FULL LINE PRODUCT CATALOG

HERITAGE®

PREMIER CAN LINERS, BAGS AND OTHER PRODUCTS

Heritage is one of the top institutional can liner producers in North America, with nearly 800 employees and seven world-class manufacturing sites. Our can liners, bags and other innovative products serve the health care, foodservice, hospitality, industrial, education, office building, building services and transportation industries.

We have a well-established history and have invested heavily back into our business. With over four decades of manufacturing experience, we offer products that set the standard in the can liner business.

Our commitment to our customers is paramount in everything we do. Through direct representation, high-quality products and a strategic national footprint, we work to serve each of our customer's unique requirements.

■ SUSTAINABILITY VISION

The Novolex vision for sustainability is to innovate more sustainable choices for our customers, operate responsibly and invest in our people and communities. We bring this vision to life every day through our ongoing focus on efficiency in our operations, as well as through partnerships with customers, suppliers, communities and others in the industry to develop solutions that reduce the impact our products can have on the environment.

■ Novolex Sustainability Partners

Novolex partners with the organizations below to support the circular economy through use of recycled content, designing for recycling and composting and labeling for consumer education.

■ Sustainability Brands

Eco-Blend® Max

Eco Blend Max can liners were developed using a minimum of 30% third party certified, post-consumer recycled (PCR) resin. Heritage uses reclaimed plastic intended for the waste stream, reducing the use of virgin resin, to create a premium quality can liner.

BioTuf® Compostable Can Liners are ideal for food scraps, compostable products, and other organic materials. These can liners are third-party certified compostable for industrial or municipal compost facilities. BioTuf Can Liners are a convenient way to transport all types of compostable materials.

X-Liners™ are made from reprocessed resins. Available in popular sizes and gauges to meet a wide range of customer needs. Individually folded for easy dispensing from our dual dispensing box, or coreless roll options. Heavyweight for tough applications.

Can Liner Selection

PICK THE RIGHT CAN LINER FOR THE RIGHT APPLICATION

Choosing the right can liner for the receptacle can save you money and reduce plastic consumption. Identify the type and weight of the content, the transport conditions and size of the receptacle. Once that information is identified, the correct type and size of liner can be chosen.

What type of application will the can liner be used for?

- Smooth & Non-Sharp Materials -
 - Cans without sharp edges, food without sharp edges
 - Grass, rags, smooth heavy objects
 - Paper-plates, cups, towels, paper

Use **High Density Polyethylene (HDPE)**

- Rough & Sharp Materials -
 - Plastic eating utensils, food with rough edges
 - Sticks, rough yard trimmings, or glass
 - Metal w/sharp edges

Use **Linear Low Density Polyethylene (LLDPE)**

What size container is being used?

AccuFit[®]

*AccuFit Can Liners available for these receptacles

■ Identifying Can Sizes

The Heritage Sizing Tape Measure is an excellent tool used to identify the gallon size of all cans in the industry.

STEP 1

STEP 2

TAPE MEASURE INSTRUCTIONS

- Starting at the beginning of the tape, wrap the tape measure around the top and just below the lip of the receptacle
- Extend the rest of the tape measure straight down the side of the receptacle
- The bottom of the receptacle will fall within markers on the tape measure that specify the size of the receptacle

Contact your Heritage Sales Representative to receive a Sizing Tape Measure

■ Types of Can Liner Seals

HIGH PERFORMANCE STAR SEAL

- Eliminates gaps where leaks can occur
- Designed without gussets
- Conforms to the shape of the container
- Distributes weight evenly
- Maximizes carrying capacity
- Sized in two dimensions, EX: 40.00 x 46.00

GUSSET SEAL

- Rarely used in the industry
- Flat-style bag design
- Both sides tucked in to form gussets
- Sealed through four layers of film (the middle of the bag has only two sealed layers)
- A potentially weak bottom seal
- Sized in three dimensions, EX: 23.00 x 17.00 x 46.00

FLAT SEAL

- Two-dimensional bag (much like a pillow case)
- Strong, but has the potential to leak wet trash from the corners
- Does not conform as well to the shape of can
- Sized in two dimensions, EX: 40.00 x 46.00

■ Dual-dispensing Packaging

The Topside Dual-Dispensing Packaging is designed for end-user convenience. These cartons were developed in response to customer needs. Now cartons may be stacked to save space while still dispensing liners with greater ease.

■ Case Labeling with NIST Standards

All cases are clearly labeled to meet NIST (National Institute of Standards and Technology) standards: Code, Size, Gauge, Color, Capacity, Case Pack, Performance Specs, Case Weight, and Bar Code.

	H7658SC		
Actual Size	38x58 in. (O.D.)		
Actual Gauge	1.10 Mil	Clear	16.1 lb/cs (net)
Actual Capacity	60 Gallon		
Actual Count	100 / Case		
	Actual Net Weight (of poly)		

Listed terms such as "Equivalent To", "EQ" and "Nominal" are not accepted as a product specification.

Gauge Recommendations

Film thickness is not the only standard for judging bag strength. Advanced polymer blend formulations and unique additives have allowed Heritage Bag to produce thinner, lighter trash bags that are stronger than thicker bags made from inferior polymer blends. Below are basic gauge recommendations for Heritage bags.

HDPE Gauge Equivalents and Recommendations

Small Cans

Light ————— 6.00 - 9.00 Mic

Mid-size Cans

Medium ————— 10.00 - 12.00 Mic

Heavy ————— 13.00 - 14.00 Mic

Larger Cans

Extra Heavy ——— 15.00 - 17.00 Mic

XXH ————— 18.00 - 22.00 Mic

LLDPE Gauge Equivalents and Recommendations

Small Cans

Light ————— 0.30 - 0.49 Mil

Medium ————— 0.50 - 0.60 Mil

Mid-size Cans

Heavy ————— 0.61 - 0.74 Mil

Extra Heavy ——— 0.75 - 0.80 Mil

Super Tuf ————— 0.81 - 1.00 Mil

Larger Cans

Super Heavy ——— 1.10 - 1.20 Mil

XXH ————— 1.30 - 1.90 Mil

XXXH ————— 2.00 - 3.00 Mil

Conversion Formulas

MIC TO MIL FORMULA

Divide the Mic by 25.40 to arrive at Mil thickness.

Example:

10.00 Mic ÷ 25.40 = 0.39 Mil

24.00 Mic ÷ 25.40 = 0.94 Mil

MIL TO MIC FORMULA

Multiply the Mil by 25.40 to arrive at Mic thickness.

Example:

0.30 Mil x 25.40 = 7.60 Mic

0.65 Mil x 25.40 = 16.50 Mic

Static Weight Performance

LINEAR LOW DENSITY

Light = 0.30 - 0.49 Mil = 10-20 lbs

Medium = 0.50 - 0.60 Mil = 21-30 lbs

Heavy = 0.61 - 0.74 Mil = 31-40 lbs

Extra Heavy = 0.75 - 0.80 Mil = 41-50 lbs

Super Tuf = 0.81 - 1.00 Mil = 51-60 lbs

Super Heavy = 1.10 - 1.20 Mil = 61-65 lbs

XX Heavy = 1.30 - 1.90 Mil = 66-70 lbs

XXX Heavy = 2.00 - 3.00 Mil = 71-75 lbs

HIGH DENSITY

Light = 6.00 - 9.00 Micron = 15-25 lbs

Medium = 10.00 - 12.00 Micron = 25-50 lbs

Heavy = 13.00 - 14.00 Micron = 51-60 lbs

Extra Heavy = 15.00 - 17.00 Micron = 61-70 lbs

XX Heavy = 18.00 - 20.00 Micron = 71-80 lbs

XXX Heavy = 21.00 - 22.00 Micron = 81-90 lbs

High Density Can Liners (HDPE)

PERFORMANCE FEATURES

- Use for smooth items (heavy or light) which do not typically puncture
- Promotes source reduction for a positive environmental impact
- HD liners are a great choice for office and restroom waste, shredded paper and in public areas where sharp trash is not deposited

STANDARD HIGH DENSITY - CORELESS ROLLS

Linear Low Density Can Liners (LLDPE)

PERFORMANCE FEATURES

- Best for all around use, resists tearing even if punctured
- LLD Can Liners are flexible, thick, and highly resistant to tearing and puncturing
- LLD liners are ideal for kitchen trash, construction debris or trash that includes glass, metal, wood, cardboard or other sharp, jagged or irregular shaped items

Eco Blend® Max Can Liners

PERFORMANCE FEATURES

- Minimum 30% Post-Consumer Recycled Content (PCR)
- Surpass the requirements for can liners in the USGBC LEED program
- Adheres to California state regulatory standards: ensures compatibility with plastic trash bag regulations.
- Fulfills new state minimums for Washington and New Jersey PCR inclusion requirements: showcases compliance with regional regulations.
- Meets the EPA's Comprehensive Procurement Guidelines
- Eco Blend Max can liners use Right-Sizing dimensions designed to fit the most common cans

Based on data from the ecoinvent life cycle inventory, Eco Blend Max can liners reduce carbon emissions by 18% when compared to the same size can liner made from virgin resin.
