DS-101A Stereo Ambient Noise Cancellation (ANC) Headset

Diagram of key features / controls

Using Your Headset:

Charge for at least 2 hours before first use.

- Insert the supplied micro-USB charger into the USB charger slot. The Status Indicator will turn RED to indicate that charging is in progress. When charging is complete, the LED Status Indicator will become dim or go out completely.

Select your ear-buds

- The headset is supplied with a medium sized silicon ear-bud already fitted. Insert the ear-bud marked "R" into your right ear, and the one marked "L" into your left ear. The ear-buds should feel stable and comfortable. If the ear-bud is too large or too small, remove the silicon ear-buds by pulling them away from the body of the ear-piece and replace them with the smaller or larger silicon ear-buds provided.

Listen to your audio

- Insert the audio plug into your mobile phone or MP3 player and start your music playback.
- If the playback audio sounds distorted or strange, place the adapter provided in the sales package on to the audio plug and re-start your music playback.
- If you wish to activate the ANC feature, simply slide the ANC On / Off switch away from the LED Status Indicator. The LED Status Indicator will turn GREEN to indicate ANC is operating. To turn off the ANC feature, slide the ANC On / Off switch in the opposite direction. The LED Status Indicator will turn off unless the unit is being charged.

Answering or Making a Call*

- An incoming call will sound in the headset. To answer the call, press the call answer / end button once. To end the call press the call answer / end button once.
- Some mobile handsets may support additional features such as voice control and dialling. Check the device User Guide for further information.

*** Where supported by playback device – for more detailed compatibility information, please visit www.digital-silence.com**

Troubleshooting Guide

PROBLEM	SOLUTION
Cannot hear any sound	<ul style="list-style-type: none">• Check your headset is correctly inserted in your playback device, and that it is playing audio at an audible level.• Check that the ANC feature is not switched on with a flat battery – if this is the case, switch the ANC feature off and recharge the battery.• Check that the ON/OFF switch is fully pushed to the On or Off position.
Audio only playing from one earbud	<ul style="list-style-type: none">• Check that the ON/OFF switch is fully pushed to the On or Off position.
Audio playback sounds strange	<ul style="list-style-type: none">• Check the plug is fully inserted into your device. If audio still sounds strange, try the adapter included with the headset.• For full details of compatibility, visit www.digital-silence.com.
Ambient noise is not reduced	<ul style="list-style-type: none">• Check that the ANC function is switched on – the Green LED will light up.• Ensure the internal battery is charged.• Ensure the ear-buds are the correct size for your ears – this impacts the ANC performance and audio playback.
Call Answer / End button doesn't work	<ul style="list-style-type: none">• Ensure your mobile device supports this feature and that the plug is fully inserted and not hindered by any external covering on the mobile device.
