Introduction

This USB-C™ to HDMI® presentation adapter features a unique toggle switch that can prevent your computer from launching its screen saver, going to sleep, or entering power save mode during a presentation or meeting. This ensures that no matter what you're presenting, you and your audience are saved the inconvenience of your display abruptly shutting down.

Package contents
- 1 x USB-C to HDMI video adapter
- 1 x quick-start guide

System requirements
- A computer with a USB Type-C port that supports DisplayPort over USB-C (DP Alt Mode)
- An HDMI display device

Installation

This device supports plug-and-play installation and is natively supported by all operating systems with no additional drivers or software required. Simply connect the CDP2HD4K60SA to your laptop, then connect your display to the adapter's video output.

Important operating note
- Your computer's USB-C port must support DisplayPort over USB-C (DP Alt mode), to work with this adapter.

Presentation mode switch

Presentation mode ensures that your computer will never go to sleep or place your display in standby mode, regardless of what your power settings are set to. You can turn Presentation mode **ON** or **OFF** depending on your application.

When to turn Presentation mode ON

Turn Presentation mode on when you're presenting information on-screen during a meeting, class or trade show, or whenever you want prevent your computer from turning off due to inactivity.

Note: You may notice occasional cursor movement that will prevent your computer's power settings from turning off your display.

When to turn Presentation mode OFF

Turn Presentation mode off when using the adapter at your workspace or office hot desk. Turning Presentation mode off allows your computer to initiate its regular power settings, ensuring your computer can save energy while extending the life of your display.
