1 One Gigabyte (1GB) means $10^9 = 1,000,000,000$ bytes and One Terabyte (1TB) means $10^{12} = 1,000,000,000,000$ bytes using powers of 10. A computer operating system, however, reports storage capacity using powers of 2 for the definition of $1GB = 2^{30} = 1,073,741,824$ bytes and $1TB = 2^{40} = 1,099,511,627,776$ bytes, and therefore shows less storage capacity. Available storage capacity (including examples of various media files) will vary based on file size, formatting, settings, software and operating system and other factors.

2 Five (5) Gbit/s is the maximum interface transfer rate per the specifications of the Universal Serial Bus 3.0. Actual transfer rate will vary depending on your system configuration and other factors.

3 Two (2) year standard limited warranty applies. The warranty brochure is preloaded on the hard drive or can be viewed online at: <http://storage.toshiba.com/consumer-hdd/support/warranty-info>.

4 Compatibility may vary depending on user's hardware configuration and operating system.

5 Read and write speed may vary depending on the host device, read and write conditions, and file size.
