Adapter Installation

WARNING! Hard Drives and format adapters require careful handling. If you are not careful with your Drive, lost data may result. Always handle your drive with caution. Be sure that you are properly grounded by wearing an anti-static strap when handling computer components or discharge yourself of any static electricity build-up by touching a large grounded metal surface (such as the computer case) for several seconds.

1. Slide the mSATA to SATA adapter into the mSATA connector on the system motherboard.
2. Secure the drive into place.
If the board has an installation clip, gently apply pressure to the top center of the adapter until it locks into place on either side of the SSD clip. To release the adapter refer to your motherboard's user manual for detailed instruction.

or

If the board has mounting holes. Drive each of the included installation screws through the matching installation holes on the adapter into the mounting holes on the motherboard.

3. The SATA port on the adapter now functions as a standard SATA port to the specification of the motherboard's mSATA port.

FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
