
Oil Treated Dusting Cloths - 24" x 24" - Yellow

M2 Professional Dusting Cloths are engineered to deliver quality dust control to help maintain a clean, and healthy workplace.

M2 Dust Cloths are treated with mineral oil to attract and retain dirt and dust particles without leaving lint or residue. The cloth is a magnet for dust and dirt. It will leave surfaces clean without the use of sprays and their costs associated with the addition of chemicals. Measuring 24 inches by 24 inches, these cloths stretch to open up dust-catching apertures, enhancing their cleaning efficiency. Resilient and durable, these cloths are ideal for heavy-duty dusting and cleaning large surfaces, making them a perfect addition to any cleaning and maintenance department. You don't want the mineral oil treatment? Try our [Static-Attack Electrostatic Dusting Sheets](#).
