## DOM Vision 45" / 52"

Ideal for Grades 7 - 10

*Clearly . . . . a better hockey stick!*

Take floor hockey a step further. We're sure you've never seen anything like VISION. You'll be wowed by the look and astounded at how well these sticks play.

VISION shafts are stiffer than traditional (polyethylene) plastic shafts yet they flex more than fiberglass or aluminum shafts. This innovative design creates a more efficient and optimized energy transfer. The result is improved play, more accurate shooting and better handling, while retaining the safety of plastic play.

"See" what makes VISION better. DOM retains their twin "I" beam structurally supported shaft, a hollow fiberglass tube for the Intermediate VISION 45 and a solid fiberglass rod for the Senior VISION 52. All sticks are capped with a crystal clear, cushioned butt end, double-stapled for added safety and security.

Each stick is complete with a pliable, tough, non-marking standard DOM blade, secured with two screws, in two team colours.

We believe VISION to be the best playing plastic floor hockey sticks ever made.

## DOM ELITE 48"/ 54"/ 60"

Ideal for Grades 10 to adult

### *Rigid fiberglass for serious hockey!*

The **ELITE** stick is a Dom product "without parallel" in the gym hockey world.

Elite is specifically designed and created for: High School, Collegiate and University play

This stick gives you the stiffness of an ice hockey stick for a real shot, but is still safe for gym play.

**Stiff fiberglass shaft**, won't flex like plastic, won't chip like wood or bend/kink like aluminum. With a shatterproof, impact resistant polyethylene blade and clear butt end.

The Dom Standard blade, which can quickly be bent left or right and back and forth, over and over, means that one dozen sticks will work for the entire school program .... as with all Dom sticks! And the blades never mark gym floors - as always.

## DOM ELITE WITH STF BLADE 48"/ 54"/ 60"

Ideal for Grades 10 to adult

### STF Blade advantages:

A quality hockey blade that's stiffer than SB-76, improves performance, and yet still bendable by hand.

- ◆ Designed for use with Fiberglass, Wood and Aluminum shafts.
- ◆ Improve your game, performance and accuracy with this stiffer blade.
- ◆ A straight blade ... Still curve left or right *by hand only* - excellent for an entire program.
- ◆ Indoor/Outdoor ... thicker bottom for improved outdoor wear.
- ◆ Unique "V" notch pattern means only slight increase in weight from our Standard blade.
- ◆ Well balanced design - minimizes bottom heavy feel of other stiff blades.

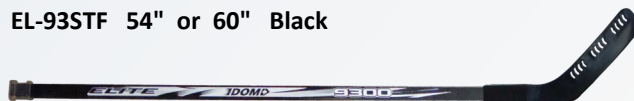

DOM has created an indoor/outdoor stick that improves play, especially for high school and up, still bends left or right by hand, does not add extra weight to make this stick feel bulky.
