

Kensington®

Elevate Comfort,
Elevate Productivity.

Kensington Monitor Arm Solutions

Why Use a Monitor Arm?

Whether working from home or in the office, more people are spending extended periods in front of a monitor. Simultaneously, employee wellbeing is a megatrend, with organisations recognising user comfort as a key component of performance and productivity. Monitor arms are essential for optimising a user's workspace. They provide exceptional positioning flexibility and superior height adjustment, while also freeing up valuable desk space compared to traditional monitor stands.

Kensington®

IMPROVED ERGONOMICS

A monitor arm enables adjustment of screen height, tilt and swivel, achieving the optimal ergonomic position. This flexibility enhances comfort for the user's neck, shoulders and eyes.

PRODUCTIVITY BOOSTER

With a monitor arm, you can easily switch between different viewing angles, screen positions and monitor orientations.

MAXIMISES DESK SPACE

Elevating a monitor off the desk frees up valuable desk space. This can be used for other essential items such as documents, a keyboard or a second monitor.

ADDED FLEXIBILITY

Kensington monitor arms can accommodate a wide range of monitor sizes and weights with extra features such as cable management.

ENABLES COLLABORATION

An arm can make it easier to share a screen - the monitor can be angled to show work to others, enhancing communication and teamwork.

ENHANCED AESTHETICS

Using monitor arms can significantly enhance the appearance of your desk, giving it a more premium and organised look, especially when using cable management.

Why Choose Kensington?

COMPLETE AND CONCISE SOLUTION

Kensington offers a simple best-better-good range of single and twin monitor arms. This is bolstered by a selection of affordable monitor arms for specialist applications.

TIME-SAVING INSTALLATION

Our SmartFit™ One-Touch, Space-Saving and Ergo monitor arm feature pre-installed C-clamps and necessary tools straight out-of-the-box saving valuable installation time.

THE PROFESSIONALS' CHOICE

For over 40 years, Kensington has collaborated with users to design professional-grade product solutions dedicated to optimising workforce performance.

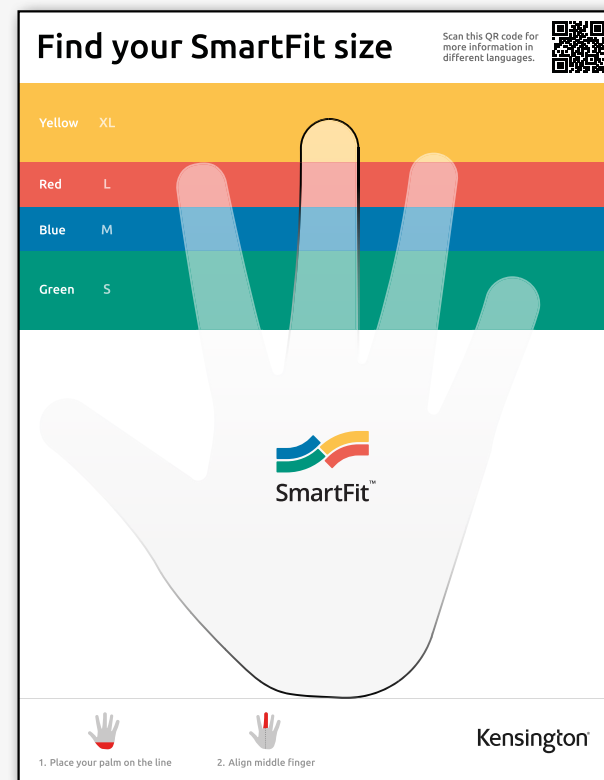

Comfort Made Easy

With SmartFit™, anyone can set up a personalised, ergonomic fit without the need for a workplace specialist.

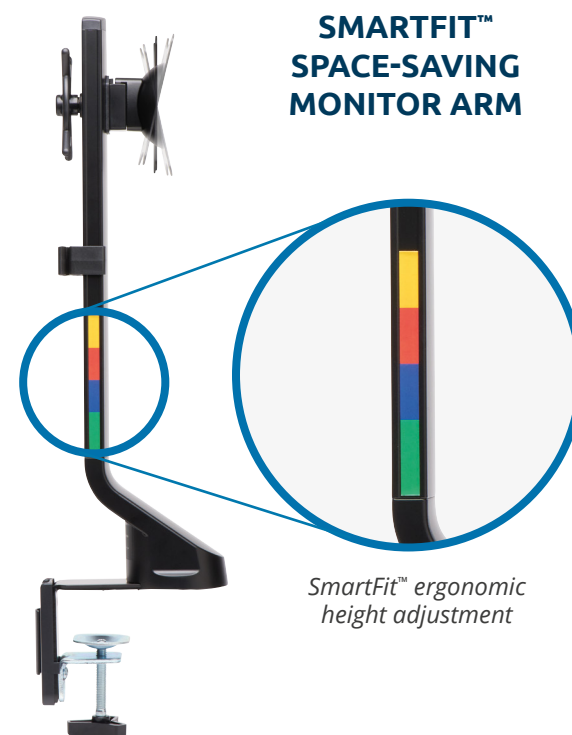

Kensington SmartFit™ products feature a colour-coded adjustment that allows the user to determine the optimal ergonomic height setting, simply using their hand size.

Whereas other solutions require an expert to tailor the product to each user, the hand chart included with each SmartFit™ product allows users to set their own ideal adjustment, without any additional tools.

DATA-DRIVEN RESEARCH FOR PERSONALISED COMFORT

SmartFit™ is based on US Army study data that compiled anthropometric data of thousands of soldiers and all of their body measurements. The study concluded that a person's stature is linked directly to their hand size. SmartFit™ uses this by applying four basic colour groups to each product, providing a fact-based ergonomic sizing guide.

SMARTFIT™ SPACE-SAVING MONITOR ARM

SmartFit™ ergonomic
height adjustment

1. MEASURE

Just place your hand on the baseline of the hand chart.
The tip of your middle finger indicates your SmartFit™ colour.

2. ADJUST

Then adjust your product to the correct SmartFit™ colour setting without the use of any tools.

3. FIT

You're all set to work more comfortably with your SmartFit™ products adjusted perfectly for you in seconds.

Kensington®

SmartFit™
One-Touch
Monitor Arms

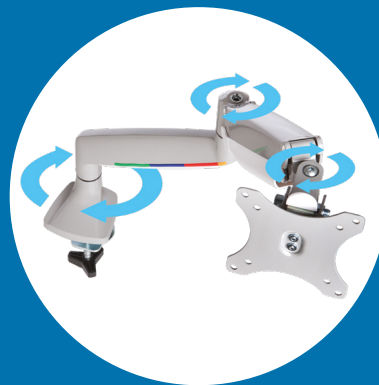

SmartFit™ One-Touch Monitor Arms are the ultimate combination of precise positioning and seamless usability.

Each One-Touch arm features an integrated gas spring which allows for effortless control over screen height, depth and angle. The counterbalance tension can be fine-tuned to accommodate various monitor sizes and weights.

Available for single and dual monitor setups with either a black or grey finish, all One-Touch arms feature SmartFit™ height adjustment that enables the user's optimal ergonomic height to be found quickly and easily.

A pre-installed C-clamp ensures fast setup, while an optional grommet fixture provides added installation flexibility.

One-Touch Gas Spring

Delivers total control over monitor's position with effortless adjustments.

Flexible Monitor Adjustment

170-505mm height, ±90° swivel, ±90° tilt and ±180° monitor rotation.

Pre-Installed C-Clamp

Saves valuable minutes of installation time when fitting the arm. (Includes optional grommet fixing.)

BETTER

Kensington®

SmartFit™
Space-Saving
Monitor Arms

SmartFit™ Space-Saving Monitor Arms are the perfect solution for compact workspaces, especially where screens face a desk divider.

Available in Single and Dual screen options, each arm's base protrudes just 148mm - ideal for shallow desks or tight spaces.

The Easy Grip adjustment combined with the colour-coded SmartFit™ height adjustment ensures effortless positioning for optimal ergonomics.

A pre-installed C-clamp speeds up installation, with an optional grommet fixture included for added flexibility.

Each arm offers tilt, swivel and rotation adjustments, while built-in cable management keeps desks tidy and clutter-free.

Ideal for Compact Workspaces

Perfect for desks where space is limited, dense seating areas and/or desks with a shallow depth.

Easy Grip Adjustment

Allows for quick height (239-470mm), tilt and swivel ($\pm 10^\circ$) positioning.

Pre-Installed C-Clamp

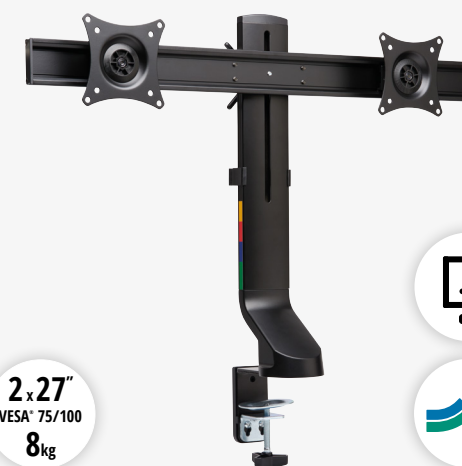

Saves valuable minutes of installation time when fitting the arm. (Includes optional grommet fixing.)

Kensington®

SmartFit™ Ergo Monitor Arms

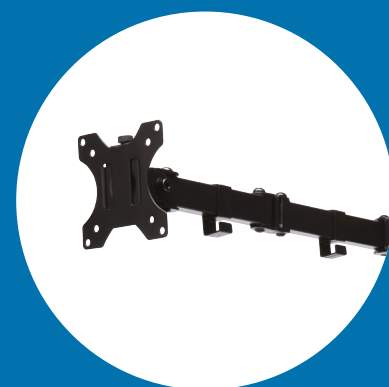

SmartFit™ Ergo Monitor Arms are an ideal first upgrade from a standard monitor stand.

Available in single, single extended and dual extended configurations, each arm is an affordable way to enhance ergonomics and productivity.

SmartFit™ makes finding the perfect ergonomic height quick and easy, thanks to the included colour-coded hand chart.

A pre-installed C-Clamp saves valuable installation time, particularly useful for mass deployments.

Each arm does not compromise on features. Tilt, swivel and rotation adjustment offers users flexible screen positioning options, with cable management keeping desktops clean and tidy.

Competitively Priced with Extra Features

Our entry-level range includes useful features such as cable management and SmartFit™.

Wide Range of Monitor Adjustments

±90° swivel, ±45° tilt and ±180° rotation.

Pre-Installed C-Clamp

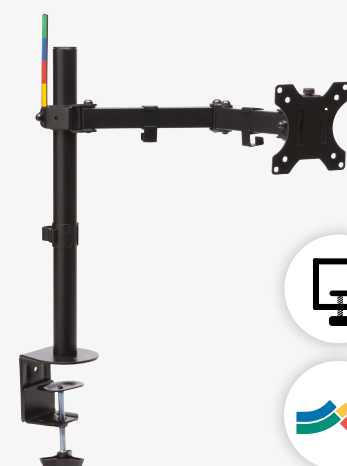

Saves valuable minutes of installation time when fitting the arm. (Includes optional grommet fixing.)

Monitor Arms

SMARTFIT™ ERGO FREESTANDING DUAL MONITOR STAND

While professionals appreciate the advantages of a dual-monitor setup and the tidy, organised workspace a monitor arm provides, mounting screens can be a challenge.

The SmartFit™ Ergo Freestanding Dual Monitor Stand combines the benefits of a monitor arm with the effortless setup of a stand - no clamps or drilling required.

Its curved monitor rail aligns with the natural curvature of the human eye for an immersive viewing experience.

K58271WW

SMARTFIT™ PREMIUM HEAVY DUTY SINGLE MONITOR ARM

Mounting a large format display can be a challenge due to the high cost, complexity or compatibility restraints of traditional monitor mounts.

The SmartFit™ Premium Heavy Duty Single Monitor Arm is an affordable solution specifically designed for screens up to 49" in landscape orientation.

An integrated gas spring provides precise and effortless monitor placement, while SmartFit™ makes it easy to find the ideal ergonomic height.

K58273WW

VERTICAL STACKING DUAL MONITOR ARM

Perfect for environments where top-to-bottom browsing is preferred, such as control rooms, spreadsheet tasks, or limited desk spaces, the Vertical Stacking Dual Monitor Arm is an excellent choice.

Its stacked design allows two monitors to occupy the footprint of a single screen, supporting up to two 32" monitors in landscape orientation (two 29" monitors in portrait orientation).

The arm is supplied with a pre-installed C-clamp, saving installation time.

SMARTFIT™ DUAL MONITOR ARM WITH CROSSBAR AND HANDLE

Hotdesks accommodate multiple users with varying ergonomic needs - and adjusting screens to their preferences can be a hassle.

The SmartFit™ Dual Monitor Arm with Crossbar and Handle minimises the effort required to reposition two monitors.

With an integrated gas spring and an easy-grip handle, adjusting screen placement is smooth and effortless. SmartFit™ simplifies finding the ideal ergonomic height.

UNIVERSAL LAPTOP HOLDER FOR MONITOR ARMS

Easily elevate your laptop to the perfect viewing height and enhance your workspace with the Universal Laptop Holder for Monitor Arms.

Designed for easy mounting on any monitor arm with a standard VESA® 75/100 plate, it offers a stable and secure platform, keeping your laptop off the desk and out of the way.

Supports laptops up to 16" screen size, 4.5kg maximum weight.
