

AntiStatic Service Kit • AntiStatic Wrist Strap

# Protect sensitive circuitry from electrostatic discharge (ESD).

### FEATURES

- » Protects sensitive circuitry from electrostatic discharge (ESD).
- » Two-layer construction.
- » Guaranteed for life!

### OVERVIEW

The AntiStatic Service Kit's long-lasting mat features a resilient outer layer, and a buried conductive inner layer shields against static charges on work surfaces and floors. You can also wrap sensitive parts in it for return to the service center.

The AntiStatic Wrist Strap is included with the kit (part number FT200) or ordered separately (part number 407-017). The crocheted cloth strap is fully adjustable. Its construction places five silver-plated conductive monofilaments on top of a non-conductive inner surface for greater skin contact.

### What's included

#### FT200:

- ◆ Post strap and resistor
- ◆ Bull clip with snap connector
- ◆ Adjustable blue cloth wristband with post snap
- ◆ ESD shielding bag
- ◆ 12-foot (3.6-m) ground cord
- ◆ 12-foot (3.6-m) coiled cord with banana/alligator plug

#### 407-017:

- ◆ Adjustable blue cloth wristband with post snap
- ◆ 5-foot (1.6-m) coiled cord with banana/alligator plug
