ThinkCentre M60q Chromebox Enterprise

Designed for ultimate productivity, this tiny form factor engineered with Intel Celeron or up to 12th Gen Intel Core i5 Processor is ideal for business professionals. Chrome OS, up to 64GB DDR4 memory, and up to 256GB SSD storage make it ideal for hosting memory-intensive applications. It also comes with optional Wi-Fi 6E technology that enables faster connection speeds with compatible routers.
MAINSTREAM COMPUTING FOR A VARIETY OF BUSINESS USES

ThinkCentre Tiny-In-One devices enable businesses to upgrade displays and computers separately, but still enjoy the space-saving benefits of an all-in-one device.

REASONS TO BUY

With the intense power of Intel Iris Xe Graphics or Intel UHD Graphics, this mini Chromebox is designed to handle data-heavy workloads and accelerate VDI efficiently. Plus, for added flexibility, it helps users connect up to four independent displays via onboard USB-C, DisplayPort, and HDMI ports.

For an added layer of security and convenience, there is a Google Security Chip H1 that allows users to unlock their devices without needing to memorize and type in long password each time they log in to the device.

Cloud applications and security solutions require minimal or no manual intervention most of the time, rendering professionals time to optimize their productivity.

ThinkCentre M60q Chromebox Enterprise
