QuickStart Guide

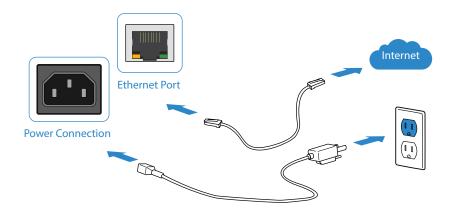

2 Rack Mount Bracket

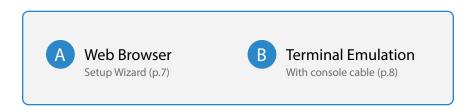

4 Rack Screws

Basic Connections

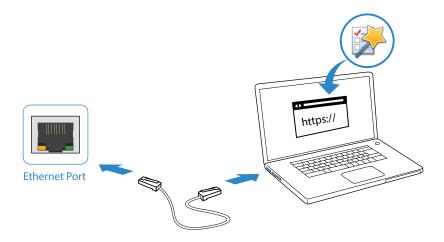

Connect your device to a power outlet and an Internet connection. This is usually a modem, but could also be another device on your network.

2 Setup Options

A Web Browser

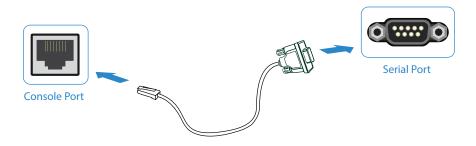

To Connect to the GUI

- 1. Connect the Ethernet cable.
- 2. Configure the management computer to be on the same subnet as the internal interface as the FortiVoice unit:

IP address: 192.168.1.X Netmask: 255.255.255.0

- 3. Visit https://192.168.1.99/admin in your web browser.
- 4. Login using username "admin" and no password.
- 5. Configure your device and save your settings.
- 6. Register your device from the dashboard page.

B Terminal Emulation

To Connect to the CLI

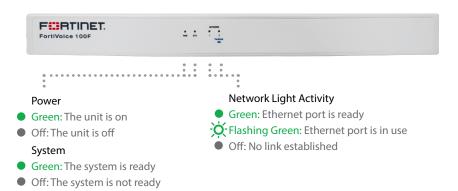

- Connect the device's console port to the management computer using the provided console cable.
- Start a terminal emulation program on the management computer, select the COM port, and use the following settings:

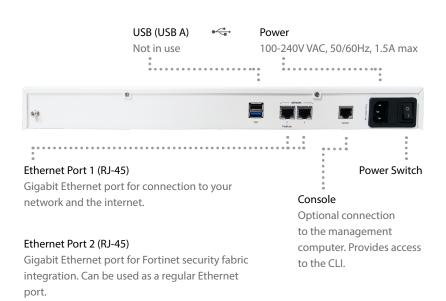

Baud Rate: 9600 Data bits: 8 Parity: None Stop bits: 1

Flow Control: None

- 3. Press Enter on your keyboard to connect to the CLI.
- 4. Login using username "admin" and no password. You can now proceed with configuring your device.

Device Guide

Installation

The FortiVoice unit can be placed on any flat surface, or mounted in any standard 19 inch rack unit with the provided rack-mount brackets and screws.

Please read "Cautions and Warnings" prior to installing your device.

Caution:

Electrostatic discharge (ESD) can damage your Fortinet equipment.

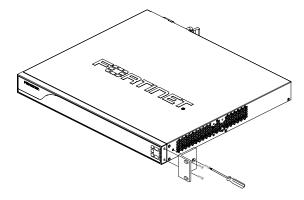

Do not place heavy objects on the unit.

To avoid personal injury or damage to the unit, it is recommended that two or more people install the unit into the rack.

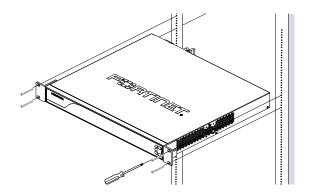

Note: If the unit has a redundant power supply, each power cable should be connected to a different power source. In this way, if one power source fails, the other may still be operational and the unit will not lose power.

To install the FortiVoice unit into a rack

- Ensure that the FortiVoice unit is placed on a stable surface prior to rack-mount installation.
- 2. Attach the provided rack-mount brackets to the sides of the unit using the provided bracket screws.

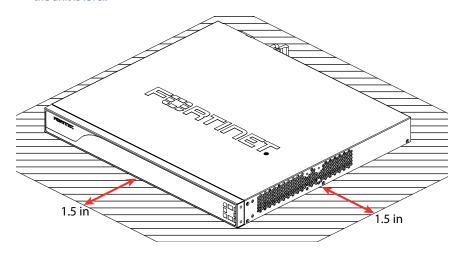

3. Position the FortiVoice unit in the rack. Ensure there is enough room around the unit to allow for sufficient air flow.

- Line up the rack-mount bracket holes to the holes on the rack and ensure that the FortiVoice unit is level.
- 5. Finger tighten four rack-mount screws to attach the unit to the rack.
- 6. Verify that the spacing around the FortiVoice unit conforms to requirements and that the unit is level, then tighten the rack-mount screws with an appropriate screwdriver.
- 7. Plug the provided power cable into the rear of the unit and then into a grounded electrical outlet or a separate power source, such as an uninterruptible power supply (UPS) or a power distribution unit (PDU).

To install the unit on a flat surface

- Ensure that the surface onto which the FortiVoice unit to be installed is clean, level, and stable and that there is at least 1.5 in (3.8 cm) of clearance on all sides to allow for adequate airflow.
- 2. Attach the provided rubber feet to the bottom of the FortiVoice unit.
- 3. Place the unit in the designated location.
- 4. Verify that the spacing around the FortiVoice unit conforms to requirements and that the unit is level.

5. Plug the provided power cable into the rear of the unit and then into a grounded electrical outlet or a separate power source, such as an uninterruptible power supply (UPS) or a power distribution unit (PDU).

Cautions and Warnings

Environmental Specifications

Ambient operating temperature: 0C to 40C

Rack Mount Instructions - The following or similar rack-mount instructions are included with the installation instructions:

Instructions de montage en rack - Les instructions de montage en rack suivantes ou similaires sont incluses avec les instructions d'installation

Elevated Operating Ambient - If installed in a closed or multi-unit rack assembly, the operating ambient temperature of the rack environment may be greater than room ambient. Therefore, consideration should be given to installing the equipment in an environment compatible with the maximum ambient temperature (Tma) specified by the manufacturer.

Température ambiante élevée - S'il est installé dans un rack fermé ou à unités multiples, la température ambiante de fonctionnement du rack peut être supérieure à la température ambiante de la pièce. Par conséquent, il est important d'installer le matériel dans un environnement respectant la température ambiante maximale (Tma) stipulée par le fabrication.

Reduced Air Flow - Installation of the equipment in a rack should be such that the amount of air flow required for safe operation of the equipment is not compromised.

Ventilation réduite – Installation de l'équipement dans un rack doit être telle que la quantité de flux d'air nécessaire au bon fonctionnement de l'équipement n'est pas compromise.

Mechanical Loading - Mounting of the equipment in the rack should be such that a hazardous condition is not achieved due to uneven mechanical loading. Chargement Mécanique – Montage de l'équipement dans le rack doit être telle qu'une situation dangereuse n'est pas lié à un chargement mécanique inégal.

Circuit Overloading - Consideration should be given to the connection of the equipment to the supply circuit and the effect that overloading of the circuits might have on overcurrent protection and supply wiring. Appropriate consideration of equipment nameplate ratings should be used when addressing this concern.

Surtension – Il convient de prendre l'ensemble des précautions nécessaires lors du branchement de l'équipement au circuit d'alimentation et être particulièrement attentif aux effets de la suralimentation sur le dispositif assurant une protection contre les courts-circuits et le càblage. Ainsi, il est recommandé de tenir compte du numéro d'identification de l'équipement.

Reliable Earthing - Reliable earthing of rack-mounted equipment should be maintained. Particular attention should be given to supply connections other than direct connections to the branch circuit (e.g. use of power strips).

Fiabilité de la mise à la terre- Fiabilité de la mise à la terre de l'équipement monté en rack doit être maintenue. Une attention particulière devrait être accordée aux connexions d'alimentation autres que les connexions directes au circuit de dérivation (par exemple de l'utilisation de bandes de puissance).

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

ThisLicenseapplies to any program or otherwork which contains a notice placed by the copyright holders aying it may be distributed under the terms of this General Public License. The "Program" below, refersto any such program or work, and a "work based on the Program" mean seither the Program or any derivative work under copyright law that is to say, a work containing the Program or aportion of fit, either verbatim or with modifications and/or translated into another language. (Herein after, translation is included without limitation in the term "modification".) Each licensee is a didressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute awork based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each of the program of the pcopyanappropriatecopyrightnoticeand disclaimer of warranty; keep intactall the notices that refer to this License and to the absence of anywarranty; and give any other recipients of the Program acopy of this License along with the Program. You may charge a fee for the physical act of transferring acopy, and you may at your option of ferwarrant typrotection in the program acopy of this License along with the Program. You may charge a fee for the physical act of transferring acopy, and you may at your option of ferwarrant typrotection in the program acopy of this License along with the Program. You may charge a fee for the physical act of transferring acopy, and you may at your option of ferwarrant typrotection in the program acopy of this License along with the Program. You may charge a fee for the physical act of transferring acopy, and you may at your option of the Program acopy of theexchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the program of the Prograterms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause anywork that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge toall third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or a constant of the program of the prodisplayanan nouncement including an appropriate copyright notice and anotice that there is no warranty (or else, saying that you provide a warranty) and that users may redistributethe program under the second it ions, and telling the user how to view a copy of this License. (Exception: if the Program it self is interactive but does not normally prints uch an extension of the program in the program is self in the program of the program is self in the program of theannouncement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and can be reasonably considered in dependent and the program and the prseparate works in themselves, then this License, and its terms, do not apply to those sections when you distribute the mass eparate works. But when you distribute the same sections when you distribute the mass expansion of the property of the propertyas part to faw hole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other license extend to the entire as the contract of the program of the programwhole, and thus to each and every part regardless of who wrote it.. Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, and thus to each and every part regardless of who wrote it... Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, and thus the entire it is not the part of the entire it... The entthe intentistoexer cise the right to control the distribution of derivative or collective works based on the Program. In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable for munder the terms of Sections 1 and 2 above provided that you are the program of thalso do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used the section of the sectifor software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give anythird party, for a charge no more than your cost of physically performing source distribution, a complete property of the pmachine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or, and the contraction of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or, and the contraction of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or, and the contraction of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or a medium customarily used for software in the contraction of the corresponding source code, to be distributed under the terms of the corresponding source code, to be distributed under the terms of the corresponding source code, to be distributed under the terms of the contraction of the corresponding source code, to be distributed under the terms of the contraction of the contracc) Accompany it with the information your eceived as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if the other properties of the other pryou received the program in object code or executable form with such an offer, in accord with Subsection b above.)

Source code for a work means the preferred form of the work formaking modifications to it. For an executable work, complete source code means all the source code for all modules and the source code for all modules are the source code for all moit contains. plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the sourcecode distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operatingsystem on which the executable runs, unless that component itself accompanies the executable. If distribution of executable or object code is made by offering access to copy from a constant of the executable of the executabledesignated place, the noffering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third partitions are the contraction of the source code, even though third partitions are the contraction of the contraction ofto copy the source along with the object code.

"Source code "for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and they are not provided by the property of theand output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true and output from such as the content of the use of the Library in a tool for writing it). Whether that is true and output from such as the use of the Library in a tool for writing it) and the use of the Library in a tool for writing it). Whether that is true and the use of the Library in a tool for writing it) and the use of the Library in a tool for writing it). Whether that is true and the use of thdepends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on the contraction of theach copy an appropriate copy right notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the above the notice of the noticethis License along with the Library. You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of the contract of the Library or any portion of the contract of the of Section 1 above, provided that you also meet all of these conditions:

- a) The modified work must itself be a software library.
- b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
- c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the application of the contract of tfacility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs a constraint of the facility still operates, and performs a constraint of the facility still operates, and the facility still operates, and the facility still operates, and the facility still operates and the facility still opwhatever part of its purpose remains meaningful.

The sereguirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and the second of the contract of the second of tseparate works in themselves, then this License, and its terms, do not apply to those sections when you distribute the mass eparate works. But when you distribute the same sections are the same sections are the same sections and the same sections are the same seas part to faw hole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other license essex tend to the entire and the permission of the permission ofwhole, and thus to each and every part regardless of who wrote it. Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, and thus to each and every part regardless of who wrote it. Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, and thus to each and every part regardless of who wrote it. Thus, it is not the intent of this section to claim rights or contest you rights to work written entirely by you; rather, and thus the intent of this section to claim rights or contest you are the intent of thethe intentisto exercise the right to control the distribution of derivative or collective works based on the Library. In addition, mere aggregation of another work not based on the library and the libraryLibrary with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License. 3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to agiven copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNUGeneral Public License, version 2 instead of to this License. (If an ewer version than version 2 of the ordinary GNUGeneral Public License, version 2 in the contract of the contractLicense has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from the content of tthat copy. This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. Youmay copy and distribute the Library (or aportion or derivative of it, under Section 2) in object code or executable formunder the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily of the company is the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily of the company is the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily of the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily of the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily of the complete corresponding machine-readable source code, which must be distributed as the complete corresponding machine-readable source code, which must be distributed as the complete corresponding machine-readable source code, which must be distributed as the complete code of the complete code of the codeused for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same places at is first the contract of the contrequirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License. However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a derivative of the Library (because it contains portions of the Library). Section 6 states terms for distribution of such executables When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the Library of the Library even though the Library even the Library even though the Library even though the Library even the

source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by the library of the lib

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the contract of thethe object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.) and the containing this object code plus portions of the Library will still fall under Section 6.) and the code of the codeOtherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under the work of the work oSection 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and the Library is a support of the Library and the Library is a support of the Library and the Library is a support of the Library and the Library is a support of the Library and the Library is a support of the Library and the Library is a support of the Library and the Library is a support of the Library and the Library is a support of the Library and the Library is a support of thedistribute that work under terms of your choice, provided that the terms permit modification of the work for your own use and reverse engineering for debugging such modifications.You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License.
