NEW PRODUCT ANNOUNCEMENT

PowerScan™ 9600
AUTO RANGE SERIES

AUTO RANGE

Extreme Scanning Flexibility
in a Super-Reliable Device

PLAY VIDEO

The PowerScan™ 9600 Auto Range (AR) series is Datalogic's newest offering in its line of handheld scanners. Building off the company's industry-leading series of ultra-rugged handheld industrial scanners, the 9600 AR features a 1D/2D scan engine with extra-long range scanning capabilities specifically designed for transportation, logistics, manufacturing, and warehouse applications. With this cutting-edge technology, operators can effortlessly scan picklists and pallets at near contact distances and instantly reach barcodes up to 20 meters (65 feet) away with a single device.

AMPLIFY EFFICIENCY AND PRODUCTIVITY

The new AR series revolutionizes extended-range scanning operations, offering a multitude of benefits for all types of business processes and applications. The best-in-class scanning performance boosts productivity while reducing total solution costs. Warehouse managers can trust the device's unparalleled reliability and superior durability, ensuring uninterrupted functionality throughout daily activities. Rock-solid communications and error-free operations that include "good-read" feedback provide the freedom to navigate expansive distribution centers and sprawling warehouses.

SEAMLESS INTEGRATION AND FUTURE-PROOF DESIGN

The new Auto Range series inherits the plug-and-play architecture of the PowerScan 9600 family, ensuring easy configuration across various communication setups. With compatibility with Serial, USB, Ethernet, EtherNet/IP, or PROFINET, the scanners protect your investment by accommodating future changes to your communication infrastructure.

UNRIVALED RELIABILITY WITH WIRELESS CHARGING SYSTEM

Experience unmatched reliability with Datalogic's Wireless Charging System. Built on cutting-edge inductive-charging technology, it eliminates the common points of failure caused by dirty or corroded charging pins. The new cradles even provide information on battery status and device health, enabling predictive maintenance, thus avoiding any unplanned downtime because of unexpected failure. The PowerScan 9600 Auto Range series is built for durability. It is designed to resist more than 50 drops at 2.5 m / 8.2 ft, sealed to IP67 and IP65 standards, and is the only device in its category with a trigger tested to resist 10 million hits. With specs like those, the 9600 AR will withstand the harshest warehouse environments.

Experience the unmatched PowerScan 9600 Auto Range series reliability>

TARGET INDUSTRY APPLICATIONS

The new Auto Range series is perfect for a range of industries and applications. In the transportation and logistics industry, it excels in distribution centers and logistics operations, including receiving/picking, inbound/outbound, and order fulfillment. In manufacturing and factory automation, it supports automotive, packaging, general manufacturing, and applications such as intralogistics, work in progress (WIP), and traceability.

Experience the PowerScan 9600 Auto Range series and empower your operations with unparalleled scanning performance and extended-range capabilities. Revolutionize your scanning workflows and unlock new levels of efficiency today.
