

ADD-Q28CIQ28NT-P5M

Cisco® QSFP-100G-CU5M to NetApp® X66211A-5 Compatible TAA Compliant 100GBase-CU QSFP28 to QSFP28 Black Direct Attach Cable (Passive Twinax, 5m)

Features

- Up to 100 Gbps bi-directional data links
- AC coupled inputs and outputs
- Compliant with QSFP28 MSA specifications
- All-metal housing for superior EMI performance
- Single power supply 3.3V, low power consumption
- 100 Ohm differential impedance
- ROHS Compliant
- Operating Temperature: 0 to 70 Celsius

Applications

- Serial Data Transmission
- 100Gigabit Ethernet
- Infiniband

Product Description

This Cisco® to NetAPP® dual oem compatible 100GBase-CU QSFP28 to QSFP28 passive direct attach cable has a maximum reach of 5.0m (16.4ft). It is 100% Cisco® to NetAPP® compatible and has been programmed, uniquely serialized, data-traffic and application tested to ensure that it is compliant and functional. This cable will initialize and perform identically to Cisco® and NetAPP®'s individual cables and is built to meet or exceed OEM specifications. This product complies with MSA (Multi-Source Agreement) standards and is TAA (Trade Acts Agreement) compliant. We stand behind the quality of our products and proudly offer a limited lifetime warranty.

AddOn's transceivers are RoHS compliant and lead-free.

TAA refers to the Trade Agreements Act (19 U.S.C. & 2501-2581), which is intended to foster fair and open international trade. TAA requires that the U.S. Government may acquire only "U.S. – made or designated country end products."

General Specifications

| Parameter | Symbol | Min. | Typ. | Max. | Unit | Notes |
|-----------------------|--------|------|------|-------------------|------|-------|
| Bit Error Rate | BER | | | 10 ⁻¹² | | |
| Operating Temperature | Tc | 0 | | 70 | °C | 1 |
| Storage Temperature | Tstg | -40 | | 85 | °C | 2 |
| Input Voltage | Vcc | 3.14 | 3.3 | 3.46 | V | 3 |
| Cable Impedance | Z | 90 | 100 | 110 | Ω | |
| Product Weight | GD | | 190 | g/PCS | | 4 |
| Cable Weight | GC | | 110 | g/M | | |
| Dust Cap Weight | GQ | | 1.40 | g/PCS | | |

Notes:

1. Case temperature.
2. Ambient temperature.
3. For electrical power interface.
4. For example, the weight of a 5m cable with 26AWG is $190 + 110 * (5-1) + 1.40 * 2 = 632.8g$.

Cable Dimensions and Insertion Loss Level

| Length | Wire Gauge AWG | Cable Diameter OD (mm) | Minimum Bending Radius R (mm) | Insertion Loss Level |
|--------|----------------|------------------------|-------------------------------|----------------------|
| 5m | 26WG | 9.2 | 45 | CA-25G-L |

Notes:

1. Cable insertion loss classification standard: IEEE 802.3by 110-10.

Length Tolerance

| Nominal Length L1 (m) | Tolerance Range ± (cm) |
|-----------------------|------------------------|
| 4 < L1 ≤ 5 | 6 |

Pin Descriptions

| Pin | Symbol | Name/Description | Notes |
|-----|---------|---|-------|
| 1 | GND | Module Ground. | 5 |
| 2 | Tx2- | Transmitter Inverted Data Input. LAN2. | |
| 3 | Tx2+ | Transmitter Non-Inverted Data Input. LAN2. | |
| 4 | GND | Module Ground. | 5 |
| 5 | Tx4- | Transmitter Inverted Data Input. LAN4. | |
| 6 | Tx4+ | Transmitter Non-Inverted Data Input. LAN4. | |
| 7 | GND | Module Ground. | 5 |
| 8 | ModSelL | Module Select Pin. The module responds to 2-wire serial communication when low level. | 1 |
| 9 | ResetL | Module Reset. | 2 |
| 10 | VccRx | +3.3V Receiver Power Supply. | |
| 11 | SCL | 2-Wire Serial Interface Clock. | |
| 12 | SDA | 2-Wire Serial Interface Data. | |
| 13 | GND | Module Ground. | 5 |
| 14 | Rx3+ | Receiver Non-Inverted Data Output. LAN3. | |
| 15 | Rx3- | Receiver Inverted Data Output. LAN3. | |
| 16 | GND | Module Ground. | 5 |
| 17 | Rx1+ | Receiver Non-Inverted Data Output. LAN1. | |
| 18 | Rx1- | Receiver Inverted Data Output. LAN1. | |
| 19 | GND | Module Ground. | 5 |
| 20 | GND | Module Ground. | 5 |
| 21 | Rx2- | Receiver Inverted Data Output. LAN2. | |
| 22 | Rx2+ | Receiver Non-Inverted Data Output. LAN2. | |
| 23 | GND | Module Ground. | 5 |
| 24 | Rx4- | Receiver Inverted Data Output. LAN4. | |
| 25 | Rx4+ | Receiver Non-Inverted Data Output. LAN4. | |
| 26 | GND | Module Ground. | 5 |
| 27 | ModPrsL | The module is inserted into the indicator pin and grounded in the module. | 3 |
| 28 | IntL | Interrupt. | 4 |
| 29 | VccTx | +3.3V Transmitter Power Supply. | |
| 30 | Vcc1 | +3.3V Power Supply. | |
| 31 | LPMODE | Low-Power Mode. | 5 |
| 32 | GND | Module Ground. | 5 |
| 33 | Tx3+ | Transmitter Non-Inverted Data Input. LAN3. | |
| 34 | Tx3- | Transmitter Inverted Data Input. LAN3. | |

| | | | |
|----|------|--|---|
| 35 | GND | Module Ground. | 5 |
| 36 | Tx1+ | Transmitter Non-Inverted Data Input. LAN1. | |
| 37 | Tx1- | Transmitter Inverted Data Input. LAN1. | |
| 38 | GND | Module Ground. | 5 |

Notes:

1. ModSelL is the input pin. The module responds to 2-wire serial communication commands when it is held "low" by the host. ModSelL allows multiple QSFP modules to be used on a single 2-wire interface bus. If ModSelL is "high," the module will not respond to any 2-wire interface communication from the host. ModSelL has internal pull-up resistors in the module.
2. The module restart pin, when the low level on the ResetL pin lasts longer than the minimum pulse length, resets the module and restores all user modules to their default state. When performing reset device, the host should ignore all status bits. Until the module reset interrupt is completed, please note that during hot plugging, the module will issue this information to complete the reset interrupt without resetting.
3. This pin is active "high," indicating that the module is running under a low-power module.
4. IntL is the output pin, which is the open collector output and must be pulled up to the Vcc on the motherboard. When it is "low," it indicates that the module may malfunction. The host uses a 2-wire serial interface to identify the interrupt source.
5. The circuit ground is internally isolated from the chassis ground.

Electrical Pad Layout

Mechanical Specifications

All Dimensions are ± 0.2 mm Unless Otherwise Specified.
Unit: mm

About AddOn Networks

In 1999, AddOn Networks entered the market with a single product. Our founders fulfilled a severe shortage for compatible, cost-effective optical transceivers that compete at the same performance levels as leading OEM manufacturers. Adhering to the idea of redefining service and product quality not previously had in the fiber optic networking industry, AddOn invested resources in solution design, production, fulfillment, and global support.

Combining one of the most extensive and stringent testing processes in the industry, an exceptional free tech support center, and a consistent roll-out of innovative technologies, AddOn has continually set industry standards of quality and reliability throughout its history.

Reliability is the cornerstone of any optical fiber network and is engrained in AddOn's DNA. It has played a key role in nurturing the long-term relationships developed over the years with customers. AddOn remains committed to exceeding industry standards with certifications from ranging from NEBS Level 3 to ISO 9001:2005 with every new development while maintaining the signature reliability of its products.
