### The Problem

**30% of students come to class without a fully charged device.** Charging devices in the classroom is not always convenient. Learning is put on pause when devices in the classroom cannot be conveniently charged.

#### Limited Access

Traditional wall outlets can be located in hard to reach places, far from desks or hidden by other objects in the room.

#### Inability to Charge

Charging status might need to be activated with a wall switch, or other form of power control that educators are unable to visibly see.

#### Minimal Outlets

Schools have moved to one device per student and classrooms are equipped with only a few wall outlets to support all students to use and charge devices.

### Our Solution

The CUBE Tower™ equips classrooms with the necessary means to provide charge to students, no matter where they are located.

#### Versatile

Nest the mobile charging station between a group of desks or easily move it everywhere in the classroom. The CUBE Tower™ adapts to the needs of the classroom.

#### The Beacon

Inspiring classroom learning, the beacon allows educators to visibly see when the charging station is ready for use, charging classroom devices.

#### Unlimited Outlets

With 8 AC outlets on one CUBE Tower™, the mobile charging station can maximize power throughout the classroom, providing ultimate Active Charging™.

#### Charging Everywhere

Educators can use the 20 ft. power cord to move the CUBE Tower™ everywhere in the classroom. There is no need to feel tied down to a wall outlet anymore.
