

ADD-PBVESAB

Size Adjustable Security Power Bank Holder w/ VESA Plate (Black)

Size Adjustable Security Power Bank Holder w/ VESA plate (Black)

This power bank holder is an ideal solution that provides a simple way for tablet users to add a power bank to their devices. This simple add-on is easily attached to the back of any VESA-compatible tablet enclosure with standard 75mm x 75mm holes or 100mm x 100mm holes. It easily amalgamates with CTA's popular Paragon Enclosures (PAD-PARAW, PAD-PSWB) and can be positioned on different parts of the enclosure for use in either portrait or landscape orientation. The power bank holder has flexibility to adjust in length, depth and height to accommodate a wide variety of power bank sizes and shapes. It has a built-in k-slot hole for cable locking purposes and will prove to be a convenient solution to keep your device charged at all times.

Features:

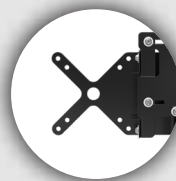

- 75mm x 75mm or 100mm x 100mm VESA-Compatible power bank holder
- Anti-Theft K-Slot for cable lock
- Adjustable length, depth and height to accommodate a wide variety of power bank sizes
- Allows for use in both landscape and portrait orientations
- Connects VESA-Compatible enclosures via 4 screws (included)
- Compatible with CTA Digital's PAD-PARAW Paragon enclosure for medium-sized tablets and PAD-PSWB Paragon enclosure for small tablets.
