

Intel® NUC 11 Essential Mini PCs, Kits, and Boards

The Essential Mini PC for Everyday Computing

The latest Intel® Pentium® Silver or Celeron®
processors power reliable, cost-efficient designs

Performance- Packed. Value-Priced.

The name says it all. Intel® NUC 11 Essential Mini PCs, Kits, and Boards are the essential, everyday solution for kiosks, collaboration and streaming, and digital signage. Powered by Intel® Pentium® Silver or Celeron® processors, these systems deliver Intel reliability and quality in a slim, cost-efficient design.

For fast performance, systems come with up to quad-core Intel Pentium Silver processors, up to 32GB dual-channel memory, and optional 64GB storage. Quality and flexibility are built in, including a simplified

design, numerous built-in mounting options, HDMI and DP++ video ports, and six USB ports.

Intel® NUC 11 Essential Mini PCs, Kits, and Boards deliver the essentials—great performance and great value in a slim form factor backed by a three-year warranty from Intel.
