Potential shock hazard

Review this important safety information.

- Read and understand these safety statements to avoid an electrical shock hazard.
- Always follow basic safety precautions when using this product to reduce risk of injury from fire or electric shock.
- Read and understand all instructions in the user guide.
- Observe all warnings and instructions marked on the product.
- Use only a grounded electrical outlet when connecting the product to a power source. If you do not know whether the outlet is grounded, check with a qualified electrician.
- Do not touch the contacts on any of the sockets on the product. Replace damaged cords immediately.
- Unplug this product from wall outlets before cleaning.
- Do not install or use this product near water or when you are wet.
- Install the product securely on a stable surface.
- Install the product in a protected location where no one can step on or trip over the power cord.
- Do not place anything on top of the machine (water, small metal or heavy objects, candles, lit cigarettes, etc.).

This could result in electric shock or fire.

Supported operating systems

Learn about supported operating systems.

The following information applies to the Printer-Specific Windows PCL 6 and HP print drivers for macOS and to the software installer.

Windows: The HP Software Installer can be downloaded from the printer support website for this printer which installs the correct print driver, depending on the Windows operating system, along with optional software when using the software installer. The print driver only package is also made available in the printer support website. Download the applicable package from the printer-support website for this printer: support.hp.com.

macOS: Mac computers are supported with this printer. Download HP Easy Start either from 123.hp.com or from the Printer Support page, and then use HP Easy Start to install the HP print driver. HP Easy Start is not included in the HP Software Installer.

1. Go to 123.hp.com.
2. Follow the steps provided to download the printer software.

Linux: For information and print drivers for Linux, go to www.hp.com/go/linuxprinting.

Table 1-11 Supported operating systems and print drivers

Operating system	Print driver installed (from the software on the web)
Windows 10, 32-bit and 64-bit	The "HP PCL-6" printer-specific print driver is installed for this operating system as part of the software installation.
Windows 11, 32-bit and 64-bit	The "HP PCL-6" printer-specific print driver is installed for this operating system as part of the software installation.
Windows Server 2003 SP2, 32-bit	<p>The "HP PCL.6" printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.</p> <p>Microsoft retired mainstream support for Windows Server 2003 in July 2010. HP will continue to provide best effort support for the discontinued Server 2003 operating system. Some features and page sizes in the print driver are not supported.</p>
Windows Server 2008 R2, 64-bit	The "HP PCL 6" printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.
Windows Server 2012, 64-bit	The PCL 6 printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.
Windows Server 2012 R2, 64-bit	The PCL 6 printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.
Windows Server 2016, 64-bit	The PCL 6 printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.
Windows Server 2019, 64-bit	The PCL 6 printer-specific print driver is available for download from the printer-support website. Download the driver, and then use the Microsoft Add Printer tool to install it.

Power consumption, electrical specifications, and acoustic emissions

In order to operate properly, the printer must be in an environment that meets certain power specifications.

See [Support for HP Color LaserJet Enterprise MFP 6800](#) or [Support for HP Color LaserJet Enterprise MFP 6801](#) for current information.

⚠ CAUTION: Power requirements are based on the country/region where the printer is sold. Do not convert operating voltages. This will damage the printer and void the printer warranty.

Operating-environment range

In order to operate properly, the printer must be in an environment that meets certain specifications.

Table 1-16 Operating-environment specifications

Environment	Recommended	Storage
Temperature	15° to 27°C (59° to 80.6°F)	10° to 32.5°C (50° to 90.5°F)
Relative humidity	30% to 70% relative humidity (RH)	10% to 80% relative humidity (RH)

Printer hardware setup and software installation

For basic setup instructions, see the Hardware Installation Guide that came with the printer. For additional instructions, go to HP support on the web.

Go to [Support for HP Color LaserJet Enterprise MFP 6800](#) or [Support for HP Color LaserJet Enterprise MFP 6801](#) for HP's all-inclusive help for the printer, which includes the following information:

Use caution when loading the paper trays.

 **CAUTION:** Do not extend more than one paper tray at a time.

Do not use paper tray as a step.

All trays must be closed while relocating/moving product.

Keep hands out of paper trays or drawers when closing.

If the printer has a keyboard, close keyboard tray when not in use.

Load paper to Tray 1 (multipurpose tray)

The following information describes how to load paper in Tray 1.

 **CAUTION:** To avoid jams, never add or remove paper from Tray 1 during printing.

Load Tray 1 (multipurpose tray)

This tray holds up to 100 sheets of 75 grams per square meter (20 lb) paper, or 10 envelopes.

 **NOTE:** Select the correct paper type in the print driver before printing.

1. Open Tray 1.

2. Pull out the tray extension to support the paper, if necessary.
3. Use the adjustment latch to spread the paper guides outward.

4. Load paper in the tray.

Make sure that the paper fits under the fill line on the paper guides.

NOTE: The maximum stack height is 10 mm (0.4 in), or approximately 100 sheets of 75 grams per square meter (20 lb) paper.

- Using the adjustment latch, adjust the side guides so that they lightly touch the paper stack, but do not bend it.

Tray 1 (multipurpose tray) paper orientation

Position paper correctly in Tray 1 (multipurpose tray) to ensure the best print quality.

Load paper to Tray 2

Review the following information about loading paper to Tray 2.

Load Tray 2 or the optional 550-sheet trays

These trays hold up to 550 sheets of 75 grams per square meter (20 lb) paper.

 **NOTE:** The procedure to load paper to Tray 2 or the optional 550-sheet trays is the same. Only Tray 2 is shown here.

1. Open the tray.

 **NOTE:** Do not open any tray while it is in use.

2. Before loading paper, adjust the paper-width guides by holding down the blue lock/unlock toggle switch on the rear paper-width guide, pinching the blue adjustment latch on the front paper-width guide, and then sliding the guides to the fully open position.

3. Adjust the paper-length guide by pushing in at the bottom of the blue adjustment latch while sliding the guide to the size of the paper being used.

4. Load paper into the tray.

5. Adjust the paper-length and paper-width guides to the size of the paper being used. Check the paper to verify the guides lightly touch the stack, but do not bend it.

 **NOTE:** Do not adjust the paper guides tightly against the paper stack. Adjust them to the indentations or markings in the tray.

 **NOTE:** To prevent jams, adjust the paper guides to the correct size and do not overfill the tray. Be sure that the top of the stack is below the tray full indicator.

6. Close the tray.

7. The tray configuration message displays on the printer control panel.
8. Select **OK** to accept the detected type and size, or select **Modify** to choose a different paper size or type.

For custom-size paper, specify the X and Y dimensions for the paper when the prompt displays on the printer control panel.

Use alternative letterhead mode

Use the [Alternative Letterhead Mode](#) feature to load letterhead or preprinted paper into the tray the same way for all jobs, whether printing to one side of the sheet of paper or to both sides. When using this mode, load paper as for automatic duplex printing.

Enable Alternative Letterhead Mode by using the printer control-panel menus

Use the [Settings](#) menu to enable [Alternative Letterhead Mode](#).

1. From the Home screen on the printer control panel, open the [Settings](#) menu.
2. Open the following menus:
 - a. [Copy/Print or Print](#)
 - b. [Manage Trays](#)
 - c. [Alternative Letterhead Mode](#)
3. Select **On**.

Load and print envelopes

To print on envelopes, use only Tray 1 (multipurpose tray). Tray 2 and the optional 550-sheet trays do not support envelopes. Tray 1 (multipurpose tray) holds up to 10 envelopes.

Print envelopes

To print envelopes using the manual feed option, follow these steps to select the correct settings in the print driver, and then load the envelopes into the tray after sending the print job to the printer.

1. From the software program, select the **Print** option.

2. Select the printer from the list of printers, and then click the **Properties** or **Preferences** button to open the print driver.

NOTE: The name of the button varies for different software programs.

3. Click the **Paper/Quality** tab.
4. In the **Paper size** drop-down list, select the correct size for the envelopes.
5. In the **Paper type** drop-down list, select **Envelope**.
6. In the **Paper source** drop-down list, select **Manual feed**.
7. Click the **OK** button to close the **Document Properties** dialog box.
8. In the **Print** dialog box, click the **OK** button to print the job.

Envelope orientation

Envelopes need to be loaded in a specific manner in order to print correctly.

Tray 1	Envelope B5, Envelope C5 (pocket)	Face-down Bottom edge leading into the printer; top flap open 

Load and print labels

To print on sheets of labels, use only Tray 1 (multipurpose tray). Tray 2, Tray 3 and the optional 550-sheet trays do not support labels.

Manually feed labels

Use the manual feed mode for Tray 1 (multipurpose tray) to print sheets of labels.

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers, and then click the **Properties** or **Preferences** button to open the print driver.

NOTE: The name of the button varies for different software programs.

3. Click the **Paper/Quality** tab.
4. In the **Paper size** drop-down list, select the correct size for the sheets of labels.
5. In the **Paper type** drop-down list, select **Labels**.
6. In the **Paper source** drop-down list, select **Manual feed**.
7. Click the **OK** button to close the **Document Properties** dialog box.
8. In the **Print** dialog box, click the **Print** button to print the job.

Customer self-repair parts

Customer self-repair (CSR) parts are available for many HP LaserJet printers to reduce repair time.

NOTE: More information about the CSR program and benefits can be found at www.hp.com/go/csr-support and www.hp.com/go/csr-faq.

Genuine HP replacement parts can be ordered at www.hp.com/buy/parts or by contacting an HP-authorized service or support provider. When ordering, one of the following will be needed: part number, serial number (found on back of printer), product number, or printer name.

- Parts listed as **Mandatory** self-replacement are to be installed by the customer unless the customer is willing to pay HP service personnel to perform the repair. For these parts, on-site or return-to-depot support is not provided under the HP printer warranty.
- Parts listed as **Optional** self-replacement can be installed by HP service personnel at your request for no additional charge during the printer warranty period.

Configure the HP toner-cartridge-protection supply settings

A network administrator can configure the toner-cartridge-protection settings using the printer control panel or the HP Embedded Web Server (EWS).

Introduction

Use HP Cartridge Policy and Cartridge Protection to control which cartridges are installed in the printer and protect the cartridges that are installed from theft.

In HP Web Jetadmin, the settings are located under the **Device Management** pane in the following menu chain: **Config > Supplies > Cartridge Policy** or **Cartridge Protection**.

- **Cartridge Policy:** This feature protects the printer from counterfeit toner cartridges by allowing only genuine HP cartridges to be used with the printer. Using genuine HP cartridges ensures the best possible print quality. When someone installs a cartridge that is not a genuine HP cartridge, the printer control panel displays a message that the cartridge is unauthorized and it provides information explaining how to proceed.

- **Cartridge Protection:** This feature permanently associates toner cartridges with a specific printer, or fleet of printers, so they cannot be used in other printers. Protecting cartridges protects your investment. When this feature is enabled, if someone attempts to transfer a protected cartridge from the original printer into an unauthorized printer, that printer will not print with the protected cartridge. The printer control panel displays a message that the cartridge is protected, and it provides information explaining how to proceed.

⚠ CAUTION: After enabling cartridge protection for the printer, all subsequent toner cartridges installed in the printer are automatically and *permanently* protected. To avoid protecting a new cartridge, disable the feature *before* installing the new cartridge.

Turning the feature off does not turn off protection for cartridges that are currently installed.

Enable or disable the Cartridge Policy feature

The Cartridge Policy feature can be enabled or disabled using the control panel or the Embedded Web Server (EWS).

 **NOTE:** Enabling or disabling this feature might require entering an administrator password.

Check with your administrator to determine if an administrator password has been set. EWS passwords cannot be recovered.

Use the printer control panel to enable the Cartridge Policy feature

From the printer control panel, a network administrator can enable the Cartridge Policy feature. This allows only genuine HP cartridges to be used with the printer.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Open the following menus:
 - a. [Manage Supplies](#)
 - b. [Cartridge Policy](#)
3. Select [Authorized HP](#).

Use the printer control panel to disable the Cartridge Policy feature

From the printer control panel, a network administrator can disable the Cartridge Policy feature. This removes the restriction that only genuine HP cartridges can be used.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Open the following menus:
 - a. [Manage Supplies](#)
 - b. [Cartridge Policy](#)
3. Select [Off](#).

Use the HP Embedded Web Server (EWS) to enable the Cartridge Policy feature

From the EWS, a network administrator can enable the Cartridge Policy feature. This allows only genuine HP cartridges to be used with the printer.

1. Open the HP Embedded Web Server (EWS):
 - a. From the Home screen on the printer control panel, touch the Information icon , and then touch the Ethernet icon  to display the IP address or host name.
 - b. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the `Enter` key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

2. Open the **Copy/Print** tab.
3. From the left navigation pane, select **Manage Supplies**.
4. In the **Supply Settings** area, select **Authorized HP** from the **Cartridge Policy** drop-down list.
5. Click the **Apply** button to save the changes.

Use the HP Embedded Web Server (EWS) to disable the Cartridge Policy feature

From the EWS, a network administrator can disable the Cartridge Policy feature. This removes the restriction that only genuine HP cartridges can be used.

1. Open the HP Embedded Web Server (EWS):
 - a. From the Home screen on the printer control panel, touch the Information icon , and then touch the Ethernet icon  to display the IP address or host name.
 - b. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the `Enter` key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

2. Open the **Copy/Print** tab.
3. From the left navigation pane, select **Manage Supplies**.
4. In the **Supply Settings** area, select **Off** from the **Cartridge Policy** drop-down list.
5. Click the **Apply** button to save the changes.

Error message	Description	Recommended action
10.0X.30 Unauthorized <Color> Cartridge	The administrator has configured this printer to use only genuine HP supplies that are still under warranty. The cartridge must be replaced to continue printing.	Replace the cartridge with a genuine HP toner cartridge. If you believe you purchased a genuine HP supply, visit www.hp.com/go/antcounterfeit to determine if the toner cartridge is a genuine HP cartridge, and learn what to do if it is not a genuine HP cartridge.

Enable or disable the Cartridge Protection feature

The Cartridge Protection feature can be enabled or disabled using the control panel or the Embedded Web Server (EWS).

NOTE: Enabling or disabling this feature might require entering an administrator password.

Check with your administrator to determine if an administrator password has been set. EWS passwords cannot be recovered.

Use the printer control panel to enable the Cartridge Protection feature

From the printer control panel, a network administrator can enable the Cartridge Protection feature. This protects the cartridges associated with the printer from being stolen and used in other printers.

1. From the Home screen on the printer control panel, navigate to the **Settings** application, and then select the **Settings** icon.
2. Open the following menus:
 - a. **Manage Supplies**
 - b. **Cartridge Protection**
3. Select **Protect Cartridges**.
4. When the printer prompts to confirm, select **Continue** to enable the feature.

CAUTION: After enabling cartridge protection for the printer, all subsequent toner cartridges installed in the printer are automatically and *permanently* protected. To avoid protecting a new cartridge, disable the feature *before* installing the new cartridge.

Turning the feature off does not turn off protection for cartridges that are currently installed.

Replace the toner cartridges

Replace the toner cartridges if you receive a message on the printer, or if you have print quality problems.

Toner cartridge information

Review details about ordering replacement toner cartridges.

The printer indicates when the toner-cartridge level is low and very low. The actual toner cartridge life remaining can vary. Consider having a replacement cartridge available to install when print quality is no longer acceptable.

Continue printing with the current cartridge until redistributing the toner no longer yields acceptable print quality. To redistribute the toner, remove the toner cartridge from the printer and gently rock the cartridge back and forth end to end. For graphical representation, see the cartridge replacement instructions. Reinsert the toner cartridge into the printer, and then close the cover.

To purchase cartridges or check cartridge compatibility for the printer, go to www.hp.com/go/suresupply. Scroll to the bottom of the page and verify that the country/region is correct.

 **NOTE:** High-yield toner cartridges contain more toner than standard cartridges for increased page yield. For more information, go to www.hp.com/go/toneryield.

Do not remove the toner cartridge from its package until it is time to replace it.

 **CAUTION:** To prevent damage to the toner cartridge, do not expose it to light for more than a few minutes. Cover the green imaging drum if the toner cartridge must be removed from the printer for an extended period of time.

The following illustration shows the toner cartridge components.

Figure 3-1 Toner cartridge components

Table 3-8 Toner cartridge components

Callout	Description
1	Imaging drum CAUTION: Do not touch the imaging drum. Fingerprints can cause print-quality problems.
2	Memory chip

CAUTION: If toner gets on clothing, wipe it off by using a dry cloth and wash the clothes in cold water. Hot water sets toner into fabric.

NOTE: Information about recycling used toner cartridges is in the toner cartridge box or at www.hp.com/hprecycle.

Remove and replace the toner cartridge

Follow these steps to replace the toner cartridge.

1. Open the front door.

2. Grasp the end of the toner cartridge and pull it straight out of the printer.

3. Remove the new toner cartridge from its package. Save all packaging for recycling the used toner cartridge.

4. Hold both ends of the toner cartridge and rock it back and forth end to end to evenly distribute the toner that is inside.

5. Align the toner cartridge with its slot and insert it into the printer.

6. Close the front door.

7. Pack the used toner cartridge into the box that the new toner cartridge came in. See the enclosed recycling guide for information about recycling.

In the U.S. and Canada, a pre-paid shipping label is included in the box. In other countries/regions, go to www.hp.com/recycle to print a pre-paid shipping label.

Adhere the pre-paid shipping label to the box, and return the used cartridge to HP for recycling.

Replace the toner collection unit (TCU)

Replace the toner collection unit if you receive a message on the printer, or if you have print quality problems.

Replace the toner collection unit (TCU)

Follow these steps to replace the toner collection unit (TCU).

1. Open the front door.

2. Lift the TCU slightly and then pull it out of the printer.

 **NOTE:** Maintain the position of the TCU as you pull it out from the printer. This will ensure that you do not spill any waste toner in the printer. Place the unit into the clear plastic bag the new TCU was packaged in.

3. Remove the new TCU from its package. Save all packaging for recycling the used TCU.

4. Install the new TCU by inserting it into the printer, and then lifting slightly to make sure it pushes all the way in.

5. Close the front door.

6. Pack the used TCU into the box that the new TCU came in. See the enclosed recycling guide for information about recycling.

In the U.S. and Canada, a pre-paid shipping label is included in the box. In other countries/regions, go to www.hp.com/recycle to print a pre-paid shipping label.

Adhere the pre-paid shipping label to the box, and return the used TCU to HP for recycling.

Replace the staple cartridge (stapler models only)

The following applies to models with staplers.

Remove and replace the staple cartridge in the 3-bin stapler/stacker

Use the steps below to remove and replace the staple cartridge in the 3-bin stapler/stacker.

1. Open the 3-bin stapler/stacker staple door.

2. Pull down the colored handle on the staple carriage, and then pull the staple carriage straight out.

3. Remove the staple cartridge from the sled and replace it with the new staple cartridge.

NOTE: Do not dispose of the staple carrier/sled. The sled is not an orderable or replaceable part.

4. Reinstall the staple carriage into the stapler by pressing the colored handle inward until it snaps into place.

5. Close the 3-bin stapler/stacker staple door.

Remove and replace the staple cartridge in the finisher

Use the steps below to remove and replace the staple cartridge in the floor-standing finisher.

1. Open the finisher door.

2. Pull down the colored handle on the staple carriage, and then pull the staple carriage straight out.

3. Remove the staple cartridge from the sled and replace it with the new staple cartridge.

 **NOTE:** Do not dispose of the staple carrier/sled. The sled is not an orderable or replaceable part.

4. Reinstall the staple carriage into the stapler by pressing the colored handle inward until it snaps into place.

5. Close the finisher door.

Remove and replace the staple cartridge in the convenience stapler

Use the steps below to remove and replace the staple cartridge in the convenience stapler on the left side of the printer.

1. Open the stapler door.

2. Pull the staple carriage straight out.

3. Insert the new staple carriage into the stapler.

4. Close the stapler door.

Print tasks (Windows)

Learn about common printing tasks for Windows users.

How to print (Windows)

Use the **Print** option from a software application to select the printer and basic options for your print job.

The following procedure describes the basic printing process for Windows.

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers. To change settings, click the **Printer Properties** or **Preferences** button to open the print driver.

NOTE: The name of the button varies for different software programs.

For the HP PCL 6 driver, the HP AiO Printer Remote application downloads additional driver features when **More settings** is selected.

NOTE: For more information, click the Help (?) button in the print driver.

3. Click the tabs in the print driver to configure the available options. For example, set the paper orientation on the **Finishing** tab, and set the paper source, paper type, paper size, and quality settings on the **Paper/Quality** tab.
4. Click the **OK** button to return to the **Print** dialog box. Select the number of copies to print from this screen.
5. Click the **Print** button to print the job.

Automatically print on both sides (Windows)

If your printer has an automatic duplexer installed, you can automatically print on both sides of the paper. Use a paper size and type supported by the duplexer.

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers, and then click the **Printer Properties** or **Preferences** button to open the print driver.

NOTE: The name of the button varies for different software programs.

For the HP PCL 6 driver, the HP AiO Printer Remote application downloads additional driver features when **More settings** is selected.

3. Click the **Finishing** tab.
4. Select **Print on both sides**. Click **OK** to close the **Document Properties** dialog.
5. In the **Print** dialog, click **Print** to print the job.

Manually print on both sides (Windows)

Use this procedure for printers that do not have an automatic duplexer installed or to print on paper that the duplexer does not support.

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers, and then click the **Printer Properties** or **Preferences** button to open the print driver.

NOTE: The name of the button varies for different software programs.

For the HP PCL 6 driver, the HP AiO Printer Remote application downloads additional driver features when **More settings** is selected.

3. Click the **Finishing** tab.
4. Select **Print on both sides (manually)**, and then click **OK** to close the **Document Properties** dialog.
5. In the **Print** dialog, click **Print** to print the first side of the job.
6. Retrieve the printed stack from the output bin, and place it in Tray 1.
7. If prompted, select the appropriate control panel button to continue.

Print multiple pages per sheet (Windows)

When you print from a software application using the **Print** option, you can select an option to print multiple pages on a single sheet of paper. For example, you might want to do this if you are printing a very large document and want to save paper.

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers, and then click the **Printer Properties** or **Preferences** button to open the print driver.

NOTE: The name of the button varies for different software programs.

For the HP PCL 6 driver, the HP AiO Printer Remote application downloads additional driver features when **More settings** is selected.

3. Click the **Finishing** tab.
4. Select the number of pages per sheet from the **Pages per sheet** drop-down.
5. Select the correct **Print page borders**, **Page order**, and **Orientation** options. Click **OK** to close the **Document Properties** dialog.
6. In the **Print** dialog, click **Print** to print the job.

Select the paper type (Windows)

When you print from a software application using the **Print** option, you can set the paper type you are using for your print job. For example, if your default paper type is Letter, but you are using a different paper type for a print job, select that specific paper type.

1. From the software program, select the **Print** option.
2. Select the printer from the list of printers, and then click the **Printer Properties** or **Preferences** button to open the print driver.

NOTE: The name of the button varies for different software programs.

For the HP PCL 6 driver, the HP AiO Printer Remote application downloads additional driver features when **More settings** is selected.

3. Click the **Paper/Quality** tab.
4. Select the paper type from the **Paper type** drop-down list.
5. Click **OK** to close the **Document Properties** dialog. In the **Print** dialog, click **Print** to print the job.

If the tray needs to be configured, a tray configuration message displays on the printer control panel.
6. Load the tray with the specified type and size of paper, and then close the tray.
7. Touch the **OK** button to accept the detected type and size, or touch the **Modify** button to choose a different paper size or type.
8. Select the correct type and size, and then touch the **OK** button.

2. Select the printer.
3. Click **Show Details** or **Copies & Pages**, and then click the **Layout** menu.

NOTE: The name of the item varies for different software programs.

4. From the **Pages per Sheet** drop-down list, select the number of pages that you want to print on each sheet.
5. In the **Layout Direction** area, select the order and placement of the pages on the sheet.
6. From the **Borders** menu, select the type of border to print around each page on the sheet.
7. Click the **Print** button.

Select the paper type (macOS)

When you print from a software application using the **Print** option, you can set the paper type you are using for your print job. For example, if your default paper type is Letter, but you are using a different paper type for a print job, select that specific paper type.

1. Click the **File** menu, and then click the **Print** option.
2. Select the printer.

3. Click **Show Details** or **Copies & Pages**, and then click the **Media & Quality** menu or the **Paper/Quality** menu.

NOTE: The name of the item varies for different software programs.

4. Select from the **Media & Quality** or **Paper/Quality** options.

NOTE: This list contains the master set of options available. Some options are not available on all printers.

- **Media Type:** Select the option for the type of paper for the print job.
 - **Print Quality** or **Quality:** Select the resolution level for the print job.
 - **Edge-To-Edge Printing:** Select this option to print close to the paper edges.
5. Click the **Print** button.

Store print jobs on the printer to print later or print privately

Store print jobs in the printer memory for printing at a later time.

Introduction

The following information provides procedures for creating and printing documents that are stored on the USB flash drive. These jobs can be printed at a later time or printed privately.

Create a stored job (Windows)

Store jobs on the USB flash drive for private or delayed printing.

1. From the software program, select the **Print** option.

2. Select the printer from the list of printers, and then select **Printer Properties** or **Preferences**.

NOTE: The name of the button varies for different software programs.

For the HP PCL 6 driver, the HP AiO Printer Remote application downloads additional driver features when **More settings** is selected.

3. Click the **Job Storage** tab.
4. Select a **Job Storage Mode** option:
 - **Proof and Hold:** Print and proof one copy of a job, and then print more copies.
 - **Personal Job:** The job does not print until you request it at the printer control panel. For this job-storage mode, you can select one of the **Make Job Private/Secure** options. If you assign a personal identification number (PIN) to the job, you must provide the required PIN at the control panel. If you encrypt the job, you must provide the required password at the control panel. The print job is deleted from memory after it prints and is lost if the printer loses power.
 - **Quick Copy:** Print the requested number of copies of a job and store a copy of the job in the printer memory so you can print it again later.
 - **Stored Job:** Store a job on the printer and allow other users to print the job at any time. For this job-storage mode, you can select one of the **Make Job Private/Secure** options. If you assign a personal identification number (PIN) to the job, the person who prints the job must provide the required PIN at the control panel. If you encrypt the job, the person who prints the job must provide the required password at the control panel.
5. To use a custom user name or job name, click the **Custom** button, and then enter the user name or the job name.

Select which option to use if another stored job already has that name:

 - **Use Job Name + (1-99):** Append a unique number to the end of the job name.
 - **Replace Existing File:** Overwrite the existing stored job with the new one.
6. Click the **OK** button to close the **Document Properties** dialog box. In the **Print** dialog box, click the **Print** button to print the job.

Create a stored job (macOS)

Store jobs on the USB flash drive for private or delayed printing.

1. Click the **File** menu, and then click the **Print** option.
2. In the **Printer** menu, select the printer.
3. Click **Show Details** or **Copies & Pages**, and then click the **Job Storage** menu.

NOTE: If the **Job Storage** menu is not showing, follow the instructions in the "Disable or enable job storage feature" section to activate the menu.

4. In the **Mode** drop-down list, select the type of stored job.
 - **Proof and Hold:** Print and proof one copy of a job, and then print more copies. The first copy prints immediately. Printing of the subsequent copies must be initiated from the device's front control panel. For example, if 10 copies are sent, one copy prints immediately, and the other nine copies will print when the job is retrieved. The job is deleted after all copies are printed.
 - **Personal Job:** The job does not print until someone requests it at the printer control panel. If the job has a personal identification number (PIN), provide the required PIN at the control panel. The print job is deleted from memory after it prints.
 - **Quick Copy:** Print the requested number of copies of a job and store a copy of the job in the printer memory to print it again later. The job is deleted manually or by the job retention schedule.
 - **Stored Job:** Store a job on the printer and allow other users to print the job at any time. If the job has a personal identification number (PIN), the person who prints the job must provide the required PIN at the control panel. The job is deleted manually or by the job retention schedule.
5. To use a custom user name or job name, click the **Custom** button, and then enter the user name or the job name.

NOTE: macOS 10.14 Mojave and later: The print driver no longer includes the **Custom** button. Use the options below the **Mode** drop-down list to set up the saved job.

Select which option to use if another stored job already has that name.

- **Use Job Name + (1-99):** Append a unique number to the end of the job name.
 - **Replace Existing File:** Overwrite the existing stored job with the new one.
6. If you selected the **Stored Job** or **Personal Job** option in the **Mode** drop-down list, you can protect the job with a PIN. Type a 4-digit number in the **Use PIN to Print** field. When other people attempt to print this job, the printer prompts them to enter this PIN.
 7. Click the **Print** button to process the job.

Print a stored job

Use the following procedure to print a job that is stored in the printer memory.

1. From the Home screen on the printer control panel, navigate to the **Print** application, and then select the **Print** icon.
2. Select **Print from Job Storage**.
3. Select the name of the folder where the job is stored, or select **Choose** to see the folder list.
4. Select the name of the job. If the job is private or encrypted, enter the PIN or password.
5. To adjust the number of copies, select the number of copies field. Use the keypad to enter the number of copies to print.
6. Select **Start**  or **Print** to print the job.

Delete a stored job

You can delete documents that have been saved to the printer when they are no longer needed. You can also adjust the maximum number of jobs for the printer to store.

Delete a job that is stored on the printer

Use the control panel to delete a job that is stored in the printer memory.

1. From the Home screen on the printer control panel, navigate to the [Print](#) application, and then select the [Print](#) icon.
2. Select [Print from Job Storage](#).
3. Select the name of the folder where the job is stored or select [Choose](#) to see the folder list.
4. Select the name of the job. If the job is private or encrypted, enter the PIN or password.
5. Select the Trash button  to delete the job.

Change the job storage limit

When a new job is stored in the printer memory, the printer overwrites any previous jobs with the same user and job name. If a job is not already stored under the same user and job name, and the printer needs additional space, the printer might delete other stored jobs starting with the oldest.

To change the number of jobs that the printer can store, complete the following procedure:

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Open the following menus:
 - a. [Copy/Print or Print](#)
 - b. [Manage Stored Jobs](#)
 - c. [Temporary Job Storage Limit](#)
3. Use the keypad to enter the number of jobs that the printer stores.
4. Select [OK](#) or [Done](#) to save the setting.

Information sent to printer for Job Accounting purposes

Printing jobs sent from drivers on the client (e.g., PC) may send personally identifiable information to HP's Printing and Imaging devices. This information may include, but is not limited to, user name and client name from which the job originated that may be used for job accounting purposes, as determined by the Administrator of the printing device. This same information may also be stored with the job on the mass storage device (e.g., disk drive) of the printing device when using the job storage feature.

Wi-Fi, Wi-Fi Direct Print, NFC, and BLE printing

HP provides Wi-Fi Direct Print, Near Field Communication (NFC), and Bluetooth Low Energy (BLE) printing for printers with a supported HP Jetdirect 3100w BLE/NFC/Wireless Accessory. This is an optional accessory.

These features enable Wi-Fi capable (mobile) devices to make a wireless network connection directly to the printer without using a wireless router.

The printer does not need to be connected to the network for this mobile walk-up printing to work.

Use Wi-Fi Direct Print to print wirelessly from the following devices:

- iPhone, iPad, or iPod touch using Apple AirPrint
- Android mobile devices using the Android embedded print solution

For more information on wireless printing, go to www.hp.com/go/LaserJetMobilePrinting.

NFC, BLE, and Wi-Fi Direct Print capabilities can be enabled or disabled from the printer control panel.

Enable wireless printing

To print wirelessly from mobile devices, Wi-Fi Direct must be turned on.

1. From the Home screen on the printer control panel, select the **Settings** menu.
2. Select the following menus:
 - a. **Networking**
 - b. **Wi-Fi Direct**
 - c. **Status**
3. Select **On**, and then select **OK** to enable wireless printing.

Change the Wi-Fi Direct name

Change the printer Wi-Fi Direct name using the HP Embedded Web Server (EWS).

NOTE: In environments where more than one model of the same printer is installed, it might be helpful to provide each printer a unique Wi-Fi Direct Name for easier printer identification for HP Wi-Fi Direct printing. The Wireless network names, e.g., Wireless, Wi-Fi Direct, etc. are available on the Information screen by selecting the Information icon , and then selecting the Wi-Fi Direct icon .

Complete the following procedure to change the printer Wi-Fi Direct name:

1. From the Home screen on the printer control panel, select the **Settings** icon.
2. Open the following menus:

- a. Networking
 - b. Wi-Fi Direct
 - c. Wi-Fi Direct Name
3. Use the keypad to change the name in the **Wi-Fi Direct Name** text field, and then select **OK**.

HP ePrint via email

Use HP ePrint via email to print documents by sending them as an email attachment to the printer's email address from any email enabled device.

To use HP ePrint via email, the printer must meet these requirements:

- The printer must be connected to a wired or wireless network and have Internet access.
- HP Web Services must be enabled on the printer, and the printer must be registered with HP Smart.

Follow this procedure to enable HP Web Services and register with HP Smart:

1. Open the HP Embedded Web Server (EWS):
 - a. From the Home screen on the printer control panel, touch the Information icon , and then touch the Ethernet icon  to display the IP address or host name.
 - b. From a computer on the same network as the printer, open a web browser. In the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

2. Click the **HP Web Services** tab.
3. Select the option to enable Web Services.

 **NOTE:** Enabling Web Services might take several minutes.

4. Go to www.hpconnected.com to create an account and complete the setup process.

AirPrint

Direct printing using Apple's AirPrint is supported for iOS and from Mac computers running macOS 10.7 Lion and newer.

Use AirPrint to print directly to the printer from an iPad, iPhone (3GS or later), or iPod touch (third generation or later) in the following mobile applications:

- Mail
- Photos
- Safari

- iBooks
- Select third-party applications

To use AirPrint, the printer must be connected to the same network (sub-net) as the Apple device. For more information about using AirPrint and about which HP printers are compatible with AirPrint, go to www.hp.com/go/MobilePrinting.

NOTE: Before using AirPrint with a USB connection, verify the version number. AirPrint versions 1.3 and earlier do not support USB connections.

Android embedded printing

HP's built-in print solution for Android and Kindle enables mobile devices to automatically find and print to HP printers that are either on a network or within wireless range for Wi-Fi Direct printing.

The print solution is built into many versions of the operating system.

NOTE: If printing is not available on your device, go to the [Google Play > Android apps](#) and install the HP Print Service Plugin.

For more information on how to use Android embedded printing and which Android devices are supported, go to www.hp.com/go/MobilePrinting.

Print from a USB flash drive

This printer features easy-access USB printing to print files without a computer.

The printer accepts standard USB flash drives in the USB port near the control panel. It supports the following types of files:

- .pdf
- .prn
- .pcl
- .ps
- .cht
- .jpg
- .png

Enable the USB port for printing

The USB port is disabled by default. Before using this feature, enable the USB port.

Use one of the following methods to enable the port:

Method one: Enable the USB port from the printer control panel

Use the printer control panel to enable the USB port for printing.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.

2. Open the following menus:
 - a. Copy/Print or Print
 - b. Enable Device USB
3. Select **Enable Print** from **USB Drive**.

Method two: Enable the USB port from the HP Embedded Web Server (network-connected printers only)

Use the HP Embedded Web Server to enable the USB port for printing.

1. From the Home screen on the printer control panel, touch the Information icon , and then touch the Ethernet icon  to display the IP address or host name.
2. Open a web browser, and in the address line, type the IP address exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

3. Select the **Copy/Print** tab for MFP models or the **Print** tab for SFP models.
4. In the left menu, select **Print from USB Drive Settings**.
5. Select **Enable Print from USB Drive**.
6. Click **Apply**.

Print USB documents

Print documents from a USB flash drive.

1. Insert the USB flash drive into the easy-access USB port.

 **NOTE:** The port might be covered. For some printers, the cover flips open. For other printers, pull the cover straight out to remove it.

2. From the Home screen on the printer control panel, navigate to the **Print** application, and then select the **Print** icon.
3. Select **Print from USB Drive**.
4. Select **Choose**, select the name of the document to print, and then select **Select**.

 **NOTE:** The document might be in a folder. Open folders as necessary.

5. To adjust the number of copies, touch the box to the left of the **Print** button, and then select the number of copies from the keypad that opens. To close the keypad, select the **Close** button.
6. Select **Print** to print the document.

Print using the SuperSpeed USB 3.0 port (wired)

Enable the SuperSpeed USB 3.0 port for wired USB printing. The port is located in the interface ports area and is disabled by default.

Use one of the following methods to enable the SuperSpeed USB 3.0 port. Once the port is enabled, install the product software in order to print using this port.

Method one: Enable the SuperSpeed USB 3.0 port from the printer control panel menus

Use the control panel to enable the port.

1. From the Home screen on the printer control panel, navigate to the **Settings** application, and then select the **Settings** icon.
2. Open the following menus:
 - a. **General**
 - b. **Enable Device USB**
3. Select the **Enabled** option.

Method two: Enable the SuperSpeed USB 3.0 port from the HP Embedded Web Server (network-connected printers only)

Use the HP EWS to enable the port.

1. Find the printer IP address. On the printer control panel, select the Information button , and then select the Network icon  to display the IP address or host name.
2. Open a web browser, and in the address line, type the IP address exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

3. Select the **Security** tab.
4. On the left side of the screen, select **General Security**.
5. Scroll down to the **Hardware Ports** and select the following check boxes:
 - a. **Enable Device USB**
 - b. **Enable Host USB plug and play**
6. Click **Apply**.

Make a copy

Copy a document or picture from the scanner glass or automatic document feeder.

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, navigate to the **Copy** application, and then select the **Copy** icon.
3. To select the number of copies, touch the box next to **Copy**, use the keypad to enter the number of copies, and then touch the close keypad button .
4. Select **Optimize Text/Picture** to optimize for the type of image being copied: text, graphics, or photos. Select one of the predefined options.
5. Set options marked with a yellow triangle before using the preview feature.

NOTE: After the preview scan, these options are removed from the main **Options** list and are summarized in the **Pre-scan Options** list. To change any of these options, discard the preview and start over.

Using the preview feature is optional.

6. Touch the right pane of the screen to preview the document. In the preview screen, use the buttons on the right of the screen to adjust the preview options and to rearrange, rotate, insert, or remove pages.

Table 5-1 Buttons on the right side of the preview pane

Button	Description
	Use these buttons to toggle between single-page view and thumbnail view. More options are available in thumbnail view than in single-page view.
	
	Use these buttons to zoom in or out on the selected page. NOTE: Select only one page at a time to use these buttons.
	
	Use this button to rotate the page 180 degrees. NOTE: This button is available only in the thumbnail view.
	Use this button to delete the selected pages. NOTE: This button is available only in the thumbnail view.
	Use these buttons to rearrange the pages within the document. Select one or more pages and move them to the left or right. NOTE: These buttons are available only in the thumbnail view.
	
	Use this button to add a page to the document. The printer prompts to scan additional pages.
	Use this button to clear the changes made in the preview and start over.
	Touch this button to collapse the preview screen and return to the Copy screen.

7. When the document is ready, touch **Copy** to begin copying.

Copy on both sides (duplex)

Copy or print on both sides of the paper.

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, navigate to the **Copy** application, and then select the **Copy** icon.
3. In the **Options** pane, select **Original Side**, and then select the option that describes the original document:
 - Use **Automatically detect** to detect whether the original is printed on one or both sides of the page.
 - Use **1-sided** for originals that are printed on one side of the page.
 - Use **2-sided (book-style)** for originals that flip on the right/left edge of the page, like books. If the image is portrait, the output flips on the long edge of the page. If the image is landscape, the output flips on the short edge of the page.
 - Use **2-sided (flip-style)** for originals that flip on the top/bottom edge of the page, like calendars. If the image is portrait, the output flips on the short edge of the page. If the image is landscape, the output flips on the long edge of the page.
4. Select **Output Sides**, and then select one of these options:
 - **1-sided**: The output will be 1-sided. However, if the administrator has restricted 1-sided printing, the output will be 2-sided book-style.
 - **2-sided (book-style)**: The output will flip on the right/left edge of the page, like a book. If the image is portrait, the output flips on the long edge of the page. If the image is landscape, the output flips on the short edge of the page.
 - **2-sided (flip-style)**: The output will flip on the top/bottom edge of the page, like a calendar. If the image is portrait, the output flips on the short edge of the page. If the image is landscape, the output flips on the long edge of the page.
5. Set options marked with a yellow triangle before using the preview feature.

NOTE: After the preview scan, these options are removed from the main **Options** list and are summarized in the **Pre-scan Options** list. To change any of these options, discard the preview and start over.

Using the preview feature is optional.

Locate information on the Web for performing common copy tasks.

Go to [Support for HP Color LaserJet Enterprise MFP 6800](#) or [Support for HP Color LaserJet Enterprise MFP 6801](#).

Instructions are available for copy tasks, such as the following:

- Copy or scan pages from books or other bound documents
- Copy mixed-size documents
- Copy or scan both sides of an identification card
- Copy or scan a document into a booklet format

6 Scan

Scan using the software, or scan directly to email, a USB flash drive, a network folder, or another destination.

Set up Scan to Email

The printer has a feature that enables it to scan a document and send it to one or more email addresses.

Introduction

To use this scan feature, the printer must be connected to a network; however, the feature is not available until it has been configured. There are two methods for configuring Scan to Email, the **Scan to Email Setup Wizard** for basic and **Email Setup** for advanced.

Use the following information to set up the Scan to Email feature.

Before you begin

To set up the Scan to Email feature, the printer must have an active network connection.

Administrators need the following information before beginning the configuration process.

- Administrative access to the printer
- DNS suffix (e.g., companyname.com)

- SMTP server (e.g., smtp.mycompany.com)

NOTE: If you do not know the SMTP server name, SMTP port number, or authentication information, contact the email/Internet service provider or system administrator for the information. SMTP server names and port names are typically found by doing an Internet search. For example, use terms like "Gmail smtp server name" or "Yahoo smtp server name" to search.

- SMTP server authentication requirements for outgoing email messages, including the user name and password used for authentication, if applicable.

NOTE: Consult your email service provider's documentation for information on digital sending limits for your email account. Some providers may temporarily lock your account if you exceed your sending limit.

Step one: Access the HP Embedded Web Server (EWS)

Open the EWS to start the setup process.

NOTE: The figure in this topic shows an EWS screen for a color printer. However, the procedure below is valid for both color and mono printers.

1. From the Home screen on the printer control panel, touch the Information icon , and then touch the Ethernet icon  to display the IP address or host name.
2. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the Enter key on the computer keyboard. The EWS opens.

 https://10.10.XX.XXX

NOTE: If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

The screenshot displays the HP Embedded Web Server (EWS) interface. At the top, there is a search bar and a user profile for 'Administrator' with a 'Sign Out' button. The main navigation bar includes tabs for Information, General, Copy/Print, Scan/Digital Send, Fax, Supplies, Troubleshooting, Security, HP Web Services, and Networking. The 'Information' tab is selected, showing a sidebar with various status pages and a main content area.

Step two: Configure the Network Identification settings

Configure advanced setting for network identification.

 **NOTE:** Configuring email setup on the **Networking** tab is an advanced process and might require the assistance of a system administrator.

1. Using the EWS top navigation tabs, click **Networking**.

 **NOTE:** For configuring the network settings for use with Office 365, [Step five: Set up Send to Email to use Office 365 Outlook \(optional\) on page 82](#)

2. In the left navigation pane, click **TCP/IP Settings**. A username/password might be required to access the **Network Identification** tab of the EWS.
3. On the **TCP/IP Settings** dialog, click the **Network Identification** tab.
4. If DNS is required on the network, in the **TCP/IP Domain Suffix** area, verify that the DNS suffix for the email client being used is listed. DNS suffixes have this format: *companyname.com, gmail.com, etc.*

The screenshot shows the HP EWS interface for TCP/IP Settings. The 'Networking' tab is selected in the top navigation bar. The left sidebar lists various configuration options, with 'TCP/IP Settings' selected. The main content area is titled 'TCP/IP Settings' and has a sub-tab 'Network Identification' selected. Under 'Network Identification', there is a checkbox for 'Enable DDNS' which is unchecked. Below this is the 'TCP/IP Domain Suffix' section, which contains a 'DNS Suffixes' list box and an 'Add' button. The 'WINS (IPv4 only)' section has 'Primary' and 'Secondary' input fields. The 'Bonjour' section has a 'Bonjour Service Name' input field. At the bottom right, there are 'Apply' and 'Cancel' buttons.

 **NOTE:** If the Domain Name suffix is not set up, use the IP address.

5. Click **Apply**.
6. Click **OK**.

Step three: Configure the Send to Email feature

The two options for configuring Send to Email are the **Email Setup Wizard** for basic configuration and **Email Setup** for advanced configuration. Use the following options to configure the Send to Email feature:

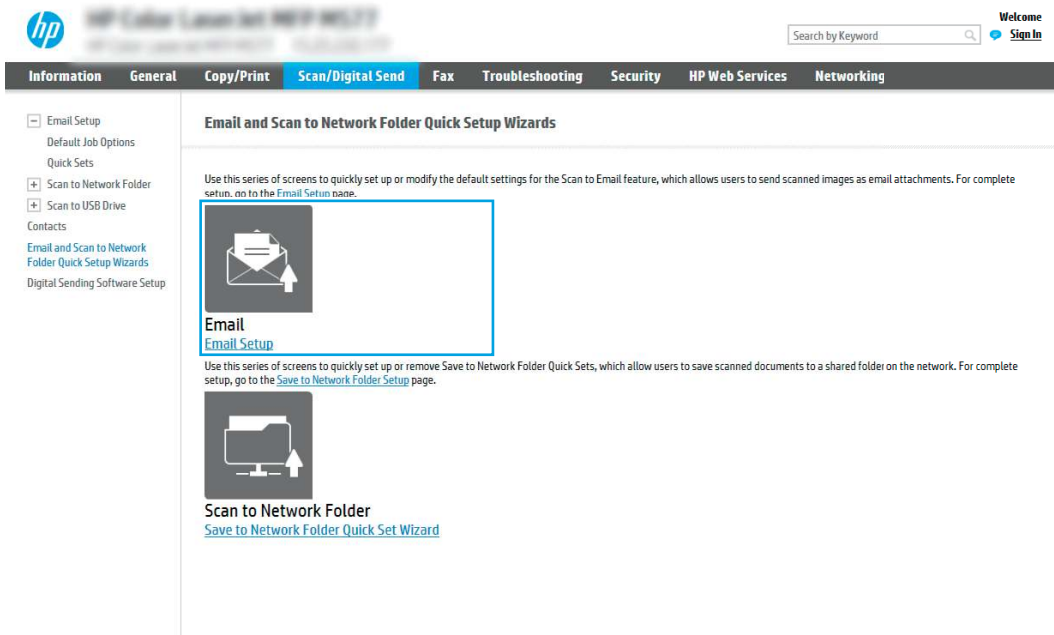

Method one: Basic configuration using the Email Setup Wizard

Perform basic configuration using the Email Setup Wizard.

This option opens the **Email Setup Wizard** in the HP Embedded Web Server (EWS) for basic configuration.

1. Using the EWS top navigation tabs, click **Scan/Digital Send**.
2. In the left navigation pane, click **Email and Scan to Network Folder Quick Setup Wizards**.
3. In the **Email and Scan to Network Folder Quick Setup Wizards** dialog, click the **Email Setup** link.

 **NOTE:** If a message displays indicating that the Scan to Email feature is disabled, click **Continue** to proceed with the configuration and enable the Scan to Email feature upon completion.

4. On the **Configure Email Servers (SMTP)** dialog, select one of the following options and complete the steps:
 - Option one: Use a server already in use by Email.
Select **Use a server already in use by Email**, and then click **Next**.
 - Option two: Search the network for the outgoing email server.
This option finds outgoing SMTP servers inside your firewall only.
 - a. Select **Search network for outgoing email server**, and then click **Next**.
 - b. Select the appropriate server from the **Configure Email Server (SMTP)** list, and then click **Next**.
 - c. Select the option that describes the server's authentication requirements:
 - Server does not require authentication: Select **Server does not require authentication**, and then click **Next**.

-OR-

- Server requires authentication: From the drop-down list, select an authentication option:
 - o Select **Use credentials of user to connect after Sign In at the control panel**, and then click **Next**.

-OR-

- o Select **Always use these credentials**, enter the **User name** and **Password**, and then click **Next**.

- Option three: Add the SMTP server.

a. Select **Add SMTP server**.

b. Enter the **Server Name** and **Port Number**, and then click **Next**.

NOTE: In most cases, the default port number does not need to be changed.

NOTE: If you are using a hosted SMTP service such as Gmail, verify the SMTP address, port number, and SSL settings from the service provider's website or other sources. Typically, for Gmail, the SMTP address is smtp.gmail.com, port number 465, and the SSL should be enabled.

Please refer to online sources to confirm these server settings are current and valid at the time of configuration.

c. Select the appropriate server authentication option:

- Server does not require authentication: Select **Server does not require authentication**, and then click **Next**.

-OR-

- Server requires authentication: Select an option from the **Server requires authentication** drop-down list:

- o Select **Use credentials of user to connect after Sign In at the control panel**, and then click **Next**.

-OR-

- o Select **Always use these credentials**, enter the **User name** and **Password**, and then click **Next**.

5. On the **Configure Email Settings** dialog, enter the following information about the sender's email address, and then click **Next**.

NOTE: When setting up the **From**, **Subject**, and **Message** fields, if the **User editable** check box is unchecked, users will not be able to edit those fields at the printer control panel when sending an email.

7. Review the **Summary** area, and then click **Finish** to complete the setup.

Method two: Advanced configuration using the Email Setup

Use the following steps for advanced configuration using the **E-mail Setup** dialog in the EWS.

1. Using the EWS top navigation tabs, click **Scan/Digital Send**, expand the **Email Setup** menu in the left navigation pane, and then click **Default Job Options**.

The **Default Job Options** page displays the **Basic Settings** for Scan to Email setup. To access additional settings, click the **Advanced Settings** button at the bottom of the page. To switch back to basic settings, click the **Basic Settings** button.

NOTE: This procedure covers the steps for **Basic Settings** first and then the steps for **Advanced Settings**.

Figure 6-1 Location of Advanced Settings button

2. On the **Default Job Options** page, select the **Enable Scan to Email** check box. If this check box is not selected, the feature is unavailable at the printer control panel.

3. In the **Outgoing Email Servers (SMTP)** area, complete the steps for one of the following options:
 - Select one of the displayed servers.
 - Click **Add** to start the SMTP wizard.
 - a. In the SMTP wizard, select one of the following options:
 - **Option one: I know my SMTP server address or host name:** Enter the address of an SMTP server, and then click **Next**

- **Option two:** If you do not know the address of the SMTP server, select **Search network for outgoing email server**, and then click **Next**. Select the server, and then click **Next**.

NOTE: If an SMTP server was already created for another printer function, the **Use a server already in use by another function** option displays. Select this option, and then configure it to be used for the email function.

- b.** On the **Set the basic information necessary to connect to the server** dialog, set the options to use, and then click **Next**.
 - Some servers have problems sending or receiving emails that are larger than 5 megabytes (MB). These problems can be prevented by entering a number in **Split emails if larger than (MB)**.
 - In most cases, the default port number does not need to be changed. However, when using the **Enable SMTP SSL Protocol** option, port 587 must be used.
 - If you are using Google™ Gmail for email service, select the **Enable SMTP SSL Protocol** check box. Typically, for gmail, the SMTP address is smtp.gmail.com, port number 465, and the SSL should be enabled. Refer to online sources to confirm these server settings are current and valid at the time of configuration.
- c.** On the **Server Authentication Requirements** dialog, select the option that describes the server's authentication requirements:
 - **Server does not require authentication**, and then click **Next**.
 - **Server requires authentication**
 - From the drop-down box, select **Use credentials of user to connect after Sign In at the control panel**, and then click **Next**.
 - From the drop-down box, select **Always use these credentials**, enter the **Username** and **Password**, and then click **Next**.

NOTE: If using a signed-in user's credentials, set email to require sign in by the user on the printer control panel. Deny device guest access to email by clearing the check box for email in the **Device Guest** column in the **Sign in and Permission Policies** area on the **Access Control** dialog of the **Security** tab. The icon in the check box changes from a check mark to a lock.

- d.** On the **Server Usage** dialog, choose the printer functions that will send email through this SMTP server, and then click the **Next** button.

If the server requires authentication, a user name and password for sending automatic alerts and reports from the printer will be required.
- e.** On the **Summary and Test** dialog, enter a valid email address in the **Send test email to:** field, and then click **Test**.
- f.** Verify that all of the settings are correct, and then click **Finish** to complete the outgoing email server set up.

- In the **Address and Message Field Control** area, enter a **From:** setting and any of the other optional settings.

User editable	To use the Default From address and Default Display Name for all emails sent from this printer (unless a user is signed in), clear the User editable check box. When setting up the address fields, if the User editable check box is cleared, users will not be able to edit those fields at the printer control panel when sending an email. For send-to-me functionality, clear the User editable check boxes for all of the address fields, including the From: , To: , CC: , and BCC: fields, and then set that user's send email From: their own email address and To: their own email address.
Default From: and Default Display Name:	Provide an email address and name to use for the From: address for the email message. NOTE: Create an email account for the printer, and use this address for the default email address. NOTE: Configure the email feature so that users must sign in before using it. This prevents users from sending an email from an address that is not their own.
Subject:	Provide a default subject line for the email messages.
Message:	Create a custom message. To use this message for all emails sent from the printer, clear or do not select the User editable check box for Message: .

Table 6-4 Address and Message Field Control (Advanced Settings - optional)

Feature	Description
Address Field Restrictions	Specify whether users must select an email address from an address book or whether users are allowed to enter in an email address manually. CAUTION: If Users must select from address book is selected, and any of the address fields are also set as User editable , changes to those editable fields also change the corresponding values in the address book. To prevent users from changing contacts in the Address Book at the printer control panel, go to the Access Control page on the Security tab, and deny Device Guest access to address book modifications.
Allow invalid email address formats	Select to allow an invalid email address format.
To:	Provide a To (recipient) email address for emails.
CC:	Provide a CC email address for emails.
BCC:	Provide a BCC email address for emails.

- In the **File Settings** area, set the default file settings preferences.

Table 6-5 File Settings (Basic Settings)

Feature	Description
File Name	Default file name for the file to be saved. Select the User editable check box to make this setting editable at the printer control panel.

Table 6-5 File Settings (Basic Settings) (continued)

Feature	Description
File Type	Select the file format for the saved file. Select the User editable check box to make this setting editable at the printer control panel.
Resolution	Set the resolution for the file. Higher resolution images have more dots per inch (dpi), so they show more detail. Lower resolution images have fewer dots per inch and show less detail, but the file size is smaller.
Quality and File Size	Select the quality for the file. Higher-quality images require a larger file size than lower-quality images, and they take more time to send.
Color/Black	Specify whether copies are to be printed in color, black and gray, or black only (color printers only).

Table 6-6 File settings (Advanced Settings - optional)

Feature	Description
File Name Prefix	Set the default file name prefix used for files saved to a network folder.
File Name Suffix	Set the default file name suffix used for files saved to a network folder. Duplicate filename suffix default [filename]_YYYYMMDDT
File Name Preview	Enter a file name, and then click the Update Preview button.
File Numbering Format	Select a file name format for when the job is divided into multiple files.
Add numbering when job has just one file (ex. _1-1)	Select this setting to add numbering to a file name when the job is only one file instead of multiple files.
High Compression (smaller file)	Select this setting to compress the scanned file, which reduces the file size. However, the scanning process for a High compression file might take longer than for a Normal compression file.
PDF encryption	If the file type is PDF, then this option encrypts the output PDF file. A password must be specified as part of the encryption. The same password must be used to open the file. The user will be prompted to enter a password prior to scanning their job if one has not been set prior to pressing start.
Suppress blank pages	If the Suppress blank pages option is enabled, blank pages will be ignored.
Create Multiple Files	Select this setting to scan pages into separate files based on a predetermined maximum number of pages per file.

6. Click the **Advanced Settings** button to display the following settings:

- **Signing and Encryption**
- **Notification** (job notification)
- **Scan Settings**

- In the **Signing and Encryption** area, set the signing and encryption preferences.

Table 6-7 Signing and Encryption settings

Feature	Description
Signing	Select whether to sign the email with a security certificate. Select the User editable check box to make this setting editable at the printer control panel.
Hashing Algorithm	Select the algorithm to use for signing the certificate.
Encryption	Select whether to encrypt the email. Select the User editable check box to make this setting editable at the printer control panel.
Encryption Algorithm	Select the algorithm to use for encrypting the email.
Attribute for Recipient Public Key	Enter which attribute to use to retrieve the recipient's public key certificate from LDAP.
Use the recipient public key certificate to verify the recipient	Select this setting to use the recipient's public key certificate to verify the recipient.

- In the **Notification** area, select when users will receive notifications about sent emails. The default setting is using the signed in user's email address. If the recipient email address is blank, no notification is sent.
- In the **Scan Settings** area, set the default scanning preferences.

Content Orientation	Select the way the content of the original document is placed on the page: Portrait or Landscape .
Background Cleanup	Select a value to remove faint images from the background or to remove a light background color.
Darkness	Select a value to adjust the darkness of the file.
Contrast	Select a value to adjust the contrast of the file.
Sharpness	Select a value to adjust the sharpness of the file.
Image Preview	Select whether to require or make optional a displayed preview of the job or to disable a preview.
Cropping Options	Select whether or not to allow a job to be cropped and the type of cropping option.
Erase Edges	Select this setting to specify the width of edge margins to be erased, in either inches or millimeters, for the front side and back side of a job.

- Review the selected options to verify that they are accurate, and then click **Apply** to complete the setup.

Step four: Configure the Quick Sets (optional)

Quick Sets are optional short-cut jobs that can be accessed on the main Home screen or within the Quick Sets application at the printer. Use the following procedure to configure the Quick Sets.

1. In the **Email Setup** area of the left navigation pane, click **Quick Sets**.
2. Select one of the following options:
 - Select an existing Quick Set under Quick Sets Application in the table.

-OR-

 - Click **Add** to start the Quick Set Wizard.
3. If you selected **Add**, the **Quick Sets Setup** page opens. Complete the following information:
 - **Quick Set Name:** Enter a title for the new Quick Set.
 - **Quick Set Description:** Enter a description of the Quick Set.
 - **Quick Set Start Option:** To set how the Quick Set starts, click either **Enter application, then user presses Start** or **Start instantly when selected from the Home Screen**.
4. Define the following settings for the Quick Set: Address and Message Field Control, Signing and Encryption, Notification, Scan Settings, File Settings.
5. Click **Finish** to save the Quick Set.

Step five: Set up Send to Email to use Office 365 Outlook (optional)

Enable the printer to send an email with an Office 365 Outlook account from the control panel.

Introduction

Microsoft Office 365 Outlook is a cloud-based email system provided by Microsoft which uses Microsoft's Simple Mail Transfer Protocol (SMTP) server to send or receive emails. Complete the following to enable the printer to send an email with an Office 365 Outlook account from the control panel.

NOTE: You must have an email address account with Office 365 Outlook to configure the settings in the EWS.

Configure the outgoing email server (SMTP) to send an email from an Office 365 Outlook account

Configure the outgoing email server using the following procedure.

1. Using the EWS top navigation tabs, click **Networking**.
2. In the left navigation pane, click **TCP/IP Settings**.
3. In the **TCP/IP Settings** area, click the **Network Identification** tab.

4. If DNS is required on the network, in the **TCP/IP Domain Suffix** area, verify that the DNS suffix for the email client being used is listed. DNS suffixes have this format: *companyname.com*, *Gmail.com*, etc.

The screenshot shows the HP ePrint web interface. The top navigation bar includes 'Information', 'General', 'Copy/Print', 'Scan/Digital Send', 'Fax', 'Troubleshooting', 'Security', 'HP Web Services', and 'Networking'. The left sidebar lists various configuration options under 'Configuration', 'Google Cloud Print', 'Security', 'Diagnostics', and 'Bonjour'. The main content area is titled 'TCP/IP Settings' and has tabs for 'Summary', 'Network Identification', 'TCP/IP(v4)', 'TCP/IP(v6)', 'Config Precedence', and 'Advanced'. The 'Network Identification' tab is active. Under 'Enable DDNS', there is an unchecked checkbox. The 'TCP/IP Domain Suffix' section is highlighted with a blue box and contains a 'DNS Suffixes' section with an empty text input field and an 'Add' button. Below this are 'WINS (IPv4 only)' settings with 'Primary' and 'Secondary' input fields, and 'Bonjour' settings with a 'Bonjour Service Name' input field. At the bottom right, there are 'Apply' and 'Cancel' buttons.

NOTE: If the Domain Name suffix is not set up, use the IP address.

5. Click **Apply**.
6. Click the **Scan/Digital Send** tab.
7. On the left navigation pane, click **Email Setup**.

- On the Email Setup page, select the **Enable Scan to Email** check box. If this check box is not available, the feature is unavailable at the printer control panel.

The screenshot shows the HP Email Setup interface. The top navigation bar includes 'Information', 'General', 'Copy/Print', 'Scan/Digital Send', 'Fax', 'Troubleshooting', 'Security', 'HP Web Services', and 'Networking'. The 'Scan/Digital Send' tab is active. The left sidebar lists 'Email Setup' with sub-items: 'Default Job Options', 'Quick Sets', 'Scan to Network Folder', 'Scan to USB Drive', 'Contacts', 'Email and Scan to Network Folder Quick Setup Wizards', and 'Digital Sending Software Setup'. The main content area is titled 'Email Setup > Default Job Options'. A text box states: 'This feature allows users to scan documents and send them as email attachments to one or more email addresses.' Below this, the 'Enable Scan to Email' checkbox is checked and highlighted with a blue box. The 'Outgoing Email Servers (SMTP)' section has a 'Click Add to configure a server' button and 'Add...', 'Edit...', and 'Remove...' buttons. The 'Address and Message Field Control' section includes a note: 'Select the desired setting for each field and whether the field can be edited by the user at the control panel. If any selections require users to sign in by navigating to the Security tab.' It lists 'From:', 'Subject:', and 'Message:' fields, each with a 'User editable' checkbox that is checked.

- In the **Outgoing Email Servers (SMTP)** area, click **Add** to start the SMTP wizard.
- In the **I know my SMTP server address or host name** field, type `smtp.onoffice.com`, and then click **Next**.
- On the **Set the basic information necessary to connect to the server** dialog, in the **Port Number** field, type `587`.

NOTE: Some servers have problems sending or receiving emails that are larger than 5 megabytes (MB). These problems can be prevented by entering a number in **Split emails if larger than (MB)**.

- Select the **Enable SMTP SSL Protocol** check box, and then click **Next**.
- On the **Server Authentication Requirements** dialog, complete the following information:
 - Select **Server requires authentication**.
 - From the drop-down list, select **Always use these credentials**.
 - In the **Username** field, type the Office 365 Outlook email address.
 - In the **Password** field, type the Office 365 Outlook account password, and then click **Next**.
- On the **Server Usage** dialog, choose the printer functions that will send email through this SMTP server, and then click the **Next** button.
- On the **Summary and Test** dialog, enter a valid email address in the **Send a test email to:** field, and then click **Test**.
- Verify that all of the settings are correct, and then click **Finish** to complete the outgoing email server setup.

For more information, go to [Microsoft's Support page](#).

Set up Scan to Network Folder

Set up the Scan to Folder feature to scan documents directly to network folder.

Introduction

This section explains how to enable and configure the Scan to Network Folder function. The printer has a feature that enables it to scan a document and save it to a network folder. To use this scan feature, the printer must be connected to a network; however, the feature is not available until it has been configured. There are two methods for configuring Scan to Network Folder, the **Save to Network Folder Setup Wizard** for basic setup and **Save to Network Folder Setup** for advanced setup.

Before you begin

Have the following items available before you set up the Scan to Network feature.

 **NOTE:** To set up the Scan to Network Folder feature, the printer must have an active network connection.

Administrators need the following items before beginning the configuration process.

- Administrative access to the printer.
- The fully-qualified domain name (FQDN) (e.g., \\servername.us.companyname.net\scans) of the destination folder OR the IP address of the server (e.g., \\16.88.20.20\scans).

 **NOTE:** The use of the term "server" in this context refers to the computer where the shared folder resides.

Step one: Access the HP Embedded Web Server (EWS)

Open the EWS to start the setup process.

 **NOTE:** The figure in this topic shows an EWS screen for a color printer. However, the procedure below is valid for both color and mono printers.

1. From the Home screen on the printer control panel, touch the Information icon , and then touch the Ethernet icon  to display the IP address or host name.
2. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

Step two: Set up Scan to Network Folder

Set up Scan to Network Folder using one of the following methods.

Method one: Use the Scan to Network Folder Wizard

Use this option for basic configuration of the Save to Network Folder feature using the Scan to Network Folder wizard.

NOTE: Before you begin: To display the printer's IP address or host name, touch the Information icon , and then touch the Network icon  on the printer's control panel. Enter the IP address into a Web browser to open the EWS.

- Using the EWS top navigation tabs, click **Scan/Digital Send** tab. The **Email and Scan to Network Folder Quick Setup Wizards** dialog opens.
- In the left navigation pane, click **Email and Scan to Network Folder Quick Setup Wizards**.
- Click the **Save to Network Folder Quick Set Wizard** link.
- On the **Add or Remove a Save to Network Folder Quick Set** dialog, click **Add**.

NOTE: Quick Sets are shortcut jobs that can be accessed on the printer Home screen or within the Quick Sets application.

NOTE: The Save to Network Folder feature can be minimally configured without creating a quick set. However, without the Quick Set, users must enter the destination folder information at the control panel for each scan job. A quick set is required to include Save to Network Folder metadata.

- On the **Add Folder Quick Set** dialog, complete the following information:
 - In the **Quick Set Title** field, type a title.

NOTE: Name the Quick Set something that users can understand quickly (e.g., "Scan and save to a folder").

- b. In the **Quick Set Description** field, type a description explaining what the Quick Set will save.
 - c. Click **Next**.
6. On the **Configure Destination Folder** dialog, complete the following information:

- a. In the **UNC Folder Path** field, type a folder path where the scan will go.

The folder path can either be the fully-qualified domain name (FQDN) or the IP address of the server. Be sure that the folder path (e.g., `\scans`) follows the FQDN or IP address.

FQDN example: `\\servername.us.companyname.net\scans`

IP address example: `\\16.88.20.20\scans`

NOTE: The FQDN can be more reliable than the IP address. If the server gets its IP address via DHCP, the IP address can change. However, the connection with an IP address might be faster because the printer does not need to use DNS to find the destination server.

- b. From the **Authentication Settings** drop-down, select one of the following options:

- **Use credentials of user to connect after Sign In at the control panel**
- **Always use these credentials**

NOTE: If **Always use these credentials** is selected, a user name and password must be entered in the corresponding fields, and the printer's access to the folder must be verified by clicking **Verify Access**.

- c. In the **Windows Domain** field, type the Windows domain.

TIP: To find the Windows domain in Windows 7, click **Start**, click **Control Panel**, click **System**.

To find the Windows domain in Windows 8, click **Search**, enter `System` in the search box, and then click **System**.

The domain is listed under **Computer name, domain, and workgroup settings**.

- d. Click **Next**.
7. On the **Configure File Scan Settings** dialog, set the default scanning preferences for the Quick Set, and then click **Next**.
8. Review the **Summary** dialog, and then click **Finish**.

Method two: Use Scan to Network Folder Setup

This option enables advanced configuration of the Save to Network Folder feature using the HP Embedded Web Server (EWS) for the printer.

NOTE: Before you begin: To display the printer's IP address or host name, touch the Information icon , and then touch the Network icon  on the printer's control panel. Enter the IP address into a Web browser to open the EWS.

Step one: Begin the configuration

Use the following steps to begin Scan to Network Folder setup.

1. Click the **Scan/Digital Send** tab.

2. In the left navigation pane, click **Scan to Network Folder Setup**.

Step two: Configure the Scan to Network Folder settings

Use the following procedure to complete Scan to Network Folder setup.

Step one: Begin the configuration

Use the following steps to begin configuration.

1. On the Scan to Network Folder Setup page, select the **Enable Scan to Network Folder** check box. If this box is not selected, the feature is unavailable at the printer control panel.
2. In the Scan to Network Folder area of the left navigation pane, click **Quick Sets**. Click **Add** to open the **Quick Sets Setup** dialog.

NOTE: Quick Sets are shortcut jobs that can be accessed on the printer Home screen or within the Quick Sets application.

NOTE: The Scan to Network Folder feature can be minimally configured without creating a Quick Set. However, without the Quick Set, users must enter the destination folder information at the control panel for each scan job. A Quick Set is required to include Scan to Network Folder metadata.

Complete all of the settings in the Quick Set Setup to fully configure the Scan to Network Folder feature.

Dialog one: Set the Quick Set name, description, and options for user interaction at the control panel

Set the Quick Set details for user interaction at the printer's control panel.

Use the **Set the button location for the Quick Set and options for user interaction at the control panel** dialog to configure where the **Quick Set** button will display on the printer control panel and to configure the level of user interaction at the printer control panel.

1. In the **Quick Set Name** field, type a title.

NOTE: Name the Quick Set something that users can understand quickly (e.g., "Scan and save to a folder").

2. In the **Quick Set Description** field, type a description explaining what the Quick Set will save.
3. From the **Quick Set Start Option** list, select one of the following options:

- Option one: **Enter application, then user presses Start**.
- Option two: **Start instantly upon selection**.

Select one of the following prompt options :

- **Prompt for original sides**
- **Prompt for additional pages**
- **Require Preview**

NOTE: If **Start instantly upon selection** is selected, the destination folder must be entered in the next step.

4. Click **Next**.

Dialog two: Folder Settings

Use the **Folder Settings** dialog to configure the types of folders the printer sends scanned documents to and the folder permissions.

There are two types of destination folders to select from:

- Shared folders or FTP folders
- Personal shared folders

There are two types of folder permissions to select from:

- Read and write access
- Write access only

Configure the destination folder for scanned documents

Select one of the following options to set up a destination folder.

Option 1: Configure the printer to save to a shared folder or FTP folder

To save scanned documents to a standard shared folder or an FTP folder, complete the following steps.

1. If it is not already selected, select **Save to shared folders or FTP folders**.
2. Click **Add....** The **Add Network Folder Path** dialog opens.
3. On the **Add Network Folder Path** dialog, select one of the following options:
 - Option one: **Save to a standard shared network folder**.

The screenshot shows the HP printer's control panel interface. At the top, there is a navigation bar with tabs: Information, General, Copy/Print, Scan/Digital Send (selected), Fax, Troubleshooting, Security, HP Web Services, and Networking. Below the navigation bar is a sidebar menu with options like Email Setup, Scan to Network Folder, Scan to USB Drive, and Email and Scan to Network Folder. The main content area is titled 'Quick Sets Setup' and contains the 'Add Network Folder Path' dialog. This dialog has two radio button options: 'Save to a standard shared network folder' (which is selected) and 'Save to an FTP Server'. Under the selected option, there are fields for 'UNC Folder Path' (with a placeholder '(\\path\path)'), 'Custom Subfolder' (with a '+' button), and a checkbox for 'Restrict subfolder access to user'. Below these fields is a 'Folder Path Preview' section with an 'Update Preview' button. There are also 'Authentication Settings' with a dropdown menu set to 'Use credentials of user to connect after Sign In at the control panel' and a 'Windows Domain' field. At the bottom right of the dialog are 'OK' and 'Cancel' buttons.

- a. If it is not already selected, select **Save to a standard shared network folder**.
- b. In the **UNC Folder Path** field, type a folder path.

The folder path can either be the fully-qualified domain name (FQDN) or the IP address of the server. Be sure that the folder path (e.g., `\scans`) follows the FQDN or IP address.

FQDN example: `\\servername.us.companyname.net\scans`

IP address example: `\\16.88.20.20\scans`

 **NOTE:** The FQDN can be more reliable than the IP address. If the server gets its IP address via DHCP, the IP address can change. However, the connection with an IP address might be faster because the printer does not need to use DNS to find the destination server.

- c. To automatically create a subfolder for scanned documents in the destination folder, select a format for the subfolder name from the **Custom Subfolder** list.

To restrict the subfolder access to the user who creates the scan job, select **Restrict subfolder access to user**.

- d. To view the complete folder path for scanned documents, click **Update Preview**.

- e. From the **Authentication Settings** list, select one of the following options:

- **Use credentials of user to connect after Sign In at the control panel**
- **Always use these credentials**

 **NOTE:** If **Always use these credentials** is selected, a user name and password must be entered in the corresponding fields.

- f. In the **Windows Domain** field, type the Windows domain.

 **NOTE:** To find the Windows domain in Windows 7, click **Start**, click **Control Panel**, click **System**.

To find the Windows domain in Windows 8, click **Search**, enter `System` in the search box, and then click **System**.

The domain is listed under **Computer name, domain, and workgroup settings**.

 **NOTE:** If a shared folder is set to be accessed by everyone, values for a workgroup name (default is "Workgroup"), a user name, and password must be entered in the corresponding fields. However, if the folder is within a particular user's folders and not Public, the user name and password of that user must be used.

 **NOTE:** An IP address might be necessary instead of a computer name. Many home routers do not handle computer names well, and there is no Domain Name Server (DNS). In this case, it is best to set up a static IP address on the shared PC to alleviate the problem of DHCP assigning a new IP address. On a typical home router, this is done by setting a static IP address that is on the same subnet, but outside the DHCP address range.

- g. Click **OK**.

- Option two: **Save to an FTP Server**.

 **NOTE:** If an FTP site is outside the firewall, a proxy server must be specified under the network settings. These settings are located in the **EWS Networking** tab, under the **Advanced** options.

- a. Select **Save to an FTP Server**.
- b. In the **FTP Server** field, type the FTP server name or IP address.
- c. In the **Port** field, type the port number.

 **NOTE:** In most cases, the default port number does not need to be changed.

- d. To automatically create a subfolder for scanned documents in the destination folder, select a format for the subfolder name from the **Custom Subfolder** list.
- e. To view the complete folder path for scanned documents, click **Update Preview**.
- f. From the **FTP Transfer Mode** list, select one of the following options:
 - **Passive**
 - **Active**
- g. In the **Username** field, type the user name.
- h. In the **Password** field, type the password.
- i. Click **Verify Access** to confirm the destination can be accessed.
- j. Click **OK**.

Option 2: Configure the printer to save to a personal shared folder

To save scanned documents to a personal shared folder, complete the following steps.

 **NOTE:** This option is used in domain environments where the administrator configures a shared folder for each user. If the Save to a personal shared folder feature is configured, users will be required to sign in at the printer control panel using Windows credentials or LDAP authentication.

1. Select **Save to a personal shared folder**.
2. In the **Retrieve the device user's home folder using this attribute** field, type the user's home folder in the Microsoft Active Directory.

 **NOTE:** Verify that the user knows where this home folder is located on the network.

3. To add a user name subfolder at the end of the folder path, select **Create subfolder based on user name**.

To restrict the subfolder access to the user who creates the scan job, select **Restrict subfolder access to user**.

Select the destination folder permissions

Select one of the following options to set up destination folder permissions.

Option 1: Configure read and write access

To send scanned documents to a folder configured for read and write access, complete the following steps.

 **NOTE:** **Send only to folders with read and write access** supports folder verification and job notification.

1. If it is not already selected, select **Send only to folders with read and write access**.
2. To require the printer to verify folder access before starting a scan job, select **Verify folder access prior to job start**.

 **NOTE:** Scan jobs can complete more quickly if **Verify folder access prior to job start** is not selected; however, if the folder is unavailable, the scan job will fail.

3. Click **Next**.

Option 2: Configure write access only

To send scanned documents to a folder configured for write access only, complete the following steps.

 **NOTE:** **Allow sending to folders with write access only** does not support folder verification or job notification.

 **NOTE:** If this option is selected, the printer cannot increment the scan filename. It sends the same filename for all scans.

Select a time-related filename prefix or suffix for the scan filename, so that each scan is saved as a unique file, and does not overwrite a previous file. This filename is determined by the information in the **File Settings** dialog in the Quick Set Wizard.

1. Select **Allow sending to folders with write access only**.
2. Click **Next**.

Dialog three: Notification Settings

Use the **Notification Settings** dialog to configure when notifications will be sent.

- On the **Notification Settings** dialog, complete one of the following tasks:
 - Option one: **Do not notify**.
 - a. Select **Do not notify**.
 - b. To prompt the user to review their notification settings, select **Prompt user prior to job start**, and then click **Next**.
 - Option two: **Notify when job completes**.
 - a. Select **Notify when job completes**.
 - b. Select the method for delivering the notification from the **Method Used to Deliver Notification** list.

If the method of notification selected is **Email**, type the email address in the **Notification Email Address** field.
 - c. To include a thumbnail of the first scanned page in the notification, select **Include Thumbnail**.
 - d. To prompt the user to review their notification settings, select **Prompt user prior to job start**, and then click **Next**.
 - Option three: **Notify only if job fails**.
 - a. Select **Notify only if job fails**.
 - b. Select the method for delivering the notification from the **Method Used to Deliver Notification** list.

If the method of notification selected is **Email**, type the email address in the **Notification Email Address** field.
 - c. To include a thumbnail of the first scanned page in the notification, select **Include Thumbnail**.
 - d. To prompt the user to review their notification settings, select **Prompt user prior to job start**, and then click **Next**.

Dialog four: Scan Settings

Complete the scan settings as follows.

On the **Scan Settings** dialog, set the default scanning preferences for the Quick Set, and then click **Next**.

Table 6-9 Scan settings

Feature	Description
Original Size	Select the page size of the original document.
Original Sides	Select whether the original document is single-sided or double-sided.
Optimize Text/Picture	Select to optimize for the output of a particular type of content.

Table 6-9 Scan settings (continued)

Feature	Description
Content Orientation	Select the way the content of the original document is placed on the page: Portrait or Landscape .
Background Cleanup	Select a value to remove faint images from the background or to remove a light background color.
Darkness	Select a value to adjust the darkness of the file.
Contrast	Select a value to adjust the contrast of the file.
Sharpness	Select a value to adjust the sharpness of the file.
Image Preview	Select whether to require or make optional a displayed preview of the job or to disable a preview.
Cropping Options	Select whether or not to allow a job to be cropped and the type of cropping option.
Erase Edges	Select this setting to specify the width of edge margins to be erased, in either inches or millimeters, for the front side and back side of a job.

Dialog five: File Settings

Complete the file settings as follows.

On the **File Settings** dialog, set the default file settings for the Quick Set, and then click **Next**.

Table 6-10 File settings

Feature	Description
File Name Prefix	Set the default file name prefix used for files saved to a network folder.
File Name	Default file name for the file to be saved. Select the User editable check box to make this setting editable at the printer control panel.
File Name Suffix	Set the default file name suffix used for files saved to a network folder.
File Name Preview	Enter a file name, and then click the Update Preview button.
File Numbering Format	Select a file name format for when the job is divided into multiple files.
Add numbering when job has just one file (ex. _1-1)	Select this setting to add numbering to a file name when the job is only one file instead of multiple files.
File Type	Select the file format for the saved file. Select the User editable check box to make this setting editable at the printer control panel.
High Compression (smaller file)	Select this setting to compress the scanned file, which reduces the file size. However, the scanning process for a High compression file might take longer than for a Normal compression file.
PDF encryption	If the file type is PDF, then this option encrypts the output PDF file. A password must be specified as part of the encryption. The same password must be used to open the file. The user will be prompted to enter a password prior to scanning their job if one has not been set prior to starting the scan.

Table 6-10 File settings (continued)

Feature	Description
Resolution	Set the resolution for the file. Higher resolution images have more dots per inch (dpi), so they show more detail. Lower resolution images have fewer dots per inch and show less detail, but the file size is smaller.
Quality and File Size	Select the quality for the file. Higher-quality images require a larger file size than lower-quality images, and they take more time to send.
Color/Black	Specify whether copies are to be printed in color, black and gray, or black only.
Suppress blank pages	If the Suppress blank pages option is enabled, blank pages will be ignored.
Metadata File Format	Use the drop-down list to select the file format for metadata information.
Create Multiple Files	Select this setting to scan pages into separate files based on a predetermined maximum number of pages per file.

Dialog six: Summary

On the **Summary** dialog, review the **Summary** dialog, and then click **Finish**.

Step three: Complete the configuration

Use the following steps to complete Scan to Network Folder setup.

1. In the left navigation pane, click **Scan to Network Folder**.
2. On the Scan to Network Folder page, review the selected settings, and then click **Apply** to complete the setup.

Set up Scan to SharePoint

Use Scan to SharePoint to scan documents directly to a Microsoft SharePoint site. This feature eliminates the need to scan the documents to a network folder, USB flash drive, or email message, and then manually upload the files to the SharePoint site.

Introduction

Set up the Scan to SharePoint feature, and then scan documents directly to a SharePoint site.

Scan to SharePoint supports all scanning options, including the ability to scan documents as images or use the OCR features to create text files or searchable PDFs.

The feature is disabled by default. Enable **Save to Sharepoint** in the HP Embedded Web Server (EWS).

Before you begin

Before this procedure can be completed, the destination folder that the scanned files will be saved to must exist on the SharePoint site, and write access must be enabled to the destination folder. Scan to SharePoint is disabled by default.

Step one: Access the HP Embedded Web Server (EWS)

Open the EWS to start the setup process.

 **NOTE:** The figure in this topic shows an EWS screen for a color printer. However, the procedure below is valid for both color and mono printers.

1. From the Home screen on the printer control panel, touch the Information icon , and then touch the Ethernet icon  to display the IP address or host name.
2. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

 <https://10.10.XX.XXX>

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

Input/Output	Status	Capacity	Size	Type
Tray 1	 Depleted	100 sheets	Legal (8.5x14)	Plain
Tray 2	 30 - 70%	520 sheets	Letter (8.5x11)	Plain
Tray 3	 30 - 70%	520 sheets	Letter (8.5x11)	Plain

Step two: Enable Scan to SharePoint and create a Scan to SharePoint Quick Set

Follow the steps to enable the Scan to SharePoint feature and create a Scan to SharePoint Quick Set.

1. Using the top navigation tabs, click **Scan/Digital Send**.
2. In the left navigation pane, click **Scan to SharePoint®**.

 **NOTE:** Quick Sets are shortcut jobs that can be accessed on the printer Home screen or within the **Quick Sets** application.

3. Select **Enable Scan to SharePoint®**, and then click **Apply**.
4. In the Scan to SharePoint area of the left navigation pane, click **Quick Sets**. Click **Add** to launch the Quick Set Wizard.
5. Enter a **Quick Set Name** (for example, "Scan to SharePoint") and a **Quick Set Description**.

6. Select a **Quick Set Start Option** to determine what occurs after selecting a Quick Set on the printer control panel, and then click **Next**.
7. Use the following steps to add the path to the SharePoint folder:
 - a. Click **Add** on the **SharePoint Destination Settings** page to open the **Add SharePoint Path** page.
 - b. Open another browser window, navigate to the SharePoint folder to use, and then copy the folder path for the SharePoint folder from that browser window.
 - c. Paste the SharePoint folder path into the **SharePoint Path:** field.
 - d. By default, the printer overwrites an existing file that has the same file name as the new file. Clear **Overwrite existing files** so that a new file with the same name as an existing file is given an updated time/date stamp.
 - e. Select an option from the **Authentication Settings** drop-down menu. Select whether it is necessary to sign in to the SharePoint site with credentials, or store the credentials within the Quick Set.

NOTE: Use credentials of user to connect after **Sign In at the control panel** is selected in the **Authentication Settings** drop-down menu, the logged-in user must have permission to write to the specified SharePoint site.

NOTE: For security purposes, the printer does not display credentials entered in the Quick Set Wizard.

- f. Click **OK** to complete the SharePoint path setup, and navigate back to the SharePoint Destination Settings page.
8. Select **Verify folder access prior to job start** to ensure that the SharePoint folder specified as the destination folder is accessible each time the Quick Set is used. If this option is not selected, jobs can be saved to the SharePoint folder more quickly. However, if this option is not selected *and* the SharePoint folder is inaccessible, the job will fail.
9. Click **Next**.
10. Set a **Condition on Which to Notify** on the Notification Settings page. This setting configures the Quick Set to either not notify, or to send email messages or print a summary page if a job either completes successfully or fails. Select one of the following options from the **Condition on Which to Notify** drop-down menu:
 - Select **Do not notify** for the Quick Set to not perform any notification action when a job completes successfully or fails.
 - Select **Notify when job completes** to for the Quick Set to send a notification when a job completes successfully.
 - Select **Notify only if job fails** to for the Quick Set to send a notification only when a job fails.

Selecting either **Notify when job completes** or **Notify only if job fails** requires the **Method Used to Deliver Notification:** to be set. Select from the following options:

- **Email:** Use this option to send an email when the selected notification condition occurs. This option requires a valid email address in the **Notification Email Address:** field.

NOTE: To use the email notification feature, first configure the email feature on the printer.

- **Print:** Use this option to print the notification when the selected notification condition occurs.

 **NOTE:** Select **Include Thumbnail** for either notification option to include a thumbnail image of the first page of the scanned page of the job.

11. Click **Next**.
12. Select options from the Scan Settings page, and then click **Next**. For more information, see [Table 6-12 Scan settings for Scan to SharePoint on page 99](#).
13. Select options from the **File Settings** page, and then click **Next**. For more information, see [Table 6-13 File settings for Scan to SharePoint on page 100](#).
14. Review the summary of settings. Click **Finish** to save the Quick Set or click **Previous** to edit the settings.

Scan a file directly to a SharePoint site

Follow the steps to scan a document directly to a SharePoint site.

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, navigate to the **Scan** application, select the **Scan** icon, and then select **Scan to SharePoint®**.

 **NOTE:** It might be necessary to sign in to the printer to use this feature.

3. Under **Quick Sets**, touch **Select**, select a Quick Set, and then select **Load**.
4. Touch the **File Name:** text field to open a keyboard. Type the name for the file using either the on-screen keyboard or the physical keyboard, and touch the Enter button .
5. Touch **Options** to view and configure settings for the document.
6. Touch the right pane of the screen to preview the document. In the preview screen, use the buttons on the right of the screen to adjust the preview options and to rearrange, rotate, insert, or remove pages.

Set up Scan to USB Drive

Enable the Scan to USB Drive feature, which allows you to scan directly to a USB flash drive.

Introduction

The printer has a feature that enables it to scan a document and save it to a USB flash drive. The feature is not available until it has been configured through the HP Embedded Web Server (EWS).

Step one: Access the HP Embedded Web Server (EWS)

Open the EWS to start the setup process.

 **NOTE:** The figure in this topic shows an EWS screen for a color printer. However, the procedure below is valid for both color and mono printers.

1. From the Home screen on the printer control panel, touch the Information icon , and then touch the Ethernet icon  to display the IP address or host name.
2. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS opens.

Step two: Enable Scan to USB Drive

Enable Scan to USB Drive using the following steps.

1. Select the **Security** tab.
2. Scroll to **Hardware Ports** and make sure that **Enable Host USB plug and play** is enabled.

3. Select the **Scan/Digital Send** tab and then click the **Scan to USB Driver Settings** option in the left navigation pane.
4. Select the **Enable Scan to USB Drive** check box.
5. Click **Apply** at the bottom of the page.

NOTE: Most devices ship with hard disk drives (HDDs) already installed. In some cases, additional storage devices can be added via USB. Verify whether the Save to USB feature needs to be expanded to USB and hard drive.

Step three: Configure the Quick Sets (optional)

Use the following steps to set up Quick Sets for Scan to USB Drive. Quick Sets are shortcut jobs that can be accessed on the printer Home screen or within the Quick Sets application.

1. In the **Scan to USB Drive** area of the left navigation pane, click **Quick Sets**.
2. Select one of the following options:
 - Select an existing Quick Set under **Quick Sets Application** in the table.
 - OR-
 - Click **Add** to start the Quick Set Wizard.
3. If you clicked **Add**, the Quick Sets Setup page opens. Complete the following information:
 - a. **Quick Set Name:** Enter a title for the new Quick Set.
 - b. **Quick Set Description:** Enter a description of the Quick Set.
 - c. **Quick Set Start Option:** To set how the Quick Set starts, click either **Enter application, then user presses Start** or **Start instantly when selected from the Home Screen**.
4. Select a default location where scanned files are saved on USB storage devices inserted into the USB port on the control panel, and then click **Next**. The default location options are:
 - **Save at root directory of the USB storage device.**
 - **Create or place in this folder on the USB Storage Device** – The path to the folder on the USB storage device must be specified when using this file location option. A backslash \ must be used to separate folder\subfolder names in the path.
5. Select an option from the **Condition on Which to Notify:** drop-down list, and then click **Next**.

This setting determines if, or how, users are notified when a Save To USB Quick Set job completes or fails. The options for the **Condition on Which to Notify:** setting are:

 - **Do not notify**
 - **Notify when job completes**
 - **Notify only if job fails**

6. Choose the **Scan Settings** for the Quick Set, and then click **Next**.

 **NOTE:** For more information on the available scan settings, see [Default scan settings for Scan to USB Drive setup on page 103](#)

7. Choose the **File Settings** for the Quick Set, and then click **Next**.

 **NOTE:** For more information on the available file settings, see [Default scan settings for Scan to USB Drive setup on page 103](#)

8. Review the summary of settings, and then click **Finish** to save the Quick Set, or click **Previous** to edit the settings.

Scan to email

Scan a document directly to an email address or contact list. The scanned document is sent as an email message attachment.

Introduction

The printer has a feature that enables it to scan a document and send it to one or more email addresses.

Scan to email

Use the following steps to scan a document directly to an email address or contact list.

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, navigate to the **Scan** application, select the **Scan** icon, and then select **Scan to Email**.

NOTE: If prompted, type your user name and password.

3. Touch the **To** field to open a keyboard.

 **NOTE:** If you are signed in to the printer, your user name or other default information might appear in the **From** field. If so, you might not be able to change it.

4. Specify the recipients by using one of these methods:

- Use the keypad to enter the address in the **To** field.

To send to multiple addresses, separate the addresses with a semicolon, or select the Enter button  on the touchscreen keyboard after typing each address.

- Use a contact list as follows:

- a. Select the Contacts button  that is next to the **To** field to open the Contacts screen.
- b. Select the appropriate contact list.
- c. Select a name or names from the list of contacts to add to the recipients list, and then select **Add**.

5. Complete the **Subject**, **File Name**, and **Message** fields by touching the field and using the touchscreen keyboard to enter information. Select the Close button  whenever you need to close the keyboard.
6. To load a Quick Set, select **Load**, select the Quick Set, and then select **Load** under the **Quick Sets** list.

 **NOTE:** **Quick Sets** are predefined settings for various types of output, such as **Text**, **Photograph**, and **High Quality**. You can select a Quick Set to view the description.

7. To configure settings, such as **File Type and Resolution**, **Original Sides**, and **Content Orientation**, select **Options** in the lower left corner, and then select the settings from the **Options** menus. Select **Done** if prompted.
8. Optional Preview: Touch the right pane of the screen to preview the document. You can use the **Expand** and **Collapse** buttons on the left side of the preview pane to expand and collapse the preview screen.

Scan to job storage

Scan a document and save it to a job storage folder on the printer.

Introduction

The printer has a feature that enables it to scan a document and save it to a job storage folder on the printer. You can retrieve the document from the printer and print it when needed.

NOTE: Before you can scan to a storage folder on the printer, your printer administrator or IT department must use the HP Embedded Web Server to enable the feature and configure the settings.

Scan to job storage on the printer

Use this procedure to scan a document and save it to a job storage folder on the printer so that you can print copies at any time.

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, navigate to the **Scan** application, select the **Scan** icon, and then select **Scan to Job Storage**.

NOTE: If prompted, enter your user name and password.

3. Select the default storage folder name shown under **Folder**.

If the printer administrator has configured the option, you can create a new folder. Follow these steps to create a new folder:

- a. Select the **New Folder** icon .
 - b. Select the **New Folder** field, type the folder name, and then select **OK**.
4. Make sure that you have selected the correct folder.
 5. Touch the **Job Name** text field to open a touchscreen keyboard, type the name for the file, and then select the **Enter** button .
 6. To make the job private, select the **PIN** button , enter a four-digit PIN in the **PIN** field, and then close the touchscreen keypad.
 7. To configure settings, such as **Sides** and **Content Orientation**, select **Options** in the lower left corner, and then select the settings from the **Options** menus. Select **Done** for each setting if prompted.

8. **Optional Preview:** Touch the right pane of the screen to preview the document. You can use the **Expand** and **Collapse** buttons on the left side of the preview pane to expand and collapse the preview screen.

9. When the document is ready, select [Save](#) to save the file to the storage folder.

Print from job storage on the printer

Use this procedure to print a scanned document that is in a job storage folder on the printer.

1. From the Home screen on the printer control panel, navigate to the [Print](#) application, select the [Print](#) icon, and then select [Print from Job Storage](#).
2. Under [Stored Jobs to Print](#), select [Choose](#), select the folder in which the document is saved, select the document, and then select [Select](#).
3. If the document is private, enter the four-digit PIN in the [Password](#) field, and then select [OK](#).
4. To adjust the number of copies, touch the box to the left of the [Print](#) button, and then select the number of copies from the keypad that opens. Select the Close button  to close the keypad.
5. Select [Print](#) to print the document.

Scan to network folder

Scan a document and save it to a folder on the network.

Introduction

The printer can scan a file and save it in a shared folder on the network.

Scan to network folder

Use this procedure to scan a document and save it to a network folder.

NOTE: You might be required to sign in to the printer to use this feature.

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, navigate to the [Scan](#) application, select the [Scan](#) icon, and then select [Scan to Network Folder](#).
3. Specify a folder destination. Folder options must first be configured by the printer administrator.
 - To select a folder location that the administrator already set up, select [Load](#) under [Quick Sets and Defaults](#), select the folder, and then select [Load](#).
 - To specify a new folder location, touch the [Folder Paths](#) field to open a touchscreen keyboard, type the path to the folder, and then select the Enter button . Enter user credentials if prompted and then select [Save](#) to save the path.

NOTE: Use this format for the path: `\\server\folder`, where “server” is the name of the server that hosts the shared folder, and “folder” is the name of the shared folder. If the folder is nested inside other folders, complete all necessary segments of the path to reach the folder. For example: `\\server\folder\folder`

NOTE: The [Folder Paths](#) field might have a pre-defined path, and it might not be editable. In this situation, the administrator has configured this folder for common access.

4. Touch the [File Name](#) text field to open a touchscreen keyboard, type the name for the file, and then select the Enter button .
5. To configure settings, such as [File Type and Resolution](#), [Original Sides](#), and [Content Orientation](#), select [Options](#) in the lower left corner, and then select the settings from the [Options](#) menus. Select [Done](#) for each setting if prompted.

Scan to SharePoint

Scan a document directly to a SharePoint site.

Introduction

If you have a workflow-equipped printer, you can scan a document and send it to a SharePoint site. This feature eliminates the need to scan the documents to a network folder, USB flash drive, or email message, and then manually upload the files to the SharePoint site.

Scan to SharePoint supports all scanning options, including the ability to scan documents as images or use the OCR features to create text files or searchable PDFs.

 **NOTE:** Before you can scan to SharePoint, your printer administrator or IT department must use the HP Embedded Web Server to enable the feature and set it up.

Scan to SharePoint

Use the following steps to scan a document directly to a SharePoint site.

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, navigate to the **Scan** application, select the **Scan** icon, and then select **Scan to SharePoint**.

 **NOTE:** It might be necessary to sign in to the printer to use this feature.

3. Under **Quick Sets**, touch **Select**, select a Quick Set, and then select **Load**.
4. Select the **File Name:** text field to open a keyboard. Type the name for the file, and then select the enter button .
5. To configure settings, such as **File Type and Resolution**, **Sides**, and **Content Orientation**, select **Options** in the lower left corner, and then select the settings from the **Options** menus. Select **Done** if prompted.
6. **Optional Preview:** Touch the right pane of the screen to preview the document. You can use the **Expand** and **Collapse** buttons on the left side of the preview pane to expand and collapse the preview screen.

	Use this button to add a page to the document. The printer prompts to scan additional pages.
	Use this button to clear the changes made in the preview and start over.
	Touch this button to collapse the preview screen and return to the Copy screen.

7. When the document is ready, select [Send](#) to save it to the SharePoint location.

Scan to USB drive

Scan a document directly to a USB drive.

Introduction

The printer can scan a file and save it to a USB flash drive.

Scan to USB drive

Use the following steps to scan a document directly to a USB drive.

 **NOTE:** You might be required to sign in to the printer to use this feature.

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. Insert the USB drive into the USB port near the printer control panel.
3. From the Home screen on the printer control panel, navigate to the **Scan** application, select the **Scan** icon, and then select **Scan to USB Drive**.
4. Select the USB drive under **Destination**, and then select the save location (either the root of the USB drive or an existing folder).
5. Touch the **File Name** text field to open a touchscreen keyboard, type the name for the file, and then select the Enter button .
6. To configure settings, such as **File Type and Resolution**, **Original Sides**, and **Content Orientation**, select **Options** in the lower left corner, and then select the settings from the **Options** menus. Select **Done** if prompted.
7. Optional Preview: Touch the right pane of the screen to preview the document. You can use the **Expand** and **Collapse** buttons on the left side of the preview pane to expand and collapse the preview screen.

Set up fax

Set up the fax features for the printer.

Introduction

This information applies to fax and Flow models, or to other printers when an optional analog fax accessory has been installed. Before continuing, connect the printer to a phone line (for analog fax) or to an Internet or network fax service.

Set up fax by using the printer control panel

Configure the fax features using the control panel.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Open the following menus:
 - a. [Fax](#)
 - b. [Internal Fax Modem Setup](#)

NOTE: If the [Internal Fax Modem Setup](#) menu does not appear in the menu listing, LAN or Internet fax might be enabled. When LAN or Internet fax is enabled, the analog fax accessory is disabled and the [Internal Fax Modem Setup](#) menu does not display. Only one fax feature, either LAN fax, analog fax, or Internet fax, can be enabled at a time. To use analog fax when LAN fax is enabled, use the HP Embedded Web Server to disable LAN fax.

3. Select the location from the list on the right side of the screen, and then select [Next](#).

4. Touch the [Company Name](#) text field, and use the keypad to type the company name.
5. Touch the [Fax Number](#) text field, and use the keypad to type the sending fax number. Select [Next](#).
6. Verify that the date and time settings are correct. Make changes as necessary, and then select [Next](#).
7. If a dialing prefix is required for sending faxes, touch the [Dialing Prefix](#) text field, and use the keypad to enter the number.
8. Review all the information on the left pane, and then select [Finish](#) to complete the fax setup.

Change fax configurations

Change or update fax settings.

NOTE: The settings configured using the control panel override any settings made in the HP Embedded Web Server.

Fax dialing settings

Use the following steps to change the fax dialing settings.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Open the following menus:
 - a. [Fax](#)
 - b. [Fax Send Settings](#)
 - c. [Fax Dialing Settings](#)
3. Configure any of the following settings, and then select [Done](#).

Table 7-1 Fax dialing settings

Menu Item	Description
Redial on Error	The Redial on Error feature sets the number of times a fax number will be redialed when an error occurs during a fax transmission.
Redial on No Answer	The Redial on No Answer setting selects the number of times the fax accessory redials if the number dialed does not answer. The number of retries is either 0 to 1 (used in the U.S.) or 0 to 2, depending on the location setting. The interval between retries is set by the Redial Interval setting.
Redial on Busy	The Redial on Busy setting selects the number of times (0 through 9) the fax accessory redials a number when the number is busy. The interval between retries is set by the Redial Interval setting.
Redial Interval	The Redial Interval setting selects the number of minutes between retries if the number dialed is busy or not answering, or if an error occurs.

NOTE: You might observe a redial message on the control panel when both the [Redial on Busy](#) and [Redial on No Answer](#) settings are set to off. This occurs when the fax accessory dials a number, establishes a connection, and then loses the connection. As a result of this error condition, the fax accessory performs three automatic redial attempts regardless of the redial settings. During this redial operation, a message displays on the control panel to indicate that a redial is in progress.

Table 7-1 Fax dialing settings (continued)

Menu Item	Description
Fax Send Speed	The Fax Send Speed setting sets the modem bit rate (measured in bits per second) of the Analog Fax modem while sending a fax. <ul style="list-style-type: none"> Fast (v.34 - 33.6k) Medium (v.17 - 14.4k) Slow (v.29 - 9.6k)
Line Monitor Volume	Use the Line Monitor Volume setting to control the printer's dialing volume level when sending faxes.
Dialing Mode	The Dialing Mode setting sets the type of dialing that is used: either tone (touch-tone phones) or pulse (rotary-dial phones).
Dialing Prefix	The Dialing Prefix setting allows you to enter a prefix number (such as a "9" to access an outside line) when dialing. This prefix number is automatically added to all phone numbers when dialed.
Detect Dial Tone	The Detect Dial Tone setting determines whether the fax checks for a dial tone before sending a fax.

General fax send settings

Use the following steps to change the fax send settings.

- From the Home screen on the printer control panel, navigate to the **Settings** application, and then select the **Settings** icon.
- Open the following menus:
 - Fax
 - Fax Send Settings
 - General Fax Send Settings
- Configure any of the following settings, and then select **Done**.

Table 7-2 Fax send settings

Menu Item	Description
Fax Number Confirmation	When the Fax Number Confirmation feature is enabled, the fax number must be entered twice to ensure that it was entered correctly. The feature is disabled by default.
PC Fax Send	Use the PC Fax Send feature to send faxes from a PC. This feature is enabled by default.

Table 7-2 Fax send settings (continued)

Menu Item	Description
Error Correction Mode	<p>Normally, the fax accessory monitors the signals on the telephone line while it is sending or receiving a fax. If the fax accessory detects an error during the transmission and the Error Correction Mode setting is on, the fax accessory can request that the error portion of the fax be sent again.</p> <p>The Error Correction Mode feature is enabled by default. You should turn it off only if you are having trouble sending or receiving a fax and if you are willing to accept the errors in the transmission and a probable quality reduction in the image. Turning off the setting might be useful when you are trying to send a fax overseas or receive one from overseas, or if you are using a satellite telephone connection.</p> <p>NOTE: Some VoIP providers might suggest turning off the Error Correction Mode setting. However, this is not usually necessary.</p>
Fax Header	<p>Use the Fax Header feature to control whether the header is appended to the top, and content is shifted down, or if the header is overlaid on top of the previous header.</p>

Fax receive settings

Use the following steps to change the fax receive settings.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Open the following menus:
 - a. Fax
 - b. Fax Receive Settings
 - c. Fax Receive Setup
3. Configure any of the following settings, and then select [Done](#).

Table 7-3 Fax receive settings

Menu Item	Description
Rings to Answer	<p>The Rings to Answer setting determines the number of times the phone rings before the call is answered by the fax accessory.</p> <p>NOTE: The default range for the available options for the Rings to Answer setting is location-specific. The range of possible Rings to Answer options is limited by location.</p> <p>If the fax accessory is not answering, and the Rings to Answer setting is 1, try increasing it to 2.</p>
Ring Volume	<p>The Ring Volume setting allows you to adjust the ringer volume.</p>
Fax Receive Speed	<p>Touch the Fax Receive Speed drop-down menu and select one of the following options:</p> <ul style="list-style-type: none">• Fast (v.34 - 33.6k)• Medium (v.17 - 14.4k)• Slow (v.29 - 9.6k)

Send a fax

Use the following steps to send a fax from the printer.

1. Place the document face-down on the scanner glass, or place it face-up in the document feeder and adjust the paper guides to fit the size of the document.
2. From the Home screen on the printer control panel, navigate to the **Fax** application, and then select the **Fax** icon. You might be prompted to type a user name and password.
3. Specify the recipients using one of these methods:

- Use the keypad to enter the recipient or recipients.

Touch the **Fax Recipients** text field, and then use the keypad to enter the fax number. To send to multiple fax numbers, separate the numbers with a semicolon, or select the Enter button  on the touchscreen keyboard after typing each number.

- Use a contact list as follows:

- a. Select the Contacts button  that is next to the **Fax Recipients** field to open the Contacts screen.
- b. Select the appropriate contact list.
- c. Select a name or names from the list of contacts to add to the recipients list, and then select **Add**.

4. To load a Quick Set, select **Load**, select the Quick Set, and then select **Load** under the **Quick Sets** list.

NOTE: **Quick Sets** are predefined settings for various types of output, such as **Text**, **Photograph**, and **High Quality**. You can select a Quick Set to view the description.

5. To configure settings, such as **Resolution**, **Sides**, and **Content Orientation**, select **Options** in the lower left corner, and then select the settings from the **Options** menus. Select **Done** if prompted.
6. Optional Preview: Touch the right pane of the screen to preview the document. You can use the **Expand** and **Collapse** buttons on the left side of the preview pane to expand and collapse the preview screen.

	Touch this button to collapse the preview screen and return to the Copy screen.

7. When the document is ready, select **Send** to send the fax.

Create a fax printing schedule

Faxes print automatically upon receipt, but they can also be stored and printed on a schedule that you determine. After you create the schedule, you can enable or disable the schedule as needed.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Open the following menus:
 - a. [Fax](#)
 - b. [Fax Receive Settings](#)
 - c. [Fax Printing Schedule](#)
3. Under [Incoming Fax Options](#), select [Use Schedule](#).
4. Select [New Event](#).
5. Select an option under [Event Type](#).
 - [Begin Printing](#)
 - [Begin Storing](#)
6. Choose a time and the day. You can select multiple days.
7. Select [Save](#). To add another event, repeat steps 4 - 6.
8. Select [Done](#) to enable the fax printing schedule.

Block incoming faxes

Use the fax block list setting to create a list of blocked phone numbers. When a fax is received from a blocked phone number, the fax is not printed and is immediately deleted from memory.

Create a list of blocked fax numbers

Use the following steps to create the list of fax numbers to block.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Open the following menus:
 - a. [Fax](#)
 - b. [Fax Receive Settings](#)
 - c. [Blocked Fax Numbers](#)
3. Use one of the following options to add a number to the list:
 - Select [Add Last Sender](#).
 - Select the [New Fax Number](#) field, type the number on the keypad that appears, and then select the Enter button . To add additional numbers, type the number and select the Enter button .

4. Select **Done**.

Delete numbers from the list of blocked fax numbers

Use the following steps to remove numbers from the list of blocked fax numbers.

1. From the Home screen on the printer control panel, navigate to the **Settings** application, and then select the **Settings** icon.
2. Open the following menus:
 - a. **Fax**
 - b. **Fax Receive Settings**
 - c. **Blocked Fax Numbers**
3. Select one or more existing fax numbers in the list, or select **Select All** if you want to remove all the numbers.
4. Select the Trash button , and then select **Delete** on the confirmation prompt.

Additional fax tasks

Locate information on the Web for performing common fax tasks.

Go to [Support for HP Color LaserJet Enterprise MFP 6800](#) or [Support for HP Color LaserJet Enterprise MFP 6801](#).

Instructions are available for fax tasks, such as the following:

- Create and manage fax speed dial lists
- Configure fax billing codes
- Use a fax printing schedule
- Block incoming faxes
- Fax archiving and forwarding

8 Manage the printer

Utilize management tools, configure security and energy-conservation settings, and manage firmware updates for the printer.

Advanced configuration with the HP Embedded Web Server (EWS)

Use the HP Embedded Web Server to manage advanced printing functions.

Introduction

Use the HP Embedded Web Server to manage printing functions from a computer instead of the printer control panel.

- View printer status information
- Determine the remaining life for all supplies and order new ones
- View and change tray configurations
- View and change the printer control-panel menu configuration
- View and print internal pages
- Receive notification of printer and supplies events
- View and change network configuration

The HP Embedded Web Server works when the printer is connected to an IP-based network. The HP Embedded Web Server does not support IPX-based printer connections. Internet access is not needed to open and use the HP Embedded Web Server.

When the printer is connected to the network, the HP Embedded Web Server is automatically available.

NOTE: The HP Embedded Web Server is not accessible beyond the network firewall.

How to access the HP Embedded Web Server (EWS)

Use the following steps to open the Embedded Web Server.

1. From the Home screen on the printer control panel, touch the Information icon , and then touch the Ethernet icon  to display the IP address or host name.
2. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the **Enter** key on the computer keyboard. The EWS web page opens.

A screenshot of a web browser address bar showing the URL "https://10.10.XX.XXX". The address bar has a globe icon on the left and a blue underline.

NOTE: If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

To use the HP Embedded Web Server, the browser must meet the following requirements:

Windows® 7

- Internet Explorer (version 8.x or greater)
- Google Chrome (version 34.x or greater)
- Firefox (version 20.x or greater)

Windows® 8 or greater

- Internet Explorer (version 9.x or greater)
- Google Chrome (version 34.x or greater)
- Firefox (version 20.x or greater)

Windows 10 or greater

- Microsoft Edge (version 93 or greater)
- Internet Explorer (version 9.x or greater)
- Google Chrome (version 34.x or greater)
- Firefox (version 20.x or greater)

macOS

- Safari (version 5.x or greater)
- Google Chrome (version 34.x or greater)

Linux

- Google Chrome (version 34.x or greater)

- Firefox (version 20.x or greater)

Figure 8-1 EWS Tabs

The screenshot shows the HP Embedded Web Server interface. At the top, there is a search bar and a user profile for 'Administrator'. Below this is a navigation bar with tabs: Information, General, Copy/Print, Scan/Digital Send, Fax, Supplies, Troubleshooting, Security, HP Web Services, and Networking. The 'Information' tab is currently selected. The main content area is titled 'Device Status' and includes a sidebar with links like 'Job Log', 'Configuration Page', and 'Supplies Status Page'. The main content shows 'Sleep mode on', 'Supplies' status for four cartridges (Yellow, Magenta, Cyan, Black) with 80% and 70% levels, and a 'Media' section with a table of trays (Tray 1-4) showing their status, capacity, size, and type.

NOTE: Copy/Print, Scan/Digital Send, and Fax tabs only appear for multi-function printers (MFPs). A Print tab appears for single-function printers (SFPs).

Configure IP network settings

Use the EWS to configure the printer network settings.

Printer sharing disclaimer

Review the following disclaimer.

HP does not support peer-to-peer networking, as the feature is a function of Microsoft operating systems and not of the HP printer drivers. Go to Microsoft at www.microsoft.com.

View or change network settings

Use the HP Embedded Web Server to view or change IP configuration settings.

1. Open the HP Embedded Web Server (EWS):
 - a. From the Home screen on the printer control panel, touch the Information icon , and then touch the Ethernet icon  to display the IP address or host name.
 - b. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the `Enter` key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

2. Click the **Networking** tab to obtain network information. Change settings as needed.

Rename the printer on a network

To rename the printer on a network so that it can be uniquely identified, use the HP Embedded Web Server.

1. Open the HP Embedded Web Server (EWS):
 - a. From the Home screen on the printer control panel, touch the Information icon , and then touch the Ethernet icon  to display the IP address or host name.
 - b. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the `Enter` key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

2. Open the **General** tab.
3. On the Device Information page, the default printer name is in the **Device Name** field. You can change this name to uniquely identify this printer.

 **NOTE:** Completing the other fields on this page is optional.

4. Click the **Apply** button to save the changes.

Manually configure IPv4 TCP/IP parameters from the control panel

Use the control-panel [Settings](#) menus to manually set an IPv4 address, subnet mask, and default gateway.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Open the following menus:
 - a. [Networking](#)
 - b. [Ethernet](#)
 - c. [TCP/IP](#)
 - d. [IPV 4 Settings](#)
 - e. [Config Method](#)
3. Select the [Manual](#) option, and then touch the [Save](#) button.
4. Open the [Manual Settings](#) menu.
5. Touch the [IP Address](#), [Subnet Mask](#), or [Default Gateway](#) option.
6. Touch the first field to open a keypad. Enter the correct digits for the field, and then touch the [OK](#) button.

Repeat the process for each field, and then touch the [Save](#) button.

Manually configure IPv6 TCP/IP parameters from the control panel

Use the control-panel [Settings](#) menus to manually set an IPv6 address.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. To enable manual configuration, open the following menus:
 - a. [Networking](#)
 - b. [Ethernet](#)
 - c. [TCP/IP](#)
 - d. [IPV6 Settings](#)
3. Select [Enable](#), and then select [On](#).
4. Select the [Enable Manual Settings](#) option, and then touch the [Done](#) button.
5. To configure the address, open the [Address](#) menu, and then touch the field to open a keypad.
6. Use the keypad to enter the address, and then touch the [OK](#) button.
7. Touch [Save](#).

Link speed and duplex settings

Use the following steps to make changes to link speed and duplex settings.

 **NOTE:** This information applies only to Ethernet networks. It does not apply to wireless networks.

The link speed and communication mode of the print server must match the network hub. For most situations, leave the printer in automatic mode. Incorrect changes to the link speed and duplex settings might prevent the printer from communicating with other network devices. To make changes, use the printer control panel.

 **NOTE:** The printer setting must match the setting for the network device (a network hub, switch, gateway, router, or computer).

 **NOTE:** Making changes to these settings causes the printer to turn off and then on. Make changes only when the printer is idle.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Open the following menus:
 - a. [Networking](#)
 - b. [Ethernet](#)
 - c. [Link Speed](#)
3. Select one of the following options:
 - [Auto](#): The print server automatically configures itself for the highest link speed and communication mode allowed on the network.
 - [10T Half](#): 10 megabytes per second (Mbps), half-duplex operation
 - [10T Full](#): 10 Mbps, full-duplex operation
 - [10T Auto](#): 10 Mbps, automatic-duplex operation
 - [100TX Half](#): 100 Mbps, half-duplex operation
 - [100TX Full](#): 100 Mbps, full-duplex operation
 - [100TX Auto](#): 100 Mbps, automatic-duplex operation
 - [1000T Full](#): 1000 Mbps, full-duplex operation
4. Touch the [Save](#) button. The printer turns off and then on.

Printer security features

Restrict who has access to configuration settings, secure data, and prevent access to valuable hardware components.

Introduction

The printer includes several security features to restrict who has access to configuration settings, to secure data, and to prevent access to valuable hardware components.

Security statements

Review this important security statement.

The printer supports security standards and recommended protocols that help you keep the printer secure, protect critical information on your network, and simplify the way you monitor and maintain the printer.

Assign an administrator password

Assign an administrator password for access to the printer and the HP Embedded Web Server so that unauthorized users cannot change the printer settings.

Use the HP Embedded Web Server (EWS) to set the password

Use the following steps to set a password for the printer.

1. Open the HP Embedded Web Server (EWS):
 - a. From the Home screen on the printer control panel, touch the Information icon , and then touch the Ethernet icon  to display the IP address or host name.
 - b. Open a web browser, and in the address line, type the IP address or host name exactly as it displays on the printer control panel. Press the `Enter` key on the computer keyboard. The EWS opens.

 **NOTE:** If the web browser displays a message indicating that accessing the website might not be safe, select the option to continue to the website. Accessing this website will not harm the computer.

2. Click the **Security** tab.
3. Open the **General Security** menu.
4. In the area labeled **Set the Local Administrator Password**, enter the name to associate with the password in the **Username** field.
5. Enter the password in the **New Password** field, and then enter it again in the **Verify Password** field.

 **NOTE:** To change an existing password, first enter the existing password in the **Old Password** field.

6. Click the **Apply** button.

 **IMPORTANT:** Make note of the password and store it in a safe place. The administrator password cannot be recovered. If the administrator password is lost or forgotten, contact HP Support for the assistance required to completely reset the printer.

[Click here to contact HP Support about resetting the printer password.](#)

Provide user access credentials at the printer control panel

Use the following steps to sign into the control panel.

Some features on the printer control panel can be secured so that unauthorized people cannot use them. When a feature is secured, the printer prompts you to sign in before you can use it. You can also sign in without waiting for a prompt by selecting [Sign In](#) from the printer control panel.

Typically, the credentials for signing in to the printer are the same as for signing in to the network. Consult the network administrator for this printer if you have questions about which credentials to use.

1. From the Home screen on the printer control panel, select [Sign In](#).
2. Follow the prompts to enter the credentials.

 **NOTE:** To maintain security for the printer, select [Sign Out](#) when you have finished using the printer.

IP Security

IP Security (IPsec) is a set of protocols that control IP-based network traffic to and from the printer. IPsec provides host-to-host authentication, data integrity, and encryption of network communications.

For printers that are connected to the network and have an HP Jetdirect print server, you can configure IPsec by using the **Networking** tab in the HP Embedded Web Server.

Encryption support: HP High Performance Secure Hard Disks

The hard disk provides hardware-based encryption so you can securely store sensitive data without impacting printer performance. This hard disk uses the latest Advanced Encryption Standard (AES) and has versatile time-saving features and robust functionality.

Use the **Security** menu in the HP Embedded Web Server to configure the disk.

Lock the formatter

The formatter has a slot that you can use to attach a security cable.

Locking the formatter prevents someone from removing valuable components from it.

Energy-conservation settings

Learn about the energy-conservation settings that are available for the printer.

Set the sleep timer and configure the printer to use 1 watt or less of power

The sleep settings affect how much power the printer uses, the wake/sleep time, how quickly the printer enters sleep mode, and how quickly the printer wakes up from sleep mode.

To configure the printer to use 1 watt or less of power while in sleep mode, enter the time for the [Sleep after Inactivity](#) setting.

1. From the Home screen on the printer control panel, select [Settings](#).
2. Open the following menus:
 - [General](#)
 - [Energy Settings](#)
 - [Sleep Settings](#)

3. Select **Sleep after Inactivity** to specify the number of minutes the printer is inactive before it enters sleep mode. Enter the appropriate time period.
4. Select **Done** to save the settings.

Set the sleep schedule

Use the **Sleep Schedule** feature to configure the printer to automatically wake or go into Sleep mode at specific times on specific days of the week.

1. From the Home screen on the printer control panel, navigate to the **Settings** application, and then select the **Settings** icon.
2. Open the following menus:
 - a. **General**
 - b. **Energy Settings**
 - c. **Sleep Schedule**
3. Select the **New Event** button, and then select the type of event to schedule: **Wake Event** or **Sleep Event**.
4. For a wake or sleep event, configure the time and the days of the week for the event. Select **Save** to save the setting.

HP Web Jetadmin

HP Web Jetadmin is an award-winning, industry-leading tool for efficiently managing a wide variety of networked HP products, including printers, multifunction printers, and digital senders. This single solution allows you to remotely install, monitor, maintain, troubleshoot, and secure your printing and imaging environment – ultimately increasing business productivity by helping you save time, control costs, and protect your investment.

HP Web Jetadmin upgrades are periodically made available to provide support for specific product features. Go to www.hp.com/go/webjetadmin for more information.

Software and firmware updates

HP regularly updates features that are available in the printer firmware. To take advantage of the most current features, update the printer firmware.

Download the most recent firmware update file from the web:

Control panel help system

The printer has a built-in Help system that explains how to use each screen. To open the Help system, touch the Help button  in the upper-right corner of the screen.

For some screens, the Help opens to a global menu where you can search for specific topics. You can browse through the menu structure by touching the buttons in the menu.

Some Help screens include animations that show specific procedures, such as clearing paper jams.

If the printer alerts of an error or warning, touch the Help button  to open a message that describes the problem. The message also contains instructions to help solve the problem.

Reset factory settings

Resetting the printer settings to the factory-set defaults can help resolve problems.

Introduction

Use one of the following methods to reset the printer settings to the original settings from the factory.

Method one: Reset factory settings from the printer control panel

Use the printer control panel to restore the settings to their original values.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Open the following menus:
 - a. [General](#)
 - b. [Reset Factory Settings](#)
3. Select [Reset](#).

A verification message advises that completing the reset function might result in loss of data.

4. Select [Reset](#) to complete the process.

NOTE: The printer restarts automatically after the reset operation completes.

Method two: Reset factory settings from the HP Embedded Web Server (network-connected printers only)

Use the HP EWS to reset the printer settings to the original settings.

1. On the printer control panel, select the Information button , and then select the Network icon  to display the IP address or host name.
2. Open the **General** tab.
3. On the left side of the screen, click **Reset Factory Settings**.
4. Click the **Reset** button.

NOTE: The printer restarts automatically after the reset operation completes.

A “Cartridge is low” or “Cartridge is very low” message displays on the printer control panel or EWS

Review the possible solutions to this issue.

Cartridge is low: The printer indicates when a toner cartridge level is low. Actual toner cartridge life remaining may vary. Consider having a replacement available to install when print quality is no longer acceptable. The toner cartridge does not need to be replaced now.

Continue printing with the current cartridge until redistributing the toner no longer yields acceptable print quality. To redistribute the toner, remove the toner cartridge from the printer and gently rock the cartridge back and forth end to end. Reinsert the toner cartridge into the printer and close the cover.

Cartridge is very low: The printer indicates when the toner cartridge level is very low. Actual toner cartridge life remaining may vary. To extend the life of the toner, gently rock the cartridges back and forth end to end. Consider having a replacement available to install when print quality is no longer acceptable. The toner cartridge does not need to be replaced now unless the print quality is no longer acceptable.

HP's Premium Protection Warranty expires when a message indicating that HP's Premium Protection Warranty on this supply has ended appears on the Supplies Status Page or the EWS.

Change the “Very Low” settings

You can change the way the printer reacts when supplies reach the Very Low state. You do not have to re-establish these settings when you install a new cartridge.

Change the “Very Low” settings at the control panel

Change the setting at the printer control panel.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Open the following menus:
 - a. [Manage Supplies](#)
 - b. [Very Low Behavior](#)
 - c. [Black Cartridge or Color Cartridges](#)
3. Select one of the following options:
 - Select the [Stop](#) option to set the printer to stop printing when the cartridge reaches the **Very Low** threshold.
 - Select the [Prompt to continue](#) option to set the printer to stop printing when the cartridge reaches the **Very Low** threshold. You can acknowledge the prompt or replace the cartridge to resume printing.

- Select the **Continue** option to set the printer to alert you that the cartridge is very low, and to continue printing beyond the **Very Low** setting without interaction. This can result in unsatisfactory print quality.

For printers with fax capability

When the printer is set to the **Stop** or **Prompt to continue** option, there is some risk that faxes will not print when the printer resumes printing. This can occur if the printer has received more faxes than the memory can hold while the printer is waiting.

The printer can print faxes without interruption when it passes the Very Low threshold if you select the **Continue** option for the cartridge, but print quality might degrade.

Printer does not pick up paper or misfeeds

Use this information if the printer is not picking up paper from the tray or is picking up multiple sheets of paper at one time.

Introduction

The following solutions can help solve problems if the printer is not picking up paper from the tray or is picking up multiple sheets of paper at one time. Either of these situations can result in paper jams.

The printer does not pick up paper

If the printer does not pick up paper from the tray, try these solutions:

1. Open the printer and remove any jammed sheets of paper. Verify that no torn remnants of paper remain inside the printer.
2. Load the tray with the correct size of paper for the job.
3. Make sure the paper size and type are set correctly on the printer control panel.
4. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides to the appropriate indentation in the tray. The arrow on the tray guide should line up exactly with the marking on the tray.

 **NOTE:** Do not adjust the paper guides tightly against the paper stack. Adjust them to the indentations or markings in the tray.

The following images show examples of the paper-size indentations in the trays for various printers. Most HP printers have markings similar to these.

Figure 9-1 Size markings for Tray 1 or the multipurpose tray

Figure 9-2 Size markings for cassette trays

5. Verify that the humidity in the room is within specifications for this printer and that paper is being stored in unopened packages. Most reams of paper are sold in moisture-proof wrapping to keep paper dry.

In high-humidity environments, paper at the top of the stack in the tray can absorb moisture, and it might have a wavy or uneven appearance. If this happens, remove the top 5 to 10 sheets of paper from the stack.

In low-humidity environments, excess static electricity can cause sheets of paper to stick together. If this happens, remove the paper from the tray, and flex the stack by holding it at each end and bringing the ends up to form a U shape. Then, rotate the ends down to reverse the U shape. Next, hold each side of the stack of paper and repeat this process. This process releases individual sheets without introducing static electricity. Straighten the paper stack against a table before returning it to the tray.

Figure 9-3 Technique for flexing the paper stack

6. Check the printer control panel to see if it is displaying a prompt to feed the paper manually. Load paper, and continue.
7. The rollers above the tray might be contaminated. Clean the rollers with a lint-free cloth dampened with warm water. Use distilled water, if it is available.

⚠ CAUTION: Do not spray water directly onto the printer. Instead, spray water on the cloth or dab the cloth in water and wring it out before cleaning the rollers.

The following image shows examples of the roller location for various printers.

Figure 9-4 Roller locations for Tray 1 or the multipurpose tray

The printer picks up multiple sheets of paper

If the printer picks up multiple sheets of paper from the tray, try these solutions:

1. Remove the stack of paper from the tray and flex it, rotate it 180 degrees, and flip it over. *Do not fan the paper.* Return the stack of paper to the tray.

 **NOTE:** Fanning the paper introduces static electricity. Instead of fanning the paper, flex the stack by holding it at each end and bringing the ends up to form a U shape. Then, rotate the ends down to reverse the U shape. Next, hold each side of the stack of paper and repeat this process. This process releases individual sheets without introducing static electricity. Straighten the paper stack against a table before returning it to the tray.

Figure 9-5 Technique for flexing the paper stack

2. Use only paper that meets HP specifications for this printer.
3. Verify that the humidity in the room is within specifications for this printer, and that paper is being stored in unopened packages. Most reams of paper are sold in moisture-proof wrapping to keep paper dry.

In high-humidity environments, paper at the top of the stack in the tray can absorb moisture, and it might have a wavy or uneven appearance. If this happens, remove the top 5 to 10 sheets of paper from the stack.

In low-humidity environments, excess static electricity can cause sheets of paper to stick together. If this happens, remove the paper from the tray and flex the stack as described above.

4. Use paper that is not wrinkled, folded, or damaged. If necessary, use paper from a different package.
5. Make sure the tray is not overfilled by checking the stack-height markings inside the tray. If it is overfilled, remove the entire stack of paper from the tray, straighten the stack, and then return some of the paper to the tray.

The following examples show the stack-height markings in the trays for various printers. Most HP printers have markings similar to these. Also make sure that all sheets of paper are below the tabs near the stack-height marks. These tabs help hold the paper in the correct position as it enters the printer.

Figure 9-6 Stack-height markings

Figure 9-7 Tab for the paper stack

6. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides to the appropriate indentation in the tray. The arrow on the tray guide should line up exactly with the marking on the tray.

 **NOTE:** Do not adjust the paper guides tightly against the paper stack. Adjust them to the indentations or markings in the tray.

The document feeder jams, skews, or picks up multiple sheets of paper

If the document feeder jams, skews, or picks up multiple sheets of paper, try these solutions.

 **NOTE:** This information applies to MFP printers only.

- The original might have something on it, such as staples or self-adhesive notes, that must be removed.

- Check that all rollers are in place and that the roller-access cover inside the document feeder is closed.
- Make sure that the top document-feeder cover is closed.
- The pages might not be placed correctly. Straighten the pages and adjust the paper guides to center the stack.
- The paper guides must be touching the sides of the paper stack to work correctly. Make sure that the paper stack is straight and the guides are against the paper stack.
- The document feeder input tray or output bin might contain more than the maximum number of pages. Make sure the paper stack fits below the guides in the input tray, and remove pages from the output bin.
- Verify that there are no pieces of paper, staples, paper clips, or other debris in the paper path.
- Clean the document-feeder rollers and the separation pad. Use compressed air or a clean, lint-free cloth moistened with warm water. If misfeeds still occur, replace the rollers.
- From the Home screen on the printer control panel, scroll to and touch the [Supplies](#) button. Check the status of the document-feeder kit, and replace it if necessary.

Auto-navigation for clearing paper jams

Learn about printer jam clearing auto-navigation.

The auto-navigation feature assists in clearing jams by providing step-by-step instructions on the control panel.

When you complete a step, the printer displays instructions for the next step until you have completed all steps in the procedure.

Experiencing frequent or recurring paper jams?

To reduce the number of paper jams, try these solutions.

1. Use only paper that meets HP specifications for this printer.
2. Use paper that is not wrinkled, folded, or damaged. If necessary, use paper from a different package.
3. Use paper that has not previously been printed or copied on.
4. Make sure the tray is not overfilled. If it is, remove the entire stack of paper from the tray, straighten the stack, and then return some of the paper to the tray.
5. Make sure the paper guides in the tray are adjusted correctly for the size of paper. Adjust the guides so they are touching the paper stack without bending it.
6. Make sure that the tray is fully inserted in the printer.
7. If you are printing on heavy, embossed, or perforated paper, use the manual feed feature and feed sheets one at a time.
8. Open the **Trays** menu on the printer control panel. Verify that the tray is configured correctly for the paper type and size.
9. Make sure the printing environment is within recommended specifications.

31.13.yz jam error in the document feeder

The following information describes how to clear paper jams in the document feeder. When a jam occurs, the control panel displays an animation that assists in clearing the jam.

In addition to the instructions provided below

NOTE: The printer model referenced in this video might be different from your printer model, but the steps to clear the jam are the same.

Recommended action for customers

When a jam occurs, the control panel displays a message and an animation that assists in clearing the jam.

- 31.13.01 Jam in document feeder
- 31.13.02 Jam in document feeder
- 31.13.13 Jam in document feeder

1. Remove paper from the exit assembly of the document feeder.

2. Open the document-feeder cover.

3. Remove any jammed paper from the document feeder input area.

4. Lift the document feeder and check the lower side of the feed path.

5. Make sure the guides in the document-feeder input tray are adjusted to the correct size for the document before loading paper.

-
-  **NOTE:** To avoid document feeder jams, to copy narrow documents, use the flatbed scanner. Remove all staples and paper clips from original documents. Do not feed damaged or wrinkled paper.
 -  **NOTE:** Original documents that are printed on heavy, glossy paper can jam more frequently than originals that are printed on plain paper.
 -  **IMPORTANT:** Warning: Do not run labels through the automatic document feeder (ADF).
-

6. If the paper continues to jam, remove and clean the document feeder rollers.
 - a. Open the document-feeder jam access door.

Figure 9-12 Open the document-feeder jam access door

- b. Release the blue locking arm to drop the assembly down. Slide the pickup and feed roller assembly to the left, and then pull it away from the document feeder to remove it.

Figure 9-13 Release the blue locking arm

- c. Lift the roller cover up and then slide the roller toward the front of the printer to remove it.

Resolving color print quality problems

Use the information below to troubleshoot print-quality, color-quality, and image-quality problems on HP Color LaserJet Enterprise printers.

Introduction

The troubleshooting steps can help resolve the following defects:

- Blank pages
- Black pages
- Colors that do not align
- Curled paper
- Dark or light bands
- Dark or light streaks
- Fuzzy print
- Gray background or dark print
- Light print
- Loose toner
- Missing toner

- Scattered dots of toner
- Skewed images
- Smears
- Streaks

Troubleshoot print quality

To resolve print-quality issues, try these steps in the order presented.

To troubleshoot specific image defects, see Troubleshoot image defects.

Update the printer firmware

Try upgrading the printer firmware.

For instructions, go to www.hp.com/support.

Print from a different software program

Try printing from a different software program.

If the page prints correctly, the problem is with the software program from which you were printing.

Check the paper-type setting for the print job

Check the paper type setting when printing from a software program and the printed pages have smears, fuzzy or dark print, curled paper, scattered dots of toner, loose toner, or small areas of missing toner.

Check the paper type setting on the control panel

Check the paper type setting on the printer control panel, and change the setting as needed.

1. Open and close the paper tray.
2. Follow the control panel prompts to confirm or modify the paper type and size settings for the tray.
3. Make sure the paper loaded meets specifications.
4. Adjust the humidity and resistance setting on the control panel to match the environment.
 - a. Open the following menus:
 - i. Settings
 - ii. Copy/Print
 - iii. Print quality
 - iv. Adjust paper type
 - b. Select the paper type that matches the type loaded in the tray.
 - c. Use the arrows to increase or decrease the humidity and resistance setting.
5. Make sure the driver settings match the control panel settings.

NOTE: The print driver settings will override any control panel settings.

Check the paper type setting (Windows)

Check the paper type setting for Windows, and change the setting as needed.

NOTE: The print driver settings will override any control panel settings.

1. From the software program, select the **Print** option.
2. Select the printer, and then click the **Properties** or **Preferences** button.
3. Click the **Paper/Quality** tab.
4. From the **Paper Type** drop-down list, click the **More...** option.
5. Expand the list of **Type is:** options.
6. Expand the category of paper types that best describes your paper.
7. Select the option for the type of paper you are using, and click the **OK** button.
8. Click the **OK** button to close the **Document Properties** dialog box. In the **Print** dialog box, click the **OK** button to print the job.

Check the paper type setting (macOS)

Check the paper type setting for macOS, and change the setting as needed.

1. Click the **File** menu, and then click the **Print** option.
2. In the **Printer** menu, select the printer.
3. By default, the print driver displays the **Copies & Pages** menu. Open the menus drop-down list, and then click the **Finishing** menu.
4. Select a type from the **Media Type** drop-down list.
5. Click the **Print** button.

Check toner-cartridge status

Follow these steps to check the estimated life remaining in the toner cartridges and if applicable, the status of other replaceable maintenance parts.

Step one: Print the Supplies Status Page

The supplies status page indicates the cartridge status.

1. From the Home screen on the printer control panel, select the **Reports** menu.
2. Select the **Configuration/Status Pages** menu.
3. Select **Supplies Status Page**, and then select **Print** to print the page.

Step two: Check supplies status

Check the supplies status report as follows.

1. Look at the supplies status report to check the percent of life remaining for the toner cartridges and, if applicable, the status of other replaceable maintenance parts.

Print quality problems can occur when using a toner cartridge that is at its estimated end of life. The supplies status page indicates when a supply level is very low. After an HP supply has reached the very low threshold, HP's premium protection warranty on that supply has ended.

The toner cartridge does not need to be replaced now unless the print quality is no longer acceptable. Consider having a replacement available to install when print quality is no longer acceptable.

If you determine that you need to replace a toner cartridge or other replaceable maintenance parts, the supplies status page lists the genuine HP part numbers.

2. Check to see if you are using a genuine HP cartridge.

A genuine HP toner cartridge has the word "HP" on it, or has the HP logo on it. For more information on identifying HP cartridges go to www.hp.com/go/learnaboutsupplies.

Print a cleaning page

During the printing process paper, toner, and dust particles can accumulate inside the printer and can cause print-quality issues such as toner specks or spatter, smears, streaks, lines, or repeating marks.

Follow these steps to clean the printer paper path:

1. From the Home screen on the printer control panel, select the **Support Tools** menu.
2. Select the following menus:
 - a. **Maintenance**
 - b. **Calibration/Cleaning**
 - c. **Cleaning Page**
3. Select **Print** to print the page.

A **Cleaning...** message displays on the printer control panel. The cleaning process takes a few minutes to complete. Do not turn the printer off until the cleaning process has finished. When it is finished, discard the printed page.

Visually inspect the toner cartridge or cartridges

Follow these steps to inspect each toner cartridge:

1. Remove the toner cartridge from the printer, and verify that the sealing tape has been removed.
2. Check the memory chip for damage.
3. Examine the surface of the green imaging drum.

 **CAUTION:** Do not touch the imaging drum. Fingerprints on the imaging drum can cause print-quality problems.

4. If you see any scratches, fingerprints, or other damage on the imaging drum, replace the toner cartridge.
5. Reinstall the toner cartridge and print a few pages to see if the problem has resolved.

Check paper and the printing environment

Use the following information to check the paper selection and the printing environment.

Step one: Use paper that meets HP specifications

Some print-quality problems arise from using paper that does not meet HP specifications.

- Always use a paper type and weight that this printer supports.
- Use paper that is of good quality and free of cuts, nicks, tears, spots, loose particles, dust, wrinkles, voids, staples, and curled or bent edges.
- Use paper that has not been previously printed on.
- Use paper that does not contain metallic material, such as glitter.
- Use paper that is designed for use in laser printers. Do not use paper that is designed only for use in Inkjet printers.
- Use paper that is not too rough. Using smoother paper generally results in better print quality.

Step two: Check the environment

The environment can directly affect print quality and is a common cause of print-quality or paper-feeding issues. Try the following solutions:

- Move the printer away from drafty locations, such as open windows or doors, or air-conditioning vents.
- Make sure the printer is not exposed to temperatures or humidity outside of printer specifications.
- Do not place the printer in a confined space, such as a cabinet.
- Place the printer on a sturdy, level surface.
- Remove anything that is blocking the vents on the printer. The printer requires good air flow on all sides, including the top.
- Protect the printer from airborne debris, dust, steam, grease, or other elements that can leave residue inside the printer.

Step three: Set the individual tray alignment

Follow these steps when text or images are not centered or aligned correctly on the printed page when printing from specific trays.

1. From the Home screen on the printer control panel, select the [Settings](#) menu.
2. Select the following menus:
 - a. [Copy/Print or Print](#)
 - b. [Print Quality](#)
 - c. [Image Registration](#)
3. Select [Tray](#), and then select the tray to adjust.
4. Select [Print Test Page](#), and then follow the instructions on the printed pages.

5. Select [Print Test Page](#) again to verify the results, and then make further adjustments if necessary.
6. Select [Done](#) to save the new settings.

Try a different print driver

Try a different print driver when printing from a software program and the printed pages have unexpected lines in graphics, missing text, missing graphics, incorrect formatting, or substituted fonts.

Download a different print driver from the HP support Web site: [Support for HP Color LaserJet Enterprise MFP 6800](#) or [Support for HP Color LaserJet Enterprise MFP 6801](#).

Troubleshoot color quality

Calibrating the printer can help ensure color print quality.

Calibrate the printer to align the colors

Calibration is a printer function that optimizes print quality.

Follow these steps to resolve print-quality problems such as misaligned color, colored shadows, blurry graphics, or other print-quality issues.

1. From the Home screen on the printer control panel, select the [Support Tools](#) menu.
2. Select the following menus:
 - [Maintenance](#)
 - [Calibration/Cleaning](#)
 - [Full Calibration](#)
3. Select [Start](#) to start the calibration process.

A **Calibrating** message will display on the printer control panel. The calibration process takes a few minutes to complete. Do not turn the printer off until the calibration process has finished.

4. Wait while the printer calibrates, and then try printing again.

Troubleshoot image defects

Review examples of image defects and steps to resolve these defects.

Image defects, no matter the cause, can often be resolved using the same steps. Use the following steps as a starting point for solving image defect issues.

1. Reprint the document. Print quality defects can be intermittent in nature or can go away completely with continued printing.
2. Check the condition of the cartridge or cartridges. If a cartridge is in a **Very Low** state (it has passed the rated life), replace the cartridge.
3. Make sure that the driver and tray print mode settings match the media that is loaded in the tray. Try using a different ream of media or a different tray. Try using a different print mode.
4. Make sure the printer is within the supported operating temperature/humidity range.
5. Make sure that the paper type, size, and weight are supported by the printer. See the printer support page at support.hp.com for a list of the supported paper sizes and types for the printer.

 **NOTE:** The term "fusing" refers to the part of the printing process where toner is affixed to paper.

The following examples depict letter-size paper that has passed through the printer with the short edge first.

Table 9-3 Banding defects

	<p>Dark or light lines which repeat down the length of the page, and are wide-pitch and/or impulse bands. They might be sharp or soft in nature. The defect displays only in areas of fill, not in text or sections with no printed content.</p>	<ol style="list-style-type: none"> 1. Reprint the document. 2. Try printing from another tray. 3. Replace the cartridge. 4. Use a different paper type. 5. Enterprise models only. From the Home screen on the printer control panel, go to the Adjust Paper Types menu, and then choose a print mode that is designed for a slightly heavier media than what you are using. This slows the print speed and might improve the print quality. 6. If the issue persists, go to support.hp.com.

Table 9-4 Black page

If the issue persists, go to support.hp.com.

Improve copy image quality

If the printer is having copy quality problems, try the following solutions in the order presented to resolve the issue.

Try these few simple steps first:

- Use the flatbed scanner rather than the document feeder.
- Use high-quality originals.
- When using the document feeder, load the original document into the feeder correctly, using the paper guides, to avoid unclear or skewed images.

If the problem still exists, try these additional solutions. If they do not fix the problem, see “Improve print quality” for further solutions.

Check the scanner glass for dirt and smudges

Learn about solving copy-quality debris problems.

Over time, specks of debris might collect on the scanner glass and document feeder white plastic backing, which might cause print defects. Use the following procedure to clean the scanner if the printed pages have streaks, unwanted lines, black dots, poor print quality, or unclear text.

1. Press the power button to turn the printer off, and then disconnect the power cable from the electrical outlet.

2. Open the scanner lid.

3. Clean the scanner glass (callout 1) and the document feeder strips (callout 2, callout 3) with a soft cloth or sponge that has been moistened with nonabrasive glass cleaner.

⚠ CAUTION: Do not use abrasives, acetone, benzene, ammonia, ethyl alcohol, or carbon tetrachloride on any part of the printer; these can damage the printer. Do not place liquids directly on the glass or platen. They might seep and damage the printer.

📝 NOTE: If you are having trouble with streaks on copies when you are using the document feeder, be sure to clean the small strips of glass on the left side of the scanner (callout 2, callout 3).

4. Dry the glass and white plastic parts with a chamois or a cellulose sponge to prevent spotting.
5. Connect the power cable to an outlet, and then press the power button to turn the printer on.

Calibrate the scanner

Calibration is a process that optimizes scan quality.

📝 NOTE: When using the document feeder, make sure to adjust the guides in the input tray so they are against the original document.

1. From the Home screen on the printer control panel, navigate to the [Support Tools](#) application, and then select the [Support Tools](#) icon.
2. Open the following menus:
 - a. [Maintenance](#)
 - b. [Calibration/Cleaning](#)
 - c. [Calibrate Scanner](#)

3. Touch the **Start** button to start the calibration process. Follow the on-screen prompts.
4. Wait while the printer calibrates, and then try copying again.

Check the paper settings

Follow these steps if copied pages have smears, fuzzy or dark print, curled paper, or areas where pigment has dropped out.

Check the paper selection options

Use the following steps to check the paper selection options.

1. From the Home screen on the printer control panel, navigate to the **Copy** application, and then select the **Copy** icon.
2. Select **Options**, and then scroll to and select **Paper Selection**.
3. Select **Paper size**, and then select one of the predefined options.
4. Select **Paper type**, and then select one of the predefined options.
5. Select **Paper tray**, and then select one of the predefined options.
6. Select **Done** to save the paper selection options.

Check the image-adjustment settings

Adjust the settings in the **Copy** menu to optimize image quality.

- **Sharpness:** Clarify or soften the image. For example, increasing the sharpness could make text appear crisper, but decreasing it could make photos appear smoother.
 - **Darkness:** Increase or decrease the amount of white and black used in colors in scanned images.
 - **Contrast:** Increase or decrease the difference between the lightest and the darkest color on the page.
 - **Background Cleanup:** Remove faint colors from the background of scanned images. For example, if the original document is printed on colored paper, use this feature to lighten the background without affecting the darkness of the image.
 - **Automatic Tone:** Available for Flow printers only. The printer automatically adjusts the **Darkness**, **Contrast**, and **Background Cleanup** settings to the most appropriate for the scanned document.
1. From the Home screen on the printer control panel, navigate to the **Copy** application, and then select the **Copy** icon.
 2. Select **Options**, and then scroll to and select **Image Adjustment**.
 3. Adjust the sliders to set the levels, and select **Done**.
 4. Select **Copy** to start the copy job.

NOTE: These settings are temporary. After you have finished the job, the printer returns to the default settings.

Optimize copy quality for text or pictures

Optimize the copy job for the type of image being copied: text, graphics, or photos.

1. From the Home screen on the printer control panel, navigate to the **Copy** application, and then select the **Copy** icon.
2. Select **Options**, and then select **Optimize Text/Picture**.
3. Select one of the predefined options.
4. Select **Copy** to start the copy job.

NOTE: These settings are temporary. After you have finished the job, the printer returns to the default settings.

Improve scan image quality

Try the following basic solutions to improve scanned image quality.

- Use the flatbed scanner rather than the document feeder.
- Use high-quality originals.
- When using the document feeder, load the original document into the feeder correctly, using the paper guides, to avoid unclear or skewed images.

If the problem still exists, try these additional solutions. If they do not fix the problem, see “Improve print quality” for further solutions.

Check the resolution settings

Follow these steps to adjust the resolution setting. Setting the resolution to a high value increases the file size and the scan time.

1. From the Home screen on the printer control panel, navigate to the [Scan](#) application, and then select the [Scan](#) icon.
2. Select one of the following Scan features:
 - [Scan to Email](#)
 - [Scan to Network Folder](#)
 - [Scan to USB Drive](#)
 - [Scan to SharePoint®](#)
3. Select [Options](#), and then select [File Type and Resolution](#).
4. Select one of the predefined [Resolution](#) options, and then select [Done](#).
5. Select [Send](#) or [Save](#) to start the scan.

Check the color settings

Follow these steps to adjust the color setting.

1. From the Home screen on the printer control panel, navigate to the [Scan](#) application, and then select the [Scan](#) icon.
2. Select one of the following Scan features:
 - [Save to Device Memory](#)
 - [Scan to Email](#)
 - [Scan to Network Folder](#)
 - [Scan to USB](#)
 - [Scan to SharePoint®](#)
3. Touch the [Options](#) button.
4. In the Options pane, scroll to and select [Color/Black](#).
5. Select one of the predefined options.
6. Touch the [Send](#) button.

 4. Adjust the sliders to set the levels, and then select **Done**.
 5. Select **Send** or **Save** to start the scan.

NOTE: These settings are temporary. After you have finished the job, the printer returns to the default settings.

Optimize scan quality for text or pictures

Optimize the scan job for the type of image being scanned: text, graphics, or photos.

1. From the Home screen on the printer control panel, navigate to the **Scan** application, and then select the **Scan** icon.
2. Select one of the following Scan features:
 - Scan to Email
 - Scan to Network Folder
 - Scan to USB Drive
 - Scan to Job Storage
 - Scan to SharePoint®
3. Select **Options**, and then select **Optimize Text/Picture**.

4. Select one of the predefined options.
5. Select [Send](#) or [Save](#) to start the scan.

NOTE: These settings are temporary. After you have finished the job, the printer returns to the default settings.

Check the output-quality settings

This setting adjusts the level of compression when saving the file. For the highest quality, select the highest setting.

1. From the Home screen on the printer control panel, navigate to the [Scan](#) application, and then select the [Scan](#) icon.
2. Select one of the following Scan features:
 - [Scan to Email](#)
 - [Scan to Network Folder](#)

Improve fax image quality

If the printer is having fax quality problems, try the following solutions in the order presented to resolve the issue.

Try these few simple steps first:

- Use the flatbed scanner rather than the document feeder.
- Use high-quality originals.
- When using the document feeder, load the original document into the feeder correctly, using the paper guides, to avoid unclear or skewed images.

5. Connect the power cable to an outlet, and then press the power button to turn the printer on.

Check the send-fax resolution settings

Adjust the resolution of outgoing faxes as needed. A higher resolution setting increases the fax size and send time.

1. From the Home screen on the printer control panel, navigate to the **Fax** application, and then select the **Fax** icon.
2. Select **Options**.
3. In the Options pane, scroll to and select **Resolution**.
4. Select one of the predefined options, and then select **Send** to send the fax.

Check the image-adjustment settings

Adjust the settings in the **Fax** menu to optimize image quality.

- **Sharpness:** Clarify or soften the image. For example, increasing the sharpness could make text appear crisper, but decreasing it could make photos appear smoother.
 - **Darkness:** Increase or decrease the amount of white and black used in colors in scanned images.

 4. Adjust the sliders to set the levels, and then select **Done**.
 5. Select **Send** to send the fax.

NOTE: These settings are temporary. After you have finished the job, the printer returns to the default settings.

Optimize fax quality for text or pictures

Optimize the fax job for the type of image being scanned: text, graphics, or photos.

1. From the Home screen on the printer control panel, navigate to the **Fax** application, and then select the **Fax** icon.
2. Select **Options**.
3. In the Options pane, scroll to and select **Optimize Text/Picture**.
4. Select one of the predefined options.
5. Select **Send** to send the fax.

NOTE: These settings are temporary. After you have finished the job, the printer returns to the default settings.

Check the error-correction setting

Make sure the **Error Correction Mode** setting is enabled. This setting can improve image quality.

1. From the Home screen on the printer control panel, navigate to the **Settings** application, and then select the **Settings** icon.
2. Open the following menus:
 - a. **Fax**
 - b. **Fax Send Settings**

- c. [General Fax Send Settings](#)
3. Select the [Error Correction Mode](#) option. Touch the [Done](#) button.

Check the fit-to-page setting

If the [Fit to Page](#) setting is enabled, and the incoming fax is larger than the default page size, the printer attempts to scale the image to fit the page. If this setting is disabled, larger images split across multiple pages.

1. From the Home screen on the printer control panel, navigate to the [Settings](#) application, and then select the [Settings](#) icon.
2. Open the following menus:
 - a. [Fax](#)
 - b. [Fax Receive Settings](#)
 - c. [Default Job Options](#)
 - d. [Fit to Page](#)
3. Select the [On](#) option to enable the setting, or select the [Off](#) option to disable it.

Send to a different fax machine

The problem might be related to fax machine settings or supplies status.

Try sending the fax to a different fax machine. If the fax quality is better, the problem is related to the initial recipient's fax machine settings or supplies status.

Check the sender's fax machine

Try the following to check the sender's fax machine.

Ask the sender to try sending from a different fax machine. If the fax quality is better, the problem is with the sender's fax machine. If a different fax machine is unavailable, ask the sender to consider making the following changes:

- Make sure the original document is on white (not colored) paper.
- Increase the fax resolution, quality level, or contrast settings.
- If possible, send the fax from a computer software program.

Solve wired network problems

Check the following information to resolve wired network issues.

Introduction

Certain types of problems can indicate there is a network communication problem. These problems include the following issues:

Poor physical connection

Check the cable connections.

1. Verify that the printer is attached to the correct network port using a cable of the correct length.
2. Verify that cable connections are secure.
3. Look at the network port connection on the back of the printer, and verify that the amber activity light flashes indicating network traffic, and the green link-status light is continuously lit indicating a network link.
4. If the problem continues, try a different cable or port on the hub.

The computer is unable to communicate with the printer

Verify that the printer is communicating with the network and your computer.

1. Test network communication by pinging the network.
 - a. Open a command-line prompt on your computer.
 - For Windows, click **Start**, click **Run**, type `cmd`, and then press `Enter`.
 - For macOS, go to **Applications**, then **Utilities**, and open **Terminal**.
 - b. Type `ping` followed by the IP address for your printer.
 - c. If the window displays round-trip times, the network is working.
2. If the ping command failed, verify that the network hubs are on, and then verify that the network settings, the printer, and the computer are all configured for the same network (also known as subnet).
3. Open the printer properties and click the **Ports** tab. Verify that the current IP address for the printer is selected. The printer IP address is listed on the printer configuration page.
4. If you installed the printer using the HP standard TCP/IP port, select the box labeled **Always print to this printer, even if its IP address changes**.
5. If you installed the printer using a Microsoft standard TCP/IP port, use the printer's hostname instead of the IP address.
6. If the IP address is correct, delete the printer and then add it again.
7. Reinstall the printer software and driver.

The printer is using incorrect link and duplex settings for the network

HP recommends leaving these settings in automatic mode (the default setting). If you change these settings, you must also change them for your network.

New software programs might be causing compatibility problems

Verify that any new software programs are correctly installed and that they use the correct print driver.

The computer or workstation might be set up incorrectly

An incorrectly configured computer can cause issues with printing.

1. Check the network drivers, print drivers, and the network redirection settings.
2. Verify that the operating system is configured correctly.

The printer is disabled, or other network settings are incorrect

Check the network settings.

1. Review the printer's configuration/networking pages to check the status of the network settings and protocols.
2. Reconfigure the network settings if necessary.

Solve wireless network problems

Check the following information to resolve wireless network issues.

Introduction

Use the troubleshooting information to help resolve issues.

 **NOTE:** To determine whether HP NFC, Wi-Fi, BLE, or other wireless printing capabilities are enabled on the printer, print a configuration page from the printer control panel.

 **NOTE:** If you have been experiencing intermittent loss of network connectivity, first update the printer firmware. For instructions on how to update the printer firmware, go to <http://support.hp.com>, search for your printer, and then search on "update the firmware."

Wireless connectivity checklist

Use the checklist to help resolve wireless connection issues.

- For printers that do not support simultaneous wired and wireless connections, verify that the network cable is not connected.
- Verify that the printer and the wireless router are turned on and have power. Also make sure that the wireless radio in the printer is turned on. (The wireless network indicator is solid when the printer is connected to a wireless network, and blinking when it is searching for a wireless network.)
- Verify that the service set identifier (SSID) is correct:
 - For a wireless connection to your network, confirm that your mobile device is connecting to the correct router/access point.
 - For a Wi-Fi Direct connection, print a configuration page to determine the printer's SSID.

If you are not sure that the SSID is correct, run the wireless setup again.

- With secured networks, verify that the security information is correct. If the security information is incorrect, run the wireless setup again.
- If the wireless network is working correctly, try accessing other computers on the wireless network. If the network has Internet access, try connecting to the Internet over a wireless connection.

- Verify that the encryption method (AES or TKIP) is the same for the printer as it is for the wireless access point (on networks using WPA security).
- Verify that the printer is within the range of the wireless network. For most networks, the printer must be within 30 m (100 ft) of the wireless access point (wireless router).
- Verify that obstacles do not block the wireless signal. Remove any large metal objects between the access point and the printer. Make sure poles, walls, or support columns containing metal or concrete do not separate the printer and wireless access point.
- Verify that the printer is located away from electronic devices that might interfere with the wireless signal. Many devices can interfere with the wireless signal including motors, cordless phones, security system cameras, other wireless networks, and some Bluetooth devices.
- For computers connecting to the wireless printer:
 - Verify that the print driver is installed on the computer.
 - Verify that you have selected the correct printer port.
 - Verify that the computer and printer connect to the same wireless network.
 - If your environment has multiple wireless signals and you need the printer to support dual band networks on both 2.4 GHz and 5 GHz, install the HP Jetdirect 2900nw print server accessory.
 - For macOS, verify that the wireless router supports Bonjour.

The printer does not print after the wireless configuration completes

Resolve issues between your computer and the printer.

1. Make sure that the printer is turned on and in the ready state.
2. Turn off any third-party firewalls on your computer.
3. Make sure that the wireless network is working correctly.
4. Make sure that your computer is working correctly. If necessary, restart the computer.
5. Verify that you can open the printer HP Embedded Web Server from a computer on the network.

The printer does not print, and the computer has a third-party firewall installed

Verify that a firewall is not interfering with wireless communication.

1. Update the firewall with the most recent update available from the manufacturer.
2. If programs request firewall access when you install the printer or try to print, make sure that you allow the programs to run.
3. Temporarily turn off the firewall, and then install the wireless printer on the computer. Enable the firewall when you have completed the wireless installation.

The wireless connection does not work after moving the wireless router or printer

Verify that the printer and network settings are correct.

1. Make sure that the router or printer connects to the same network that your computer connects to.

2. Print a configuration page.
3. Compare the service set identifier (SSID) on the configuration page to the SSID in the printer configuration for the computer.
4. If the numbers are not the same, the devices are not connecting to the same network. Reconfigure the wireless setup for the printer.

Cannot connect more computers to the wireless printer

Complete the following steps to solve connection issues.

1. Make sure that the other computers are within the wireless range and that no obstacles block the signal. For most networks, the wireless range is within 30 m (100 ft) of the wireless access point.
2. Make sure that the printer is turned on and in the ready state.
3. Make sure there are not more than 5 concurrent Wireless Print Direct users.
4. Turn off any third-party firewalls on your computer.
5. Make sure that the wireless network is working correctly.
6. Make sure that your computer is working correctly. If necessary, restart the computer.

The wireless printer loses communication when connected to a VPN

Typically, you cannot connect to a VPN and other networks at the same time.

The network does not appear in the wireless networks list

Follow these steps when the network does not appear in the wireless network list on your computer or mobile device.

- Make sure the wireless router is turned on and has power.
- The network might be hidden. However, you can still connect to a hidden network. Make sure the router/access point is advertising the SSID by checking for its SSID in the available networks seen by your mobile device.

The wireless network is not functioning

Complete the following steps to ensure that the network is functioning correctly.

1. For printers that do not support simultaneous wired and wireless connections, make sure that the network cable is disconnected.
2. To verify if the network has lost communication, try connecting other devices to the network.
3. Test network communication by pinging the network.
 - a. Open a command-line prompt on your computer.
 - For Windows, click **Start**, click **Run**, type `cmd`, and then press `Enter`.
 - For macOS, go to **Applications**, then **Utilities**, and open **Terminal**.
 - b. Type `ping` followed by the router IP address.
 - c. If the window displays round-trip times, the network is working.

4. Make sure that the router or printer connects to the same network that the computer connects to.
 - a. Print a configuration page.
 - b. Compare the service set identifier (SSID) on the configuration report to the SSID in the printer configuration for the computer.
 - c. If the numbers are not the same, the devices are not connecting to the same network. Reconfigure the wireless setup for the printer.

Reduce interference on a wireless network

The following tips can reduce interference in a wireless network:

- Keep the wireless devices away from large metal objects, such as filing cabinets, and other electromagnetic devices, such as microwaves and cordless telephones. These objects can disrupt radio signals.
- Keep the wireless devices away from large masonry structures and other building structures. These objects can absorb radio waves and lower signal strength.
- Position the wireless router in a central location in line of sight with the wireless printers on the network.

Solve fax problems

Use the following sections to solve issues involving the printer fax functions.

Checklist for solving fax problems

Use the following checklist to help identify the cause of any fax-related problems you encounter:

- **Are you using the fax cable supplied with the fax accessory?** This fax accessory has been tested with the supplied fax cable to meet RJ11 and functional specifications. Do not substitute another fax cable; the analog-fax accessory requires an analog-fax cable. It also requires an analog phone connection.
- **Is the fax/phone line connector seated in the outlet on the fax accessory?** Make sure that the phone jack is correctly seated in the outlet. Insert the connector into the outlet until it "clicks."

NOTE: Verify that the phone jack is connected to the fax port rather than to the network port. The ports are similar.

- **Is the phone wall jack working properly?** Verify that a dial tone exists by attaching a phone to the wall jack. Can you hear a dial tone, and can you make or receive a phone call?

What type of phone line are you using?

Verify the type of phone line you are using, and review the recommendations for that type of line.

- **Dedicated line:** A standard analog fax/phone line assigned to receive or send faxes.

NOTE: The phone line should be for printer fax use only and not shared with other types of telephone devices. Examples include alarm systems that use the phone line for notifications to a monitoring company.

- **PBX system:** A business-environment phone system. Standard home phones and the fax accessory use an analog phone signal. Some PBX systems are digital and might not be compatible with the fax accessory. You might need an interfacing Analog Telephone Adapter (ATA) to connect the fax machine to digital PBX systems.
- **Roll-over lines:** A phone system feature where a new call "rolls over" to the next available line when the first incoming line is busy. Try attaching the printer to the first incoming phone line. The fax accessory answers the phone after it rings the number of times set in the rings-to-answer setting.

Are you using a surge-protection device?

A surge-protection device can be used between the wall jack and the fax accessory to protect the fax accessory against electrical power passed through the phone lines. These devices can cause some fax communication problems by degrading the quality of the phone signal.

If you are having problems sending or receiving faxes and are using one of these devices, connect the printer directly to the phone jack on the wall to determine whether the problem is with the surge-protection device.

Are you using a phone company voice-messaging service or an answering machine?

If the rings-to-answer setting for the messaging service is lower than the rings-to-answer setting for the fax accessory, the messaging service answers the call, and the fax accessory cannot receive faxes.

If the rings-to-answer setting for the fax accessory is lower than that of the messaging service, the fax accessory answers all calls.

Does your phone line have a call-waiting feature?

If the fax telephone line has an activated call-waiting feature, a call-waiting notice can interrupt a fax call in progress, which causes a communication error.

Ensure that a call-waiting feature is not active on the fax telephone line.

Check fax accessory status

If the analog-fax accessory does not appear to be functioning, print a [Configuration Page](#) report to check the status.

1. From the Home screen, scroll to and select [Reports](#).
2. Open the following menus:
 - a. [Configuration/Status Pages](#)
 - b. [Configuration Page](#)
3. Touch the [Print](#) button to print the report, or touch the [View](#) button to view the report on the screen. The report consists of several pages.

NOTE: The printer IP address or host name is listed on the [Jetdirect Page](#).

- On the Fax Accessory Page of the Configuration Page, under the Hardware Information heading, check the Modem Status. The following table identifies the status conditions and possible solutions.

 **NOTE:** If the Fax Accessory Page does not print, there might be a problem with the analog fax accessory. If you are using LAN fax or Internet fax, those configurations could be disabling the feature.

Table 9-13 Analog-fax accessory troubleshooting

Status conditions	Possible solutions
Operational / Enabled ¹	The analog-fax accessory is installed and ready.
Operational / Disabled ¹	<p>The fax accessory is installed, but you have not configured the required fax settings yet.</p> <p>The fax accessory is installed and operational; however, the HP Digital Sending utility has either disabled the printer fax feature or has enabled LAN fax. When LAN fax is enabled, the analog-fax feature is disabled. Only one fax feature, either LAN fax or analog fax, can be enabled at a time.</p> <p>NOTE: If LAN fax is enabled, the Scan to Fax feature is unavailable on the printer control panel.</p>
Non-Operational / Enabled/Disabled ¹	The printer has detected a firmware failure. Upgrade the firmware.
Damaged / Enabled/Disabled ¹	The fax accessory has failed. Reseat the fax accessory card and check for bent pins. If the status is still DAMAGED, replace the analog-fax accessory card.

¹ ENABLED indicates that the analog-fax accessory is enabled and turned on; DISABLED indicates that LAN fax is enabled (analog fax is turned off).

JBIG is enabled, and the receiving fax machine does not have JBIG capability.

Turn off the JBIG setting.

No fax address book button displays

Verify the fax issue, and try the suggested solution.

None of the contacts in the selected contacts list have fax information associated with them. Add the necessary fax information.

Not able to locate the Fax settings in HP Web Jetadmin

Verify the fax issue, and try the suggested solution.

Fax settings in HP Web Jetadmin are located under the device's status page drop-down menu.

Select **Digital Sending and Fax** from the drop-down menu.

The header is appended to the top of the page when the overlay option is enabled

This fax issue is a normal part of operation.

For all forwarded faxes, the printer appends the overlay header to the top of a page.

This is normal operation.

A mix of names and numbers is in the recipients box

This fax issue is a normal part of operation.

Names and numbers can both display, depending on where they are from. The fax address book lists names, and all other databases list numbers.

This is normal operation.

A one-page fax prints as two pages

Verify the fax issue, and try the suggested solution.

The fax header is being appended to the top of the fax, pushing text to a second page.

To print a one page fax on a single page, set the overlay header to overlay mode, or adjust the fit-to-page setting.

A document stops in the document feeder in the middle of faxing

Verify the fax issue, and try the suggested solution.

A jam is in the document feeder.

Clear the jam, and send the fax again.

The volume for sounds coming from the fax accessory is too high or too low

Verify the fax issue, and try the suggested solution.

The volume setting needs to be adjusted.

Adjust the volume in the [Fax Send Settings](#) menu and the [Fax Receive Settings](#) menu.

HP limited warranty statement

HP PRODUCT

DURATION OF LIMITED WARRANTY*

One-year, next-business day, onsite warranty

NOTE: *Warranty and support options vary by product, country, and local legal requirements. Go to support.hp.com to learn about HP award-winning service and support options in your region.

HP warrants to you, the end-user customer, this HP Limited Warranty applies only to HP branded products sold or leased a) from HP Inc., its subsidiaries, affiliates, authorized resellers, authorized distributors, or country distributors; and, b) with this HP Limited Warranty, that HP hardware and accessories will be free from defects in materials and workmanship after the date of purchase, for the period specified above. If HP receives notice of such defects during the warranty period, HP will, at its option, either repair or replace products which prove to be defective. Replacement products may be either new or equivalent in performance to new.

HP warrants to you that HP software will not fail to execute its programming instructions after the date of purchase, for the period specified above, due to defects in material and workmanship when properly installed and used. If HP receives notice of such defects during the warranty period, HP will replace software which does not execute its programming instructions due to such defects.

HP does not warrant that the operation of HP products will be uninterrupted or error free. If HP is unable, within a reasonable time, to repair or replace any product to a condition as warranted, you will be entitled to a refund of the purchase price upon prompt return of the product.

HP products may contain remanufactured parts equivalent to new in performance or may have been subject to incidental use.

Warranty does not apply to defects resulting from (a) improper or inadequate maintenance or calibration, (b) software, interfacing, parts or supplies not supplied by HP, (c) unauthorized modification or misuse, (d) operation outside of the published environmental specifications for the product, or (e) improper site preparation or maintenance.

TO THE EXTENT ALLOWED BY LOCAL LAW, THE ABOVE WARRANTIES ARE EXCLUSIVE AND NO OTHER WARRANTY OR CONDITION, WHETHER WRITTEN OR ORAL, IS EXPRESSED OR IMPLIED AND HP SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, AND FITNESS FOR A PARTICULAR PURPOSE. Some countries/regions, states or provinces do not allow limitations on the duration of an implied warranty, so the above limitation or exclusion might not apply to you. This warranty gives you specific legal rights and you might also have other rights that vary from country/region to country/region, state to state, or province to province.

HP's limited warranty is valid in any country/region or locality where HP has a support presence for this product and where HP has marketed this product. The level of warranty service you receive may vary according to local standards. HP will not alter form, fit or function of the product to make it operate in a country/region for which it was never intended to function for legal or regulatory reasons.

TO THE EXTENT ALLOWED BY LOCAL LAW, THE REMEDIES IN THIS WARRANTY STATEMENT ARE YOUR SOLE AND EXCLUSIVE REMEDIES. EXCEPT AS INDICATED ABOVE, IN NO EVENT WILL HP OR ITS SUPPLIERS BE LIABLE FOR LOSS OF DATA OR FOR DIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFIT OR DATA), OR OTHER DAMAGE, WHETHER BASED IN CONTRACT, TORT, OR OTHERWISE. Some countries/regions, states or provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

THE WARRANTY TERMS CONTAINED IN THIS STATEMENT, EXCEPT TO THE EXTENT LAWFULLY PERMITTED, DO NOT EXCLUDE, RESTRICT OR MODIFY AND ARE IN ADDITION TO THE MANDATORY STATUTORY RIGHTS APPLICABLE TO THE SALE OF THIS PRODUCT TO YOU.

UK, Ireland, and Malta

France: La Garantie Limitée HP s'applique sans préjudice du droit pour le consommateur de bénéficier de la garantie légale de conformité dans les conditions prévues aux articles L. 217-1 à L. 217-32 du code de la consommation et de celle relative aux vices cachés dans les conditions prévues aux articles 1641 à 1649 du code civil. Le consommateur peut ainsi choisir d'exercer ses droits au titre de la Garantie Limitée HP ou, auprès du vendeur, au titre des garanties légales dont les modalités de mises en œuvre sont rappelées ci-dessous.

Le consommateur dispose d'un délai de deux ans à compter de la délivrance du bien pour obtenir la mise en oeuvre de la garantie légale de conformité en cas d'apparition d'un défaut de conformité. Durant ce délai, le consommateur n'est tenu d'établir que l'existence du défaut de conformité et non la date d'apparition de celui-ci.

Lorsque le contrat de vente du bien prévoit la fourniture d'un contenu numérique ou d'un service numérique de manière continue pendant une durée supérieure à deux ans, la garantie légale est applicable à ce contenu numérique ou ce service numérique tout au long de la période de fourniture prévue. Durant ce délai, le consommateur n'est tenu d'établir que l'existence du défaut de conformité affectant le contenu numérique ou le service numérique et non la date d'apparition de celui-ci.

La garantie légale de conformité emporte obligation pour le professionnel, le cas échéant, de fournir toutes les mises à jour nécessaires au maintien de la conformité du bien.

La garantie légale de conformité donne au consommateur droit à la réparation ou au remplacement du bien dans un délai de trente jours suivant sa demande, sans frais et sans inconvénient majeur pour lui.

Si le bien est réparé dans le cadre de la garantie légale de conformité, le consommateur bénéficie d'une extension de six mois de la garantie initiale. Si le consommateur demande la réparation du bien, mais que le vendeur impose le remplacement, la garantie légale de conformité est renouvelée pour une période de deux ans à compter de la date de remplacement du bien.

Le consommateur peut obtenir une réduction du prix d'achat en conservant le bien ou mettre fin au contrat en se faisant rembourser intégralement contre restitution du bien, si:

1° Le professionnel refuse de réparer ou de remplacer le bien;

2° La réparation ou le remplacement du bien intervient après un délai de trente jours;

3° La réparation ou le remplacement du bien occasionne un inconvénient majeur pour le consommateur, notamment lorsque le consommateur supporte définitivement les frais de reprise ou d'enlèvement du bien non conforme, ou s'il supporte les frais d'installation du bien réparé ou de remplacement;

4° La non-conformité du bien persiste en dépit de la tentative de mise en conformité du vendeur restée infructueuse.

Le consommateur a également droit à une réduction du prix du bien ou à la résolution du contrat lorsque le défaut de conformité est si grave qu'il justifie que la réduction du prix ou la résolution du contrat soit immédiate. Le consommateur n'est alors pas tenu de demander la réparation ou le remplacement du bien au préalable.

Le consommateur n'a pas droit à la résolution de la vente si le défaut de conformité est mineur.

Toute période d'immobilisation du bien en vue de sa réparation ou de son remplacement suspend la garantie qui restait à courir jusqu'à la délivrance du bien remis en état.

Les droits mentionnés ci-dessus résultent de l'application des articles L. 217-1 à L. 217-32 du code de la consommation.

Le vendeur qui fait obstacle de mauvaise foi à la mise en oeuvre de la garantie légale de conformité encourt une amende civile d'un montant maximal de 300 000 euros, qui peut être porté jusqu'à 10 % du chiffre d'affaires moyen annuel (article L. 241-5 du code de la consommation).

Le consommateur bénéficie également de la garantie légale des vices cachés en application des articles 1641 à 1649 du code civil, pendant une durée de deux ans à compter de la découverte du défaut. Cette garantie donne droit à une réduction de prix si le bien est conservé ou à un remboursement intégral contre restitution du bien.

Pour de plus amples informations, veuillez consulter le lien suivant: Garanties légales accordées au consommateur (<http://www.hp.com/go/eu-legal>) ou vous pouvez également consulter le site Web des Centres européens des consommateurs (<https://commission.europa.eu/live-work-travel-eu/consumer-rights-and-complaints/resolve-your-consumer-complaint/european-consumer-centres-network-ecc-net>). Les consommateurs ont le droit de choisir de réclamer un service sous la garantie limitée HP ou auprès du vendeur au cours d'une garantie légale.

Italy

La Garanzia limitata HP è una garanzia commerciale fornita volontariamente da HP. Di seguito sono indicati nome e indirizzo della società HP responsabile della fornitura dei servizi coperti dalla Garanzia limitata HP nel vostro Paese:

Italia: HP Italy S.r.l., Via G. Di Vittorio 9, 20063 Cernusco S/Naviglio

I vantaggi della Garanzia limitata HP vengono concessi ai consumatori in aggiunta ai diritti derivanti dalla garanzia di due anni fornita dal venditore in caso di non conformità dei beni rispetto al contratto di vendita. Tuttavia, diversi fattori possono avere un impatto sulla possibilità di beneficiare di tali diritti. I diritti spettanti ai consumatori in forza della garanzia legale non sono in alcun modo limitati, né modificati dalla Garanzia limitata HP. Per ulteriori informazioni, si prega di consultare il seguente link: Garanzia legale per i clienti (<http://www.hp.com/go/eu-legal>), oppure visitare il sito Web dei Centri europei per i consumatori (<https://commission.europa.eu/live-work-travel-eu/consumer-rights-and-complaints/resolve-your-consumer-complaint/european-consumer-centres-network-ecc-net>). I consumatori hanno il diritto di scegliere se richiedere un servizio usufruendo della Garanzia limitata HP oppure rivolgendosi al venditore per far valere la garanzia legale di due anni.

Spain

Su Garantía limitada de HP es una garantía comercial voluntariamente proporcionada por HP. El nombre y dirección de las entidades HP que proporcionan la Garantía limitada de HP (garantía comercial adicional del fabricante) en su país es:

España: HP Printing and Computing Solutions S.L. Calle Jose Echegaray 18 Las Rozas, 28232 Madrid

Los beneficios de la Garantía limitada de HP son adicionales a la garantía legal de 2 años a la que los consumidores tienen derecho a recibir del vendedor en virtud del contrato de compraventa; sin embargo, varios factores pueden afectar su derecho a recibir los beneficios bajo dicha garantía legal. A este respecto, la Garantía limitada de HP no limita o afecta en modo alguno los derechos legales del consumidor (<http://www.hp.com/go/eu-legal>). Para más información, consulte el siguiente enlace: Garantía legal del consumidor o puede visitar el sitio web de los Centros europeos de los consumidores (<https://commission.europa.eu/live-work-travel-eu/consumer-rights-and-complaints/resolve-your-consumer-complaint/european-consumer-centres-network-ecc-net>). Los clientes tienen derecho a elegir si reclaman un servicio acogiéndose a la Garantía limitada de HP o al vendedor de conformidad con la garantía legal de dos años.

Denmark

Danmark: HP Inc Danmark ApS, Engholm Parkvej 8, 3450, Allerød

Den begrænsede HP-garanti gælder i tillæg til eventuelle juridiske rettigheder, for en toårig garanti fra sælgeren af varer, der ikke er i overensstemmelse med salgsaftalen, men forskellige faktorer kan dog påvirke din ret til at opnå disse rettigheder. Forbrugerens lovbestemte rettigheder begrænses eller påvirkes ikke på nogen måde af den begrænsede HP-garanti. Se nedenstående link for at få yderligere oplysninger: Forbrugerens juridiske garanti (<http://www.hp.com/go/eu-legal>) eller du kan besøge De Europæiske Forbrugercentres websted (<https://commission.europa.eu/live-work-travel-eu/consumer-rights-and-complaints/resolve-your-consumer-complaint/european-consumer-centres-network-ecc-net>). Forbrugere har ret til at vælge, om de vil gøre krav på service i henhold til HP's begrænsede garanti eller hos sælger i henhold til en toårig juridisk garanti.

Norway

HPs garanti er en begrenset og kommersiell garanti som HP selv har valgt å tilby. Følgende lokale selskap inntestår for garantien:

Norge: HP Norge AS, Rolfbuktveien 4b, 1364 Fornebu

HPs garanti kommer i tillegg til det mangelsansvar HP har i henhold til norsk forbrukerkjøpslovgivning, hvor reklamasjonsperioden kan være to eller fem år, avhengig av hvor lenge salgsgjenstanden var ment å vare. Ulike faktorer kan imidlertid ha betydning for om du kvalifiserer til å kreve avhjelp iht slikt mangelsansvar. Forbrukerens lovmessige rettigheter begrenses ikke av HPs garanti. Hvis du vil ha mer informasjon, kan du klikke på følgende kobling: Juridisk garanti for forbruker (<http://www.hp.com/go/eu-legal>) eller du kan besøke nettstedet til de europeiske forbrukersentrene (<https://commission.europa.eu/live-work-travel-eu/consumer-rights-and-complaints/resolve-your-consumer-complaint/european-consumer-centres-network-ecc-net>). Forbrukere har retten til å velge å kreve service under HPs garanti eller iht selgerens lovpålagte mangelsansvar.

Limited Warranty Statement for HP Print Cartridges, Imaging Drums, and Imaging Units for use with HP LaserJet Printers, HP Laser Printers and Samsung Branded Laser Printers

This product is covered by the HP Commercial/Limited Warranty in countries/regions authorized for use/distribution. For complete warranty details, see: hp.com/toner/info.

Long life consumable and maintenance kit limited warranty statement

This HP product is warranted to be free from defects in materials and workmanship until the earlier of a) the printer providing a low-life indicator on the control panel, or b) the expiration of the warranty period. Replacement Preventative Maintenance kits or LLCs products carry a 90 day parts only limited warranty, from the last purchase date.

This warranty does not apply to products that (a) have been refurbished, remanufactured or tampered with in any way, (b) experience problems resulting from misuse, improper storage, or operation outside of the published environmental specifications for the printer product or (c) exhibit wear from ordinary use.

To obtain warranty service, please return the product to place of purchase (with a written description of the problem) or contact HP customer support. At HP's option, HP will either replace products that prove to be defective or refund your purchase price.

TO THE EXTENT ALLOWED BY LOCAL LAW, THE ABOVE WARRANTY IS EXCLUSIVE AND NO OTHER WARRANTY OR CONDITION, WHETHER WRITTEN OR ORAL, IS EXPRESSED OR IMPLIED. HP SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, AND FITNESS FOR A PARTICULAR PURPOSE.

TO THE EXTENT ALLOWED BY LOCAL LAW, IN NO EVENT WILL HP OR ITS SUPPLIERS BE LIABLE FOR DIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFIT OR DATA), OR OTHER DAMAGE, WHETHER BASED IN CONTRACT, TORT, OR OTHERWISE.

THE WARRANTY TERMS CONTAINED IN THIS STATEMENT, EXCEPT TO THE EXTENT LAWFULLY PERMITTED, DO NOT EXCLUDE, RESTRICT OR MODIFY AND ARE IN ADDITION TO THE MANDATORY STATUTORY RIGHTS APPLICABLE TO THE SALE OF THE PRODUCT TO YOU.

HP policy on non-HP supplies

HP cannot recommend the use of non-HP toner cartridges, either new or remanufactured.

 **NOTE:** For HP printer products, the use of a non-HP toner cartridge or a refilled toner cartridge does not affect either the warranty to the customer or any HP support contract with the customer. However, if product failure or damage is attributable to the use of a non-HP toner cartridge or refilled toner cartridge, HP will charge its standard time and materials charges to service the product for the particular failure or damage.

HP anticounterfeit Web site

Go to www.hp.com/go/anticounterfeit when you install an HP cartridge and the control-panel message indicates the cartridge is non-HP. HP will help determine if the cartridge is genuine and take steps to resolve the problem.

Your cartridge might not be a genuine HP cartridge if you notice the following:

- The supplies status page indicates that a non-HP supply is installed.
- You are experiencing a high number of problems with the cartridge.
- The cartridge does not look like it usually does (for example, the packaging differs from HP packaging).

Data stored on the toner cartridge

The HP toner cartridges used with this product contain a memory chip that assists in the operation of the product.

In addition, this memory chip collects a limited set of information about the usage of the product, which might include the following: the date when the toner cartridge was first installed, the date when the toner cartridge was last used, the number of pages printed using the toner cartridge, the page coverage, the printing modes used, any printing errors that might have occurred, and the product model. This information helps HP design future products to meet our customers' printing needs.

The data collected from the toner cartridge memory chip does not contain information that can be used to identify a customer or user of the toner cartridge or their product.

HP collects a sampling of the memory chips from toner cartridges returned to HP's free return and recycling program (HP Planet Partners: www.hp.com/hprecycle). The memory chips from this sampling are read and studied in order to improve future HP products. HP partners who assist in recycling this toner cartridge might have access to this data, as well.

Any third party possessing the toner cartridge might have access to the anonymous information on the memory chip.

End User License Agreement

READ CAREFULLY BEFORE USING THIS SOFTWARE EQUIPMENT: This End-User License Agreement ("EULA") is a legal agreement between (a) you (either an individual or a single entity) and (b) HP Inc. ("HP") that governs your use of the Sign-In Once application installed on or made available by HP for use with your printing device (the "Software").

An amendment or addendum to this EULA may accompany the HP Product.

RIGHTS IN THE SOFTWARE ARE OFFERED ONLY ON THE CONDITION THAT YOU AGREE TO ALL TERMS AND CONDITIONS OF THIS EULA. BY INSTALLING, COPYING, DOWNLOADING, OR OTHERWISE USING THE SOFTWARE, YOU AGREE TO BE BOUND BY THE TERMS OF THIS EULA. IF YOU DO NOT ACCEPT THESE LICENSE TERMS, YOUR SOLE REMEDY IS TO IMMEDIATELY STOP USING SOFTWARE AND TO UNINSTALL THE PRODUCT FROM YOUR DEVICE.

THIS EULA IS A GLOBAL AGREEMENT AND IS NOT SPECIFIC TO ANY PARTICULAR COUNTRY, STATE OR TERRITORY. IF YOU ACQUIRED THE SOFTWARE AS A CONSUMER WITHIN THE MEANING OF RELEVANT CONSUMER LEGISLATION IN YOUR COUNTRY, STATE OR TERRITORY, THEN DESPITE ANYTHING TO THE CONTRARY IN THIS EULA, NOTHING IN THIS EULA AFFECTS ANY NON EXCLUDABLE STATUTORY

RIGHTS OR REMEDIES THAT YOU MAY HAVE UNDER SUCH CONSUMER LEGISLATION AND THIS EULA IS SUBJECT TO THOSE RIGHTS AND REMEDIES. REFER TO SECTION 17 FOR FURTHER INFORMATION ON YOUR CONSUMER RIGHTS.

1. **GRANT OF LICENSE.** HP grants you the following rights provided you comply with all terms and conditions of this EULA. In the case you are representing an entity or organization, the same terms and conditions in this Section 1 shall also apply with respect to the use, copying, and storage of the Software on the devices of your respective entity or organization.
 - a. Use. You may use one copy of the Software on your device for the purpose of accessing and using the Software. You may not separate component parts of the Software for use on more than one device. You do not have the right to distribute the Software, nor do you have the right to modify the Software or disable any licensing or control feature of the Software. You may load the Software into the temporary memory (RAM) of your device for purposes of using the Software.
 - b. Storage. You may copy the Software into the local memory or storage device of your device.
 - c. Copying. You may make archival or back-up copies of the Software, provided the copy contains all of the original Software's proprietary notices and that it is used only for back-up purposes.
 - d. Reservation of Rights. HP and its suppliers reserve all rights not expressly granted to you in this EULA.
 - e. Freeware. Notwithstanding the terms and conditions of this EULA, all or any portion of the Software which constitutes non-proprietary HP software or software provided under public license by third parties ("Freeware"), is licensed to you subject to the terms and conditions of the software license agreement or other documentation accompanying such Freeware at the time of download, installation, or use of the Freeware. Use of the Freeware by you shall be governed entirely by the terms and conditions of such license.
2. **UPGRADES.** To use Software identified as an upgrade, you must first be licensed for the original Software identified by HP as eligible for the upgrade. After upgrading, you may no longer use the original Software Product that formed the basis for your upgrade eligibility.
3. **ADDITIONAL SOFTWARE.** This EULA applies to updates or supplements to the original Software provided by HP unless HP provides other terms along with the update or supplement. In case of a conflict between such terms, the other terms will prevail.
4. **TRANSFER.**
 - a. Third Party. The initial user of the Software may make a one-time transfer of the Software to another end user. Any transfer must include all component parts, media, printed materials, this EULA, and if applicable, the Certificate of Authenticity. The transfer may not be an indirect transfer, such as a consignment. Prior to the transfer, the end user receiving the transferred product must agree to all the EULA terms. Upon transfer of the Software, your license is automatically terminated.
 - b. Restrictions. You may not rent, lease or lend the Software or use the Software for commercial timesharing or bureau use. You may not sublicense, assign or transfer the license or Software except as expressly provided in this EULA.
5. **PROPRIETARY RIGHTS.** All intellectual property rights in the Software and user documentation are owned by HP or its suppliers and are protected by law, including but not limited to United States copyright, trade secret, and trademark law, as well as other applicable laws and international treaty provisions. You shall not remove any product identification, copyright notices or proprietary restrictions from the Software.

6. **LIMITATION ON REVERSE ENGINEERING.** You may not reverse engineer, decompile, or disassemble the Software, except and only to the extent that the right to do so is mandated under applicable law notwithstanding this limitation or it is expressly provided for in this EULA.
7. **TERM.** This EULA is effective unless terminated or rejected. This EULA will also terminate upon conditions set forth elsewhere in this EULA or if you fail to comply with any term or condition of this EULA.
8. **ACCOUNT SET-UP.**
 - a. You must register and establish an account on HP ID in order to use the Software. It is your responsibility to obtain and maintain all equipment, services and software needed for access to and use of the HP ID account, any applications linked via this Software, and your device(s), as well as paying any applicable charges.
 - b. YOU ARE SOLELY AND FULLY RESPONSIBLE FOR MAINTAINING THE CONFIDENTIALITY OF ANY USERNAMES AND PASSWORDS COLLECTED BY THE SOFTWARE. You must notify HP immediately of any unauthorized use of your HP ID account or any other breach of security related to this Software or the device(s) it is installed on.
9. **NOTICE OF DATA COLLECTION.** HP may collect usernames, passwords, device IP addresses, and/or other authentication information used by you to access HP ID and the various applications connected via this Software. HP may use this data to optimize Software performance based on user preferences, provide support and maintenance, and assure security and software integrity. You can read more about the data collection in the sections titled “What Data We Collect” and “How We Use Data” in the [HP Privacy Statement](#).
10. **DISCLAIMER OF WARRANTIES.** TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, HP AND ITS SUPPLIERS PROVIDE THE SOFTWARE “AS IS” AND WITH ALL FAULTS, AND HEREBY DISCLAIM ALL OTHER WARRANTIES, DUTIES, AND CONDITIONS, EITHER EXPRESS, IMPLIED, OR STATUTORY, INCLUDING, BUT NOT LIMITED TO, WARRANTIES: (i) OF TITLE AND NON-INFRINGEMENT; (ii) OF MERCHANTABILITY; (iii) OF FITNESS FOR A PARTICULAR PURPOSE; (iv) THAT THE SOFTWARE WILL FUNCTION WITH NON-HP SUPPLIES OR ACCESSORIES; AND (v), OF LACK OF VIRUSES ALL WITH REGARD TO THE SOFTWARE. Some states/jurisdictions do not allow exclusion of implied warranties or limitations on the duration of implied warranties, so the above disclaimer may not apply to you in its entirety.
11. **LIMITATION OF LIABILITY.** Subject to local law, notwithstanding any damages that you might incur, the entire liability of HP and any of its suppliers under any provision of this EULA and your exclusive remedy for all of the foregoing shall be limited to the greater of the amount actually paid by you separately for the Software or U.S. \$5.00. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL HP OR ITS SUPPLIERS BE LIABLE FOR ANY SPECIAL, INCIDENTAL, INDIRECT, OR CONSEQUENTIAL DAMAGES WHATSOEVER (INCLUDING, BUT NOT LIMITED TO, DAMAGES FOR LOSS OF PROFITS OR CONFIDENTIAL OR OTHER INFORMATION, FOR BUSINESS INTERRUPTION, FOR PERSONAL INJURY, OR FOR LOSS OF PRIVACY) ARISING OUT OF OR IN ANY WAY RELATED TO THE USE OF OR INABILITY TO USE THE SOFTWARE, OR OTHERWISE IN CONNECTION WITH ANY PROVISION OF THIS EULA, EVEN IF HP OR ANY SUPPLIER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES AND EVEN IF THE REMEDY FAILS OF ITS ESSENTIAL PURPOSE. Some states/jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.
12. **U.S. GOVERNMENT CUSTOMERS.** Consistent with FAR 12.211 and 12.212, Commercial Computer Software, Computer Software Documentation, and Technical Data for Commercial Items are licensed to the U.S. Government under HP’s standard commercial license.

13. **COMPLIANCE WITH EXPORT LAWS.** You shall comply with all laws and regulations of the United States and other countries ("Export Laws") to assure that the Software is not (1) exported, directly or indirectly, in violation of Export Laws, or (2) used for any purpose prohibited by Export Laws, including, without limitation, nuclear, chemical, or biological weapons proliferation.
14. **CAPACITY AND AUTHORITY TO CONTRACT.** You represent that you are of the legal age of majority in your state of residence and, if applicable, you are duly authorized by your employer to enter into this contract.
15. **APPLICABLE LAW.** This EULA is governed by the laws of the State of California, U.S.A.
16. **ENTIRE AGREEMENT.** Unless you have entered into a separate license agreement for the Software, this EULA (including any addendum or amendment to this EULA which is included with the HP Product) is the entire agreement between you and HP relating to the Software and it supersedes all prior or contemporaneous oral or written communications, proposals and representations with respect to the Software or any other subject matter covered by this EULA. To the extent the terms of any HP policies or programs for support services conflict with the terms of this EULA, the terms of this EULA shall control.
17. **CONSUMER RIGHTS.** Consumers in some countries, states or territories may have the benefit of certain statutory rights and remedies under consumer legislation in respect of which HP's liability cannot lawfully be excluded or limited. If you acquired the Software as a consumer within the meaning of relevant consumer legislation in your country, state or territory, the provisions of this EULA (including the disclaimers of warranties, limitations and exclusions of liability) must be read subject to applicable law and apply only to the maximum extent permitted by that applicable law.

Australian Consumers: If you acquired the Software as a consumer within the meaning of the 'Australian Consumer Law' under the Australian Competition and Consumer Act 2010 (Cth) then despite any other provision of this EULA:

- a. the Software comes with guarantees that cannot be excluded under the Australian Consumer Law, including that goods will be of acceptable quality and services will be supplied with due care and skill. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the Software repaired or replaced if it is not of acceptable quality and the failure does not amount to a major failure
- b. nothing in this EULA excludes, restricts or modifies any right or remedy, or any guarantee, warranty or other term or condition implied or imposed by the Australian Consumer Law which cannot be lawfully excluded or limited; and
- c. the benefits provided to you by the express warranties in this EULA are in addition to other rights and remedies available to you under the Australian Consumer Law. Your rights under the Australian Consumer Law prevail to the extent that they are inconsistent with any limitations contained in the express warranty.

The Software may be capable of retaining user-generated data. HP hereby provides you with notice that if HP repairs your Software, that repair may result in the loss of that data. To the full extent permitted by law, the limitations and exclusions of HP's liability in this EULA apply in respect of any such loss of data.

If you think that you are entitled to any warranty under this agreement or any of the above remedies, please contact HP:

To initiate a support request or warranty claim, please call 13 10 47 (within Australia) or +61 2 8278 1039 (if dialing internationally) or visit www.hp.com.au and select the "Support" tab for the most current customer service options.

If you are a consumer within the meaning of the Australia Consumer Law and you are purchasing the Software or warranty and support services for the Software which are not of a kind ordinarily acquired for personal, domestic or household use or consumption, then despite any other provision of this EULA, HP limits its liability for failure to comply with a consumer guarantee as follows:

- a. provision of warranty or support services for the Software: to any one or more of the following: re-supply of the services or payment of the costs of having the services re-supplied;
- b. provision of the Software: to any one or more of the following: replacement of the Software or the supply of equivalent software; repair of the Software; payment of the costs of replacing the Software or of acquiring equivalent software; or payment of the costs of having the Software repaired; and
- c. otherwise, to the maximum extent permitted by law.

New Zealand Consumers: In New Zealand, the Software comes with guarantees that cannot be excluded under the Consumer Guarantees Act 1993. In New Zealand, Consumer Transaction means a transaction involving a person who is purchasing goods for personal, domestic or household use or consumption and not for the purpose of a business. New Zealand consumers who are purchasing goods for personal, domestic or household use or consumption and not for the purpose of a business ("New Zealand Consumers") are entitled to repair, replacement or refund for a failure and compensation for other reasonably foreseeable loss or damage. A New Zealand Consumer (as defined above) may recover the costs of returning the product to the place of purchase if there is a breach of the New Zealand consumer law; furthermore, if it will be of significant cost to the New Zealand Consumer to return the goods to HP then HP will collect such goods at its own cost. Where any supply of products or services is for business purposes, you agree that the Consumer Guarantees Act 1993 does not apply and that given the nature and value of the transaction, this is fair and reasonable.

Customer self-repair warranty service

HP products are designed with many Customer Self Repair (CSR) parts to minimize repair time and allow for greater flexibility in performing defective parts replacement. If during the diagnosis period, HP identifies that the repair can be accomplished by the use of a CSR part, HP will ship that part directly to you for replacement. There are two categories of CSR parts: 1) Parts for which customer self repair is mandatory. If you request HP to replace these parts, you will be charged for the travel and labor costs of this service. 2) Parts for which customer self repair is optional. These parts are also designed for Customer Self Repair. If, however, you require that HP replace them for you, this may be done at no additional charge under the type of warranty service designated for your product.

Based on availability and where geography permits, CSR parts will be shipped for next business day delivery. Same-day or four-hour delivery may be offered at an additional charge where geography permits. If assistance is required, you can call the HP Technical Support Center and a technician will help you over the phone. HP specifies in the materials shipped with a replacement CSR part whether a defective part must be returned to HP. In cases where it is required to return the defective part to HP, you must ship the defective part back to HP within a defined period of time, normally five (5) business days. The defective part must be returned with the associated documentation in the provided shipping material. Failure to return the defective part may result in HP billing you for the replacement. With a customer self repair, HP will pay all shipping and part return costs and determine the courier/carrier to be used.

B Environmental product stewardship program

Protecting the environment

HP is committed to providing quality products in an environmentally sound manner. This product has been designed with several attributes to minimize impacts on our environment.

Ozone production

The airborne emissions of ozone for this product has been measured according to a standardized protocol* and when these emissions data are applied to an anticipated high-use scenario in an office workspace**, HP has determined there is no appreciable amount of ozone generated during printing and the levels are well within current indoor air quality standards and guidelines.

* Test method for the determination of emissions from hardcopy devices with respect to awarding the environmental label for office devices with printing function; RAL-UZ 219 - BAM January, 2021

** Based on ozone concentration when printing 2 hours per day in 30.6 cubic meter room with a ventilation rate of 0.68 air changes per hour with HP printing supplies

Power consumption

Power usage drops significantly while in Ready, Sleep, or Off mode, which saves natural resources and saves money without affecting the high performance of this product. HP printing and imaging equipment marked with the ENERGY STAR® logo is qualified to the U.S. Environmental Protection Agency's ENERGY STAR specifications for imaging equipment. The following mark will appear on ENERGY STAR qualified imaging products:

Additional ENERGY STAR qualified imaging product model information is listed at:

www.hp.com/go/energystar

Toner consumption

EconoMode uses less toner, which might extend the life of the print cartridge. HP does not recommend the full-time use of EconoMode. If EconoMode is used full-time, the toner supply might outlast the mechanical parts in the print cartridge. If print quality begins to degrade and is no longer acceptable, consider replacing the print cartridge.

Paper use

This product's duplex feature (manual or automatic) and N-up printing (multiple pages printed on one page) capability can reduce paper usage and the resulting demands on natural resources.

Plastics

Plastic parts over 25 grams are marked according to international standards that enhance the ability to identify plastics for recycling purposes at the end of the product's life.

HP LaserJet print supplies

Original HP Supplies were designed with the environment in mind. HP makes it easy to conserve resources and paper when printing. And when you are done, we make it easy and free to recycle.¹

All HP cartridges returned to HP Planet Partners go through a multiphase recycling process where materials are separated and refined for use as raw material in new Original HP cartridges and everyday products. No Original HP cartridges returned through HP Planet Partners are ever sent to a landfill, and HP never refills or resells Original HP cartridges.

To participate in the HP Planet Partners return and recycling program, visit www.hp.com/hprecycle. Select your country/region for information on how to return HP printing supplies. Multi-lingual program information and instructions are also included in every new HP LaserJet print cartridge package.

¹ Program availability varies. For more information, visit www.hp.com/hprecycle.

Paper

This product is capable of using recycled paper and lightweight paper (EcoFFICIENT™) when the paper meets the guidelines outlined in the *HP LaserJet Printer Family Print Media Guide*. This product is suitable for the use of recycled paper and lightweight paper (EcoFFICIENT™) according to EN12281:2002.

Material restrictions

This HP product does not contain added mercury.

Battery information

This product may contain a:

- Poly-carbonmonofluoride lithium (BR type) or
- Manganese dioxide lithium (CR type)

battery that may require special handling at end-of-life.

NOTE: NOTE for CR type only: Perchlorate material - special handling may apply. See <http://dtsc.ca.gov/hazardouswaste/perchlorate>.

FCC regulations

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

 **NOTE:** Any changes or modifications to the printer that are not expressly approved by HP could void the user's authority to operate this equipment.

Use of a shielded interface cable is required to comply with the Class A limits of Part 15 of FCC rules.

Laser safety

The Center for Devices and Radiological Health (CDRH) of the U.S. Food and Drug Administration has implemented regulations for laser products manufactured since August 1, 1976. Compliance is mandatory for products marketed in the United States. The device is certified as a "Class 1" laser product under the U.S. Department of Health and Human Services (DHHS) Radiation Performance Standard according to the Radiation Control for Health and Safety Act of 1968. Since radiation emitted inside the device is completely confined within protective housings and external covers, the laser beam cannot escape during any phase of normal user operation.

⚠ **WARNING!** Using controls, making adjustments, or performing procedures other than those specified in this user guide may result in exposure to hazardous radiation.

Luokan 1 laserlaite

HP Color LaserJet Enterprise MFP 6800, HP Color LaserJet Enterprise MFP 6800dn, HP Color LaserJet Enterprise Flow MFP 6800zf, HP Color LaserJet Enterprise Flow MFP 6800zfs, HP Color LaserJet Enterprise Flow MFP 6800zfw+, laserkirjoitin on käyttäjän kannalta turvallinen luokan 1 laserlaite. Normaalisessa käytössä kirjoittimen suojakotelointi estää lasersäteiden pääsyn laitteen ulkopuolelle. Laitteen turvallisuusluokka on määritetty standardin EN 60825-1 (2014) mukaisesti.

VAROITUS!

Laitteen käyttäminen muulla kuin käyttöohjeessa mainitulla tavalla saattaa altistaa käyttäjän turvallisuusluokan 1 ylittävälle näkymättömälle lasersäteilylle.

WARNING!

Om apparaten används på annat sätt än i bruksanvisning specificerats, kan användaren utsättas för osynlig laserstrålning, som överskrider gränsen för laserklass 1.

Laitteen saa avata ja huoltaa ainoastaan sen huoltamiseen koulutettu henkilö. Tällaiseksi huoltotoimenpiteeksi ei katsota väriainekasetin vaihtamista, paperiradan puhdistusta tai muita käyttäjän käsikirjassa lueteltuja, käyttäjän tehtäväksi tarkoitettuja ylläpitotoimia, jotka voidaan suorittaa ilman erikoistyökaluja.

VARO!

Mikäli kirjoittimen suojakotelo avataan, olet alttiina näkymättömälle lasersäteilylle laitteen ollessa toiminnassa. Älä katso säteeseen.

WARNING!

Om laserprinterns skyddshölje öppnas då apparaten är i funktion, utsätts användaren för osynlig laserstrålning. Betrakta ej strålen.

Fax Cord Statement

Product may or may not have fax/telephone cord enclosed. If not provided to reduce the risk of fire, use only No. 26 AWG or larger telecommunication line cord.

Europe Statement for Telecom Operation

The printer meets applicable EU Directive & UK Statutory Instruments and carries the CE & UKCA mark accordingly. For details see EU & UK Declaration of Conformity issued by the manufacturer.

For printers with the feature to be connected to the analog Public Switched Telecommunication Networks (PSTN):

Due to differences between individual European national PSTNs the product may not guarantee unconditional assurance of successful operation on every PSTN termination point. Network compatibility depends on the correct setting being selected by the customer in preparation of its connection to the PSTN. Please follow the instructions provided in the user manual. If you experience network compatibility issues, please contact your equipment supplier or HP Inc. help desk in the country of operation. Connecting to a PSTN termination point may be the subject of additional requirements set out by the local PSTN operator.

New Zealand Telecom Statements

The grant of a Telepermit for any item of terminal equipment indicates only that Telecom has accepted that the item complies with minimum conditions for connection to its network. It indicates no endorsement of the product by Telecom, nor does it provide any sort of warranty. Above all, it provides no assurance that any item will work correctly in all respects with another item of Telepermitted equipment of a different make or model, nor does it imply that any product is compatible with all of Telecom's network services.

This equipment may not provide for the effective hand-over of a call to another device connected to the same line.

This equipment shall not be set up to make automatic calls to the Telecom "111" Emergency Service.

This product has not been tested to ensure compatibility with the FaxAbility distinctive ring service for New Zealand.

Additional FCC statement for telecom products (US)

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the back of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

The REN is used to determine the quantity of devices, which may be connected to the telephone line. Excessive RENs on the telephone line may result in the devices not ringing in response to an incoming call. In most, but not all, areas, the sum of the RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to the line, as determined by the total RENs, contact the telephone company to determine the maximum REN for the calling area.

This equipment uses the following USOC jacks: RJ11C.

FCC-compliant telephone cord, jack and modular plug should be used with this equipment. This equipment is designed to be connected to the telephone network or premises wiring using a compatible modular jack, which is Part 68 compliant. This equipment cannot be used on telephone company-provided coin service. Connection to Party Line Service is subject to state tariffs.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. If advance notice is not practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the operation of the equipment. If this happens, the telephone company will provide advance notice in order for you to make the necessary modifications in order to maintain uninterrupted service.

If trouble is experienced with this equipment, please see the numbers in this manual for repair and (or) warranty information. If the trouble is causing harm to the telephone network, the telephone company may request you remove the equipment from the network until the problem is resolved.

The customer can do the following repairs: Replace any original equipment that came with the device. This includes the toner cartridge, the supports for trays and bins, the power cord, and the telephone cord. It is recommended that the customer install an AC surge arrestor in the AC outlet to which this device is connected. This is to avoid damage to the equipment caused by local lightning strikes and other electrical surges.

Telephone Consumer Protection Act (US)

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains, in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business, other entity, or individual sending the message and the telephone number of the sending machine or such business, or other entity, or individual. (The telephone number provided cannot be a 900 number or any other number for which charges exceed local or long distance transmission charges).

Industry Canada CS-03 requirements

Notice: The Industry Canada label identifies certified equipment. This certification means the equipment meets certain telecommunications network protective, operational, and safety requirements as prescribed in the appropriate Terminal Equipment Technical Requirement document(s). The Department does not guarantee the equipment will operate to the user's satisfaction. Before installing this equipment, users should ensure that it is permissible for the equipment to be connected to the facilities of the local telecommunications company. The equipment must also be installed using an acceptable

method of connection. The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations. Repairs to certified equipment should be coordinated by a representative designated by the supplier. Any repairs or alterations made by the user to this equipment, or equipment malfunctions, may give the telecommunications company cause to request the user to disconnect the equipment. Users should ensure for their own protection that the electrical ground connections of the power utility, telephone lines, and internal metallic water pipe system, if present, are connected together. This precaution can be particularly important in rural areas.

⚠ CAUTION: Users should not attempt to make such connections themselves, but should contact the appropriate electric inspection authority, or electrician, as appropriate. The Ringer Equivalence Number (REN) of this device is shown on the regulatory chassis label.

This product meets the applicable Innovation, Science and Economic Development Canada technical specifications.

The Ringer Equivalence Number (REN) indicates the maximum number of devices allowed to be connected to a telephone interface. The termination of an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices not exceed five (5).

The standard connecting arrangement code (telephone jack type) for equipment with direct connections to the telephone network is CA11A.

Remarque: L'étiquette Industrie Canaca identifie un équipement certifié. Cette certification signifie que l'équipement satisfait à certaines exigences en matière de protection, d'exploitation et de sécurité du réseau de télécommunications, conformément au(x) document(s) sur les exigences techniques relatives à l'équipement terminal. Le Ministère ne garantit pas que l'équipement donnera satisfaction à l'utilisateur. Avant d'installer cet équipement, les utilisateurs doivent s'assurer qu'ils sont autorisés à connecter l'équipement aux installations de l'entreprise locale de télécommunications. L'équipement doit également être installé via une méthode de connexion appropriée. Le client doit être conscient que le respect des conditions ci-dessus ne peut pas empêcher la dégradation du service dans certaines situations. Les réparations de l'équipement certifié doivent être coordonnées par un représentant désigné par le fournisseur. Toute réparation ou modification apportée par l'utilisateur à cet équipement ou tout dysfonctionnement de l'équipement peut amener l'entreprise de télécommunications à demander à l'utilisateur de débrancher l'équipement. Pour leur propre protection, les utilisateurs doivent s'assurer que les connexions électriques à la terre du service public d'électricité, des lignes téléphoniques et, le cas échéant, des conduites d'eau métalliques internes sont raccordées ensemble. Cette précaution peut être particulièrement importante dans les zones rurales.

⚠ CAUTION: Les utilisateurs ne doivent pas tenter d'effectuer eux-mêmes de tels raccordements, mais doivent prendre contact avec les services d'inspection électrique appropriés ou avec un électricien, selon le cas. Le numéro d'équivalence de sonnerie (REN) de cet appareil est indiqué sur l'étiquette réglementaire du châssis.

Ce produit est conforme aux spécifications techniques applicables d'Innovation, Sciences et Développement économique Canada.

Le numéro d'équivalence de sonnerie (REN) indique le nombre maximum d'appareils pouvant être connectés à une interface téléphonique. La terminaison d'une interface peut consister en n'importe quelle combinaison de dispositifs, à la seule condition que la somme des REN de tous les dispositifs ne dépasse pas cinq (5).

Le code de raccordement standard (type prise téléphonique) pour les appareils directement raccordés au réseau téléphonique est CA11A.

Wireless functionality in Europe

For products with 802.11b/g/n or Bluetooth radio	This product operates on radio frequency between 2400 MHz and 2483.5 MHz, with a transmit power of 20 dBm (100 mW) or less.
For products with 802.11a/b/g/n radio	 CAUTION: IEEE802.11x wireless LAN with 5.15-5.35 GHz frequency band is restricted for indoor use only in all European Union member states, EFTA (Iceland, Norway, Liechtenstein) and most other European countries (i.e.: Switzerland, Turkey, Republic of Serbia). Using this WLAN application outdoors might lead to interference issues with existing radio services. This product operates on radio frequencies between 2400 MHz and 2483.5 MHz, and between 5170 MHz and 5710 MHz, with a transmit power of 20 dBm (100 mW) or less.

FCC compliance statement—United States

Exposure to radio frequency radiation

-  **CAUTION:** The radiated output power of this device is far below the FCC radio frequency exposure limits. Nevertheless, the device shall be used in such a manner that the potential for human contact during normal operation is minimized.

In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 20 cm (8 in) during normal operation.

This device complies with Part 15 of FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

⚠ CAUTION: Based on Section 15.21 of the FCC rules, changes of modifications to the operation of this product without the express approval by HP may invalidate its authorized use.

Australia statement

This device incorporates a radio-transmitting (wireless) device. For protection against radio transmission exposure, it is recommended that this device be operated no less than 20 cm from the head, neck, or body.

Canadian statements

For Indoor Use. This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus as set out in the radio interference regulations of the Canadian Department of Communications. The internal wireless radio complies with RSS 210 of Industry Canada.

Pour l'usage d'intérieur. Le présent appareil numérique n'émet pas de bruits radioélectriques dépassant les limites applicables aux appareils numériques de Classe B prescrites dans le règlement sur le brouillage radioélectrique édicté par le Ministère des Communications du Canada. Le composant RF interne est conforme à la norme CNR-210 d'Industrie Canada.

Products with 5 GHz Operation Industry of Canada

⚠ CAUTION: When using IEEE 802.11a wireless LAN, this product is restricted to indoor use, due to its operation in the 5.15- to 5.25-GHz frequency range. Industry Canada requires this product to be used indoors for the frequency range of 5.15 GHz to 5.25 GHz to reduce the potential for harmful interference to co-channel mobile satellite systems. High-power radar is allocated as the primary user of the 5.25- to 5.35-GHz and 5.65- to 5.85-GHz bands. These radar stations can cause interference with and/or damage to this device.

Lors de l'utilisation d'un réseau local sans fil IEEE 802.11a, ce produit est réservé à une utilisation en intérieur en raison de sa plage de fréquences, comprise entre 5,15 et 5,25 GHz. Industrie Canada recommande l'utilisation en intérieur de ce produit pour la plage de fréquences comprise entre 5,15 et 5,25 GHz afin de réduire les interférences nuisibles potentielles avec les systèmes de satellite portables utilisant le même canal. Le radar à haute puissance est défini comme étant le principal utilisateur des bandes 5,25 à 5,35 GHz et 5,65 à 5,85 GHz. Ces stations radar peuvent provoquer des interférences sur ce périphérique et/ou l'endommager.

Exposure to Radio Frequency Radiation (Canada)

⚠ WARNING! Exposure to Radio Frequency Radiation The radiated output power of this device is below the Industry Canada radio frequency exposure limits. Nevertheless, the device should be used in such a manner that the potential for human contact is minimized during normal operation.

To avoid the possibility of exceeding the Industry Canada radio frequency exposure limits, human proximity to the antennas should not be less than 20 cm (8 inches).

AVERTISSEMENT! Exposition aux émissions de fréquences radio. La puissance de sortie émise par ce périphérique est inférieure aux limites fixées par Industrie Canada en matière d'exposition aux fréquences radio. Néanmoins, les précautions d'utilisation du périphérique doivent être respectées afin de limiter tout risque de contact avec une personne.
