Premium Performance

Designed for when performance, reliability and value count, Elements series cables are budget friendly while providing professional performance for home or commercial use. These cables connect DisplayPort DP++ sources to HDMI displays and support HDMI resolutions up to the HDMI 1.4 maximum of 4K at 30Hz as well as Full HD 1920x1080 at up to 120Hz. Engineered with low profile connectors and high flexibility, low bend radius cable, these cables are ideal for use where space is limited such as behind displays and in equipment racks.

Value Oriented Connectivity

These cables leverage the fact that most DisplayPort source devices natively support HDMI displays to provide a passive, budget friendly option to connect these devices. In order to use these cables it is important that the DisplayPort source is DP++ compatible, indicating that it is compatible with HDMI displays.

User Interface

Input	DisplayPort (Male)
Output	HDMI (Male)

Video Support

- Supports 3D video
- Refresh rates to 240Hz at 1080p
- Colour depths to 16 bit per colour

Compatibility

Use for connecting DisplayPort source devices to HDMI displays. DisplayPort source must support DP++ compatibility with HDMI.

This cable is uni-directional; it cannot be used to connect a HDMI source to a DisplayPort display.

Resolution

Supports up to maximum HDMI 1.4 resolution of 4K at 30Hz
Supports refresh rates of up to 120Hz at Full HD 1920x1080

Compliance

RoHS

Package Includes

DisplayPort to HDMI Cable

Reliability You Can Count On

Engineered with professional applications in mind, these cables utilise highly flexible 30AWG cable for reliable performance and ease of installation in home or business uses. Our robust ABS low profile DisplayPort connectors provide a comfortable grip and easy insertion while standing up to use in high traffic environments. The connectors are latching, meaning they can't fall out once connected.

Features

Supports the following DisplayPort features (when used with equipment that supports them):

- Extended Consumer Electronics Control (CEC)
- Adaptive sync; G-Sync and Freesync compatible
- High Dynamic Range (HDR) video support including HDR10, Dolby Vision, HLG
- Multiple audio stream and Dual View video support

Data Rate

HDMI 1.4, 10.2Gbps, High Speed class cable
(Backwards compatible with all previous HDMI standards)

Physical Characteristics

Materials: ABS DP Connector, PVC Jacket and HDMI Connector
