

ZD510 HC Z-Band Wristbands

Zebra's ZD510-HC allows you to print patient information and barcodes directly on Z-Band direct thermal wristbands.

The wristband is the cornerstone of patient safety. If a wristband fades and fails to scan, patient care and safety and workflows are compromised. Zebra's Supplies Research and Development developed Z-Band to be one of the most durable direct thermal wristbands in the market*. With over 4 billion patients identified since 1998**, you can rely on Zebra.

Z-Band Wristband Features:

- Adult, Pediatric and Infant sizes
- Adhesive and Clip-Closure options
- Resistance to common hospital hand sanitizers
- Silver antimicrobial coating that protects the wristband from degradation
- Latex-free material
- MR-Safe*** level of safety

Environmentally Friendly Wristband Cartridge: Supporting Your Sustainability Goals

As well as designing our wristbands to enhance patient safety, we innovate to support your environmental, social, and governance goals. Our new Environmentally Friendly Wristband Cartridge, for use with our ZD510-HC and HC100 Wristband Printers, is made from PET 1 material. PET 1 can be recycled in standard curbside collections, reducing landfill and promoting circular economy practices.

*For more details on the durability laboratory testing performed, please download our white paper on www.zebra.com titled "Putting Wristband Durability to the Test."

**1998 - 2018

***Z-Band wristbands are made of polypropylene and vinyl. The direct thermal imaging chemistry is composed primarily of leuco dyes and developers. The inks / varnishes used are UV varnishes and water-based inks. There is no metal content in or on these particular patient identification bands. Therefore, Z-Band wristbands are considered to be MR-Safe.

Zebra Z-Band wristbands are available with adhesive or clip-closure, in a variety of sizes and colors to meet your organization's needs.
