this Agreement. The arbitrator, and not any federal, state or local court or agency, shall have exclusive authority to resolve all disputes arising out of or relating to the interpretation, applicability, enforceability or formation of this Agreement, including any claim that all or any part of this Agreement is void or voidable. Notwithstanding this broad delegation of authority to the arbitrator, a court may determine the limited question of whether a claim or cause of action is for an IP Claim, which is excluded from the definition of "Disputes" in Section 1.1 above. The arbitrator shall be empowered to grant whatever relief would be available in a court under law or in equity. The arbitrator may award you the same damages as a court could, and may award declaratory or injunctive relief only in favor of the individual party seeking relief and only to the extent necessary to provide relief warranted by that party's individual claim. In some instances, the costs of arbitration can exceed the costs of litigation and the right to discovery may be more limited in arbitration than in court. The arbitrator's award is binding and may be entered as a judgment in any court of competent jurisdiction.

You may choose to engage in arbitration hearings by telephone. Arbitration hearings not conducted by telephone shall take place in a location reasonably accessible from your primary residence, or in Orange County, California, at your option.

- a) Initiation of Arbitration Proceeding. If either you or Epson decides to arbitrate a Dispute, both parties agree to the following procedure:
- (i) Write a Demand for Arbitration. The demand must include a description of the Dispute and the amount of damages sought to be recovered. You can find a copy of a Demand for Arbitration at http://www.jamsadr.com ("Demand for Arbitration").
- (ii) Send three copies of the Demand for Arbitration, plus the appropriate filing fee, to: JAMS, 500 North State College Blvd., Suite 600 Orange, CA 92868, U.S.A.
- (iii) Send one copy of the Demand for Arbitration to the other party (same address as the Dispute Notice), or as otherwise agreed by the parties.
- b) Hearing Format. During the arbitration, the amount of any settlement offer made shall not be disclosed to the arbitrator until after the arbitrator determines the amount, if any, to which you or Epson is entitled. The discovery or exchange of non-privileged information relevant to the Dispute may be allowed during the arbitration.
- c) Arbitration Fees. Epson shall pay, or (if applicable) reimburse you for, all JAMS filings and arbitrator fees for any arbitration commenced (by you or Epson) pursuant to provisions of this Agreement.
- d) Award in Your Favor. For Disputes in which you or Epson seeks \$75,000 or less in damages exclusive of attorney's fees and costs, if the arbitrator's decision results in an award to you in an amount greater than Epson's last written offer, if any, to settle the Dispute, Epson will: (i) pay you \$1,000 or the amount of the award, whichever is greater; (ii) pay you twice the amount of your reasonable attorney's fees, if any; and (iii) reimburse you for any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing the Dispute in arbitration. Except as agreed upon by you and Epson in writing, the arbitrator shall determine the amount of fees, costs, and expenses to be paid by Epson pursuant to this Section 1.6d).
- e) Attorney's Fees. Epson will not seek its attorney's fees and expenses for any arbitration commenced involving a Dispute under this Agreement. Your right to attorney's fees and expenses under Section 1.6d) above does not limit your rights to attorney's fees and expenses under applicable law; notwithstanding the foregoing, the arbitrator may not award duplicative awards of attorney's fees and expenses.
- 1.7 Opt-out. You may elect to opt-out (exclude yourself) from the final, binding, individual arbitration procedure and waiver of class and representative proceedings specified in this Agreement by sending a written letter to the Epson Address within thirty (30) days of your assent to this Agreement (including without limitation the purchase, download, installation of the Software or other applicable use of Epson Hardware, products and services) that specifies (i) your name, (ii) your mailing address, and (iii) your request to be excluded from the final, binding individual arbitration procedure and waiver of class and representative proceedings specified in this Section 1. In the event that you opt-out consistent with the procedure set forth above, all other terms shall continue to apply, including the requirement to provide notice prior to litigation.

- 1.8 **Amendments to Section 1**. Notwithstanding any provision in this Agreement to the contrary, you and Epson agree that if Epson makes any future amendments to the dispute resolution procedure and class action waiver provisions (other than a change to Epson's address) in this Agreement, Epson will obtain your affirmative assent to the applicable amendment. If you do not affirmatively assent to the applicable amendment, you are agreeing that you will arbitrate any Dispute between the parties in accordance with the language of this Section 1 (or resolve disputes as provided for in Section 1.7, if you timely elected to opt-out when you first assented to this Agreement).
- 1.9 Severability. If any provision in this Section 1 is found to be unenforceable, that provision shall be severed with the remainder of this Agreement remaining in full force and effect. The foregoing shall not apply to the prohibition against class or representative actions as provided in Section 1.5. This means that if Section 1.5 is found to be unenforceable, the entire Section 1 (but only Section 1) shall be null and void.
