- Compatible phone

Package Contents

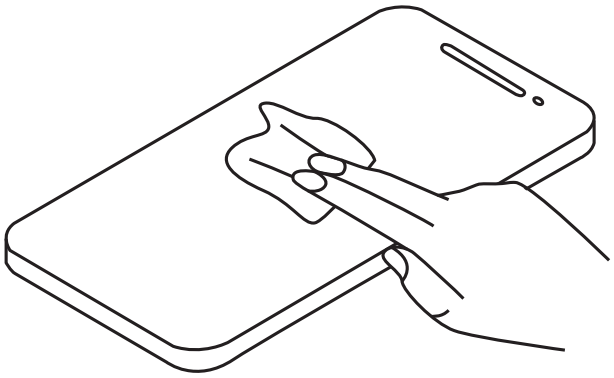

- Filter Applicator x 1
- Screen Cleaning Kit x 1
- Squeegee x 1
- Quick-Start Guide x 1

Installation

Note: *Ensure that the Screen is thoroughly cleaned with the included Screen Cleaning Kit prior to installation.*

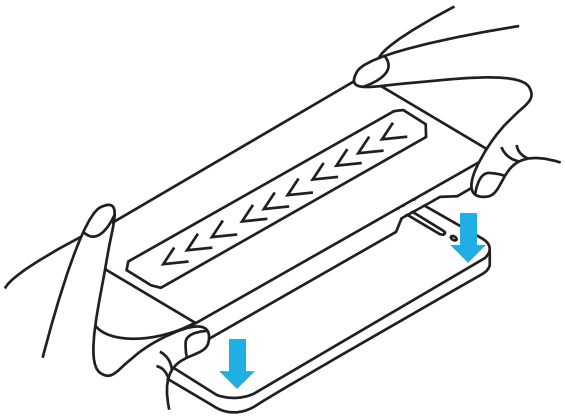

Dust, lint, or debris trapped between the screen and the privacy filter may cause bubbles or visual distractions, which can be more noticeable depending on the displayed content.

1

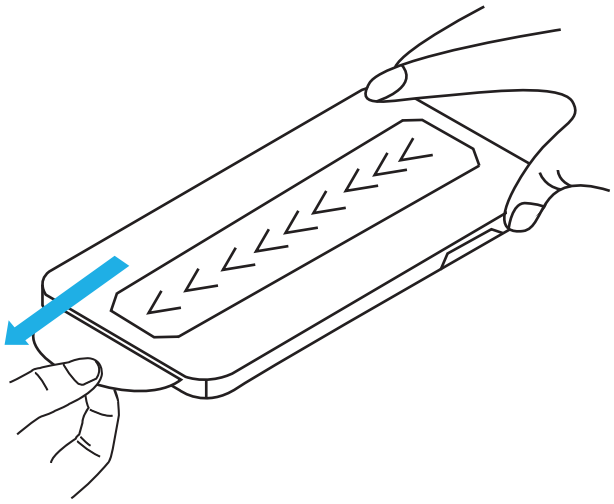

Note: *Clean the Screen using the Wet Wipes, then dry it using the Wiping Cloth. Use the Dust Remover to Dab the Screen and pick up dust particles or other debris.*

2

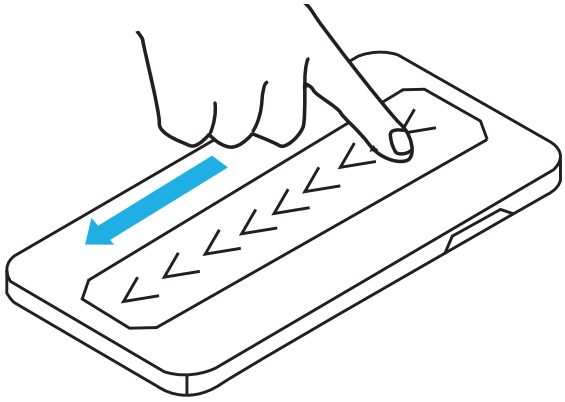

3

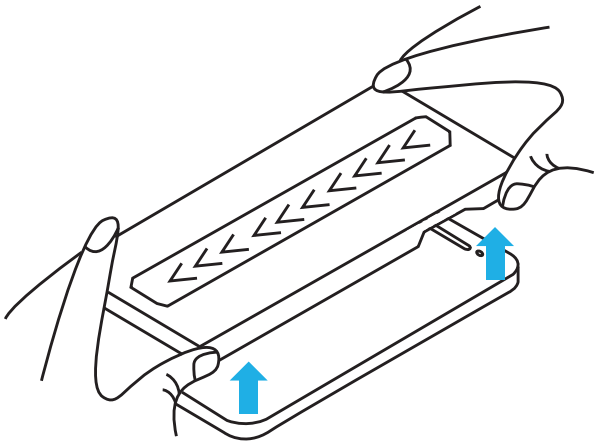

Note: *Press the Application Frame against the phone while pulling the Application Tab.*

4

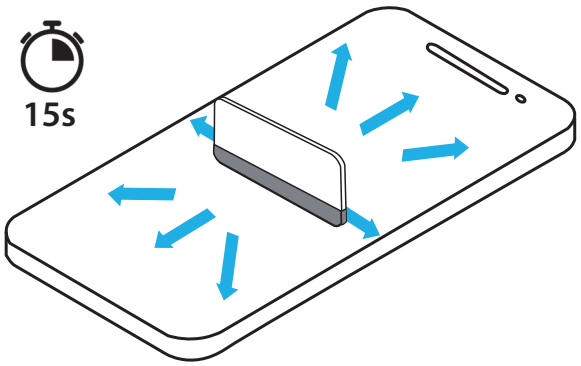

Note: *Slide a finger through the Pressure Window 4 – 6 times applying even pressure on the screen.*

5

Note: *Lift the Application Frame slowly to remove the top protective film. If the frame does not release easily, hold the phone firmly with one hand while gripping the Application Frame with the other, then peel it away slowly.*

6

Note: *If bubbles are present, wait 15 seconds before using the Squeegee to push them toward the edges for removal.*
