24 Port Cat6A Shielded Patch Panel

P/N 675-24C6AS

Patch panels are an efficient and convenient solution to terminating all the cable runs coming in from various rooms to one main location commonly referred to as the server room or wiring closet. Patch panels are key to connecting and routing circuits in your network and beneficial to:

- Keeping your cables tidy

- Making it easier to identify your cables

- Keep your cables secure

- Easier to re-configure your network

- Easier to troubleshoot your network
