TROY ®

An Innovative Manufacturer.

TROY Group, Inc. is a worldwide leader of personalized, on demand, layered security for printed documents. We offer software, security hardware, and specialized consumables for securely printing important documents requiring security at the point of issue. TROY solutions are used by businesses of all sizes, as well as government organizations, to manage fraud, reduce operational risks, and comply with government regulations related to protecting information privacy. Our customers include major corporations, banks, key government accounts, and distributors worldwide. TROY has been adding trust, security, and confidence to documents since 1963.
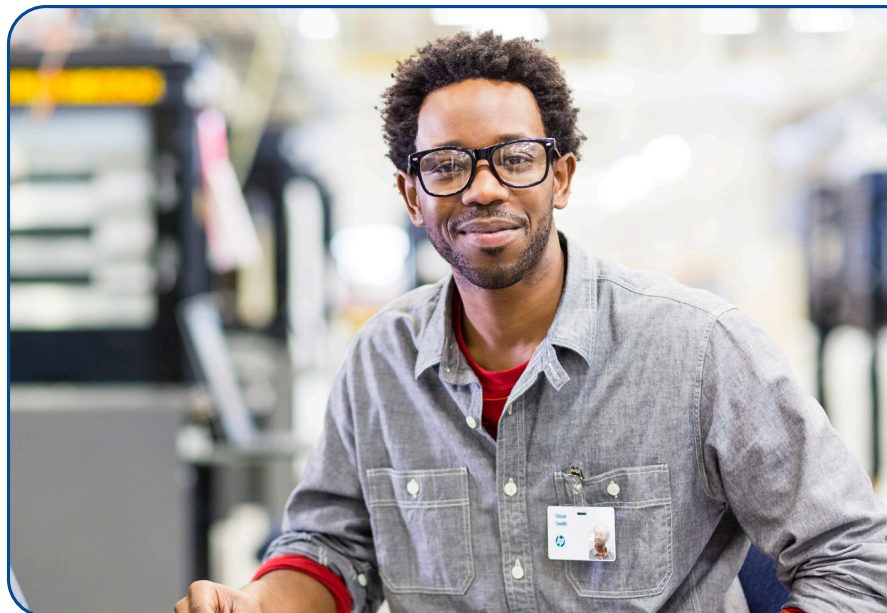

Our OEM Brands

TROY has been a member of the HP Solutions Business Partner Program for over two decades. In 1993, HP sought partnership with us to develop new desktop solutions for the insurance industry. Since then, we've created solutions across every industry. After 25 years, we're still the only company in the world authorized by HP to enhance HP printers and consumables for use in secure check and document printing applications.
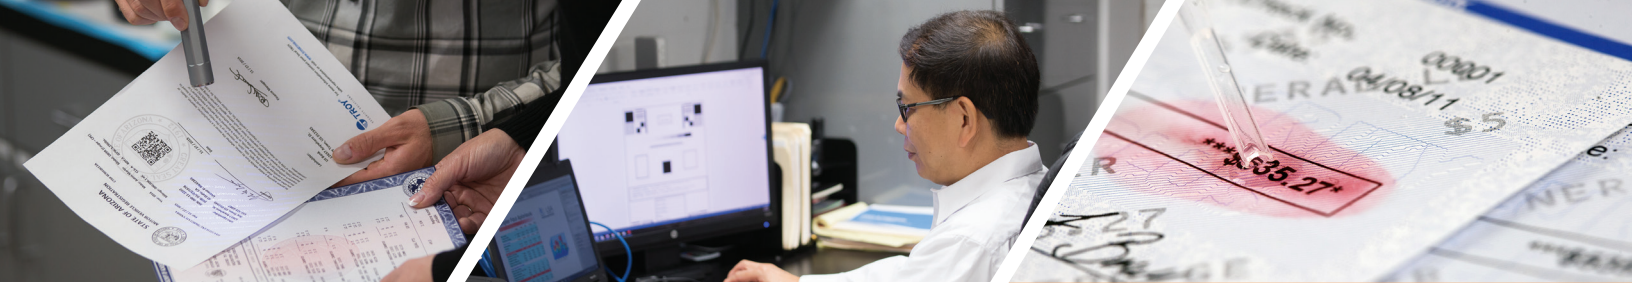

More recently we have partnered with Konica Minolta. Together, we've developed hardware that is setting new industry standards in production check printing.

KONICA MINOLTA

Global Partnerships

TROY has created a global partner program that allows participants to provide a complete, end-to-end security printing solution portfolio to their customers. Our primary role is to support our partners in their sales successes through continuous innovation in software, hardware, and consumables. We also provide sales and product certification training, pre- and post-sales support, collateral, case studies, and other materials, along with industry expertise.

Secure Document Printing

TROY's complete solution of software, hardware, and specialty inks and toners allows you to create a secure, printed document. When combined, TROY empowers organizations to add personalized layers of document authentication, copy detection, and fraud deterrence to high value documents.

Software Solutions

Enhance the layers of security in your document printing process with an array of fraud deterrent features designed to fit your specific needs. We offer software for secure check printing, another for healthcare facilities printing prescriptions, and a revolutionary software for high value documents, such as birth certificates, diplomas, temporary IDs, and other breeder documents at risk for fraud.

Paper Supplier

In offering a complete solution, we provide a variety of security paper for applications, including check printing, vehicle titles, vital records, and more. Whether you are looking for strong chain of custody document control, or seeking a cost-effective security paper option, we can recommend a solution to meet and exceed your standard for secure document printing.

Inks & Toners

The Research and Development Team here at TROY is continually formulating new inks and toners for a multitude of security applications. From MICR for check printing to overt and covert UV inks and toners, we develop technologies that offer cutting-edge protection. We also produce custom inks for use in large volume applications.

Printers

Selecting the printer to best meet your secure check or document printing needs can be challenging. TROY printers are engineered to meet your unique printing needs. Our models cover low volume, mobile check printing to high volume, centralized or decentralized printing. We have full color inkjet printers for overt and covert security printing needs. Backed by HP technology, our enterprise level printers also protect your network from malicious intrusion.
