

Steel Fish Tapes

- Stainless Steel fish tape is corrosion resistant extending the life of the tape (Cat. No. 56341)
- Durable, high strength 1/8" (0.3 cm) wide spring steel fish tapes are firm yet flexible for long runs and large wire pulls
- Double-Loop creates a stronger end for maneuvering through conduit
- Full grip style handle gives you a firm, steady grip as you pull tape from the case
- Tempered, high quality tape keeps its stability as it glides between surfaces for effective pushing and pulling of wire under carpets, through insulated walls and over suspended ceilings
- 25' (7.6 m) length with slim-profile plastic tip has protective coating to reduce non-contact moisture and humidity but keeps the steel dry to touch (Cat. No. 56335)
