CHAPTER 1: OVERVIEW

1.1 INTRODUCTION

The Fiber Wall Cabinet is used to extend indoor fiber optic distribution cable runs out from the data center to a remote wallmount area in your building. The fiber wall mount enclosure allows the incoming bulk fiber optic distribution cable to break out and terminate to fiber adapters panels in the enclosure where the user can use fiber duplex cable to connect to your equipment.

The fiber optic lock style wall cabinet, is perfect for secured fiber cabling. The lock-style cabinet has two locking compartments. One compartment is for a user side and the other is for the technician side. Each compartment uses a separate key lock for additional security. This enclosure can accept up to four fiber adapter panels.

The cabinet's rugged metallic housing is made of heavy-gauge steel with a powder coat finish. Bulk fiber cabling can enter the enclosure from the top left or bottom left grommet opening. The rubber grommet is a thin membrane seal that prevents dust from settling inside.

In addition, the enclosure can accommodate an internal splice tray for fusion or mechanical splicing.

1.2 WHAT'S INCLUDED

Your package should include the following items. If anything is missing or damaged, please contact Black Box at 877-877-2269 or info@blackbox.com.

- ♦ (1) Fiber Wall Cabinet, Lock Style, 4-Adapter Panel
- ♦ (1) Warning label
- ♦ (6) 1" (2.5-cm) stick-on rectangular cable holders
- ♦ (4) Mounting screws
- ♦ (30) 3" (7.6-cm) cable ties
- ♦ (4) 4" (10.2-cm) cable ties
- ♦ (1) cable management sticker
- ♦ (1) set of ID labels (1, 2, 3, 4)
- ♦ (2) sets of keys (labeled "A" and "B")
- ♦ (2) semicircular cable holding rings (installed)

CHAPTER 2: INSTALLATION

2.1 INSTALLING THE CABINET AND CABLE

Follow these steps:

1. Open the cabinet's doors and use a screwdriver to attach the cabinet to a wall with the four included mounting screws. Or, use your own hardware to mount the cabinet on a block wall.
2. Bring in your bulk fiber cable in either the cabinet's top left or bottom left on the enclosure.
3. Strip back the cable jacket on the incoming bulk fiber cable and use the cable ties to secure to the enclosure at the internal mounting points. Make sure you anchor the fiber cable with the Kevlar yarn to the Kevlar clamp on the enclosure.

FIGURE 2-1. THE JPM402A-R3 CABINET'S INSIDE VIEW

2.2 INSTALLING THE SPLICE TRAYS (OPTIONAL)

1. Unfasten the two wing head nuts inside the cabinet. Remove the semi-circular take up rings.
2. Place the splice tray through the threaded studs.
3. Make your fiber splices and re-install the tray cover.
4. Re-fasten the wing head nuts.

CHAPTER 2: INSTALLATION

2.3 PREPARING THE CABLE

1. After the incoming bulk fiber cable is secured to the enclosure, wrap the excess individual fiber strands around the semi-circular rings.
2. Install the fiber adapter panels in the wall mount fiber enclosure.
3. Terminate each fiber stand with the fiber optic connector and attach it to the fiber adapter panel.

2.4 ROUTING THE FIBER PATCH CABLES

1. After all the individual strands of are terminated and connected to the fiber adapter panels, use fiber patch cables and connect to the user side of the adapter panels.
2. After the patch cords are terminated and connected to the fiber adapter panel, use the cable ties and stick-on rectangular cable holders to organize your work.

2.5 FIBER ENCLOSURE KEY LOCKS

The Fiber Wall Mount Enclosure has locking front doors. There are two doors on the front of the enclosure, and each has its own separate key lock. The left side door is referred to as the Technician Side and the right side door is referred as the User Side.

The Technician Side uses Key Lock labeled "A."

The User Side uses Key Lock labeled "B."
