

WHAT IS THE ET80/ET85 RUGGED 2-IN-1 WINDOWS TABLET?

The dependable tablet created for the workers the world depends on

First responders, utility field service teams and manufacturing production line workers are all essential to our way of life. They need more than just a rugged tablet; they need a tablet that is tailored for the essential work they perform. And that's exactly what the ET80/ET85 delivers. This 12-inch tablet enables workers to stay connected to the information, tools and people they need to take the right action at the right time — whether they're in the field, on scene, in a vehicle, on the factory floor or at the office. In just seconds, this standalone tablet can become a laptop or a fixed or mobile full workstation. And many feature options and accessories allow you to create the perfect tablet for every job.

WHY SHOULD YOU BUY THE ET80/ET85?

TOP 5 CUSTOMER BENEFITS

1

The lightest and thinnest rugged 2-in-1 in its class.

Do you think a rugged 2-in-1 has to be heavy and bulky? Think again. The ET80/ET85 redefines what a 2-in-1 can be. It's greater than 35% thinner and 20% lighter than major 2-in-1 competitors with the same screen size, making it easy to grab and go. When docked in a vehicle, its low profile improves driver visibility — and safety. A friction hinge keyboard provides a natural laptop-like experience. And its smooth, sleek design is easy to wipe down with fewer crevices.

2

Stay connected no matter what.

When every second counts, your workers need wireless connectivity they can trust. The ET80/ET85 is the only tablet in its class that supports WiFi 6E and 5G. Workers get faster upload and download speeds, more reliable connections and better quality video calls — and you get a future-proof device that's ready for these next generation networks. The ET80/ET85 also supports CBRS¹ and public safety network certification, along with three pass-through antenna ports for stronger in-vehicle coverage

3

Take collaboration and productivity to the next level.

With the ET80/ET85, you get all the security, manageability and compatibility of Windows 10 — with the added value of select Zebra Mobility DNA and DataCapture DNA tools. That means you can easily deploy enterprise-class PTT and secure text messaging to make your team even tighter. You can monitor battery health to make sure workers have battery power they can count on, every shift, every day. And you can easily configure the scanners in your tablets to get them up and running quickly.

4

Built for your mission-critical work.

Every aspect of the ET80/ET85 has been designed with a deep understanding of how much is at stake. Rugged and ready, it's built to survive inevitable drops, your dustiest environments, heavy rain and snow, and can be hosed down even with the ports open. The fanless thermal design is ideal for manufacturing clean rooms. The optional integrated scanner can read virtually any barcode, even dirty and damaged ones. The result? A device you can trust in the most unforgiving roles and environments.

5

One docking solution for wherever you need it.

With a single universal dock, the ET80/ET85 transforms into a desktop computer in the office or a mobile workstation in a police car, truck or forklift. The simplified docking experience lets workers dock and undock in seconds — so the tablet is always where it's needed and never left behind in the vehicle. The dock offers up to nine additional ports for more ways to connect, accommodates both tablet and laptop modes and is compatible with the rugged case and expansion back.

APPLICATIONS

Public Safety

- Routing/dispatch
- Personnel tracking
- Incident reporting
- Patient care reporting
- E-Citation
- Records management
- Mobile incident command
- And more...

Utilities/Field Service

- Routing/dispatch
- Personnel tracking
- Emergency repairs
- Mobile work order management
- Safety inspection/compliance
- And more...

Manufacturing

- Plant management
- Mobile HMI
- PLC programming
- MRO
- Forklift operations
- Clean room, pharma and more
