Using the KVXHP-series/ ACR1002DP-R rack mount
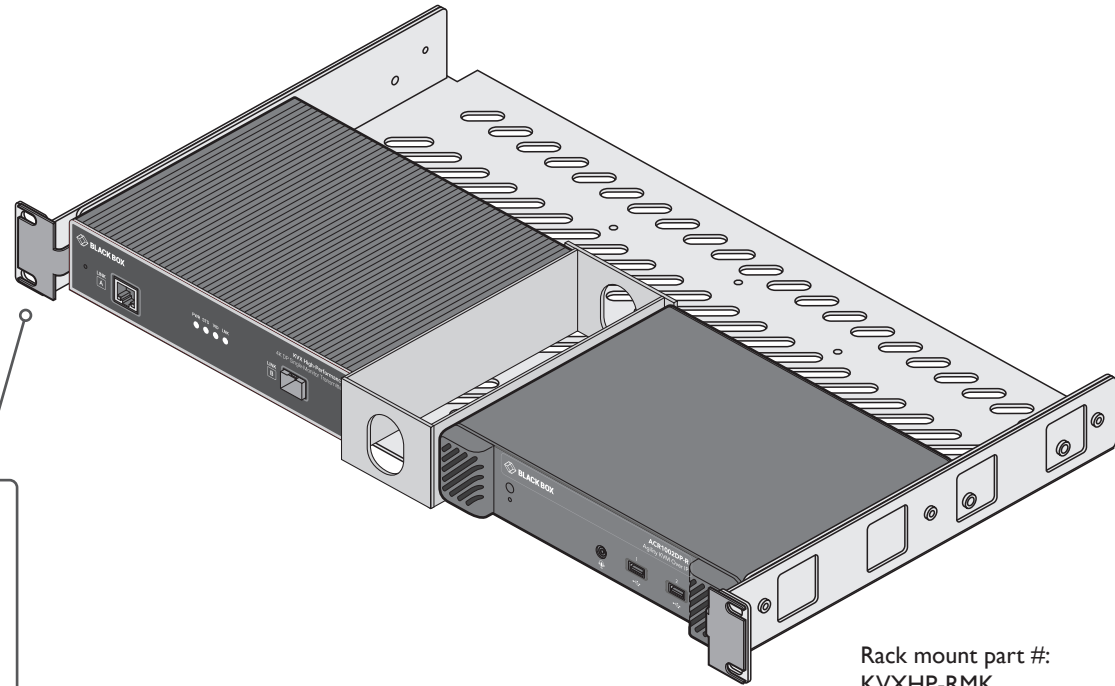

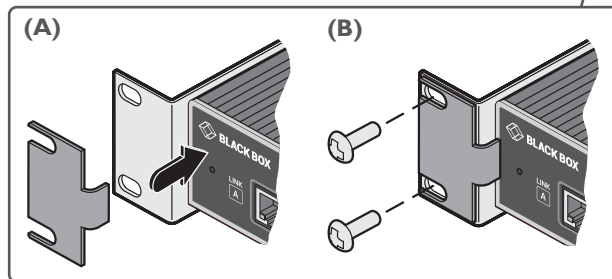

1 Install the empty rack mount into your 19" frame.

2 Place a compatible module into each side of the rack mount so that their rear panels butt up against the center backstop.

3 Locate the two supplied brackets.

4 Working on one side at a time, remove the rack mount securing bolts, place a bracket at side of the rack mount so that it holds the module in place and replace the bolts **(A)** and **(B)** below.

5 Make all other necessary connections to the modules.

Rack mount part #: KVXHP-RMK
