

SW-100

Key Features

- Instant Wireless Presentations
- Display Mirroring
- Real-time Annotation
- Touch Back Control

Product Description

ViewBoard® Cast is a content sharing app for ViewBoard™ Box. ViewBoard Cast enables 1080p content to be streamed from a user's device onto a ViewBoard® display over wireless or cable networks. Multiple users can simultaneously annotate and broadcast content (such as multimedia documents, cloud files, etc.) from their mobile devices and shown on the large screen of the ViewBoard display. Presenters can control displayed content from a phone, tablet or laptop, while Android and iOS device users can use ViewBoard Cast's specialized annotation toolbar and control the ViewBoard display remotely. Whether, in class or in a meeting, ViewBoard Cast makes teaching and group discussion quick and easy.
