

10ft (3.1m) TAA-Compliant USB 2.0 A/B Cable **SKU: C2G68002**

When your AV or IT setup requires a dependable connection between a computer and USB-B peripherals, this high-quality USB-A to USB-B cable delivers consistent, reliable performance.

Designed for professional environments, it provides a stable connection for devices such as printers, scanners, USB hubs, and other legacy USB-B equipment, ensuring dependable data transfer in everyday installations.

Engineered with both foil and braid shielding, the cable effectively minimizes EMI/RFI interference critical for clean signal transmission. The twisted-pair construction further reduces crosstalk, supporting high-speed, error-free data transfer between connected devices.

This cable supports USB 2.0 data transfer speeds up to 480 Mbps and works seamlessly with both PC and Mac systems.

For government, enterprise, and regulated environments, choose our TAA-compliant cables, designed to meet U.S. Government procurement requirements and other federally regulated project needs.
