boom MEZZO

an intelligent camera for superior meetings

The Boom Mezzo camera is the intelligent video solution designed to enhance communication in hospitals. Whether for patients connecting with their families or doctors conducting virtual check-ups, the Mezzo ensures a seamless and compassionate experience.

Effortless Auto-Framing:

- Intelligent Auto-Framing: Built-in AI technology ensures every participant is in focus, facilitating comfortable communication between patients, families, and doctors without camera adjustments
- 10x Electronic PTZ: Captures every detail clearly, allowing doctors to assess patients effortlessly

Exceptional Image Quality:

- 4K Ultra HD Resolution: Provides crystal-clear video, making virtual interactions feel almost face-to-face
- Advanced Image Signal Processor (ISP): Enhances lighting, color, and clarity, delivering a professional visual experience even in low-light hospital rooms.

Focus on Care, Not Camera Control:

- Wide Angle 115° Field of View: Captures the entire room, allowing multiple participants to join the conversation without being out of frame
- Low Light Optimization: Improves visibility in dimly lit rooms, essential for nighttime check-ins or areas with minimal lighting

Easy Installation and Use:

- USB Plug & Play: Ensures quick and simple setup in various hospital environments without technical help
- Two Built-in High-Sensitive Mics: Provides clear audio capture, facilitating effective communication without additional microphones
