[3] Energy savings calculation is based on HP's black-and-white LaserJet printers comparing the energy-efficient toner in the most recent printer within a class to its legacy printer with conventional toner. The stated energy consumption, during printing, is divided by the printer's pages per minute. Actual savings may vary.

[4] Declared yield based on ISO/IEC 19752 and continuous printing. Actual yields vary considerably based on images printed and other factors. For details see <http://www.hp.com/go/learnaboutsupplies>.
