# My Body in Action Cards

To view the complete guide and watch a video, go to [www.Roylco.com/product/R59270](http://www.Roylco.com/product/R59270).

Take your students on a tour of the human body! 10 beautifully illustrated animation cards depict the intricate details of body systems.

Move the cards from side to side to observe the processes of various organs, from light entering the eye to blood flowing through the arteries, veins and heart valves!

The cards depict the following major organs and body systems: brain, eye, nose, mouth and throat, heart, lungs, liver and pancreas, stomach and intestines. We've animated little colored arrows to show the directions that everything moves.

While viewing the cards, encourage students to prop them up against their bodies, and talk about the important functions of the various organs they are observing. This will allow students to visualize the placement of organs throughout their bodies and allow them to make connections with the images in other Human Body Action Cards. View the full guide (see above) for a complete description of each card.
