

EP67
ECOPURE™

Heavy Duty Industrial Degreaser

Need a tough guy on your team! Look no further than EP67.
When indoor air quality matters to you.

FEATURES

- Quick work on the toughest grease and grime
- Always ready to impress and satisfy the most discriminating custodian and customer
- GreenGuard Gold, Ecologo and Ecocert certified
- LONO: Letter of Non-Objection for food plants.
- Biodegradable
- Solvent-free
- No added fragrance
- Heavy duty degreaser, floor cleaner, top scrub and many other industrial applications.

BENEFITS

- ✓ Available in 6 formats, from free pour, closed loop system or RTU, we've got you covered
- ✓ Promotes health and safety for the operator and contribute to a good Indoor Air Quality
- ✓ pH friendly for sensitive substrates and surfaces

EP67 Heavy Duty Industrial Degreaser quickly removes grease, oily residue, carbon, ink petroleum and soot from washable surfaces. Focusing not only on green cleaning but UL's most stringent standard of GREENGUARD GOLD certification makes it a natural for any facility who embraces green cleaning and its benefits of Indoor Air Quality. EP67 is uniquely engineered to deal with soils of all levels. Try it as a grout cleaner for "wow and impress" results every time. Available in 1:10 for tough soils, 1:32 for medium soils and 1:64 for light soils. Users of EP67 have found it to be an excellent top scrub product in the process of scrubbing and refinishing floors in preparation for additional coats of floor finish. Safe for all kinds of surfaces and floors including rubber, marble, and granite.

* Input approved for agriculture or organic processing by ECOCERT Canada.

Heavy Duty Industrial Degreaser

EP67
ECOPURE™

WHAT YOU NEED TO KNOW

- Used as a multi-faceted cleaner and degreaser to remove some of the toughest soils found in common and industrial environments.
- pH sensitive for most known surfaces to ensure no damage will occur with its use.
- Can cross over into the floor care world as an excellent top scrub prior to recoating.
- Use in a spray bottle or an autoscrubber and make quick work of soils.

SAFETY

- Always wear safety equipment when preparing and cleaning - eye protection and gloves.
- Always put out wet floor signs whenever wet work is being done.
- Always hold equipment handles firmly when starting up.

TOOLS

- Decant into spray bottle, mop bucket or autoscrubber.
- Use a pump up sprayer when performing large jobs as a spray and wipe.
- Use a properly laundered (residual-free) microfiber when using as a spray and wipe for maximum productivity and effectiveness.
- Wet/dry vacuum (for use with rotary floor machine).
- Mop and bucket/wringer can also be used.

Pro Tips

- ProTip:** In winter months, a blue pad can be used in favor of red pads to provide a more aggressive clean.
- ProTip:** Use a 48 oz pump sprayer to lessen the risk of repetitive motion injury.
- ProTip:** If not using an autoscrubber or a standard floor machine when doing floor work, mop and bucket cleaning is acceptable, however, microfiber mop heads will greatly assist in delivering a cleaner floor surface.
- ProTip:** If using in a mop bucket for floor cleaning, check the level soil level in the bucket to ensure that you are always cleaning with a clean solution. Many great double bucket systems exist in the marketplace today. We encourage you to invest in this technology.

Professional Results

- Surfaces are clean and streak free.
- "Areas that are clean, tend to stay clean". (Community Policing Model)
