POWERED BY GDS® TECH™ WITH INTELLISKIN®

GDS® Tech™ is an enterprise device mounting ecosystem that provides rugged protection, charging, and data sync capabilities. This ecosystem is enabled by IntelliSkin®, a patented, one-of-a-kind protective sleeve that utilizes pogo pads for connectivity rather than USB ports. Paired together, GDS® Tech™ and IntelliSkin® deliver a workflow-centric experience and are purposefully built for cost-efficient upgrades, making them the preferred solution for industries such as material handling, transportation, field service, and more.

IntelliSkin®

Each IntelliSkin® delivers a precise, form-fit that preserves full access to buttons and cameras, while converting the USB-C port into rugged pogo pin contacts. This unlocks the GDS® Ecosystem™ of vehicle, desktop, and wall docks—plus a full range of ergonomic accessories.

External USB-C Port

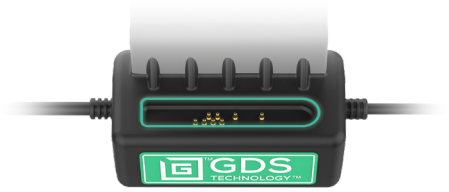

Ergo Accessories

Each IntelliSkin® includes integrated attachment points for ergonomic accessories like hand straps, shoulder straps, and more.

RAM® Screen Protectors Available

Port Protection

IntelliSkin® is the only case system on the market that protects the device port and converts that connection point to ruggedized pogo pads for charging and data transfer.

Pogo Pin Connection

Unlock the GDS® Ecosystem™ with a large collection of docks built with an integrated Distictive D Shape™ pogo pin connector for a hassle-free user experience that increases efficiency.

Easy to Clean

Flat pogo pads help minimize debris build-up and can be easily wiped clean with a soft cloth to maintain a secure connection with dock pins.

Customize Your Favorite Devices

*Additional colors available, please speak with your RAM® representative for more information.

OVERVIEW & CAPABILITIES

GDS® Docks™

GDS® Docks™ provide easy and intuitive docking capabilities that enhance any enterprise workflow. One single docking action immediately connects your device to power, data sync, and network, all while keeping your device protected in the warehouse, office, and on the go.

Temperature Control

NFC Extension

Future Proof

All IntelliSkin® and GDS® Docks™ use one of two standardized connectors—the octagon or D-shape—making it easier to upgrade devices without replacing your entire docking setup.

Fast & Convenient Charging

GDS® Docks™ provide easy and intuitive docking capabilities that enhance any enterprise workflow. One single docking action immediately connects your device to power, data sync and network.

Reliable Connection, Rugged Protection

By upgrading to the GDS®/IntelliSkin® system, your devices will seamlessly pair across the GDS® Ecosystem™ of vehicle docks, desktop docks, and multi-port charging bays. The pogo pad/pin design enables a streamlined workflow without fumbling for cords—simply dock the IntelliSkin®-wrapped device to charge.

USB-C 3.1

Peripheral Support

Dock Styles

The GDS® Ecosystem™ offers a variety of dock styles with assorted peripheral connectors, temperature-regulating accessories, locks, and power inputs. Learn what style works best for you below!

Vehicle - Universal

GDS® Uni-Conn™ offers a universal snap-in docking system; all you need is an IntelliSkin® and an adapter!

Vehicle - Custom Form-Fit

GDS® Tough-Dock™ offers a rugged exoskeleton that protects the back and sides of the device from impact.

Kiosk - Weighted & Pedestal

Wall - Locking & Non-Locking

Desktop - Single & Multi-Port

HOW IT WORKS

GDS® Uni-Conn™ Vehicle Docks

Compatible IntelliSkin® Rear & Bottom Pogo Pads

GDS® Uni-Conn™ is a universal, snap-in docking system that eliminates the need for expensive device upgrades. With just an IntelliSkin®-wrapped device and a GDS® Uni-Conn™ adapter, you're ready to connect seamlessly. This system not only streamlines the upgrade process but also makes docking effortless. When it's time for your next device upgrade, remember: there's only One Dock to Connect Them All™.

Spring Loaded Docks Available

Locking Versions Available

GDS® Uni-Conn™ Adapters for IntelliSkin®

Unlock the potential of GDS® Uni-Conn™ by installing the adjustable button adapter (RAM-GDS-U1AU) or standard adapter (RAM-GDS-U1U) to the back of your IntelliSkin®.

Seamless Device Upgrades for the Future

When the time comes to upgrade devices in your fleet, a new IntelliSkin® is all that is needed—keep your existing dock.

NOTE: failure to install dock lever stop will void warranty.

HOW IT WORKS

GDS® Tough-Dock™

The GDS® Tough-Dock™ is the most protective for tablets, securing the entire exterior frame of an IntelliSkin®-wrapped tablet. It's form-fitting modular design allows you to easily upgrade during device refreshes or peripheral updates.

Tested and deployed by the world's most reputable enterprises, the GDS® Tough-Dock™ remains the most durable tablet dock on the market—perfect for withstanding harsh environments like material handling, waste collection, or heavy machinery.

Safety Standards

The GDS® Tough-Dock™ is a top-rated safety product complying with local, federal, and international forklift safety standards to keep your workers safe while on the job.

HOW IT WORKS: GDS® TOUGH-DOCK™

Modular Tough-Dock™ Components

Device upgrades are inevitable. The modularity of GDS® Tough-Dock™ is what makes this system a cost-effective investment—simply swap out your dock body to match your newly deployed devices. By utilizing interchangeable top cups, bodies, and bases, we've made it easy to modify existing mounting systems without breaking the bank on an entirely new setup.

CASE STUDY

Modernized Mobile Data Terminals

With nearly 100 active lieutenants, Laramie County Sheriff's Office needed to modernize its mobile data terminals with a solution that was easier to use, more cost-effective, and built to handle demanding field operations. An additional challenge to tackle: Wyoming's intense summer sun that causes iPads to overheat and shut down while vehicles were parked.

The RAM® Mounts Solution

RAM® outfitted iPad Air 13" devices with IntelliSkin® cases, enabling reliable pogo-pin connections for seamless docking. Paired with the RAM® Vent-Temp™ cooling system, the tablets stayed protected from overheating and downtime. GDS® Tough-Docks™ provided secure charging and peripheral support in-vehicle, while a rugged keyboard maintained desktop-style workflows. For integration, a custom RAM® mounting solution for the Ford Police Interceptor maximized cabin space and officer comfort.

High-Tech Waste Collection Fleet

CARDS, operating nearly 200 specialized trucks, sought to modernize operations by deploying mobile devices to automate driver tasks, boost productivity, and streamline waste collection. The challenge: keeping tablets protected and accessible on the road while ensuring seamless tracking and service recording.

The RAM® Mounts Solution

CARDS equipped its fleet with Samsung Tab Active4 Pro tablets in IntelliSkin® cases paired with GDS® Tough-Docks™. Combined with drill-down dashboard mounts, the tablets stayed accessible yet unobtrusive—minimizing distractions, maximizing efficiency, and delivering durable, reliable performance across diverse vehicle types.

CASE STUDY

Hospital Increases Mobility

This large Van Nuys hospital made the leap towards increasing nurse mobility by implementing mobile devices into the daily workflow. They switched to Samsung's XCover6 Pro and needed physical product enhancers that would improve the nurses' workflow, spending less time dealing with devices and more time dealing with patients.

The RAM® Mounts Solution

RAM® Mounts streamlined hospital workflows with GDS® Tech™ and IntelliSkin® for XCover6 Pro. Protective IntelliSkins® enable charging, data transfer, and Samsung DeX via GDS® Docks™. The universal docking platform let nurses easily swap devices and use single or multi-port docking stations for efficiency.

Temperature Control

Located at the back of your GDS® Tough-Dock™ is an empty housing for upgrading your mounting solution. This housing can accommodate various temperature modules provided by RAM® Mounts. Easily install either the RAM® Vent-Temp™, which connects to your vehicle's vents or the RAM® Temp-Right™, which provides regulated heat in extremely cold environments.

RAM® Vent-Temp™

Back Nozzle Attachment

Hot or cold air from your vehicle's air system enters through the RAM® Temp-Right™ nozzle, travels through flexible tube, and exits behind the docked tablet.

RAM-VENT2-RND-50U
RAM® Vent-Temp™ with Front Dock Connection for Round Vents

✓ ADDITIONAL FEATURES

Vent cover attaches directly to circular vents using zip ties

Hose attachment includes built-in magnets for easy break-away when not in-use

RAM® Temp-Right™

The RAM® Temp-Right™ heater module regulates device temperatures to maintain functionality in extreme cold environments. Cabin air gets drawn through the Temp-Right™ fan and through the module, heating the air up to the right temperature needed for tablet functionality.

RAM-DOCK-HEATER1-BU

Low-profile docking station for electronic devices equipped with an IntelliSkin® protective case

The Desktop Dock features pogo pin contacts designed to match the pogo pads on IntelliSkin®-wrapped devices supporting USB Type-C data transfer and charging profiles

Power Delivery docks include a male to male USB Type-C cord which plugs directly into the back of the dock and to a Power Delivery charging source

Multi-Port Desktop Docks

The GDS® 6-Port Charging Dock was designed specifically to support up to six devices for simultaneous charging. These charging stations reduce the amount of charging cords needed to charge each device by consolidating power through one cord and provide each electronic device with its own charging bay to reduce clutter.

ADDITIONAL FEATURES

1. Supports devices with Power Delivery
2. Integrated pogo pads with distinctive D shape™ connector
3. 6-Port dock allows space for ergonomic accessories

GDS® View™

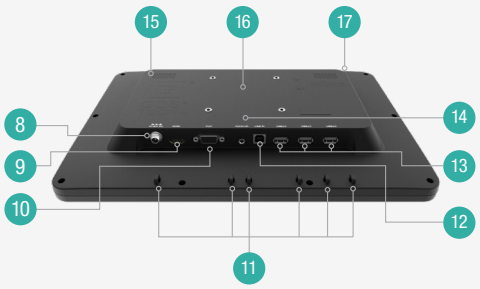

The GDS® View™ 13.3” touchscreen monitor lets you take the PC experience on the road. Create a mobile workstation that takes advantage of the GDS® Reach™ experience for data sync and charging capabilities. The GDS® View™ monitor has undergone MIL-STD-810H shock and vibration testing, ensuring performance in the most demanding environments.

This two-point capacitive touchscreen monitor allows you to pinch, zoom, and select—and includes an anti-glare and anti-fingerprint treatment. Control buttons on the front of the monitor are easy to access, while a red monochrome night mode helps to reduce eyestrain. In addition, two integrated 2W speakers allow for audio.

GDS® CAN Bus

EXPLORE GDS® UNI-CONN™ MOUNTING KITS FOR TRANSPORTATION

For the last few decades, RAM® Mounts has collaborated with the industry's best innovators to build the future of mobility. The key to a mobile workforce combines device, software, and docking solution. Every day our engineering teams look for ways to optimize product performance to seamlessly integrate into one another, making the lives of drivers all around the world easier, and business logistics scalable. That's why RAM® offers turnkey, rugged, cost-effective mounting solutions for ELD compliance. Depending on what device you are deploying, RAM® will either have the right solution ready to go or custom-build the right kit for you. Take advantage of upgrades like peripheral support, add-on accessories, and the award-winning GDS® Tech™ for connective longevity and reliability.

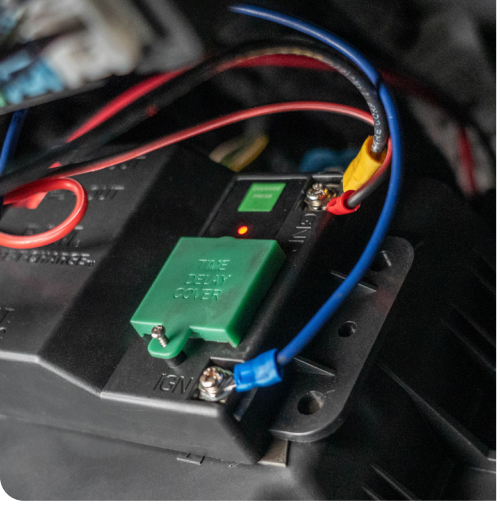

How it works

The GDS® CAN Bus allows users to simultaneously charge onboard ELDs and extract RAW CAN data to be read by third-party software, providing unparalleled flexibility and control over vehicle data.

Unlock the power of seamless data transfer and Power Delivery fast charging with GDS® CAN Bus technology

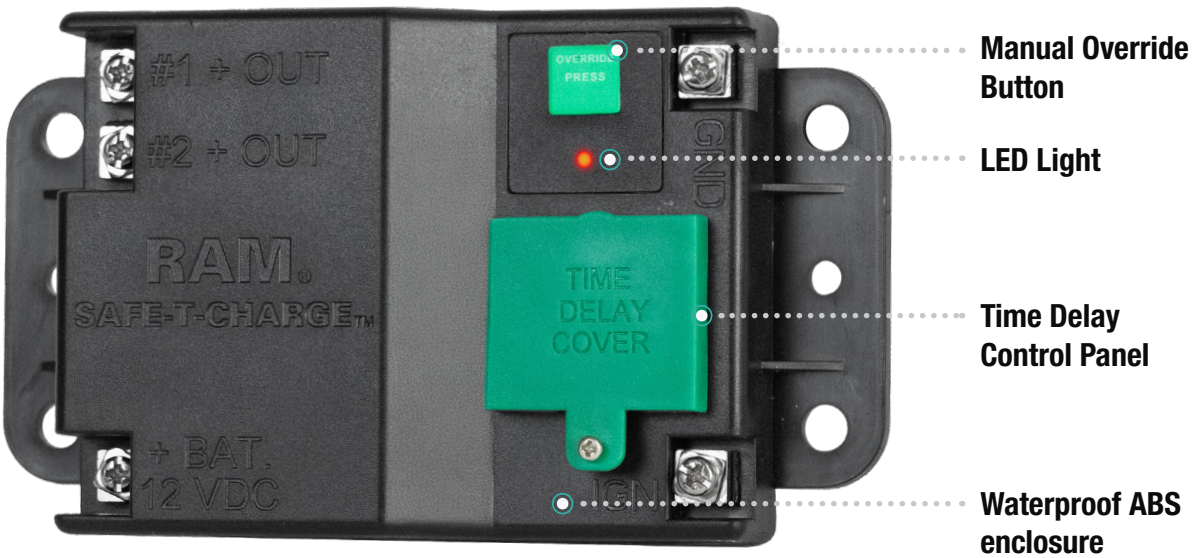

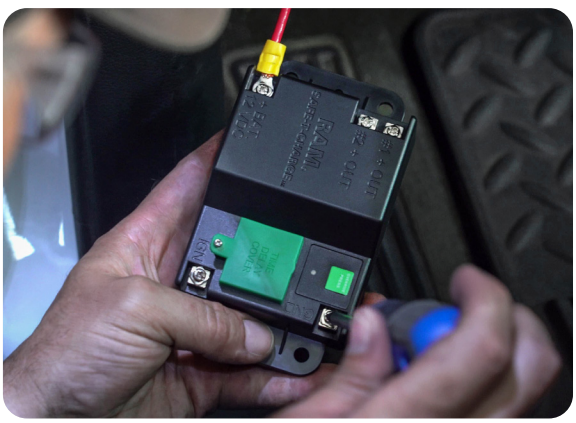

Safe-T-Charge™

This device is a smart, configurable voltage monitoring solution designed to protect vehicle and equipment batteries from excessive drain. It automatically cuts power to connected devices based on ignition status or voltage thresholds—ensuring essential electronics remain powered as needed without compromising engine start capability.

- **Manual Override Button**
- **LED Light**
- **Time Delay Control Panel**
- **Waterproof ABS enclosure**

ADDITIONAL FEATURES

Power-Off Delay Timer

Set timeouts from instant up to 8 hours post-ignition—ideal for IT updates, remote access, or continued power needs.

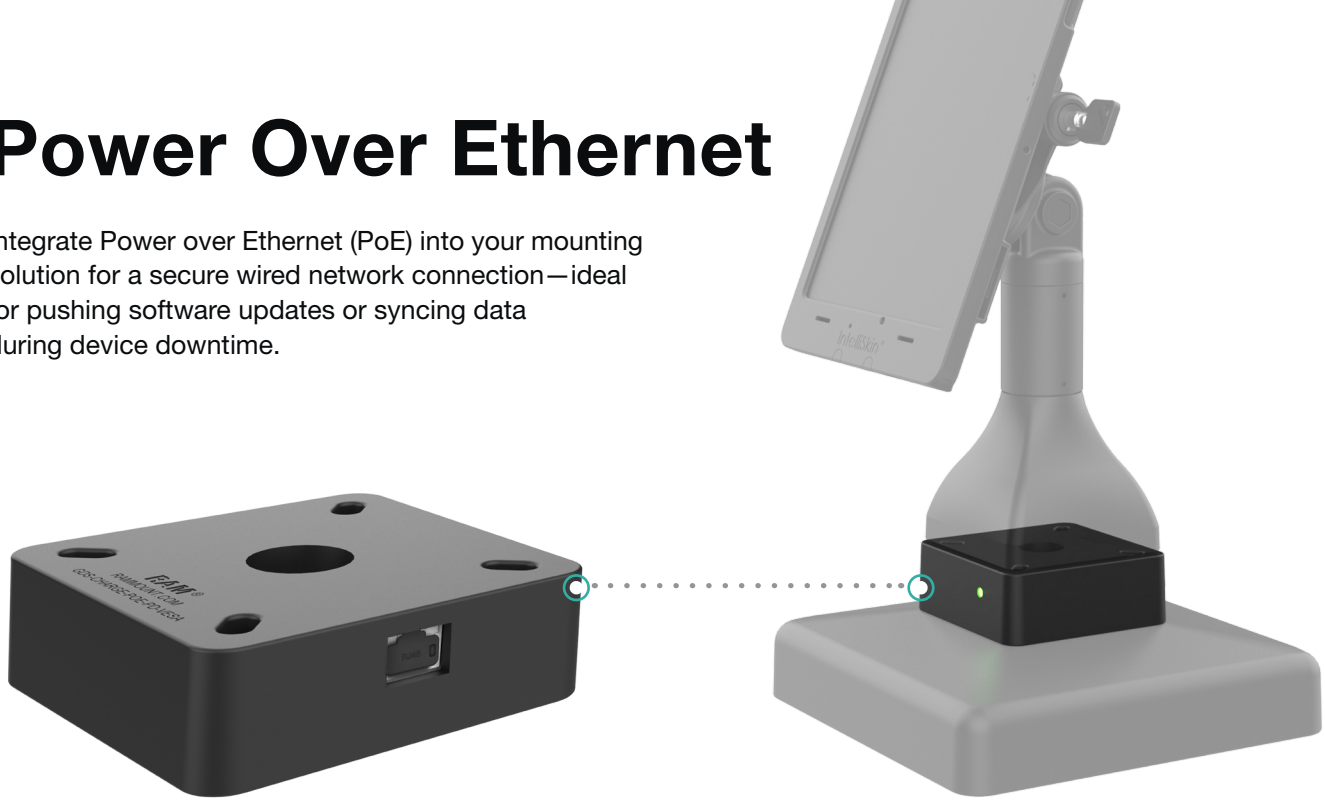

Surge Protection

Surge, reverse polarity & jump start protection ensures safe, reliable connection and uninterrupted operation in tough electrical environments.

Cables and Cable Retention

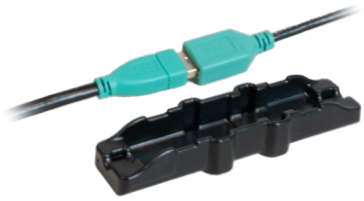

When it comes to device safety, it's the little details that matter. Cable retention is a vital piece of the puzzle in maintaining a secure connection between your device and ensuring it does not become unplugged from its power source.

Explore our GDS® cable clamp accessories below to learn how easy cable management and retention can be with the help of RAM® Mounts.

Care & Maintenance

When it comes to protecting and maintaining your fleet of devices, regular care is important for long-term performance. Learn more about our recommended cleaning, care, and maintenance below.

For Maintenance

Use 70% Isopropyl Alcohol for routine maintenance and light buildup of debris.

Cleaning Agent + Q-tips

For Connection Issues

Use DeoxIT® Pen for extreme buildup of debris, or if you're experiencing loss of connection.

DeoxIT Pen

Cleaning

Uncap your DeoxIT® Pen, or wet the end of your Q-tip with the cleaning agent and twist in a circular motion against each pogo pad 2-4 times each pad. Check pad for cleanliness and repeat the process until thoroughly cleaned.

Note: After using DeoxIT®, perform one cleaning with isopropyl alcohol.

General Care & Maintenance

For spills or accumulated dirt on the GDS® Dock™ pogo pins, gently clean using contact cleaner or alcohol on a cotton swab. Use contact cleaner or alcohol with a stiff brush to clean IntelliSkin® contacts.

For industrial and heavy use environments, clean pogo pins and contacts on a regular basis.

3-year warranty on all electronic components/Lifetime Warranty on all non-electronic components

The exclusive NPI Lifetime Warranty states that all GDS® non-electronic components and parts are warranted against defect in materials and workmanship for the life of the product or part. NPI's Lifetime Warranty covers the product or its components only. The mount device is not covered under the Lifetime Warranty and will not be replaced if damaged as a result of mount failure. This warranty is expressly limited to persons in the United States, and all foreign countries who purchase GDS® for resale or use in the ordinary course of the buyer's business. This warranty does not cover any product or part that has been abused, worn out, heated, ground or otherwise altered, used for a purchase other than that for which it was intended, or used in a manner inconsistent with any instruction regarding its use.

RAM-GDS-AD2U

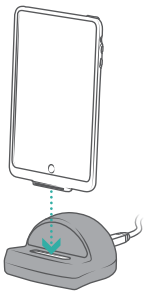

The Snap-Con™ GDS to Micro USB 2.0 Adaptor enables on the go charging and data connectivity of any GDS® compatible device, including devices wrapped in IntelliSkin®, using an included Micro USB 2.0 cable.

RAM-GDS-DOCK-AD2U

The Snap-Con Destop Stand holds your IntelliSkin® device upright while connected to the Snap-Con with integrated cable. Simply connect your Snap-Con to any device in an IntelliSkin and drop into the stand to secure in place.

RAM-GDS-DOCK-AD2U

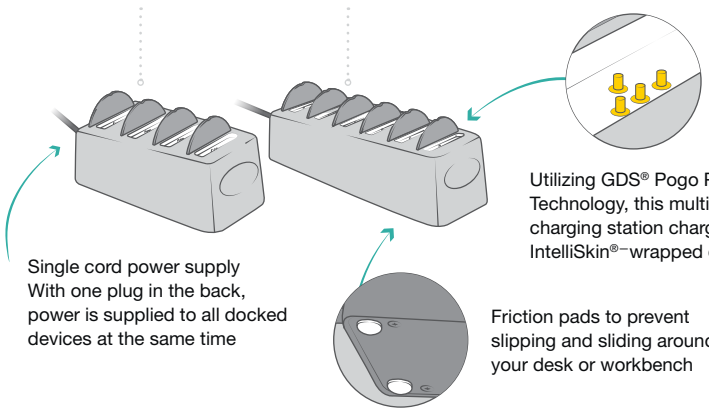

Heavy-duty docking and charging base for any device equipped with an IntelliSkin® sleeve including electronic devices. It provides HD data connectivity and an extra-heavy base for stability of larger devices and frequent docking and undocking common in commercial applications.

RAM-GDS-DOCK-4G1PU

*Not compatible with standard Type-C IntelliSkin®

RAM-GDS-DOCK-6G1PU

*Not compatible with standard Type-C IntelliSkin®

Utilizing GDS® Pogo Pin Technology, this multiport charging station charges any IntelliSkin®-wrapped device

Single cord power supply
With one plug in the back, power is supplied to all docked devices at the same time

Friction pads to prevent slipping and sliding around your desk or workbench

Mount Anything, Anywhere
