

PANDUIT™

Elevate to Power with the EL2P

The smarter, simpler, more secure PDU

1

SEAMLESS REDFISH API INTEGRATION

Manage and control the PDU effortlessly with the Full Redfish API, utilized by Dell, Cisco, and RackLive, enabling **secure interaction, configuration, and firmware management** across IT equipment.

2

ADVANCED SECURITY FEATURES

Protocols like 802.1x MIL-Grade protection, USGv6 Certified IPV6 Stack, and Secure Supply Chain Code Signing deliver **best-in-class defense** for data centers and network infrastructures.

3

BUILT-IN PROTECTIVE MEASURES

Secure Boot, repeat login block access, and session timeouts are built into the EL2P to support **continuous security without extra effort**.

4

ENFORCED PASSWORD POLICIES

The EL2P requires strong passwords and mandates users to update their initial credentials during deployment for **increased security**.

5

CENTRALIZED ACCESS CONTROL

Role-based access management **strengthens security** by enabling permissions for individual users and user groups.
