SHURSEAL® PACKAGING SOLUTIONS

FOLDED EDGE® HAND DISPENSER

**FOLDED
EDGE
TECHNOLOGY**
Reinforced Strength. Ready To-Open.

The Folded Edge® Hand Dispenser is unique in construction – patented Folded Edge® Technology folds both edges of the packaging tape along the length of the carton as it's applied, delivering:

REINFORCED STRENGTH

Increases the strength of the tape edge to keep the seal intact, particularly at its most vulnerable failure point – the major flaps where the tape folds over the edges of the carton.

READY TO OPEN SEALS

Creates a secure, easy-to-open carton seal that doesn't require a knife or other sharp instrument to open.

ADDITIONAL BENEFITS INCLUDE

- **Improved wipe-down pressure** as tape is applied, which results in deeper penetration of the tape's adhesive into the carton to produce tamper-evident seals.
- **A retractable/pivoting safety blade** that is shielded from accidental contact.
- **Visible tape length indicators** that provide tab length control and reduced tape consumption – see how much tape is being dispensed.
- **Single strip tape application** via visible markers that provide straight taping guidance.
